American Railroad Journal.

Saturday, June 15, 1872.

Stock Exchange and Money Market.

Money has been in more liberal supply, and having been in less urgent request, for all purposes, rates have been tending downward. Call loans have been quoted at from 4@6, generally 5@6; and choice to good discounts at 6@8, with the bulk of the new business in strictly prime grades of commercial paper reported at 6½@7 per cent. per annum. The banks have been adding to their cash reserves, and the last weekly exhibit was deemed a favorable one, having shown a considerable gain of legal tender notes, with an addition to their deposit line, which encouraged them to enlarge their average loan, and discounts. The Government office, while augmenting its currency balance, materially reduced in specie reserve. The U. S. Sub-Treasury office again reduced its coin balance nearly 3¼ millions and enlarged its currency over 1½ millions. The city banks added to their loan and discount average nearly 2½ millions during the week, and again reduced their outstanding circulation slightly. The U. S. Sub-Treasury held a currency balance at the close of business on Tuesday of $6,815,447, and a coin reserve of $48,515,965.

The city banks, in their latest return, show an increase of $1,327,000 of legal tender notes with a decrease of $992,800 of specie, and an increase of $1,230,500 of deposits, also an addition of $2,438,400 to their loan and discount averages, and a reduction of $19,500 in their item of circulation. The city bank exchanges, last week, averaged 99¼, and thus far, this week, about 115¾ millions daily. The banks now hold $11,753,125 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $20,346,000, against $12,716,153 same time last year. The city bank deposits are now $227,301,400 against $241,894,336, week ending June 10, 1871. The legal tender reserve amounts to $55,108,100, against $70,410,441 same time last year. The circulation now stands at $27,502,500 against $30,740,411 same time last year. The loans are now $287,113,200 against $293,810,161 at this date last year.

The coin reserve of the city banks is now about 20⅜ millions as against about 28⅞ millions on the 6th of January; the legal tender reserve is about 55⅛ millions against $46,616,000 on the statement of February 10th.

Government revenues have been yielding more liberally, since our last. The excises yielded within the week about 3¼ millions, and thus far since July 1, 1871, $122,158,109. The customs at the port of New York last week were $1,927,734; at the outports, equal to about $650,000 all in coin, or coin certificates.

Under the June programme of the Treasury Department, Government proposes to sell Gold, as follows: Thursday, June 20—Two Millions. Thursday, June 27—Two Millions. And to buy in bonds as follows: Wednesday, June 19—Two Millions. Wednesday, June 26—Two Millions.

The Treasury Department, on Monday, controlled a coin reserve of $86,000,000, (including $25,000,000 represented by outstanding coin certificates) and a currency balance of eight millions.

Gold has been in less demand, particularly on speculative account, and the price has shown much less firmness toward the close. The customs drain has been a moderate one, and the specie outflow to foreign ports has been on a reduced scale. The recent successful negotiations in foreign markets of American railway loans tended to lessen the call for specie for shipment.

The range of the price during the week has been from 113⅞@114⅝ and the closing quotation on Wednesday was 114⅛ against 114⅝ the preceding Wednesday. The specie outflow, last week, was $3,782,639. The Gold Exchange Bank clearances have averaged about 46 millions per day during the week.

The specie exports from this port on Wednesday were only $362,694.

The customs demand for Gold last week, averaged $334,667 a day; thus far, this week, it has averaged $328,000 a day, or equal to a weekly aggregate of $1,968,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $2,734, and since Jan. 1, 1872, $708,860, against $3,040,794 same time in 1871. The total customs revenue of the Government, in coin, at this port, from July 1, 1871, has been

$148,425,196 against $140,458,844 same time in the preceding fiscal year 1870-'71.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from July 1, 1871, to June 8, 1872, $75,715,407, against $84,912,515 same time in 1870-'71.

The export drain of specie was $3,792,689 last week, against $1,520,560 same week preceding year. The shipments since July 1, 1871, have been $53,518,485 against $77,312,241 same time in 1870-'71.

Foreign Exchange has been in less confident demand and less buoyant as to price. Bankers' sixty day bills on London closed on Wednesday at 109⅝@109⅞; sight bills on London, 110½@110⅝.

The produce exports from this port, week ending with June 11, were to the currency value of $5,065,570.

There has been a good demand noted for Government securities, chiefly for investment purposes at well supported prices, though the later dealings indicated less buoyancy as to values. On Wednesday, Government bought in only $47,850 of Five-Twenties at 113.87, net, out of an aggregate offering of $921,750.

U. S. sixes of 1881 closed here on Wednesday of the current week at 120⅛@120¼; U. S. Five-Twenties of 1862, (other than the bonds called in) ex May coupon 114⅛@114¾; U. S. Five-Twenties of 1864 at 114⅛@114¾; U. S. Five-Twenties of 1865, 115¼@115⅝; U. S. Five-Twenties of 1865 consolidated, 117@117⅛; U. S. Five-Twenties of 1867, 117⅜@117½; U. S. Five-Twenties of 1868, 117⅛@117⅜ U. S. Ten-forties at 111⅞@112⅛; U. S. Fives of 1881 (Funding Loan) 112⅞@113⅓; Six per cent. currency bonds, 114½@114⅝.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	May 29.	June 5.	June 12.

New Fives of 1881...	——	89¾	89¾
Erie.	——	50⅛	48½

State bonds have been in comparatively light request and less firm in price, closing dull.

In the most popular of the Railway mortgage loans, there has been a fair investment business reported at full rates. Few round lots of the older issues have been available. Central Pacific Sixes have been in good request at 104⅞@105. Chesapeake and Ohio have been selling to a fair extent at 94 per cent. and accrued interest.

Railway and Miscellaneous share property has been attracting less attention, and values have shown less buoyancy. The speculative dealings have been much lighter.

The Metal markets have been devoid of animation, in most lines. Ingot Copper has been dull, but steady; 100,000 lbs. at 33c. Scotch Pig-iron has been offered more freely and quoted easier in price, on a very moderate demand; sales 300 tons Glengarnock, in lots, at $49, with Eglinton quoted at $47@$48. American Pig has been in good request and quoted quite firm, with sales reported of 1,000 tons at $51@$52, and 1,500 tons Crane (repurchased by the company) on private terms. American Iron Rails have been actively sought after, and 3,000 tons have been purchased at $85. Other kinds of iron have been quiet at unchanged figures. Lead and Spelter dull at old rates. Pig-tin dull at 36½c@37c. gold for Straits. Tin Plates very quiet at former quotations, with sales reported of 400 boxes Assorted Charcoal on private terms. Of Zinc, 30 casks Musselman were sold at 8⅞c., gold.

There has been a fair businesss in the leading kinds of domestic produce, at generally firm prices. Corn has been exceptionally brisk. Toward the close, values were rather weaker, on a less confident demand. Middling upland cotton closed on Wednesday at 26¼ cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,637,811 bales, against 3,826,972 bales same time in the preceding year; exports 1,874,022 bales against 2 989,567 bales in the previous year; stock at the ports at latest dates, 179,002 bales against 254,360 bales same date 1871.

At the Live Stock Markets, Beeves continue in fair demand at 10½@14 cts.; Veals at 6@9 cts.; Sheep at 6¼@8¼; Lambs 10@14 cts.; Swine, dull at 4½@4¾ cts. per lb., all live weight. The week's receipts were 9,023 Beeves, 4,011 Veal Calves, 20,708 Sheep and Lambs; and 44,120 Swine.

Foreign goods have been moderately sought after within our previous range as to values, in most instances. Coffee has been quoted scarce. The week's imports of foreign goods reached the amount of $6,182,999 including $1,086,419 of dry goods.

Ocean freights have been fairly active, particularly in the line of Grain engagements at firmer rates.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ The directors of the Colorado Central Railroad Company, recently elected, are: H. M. Teller, W. A. H. Loveland, C. C. Welch, R. D. Hall, and H. H. Given, of Colorado—Eastern Directors, F. Gordon Dexter, Fred L. Ames, Oliver Ames, T. E. Sickles, J. B. Taft and T. J. Carter. President, H. M. Teller; Vice President, Oliver Ames; Secretary and Treasurer, E. H. Rollins.

☞ The third installment of $100 per share on 1,477 shares ($738,500) Boston and Lowell Railroad new stock (par $500) voted February 6, 1871, will be due June 15. The two remaining fall due December 1, 1872, and July 1, 1873. Seven per cent is paid on the installments, or six per cent. on any sum anticipated.

☞ Track laying on the Canada Southern Railway was commenced on the 1st of May, and by the 1st of December the road will be open for business from Buffalo to Amherstburg and Toledo and also the branch to St Clair. A single track of steel rails is to be laid first, and as soon as it is completed a second track is to be laid.

☞ The St. Louis, Jerseyville and Springfield Railroad is being pushed forward with commendable energy. The force under Col. J. B. Moulton, Chief Engineer, arrived at Chesterfield on the 1st inst.

Rhode Island and Massachusetts Railroad.

Another meeting of gentlemen interested in the construction of this road was held in Worcester, Mass., on the 7th inst. The route of the road as surveyed by Mr. E. H. Stone, the civil engineer, will commence at Worcester, passing through the towns of Millbury, Grafton, Milford, Upton, Franklin, Wrentham and Attleboro,' in Massachusetts, to tide water near Providence, R. I.

The articles of association were taken up and discussed, and a company was formed under the general railroad law, to be known as the Rhode Island and Massachusetts Railroad. The capital stock was fixed at six hundred thousand dollars. The vote passed at the last meeting, fixing the gauge of the road at three feet, was recousidered and the four feet eight and one-half inch gauge was adopted.

The following gentlemen were elected Directors: George F. Wilson and J. H. Southwick of Providence; Harvey Chace of Valley Falls; Wm. E. Rice, H. H. Chamberlain and L. L. Nelson of Worcester; Geo. F. Slocumb of Grafton; Wm. Knowlton of Upton; Samuel Walker of Milford; Gen. W. F. Draper of Hopedale; James P. Ray of Franklin; and H. N. Daggett of Attlboro'.

Illinois Central Railroad.

The statement of this Company for the month of May, 1872, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	2,147.81 for	$19,024 09
Acres Inter't Fund Lands Sold	80.00 for	720 00
Acres Free Lands Sold	471.44 for	4,778 96
Total sales during the m'th of May, 1872	2,699.25 for	$24,523 05
To which add Town Lot Sales	for	30 00
Total of all	2,699.25 for	$24,553 05
Cash collected in May, 1872		$48,710 97

ESTIMATED EARNINGS—TRAFFIC DEPARTMENT.

	In Illinois. 707 Miles.	In Iowa. 402 Miles.	Total. 1,109 Miles.
Freight	$369,304 00	$61,999 00	$431,303 00
Passengers	98,722 50	35,947 75	134 670 25

☞ The following gentlemen have been elected directors of the New York Central and Hudson River Railroad Company: Cornelius Vanderbilt, William H. Vanderbilt, Horace F. Clark, Augustus Schell, James H. Banker, Samuel F. Barger, H. Henry Baxter, Joseph Harker, New York; Henry R. Pierson, Albany, N. Y.; Chester W. Chapin, Springfield, Mass.; George J. Whitney, Rochester, N. Y.; James M. Marvin, Saratoga Springs, N. Y.; Solomon Drullard, Buffalo, N. Y.

☞ We learn that the work of tunneling West Point for the West Shore Railroad has been commenced. The tunnel will be three-fourths of a mile in length, and two years will be required for its completion.

☞ The extension of the Portsmouth, Great Falls and Conway Railroad has been completed to North Conway, its terminus, 140 miles from Boston.

THE

St. Joseph & Denver City

RAILROAD COMPANY'S

First Mortgage Bonds

are being absorbed by an increasing demand for them.

Secured as they are by a first mortgage on the Road, Land Grant, Franchise and Equipments, combined in one mortgage, they command at once a ready market.

A Liberal Sinking Fund provided in the Mortgage Deed must advance the price upon the closing of the loan. Principal and interest payable in *gold*. Interest at eight (8) per cent. per annum. Payable, semi-annually, free of tax. Principal in thirty years. Denominations, $1,000, $500 and $100, Coupon or Registered.

Price 97½ and accrued interest in currency, from February 15, 1872.

Maps, circulars, documents and information furnished.

Trustees, Farmers' Loan and Trust Company of New York.

Can now be had through the principal Banks and Bankers throughout the country, and from the undersigned, who unhesitatingly recommend them.

TANNER & CO.,

BANKERS,

NO. 11 WALL STREET.

☞ A dividend of three per cent. on the preferred and common stock of the Central Ohio Railroad Company, as reorganized, has been declared for the six months ending 31st May ultimo, payable at the Treasurer's Office, Baltimore and Ohio Railroad Company, in Baltimore, on and after the 22d instant.

☞ The Philadelphia, Wilmington and Baltimore Railroad Company have declared a dividend of four cent., pay July 5.

☞ The Chicago and Northwestern Railway Company have declared a dividend of three and one-half per cent. on the preferred stock, payable on and after the 27th of June.

☞ The New York and Harlem Railroad Company have declared a dividend of four per cent., payable on the 1st day of July next.

☞ The Fitchburg Railroad Company has declared a dividend of $4 per share, free of National and local taxes, payable July 1.

☞ Locomotives are now being shipped to Russia from the Baldwin Works, Philadelphia. Nearly 40 locomotives are made at these works every month.

Journal of Railroad Law.

RAILROAD COMPANIES—WHAT IS THEIR LIABILITY FOR UNCALLED-FOR BAGGAGE OF PASSENGER, WHEN HE HAS LEFT THEIR CARS.

The facts in the recent case of Burnell *vs.* The New York Central R. R. Co., (45 N. Y., 184,) are fully and clearly stated in the following opinion by--

CHURCH CH. J.—The plaintiff took passage at Palmyra, on the defendants' road for New York, and purchased a ticket and checked his trunk to the latter place. On his arrival in New York, the plaintiff, without calling for his baggage, went to Brooklyn, and the second day after his arrival presented his check and demanded his trunk but it could not be found, and has not since been found. This action was brought to recover the value of the trunk and contents. The Referee found that the trunk was lost through the negligence of the defendants and their servants, and that the plaintiff was entitled to recover upon which a judgment was entered, which was reversed by the General Term, in the first district, and a new trial ordered, from which the plaintiff appealed to this Court.

The Supreme Court placed its decision upon the ground that the defendants' liability ceased with the transportation of the trunk by the Hudson River Railroad Company to New York, and its readiness to deliver it within a reasonable time after arrival, and that whatever responsibility was incurred afterward, in keeping or storing it, was incurred by the latter company, for which the defendants were not liable.

The correctness of this decision depends upon the nature of the contract between carrier and passenger, in respect to the custody and loss of baggage upon the failure of the owner to call for it within a reasonable time after its arrival at the place of destination.

As to what is a reasonable time cannot be definitely determined but must be left to the circumstances of each case. Up to the expiration of that period the strict liability of common carriers continues. After that a modified liability analogous to that of warehouseman only exists. The rule of exemption from strict liability was carried to the utmost limit of propriety, to say the least of it in Roth *vs.* Buffalo and State Line R. R. Co. (34 N. Y. 528.)

It is unnecessary to attempt a definition of *reasonable time* as applied to this subject in this case, because it is clear that sufficient time had elapsed to relieve the carrier from his peculiar liability as insurer of the property. But there still remained a duty or obligation on the part of the Hudson River Company, to exercise ordinary care in keeping and preserving the property until it was called for or was disposed of according to law. The question is whether this obligation, with its modified liability, was imposed by the contract of carriage, or whether it was a new and independent obligation, arising from the unprovided-for and accidental circumstances of leaving the trunk in possession of the carrier. If the latter is the correct theory, then the defendants are not liable, and the action should have been against the Hudson River Company; if the former, they are liable, because by their contract they assumed the responsibility of every duty and obligation imposed by the contract of carriage. The Hudson River Company were then agents in performing the contract.

In considering such questions, it is proper to regard the improved facilities of traveling with its incidental contingencies, accidents and conveniences, and the usual mode of transacting such business, to the end, that while on the one hand onerous unnecessary duties should not be imposed upon the carrier by an unnatural or arbitrary construction of the contract, on the other hand, that is should be so construed as to afford reasonable protection to the public. The rule applicable in the construction of all contracts, that existing facts and all the surrounding circumstances are to be regarded for the purpose of effectuating the intent of the parties is also to be applied. I think the duty or obligation referred to, of storing the property and exercising ordinary care to preserve and protect it upon the happening of the contingent event of its not being called for, was incurred at the time the contract was made, and is a part of the contract itself. It is to be presumed that the parties intended to provide for every contingency incident to the subject of the contract.

Leaving baggage with a carrier by railroad, either for temporary convenience, from necessity, sickness or accident is not such an unusual exceptional circumstance, as to create a presumption, that it was not within the contemplation of the parties at the time the contract was made.

The duty of exercising care over property thus remaining in their possession, is a part of the duty of carriers, incidental it is true to their principal or main duty, but nevertheless incumbent upon them, and it is no less a duty growing out of their relation of carriers, because their liability is mitigated to that of ordinary bailees for hire. Besides this is the ordinary mode in which this business has been transacted, as the evidence in this case shows and as all railroad companies are in the habit of doing. Baggage thus left is and always has been kept and cared for, and the manner of disposing of it, if not finally called for, was long since regulated by law (Law of 1837, p. 311), and it is presumed that the parties contracted with reference to the existing state of facts, and to the customary manner of transacting such business.

The other view terminates all relations between carrier and passenger immediately upon the expiration of the "reasonable time," within which the baggage must be called for, and transforms the carrier into a mere accidental finder, or gratuitous bailee liable only for gross negligence. In other words, it makes two contracts in every case where baggage is left, and complicates the rights and duties of the respective parties, and while it essentially impairs the security of the public confers no substantial benefit upon the carrier. Its tendency would be to induce carelessness and negligence where care and vigilance is necessary. The fair construction of the contract is that the defendants agreed for a consideration to transport the plaintiff and his trunk to New York, and deliver the latter to him on its arrival, if called for, if not that it should be property stored, and reasonable care exercised to prevent injury or loss until it was called for, or was lawfully disposed of. This simplifies the transaction, carries out the intention of the parties, legalizes the uniform practice, and does justice to the carrier and the public. Although the rule on this subject has not been very definitely settled, yet the principles herein indicated are not new (Cary *vs.* Cleveland and Toledo R. R. Co 29 Barb., 35,).

These views in effect determine the liability of the defendants to this action. The Hudson River company being the agents of the defendants in performing the contract, and the contract of storage, being a part of the original contract of carriage, it follows that the defendants are liable for the loss in that case if any one is liable. Allen J. in 29 Barb. 35, said "There was but one contract, one hiring and one consideration paid for the carriage and storage of the baggage; the contract for storing resulting from and being an incident to the main contract for carriage. It follows that the party liable upon the main and express contract, is liable upon the incidental and implied contract, and the Buffalo and State Line Road, in the storage as in the carriage of the trunk must be deemed the agent of the defendant performing its contract."

The only remaining question is whether a cause of action was established, based upon the negligence of the Hudson River Company. The failure of that company to produce the subject of bailment when demanded, *prima facie* established negligence and want of due care. When there is a total default to deliver the goods bailed on demand, the *onus* of accounting for the default lies with the bailee. It is claimed that the failure to produce the trunk, and the charge of negligence is fully met by the evidence produced on the part of the defendants, that the building used for storing baggage was safe and in charge of trusty agents and servants, and properly guarded night and day. There was no evidence as to how this particular trunk got out of the possession of the Hudson River Company. If it had been burned or stolen, without fault on their part, the defendants would not have been liable.

The evidence certainly shows commendable vigilance in the general arrangements to protect this class of property, but it fails to point out how or by what means this trunk was lost. The inference that it was delivered to the wrong person by mistake is quite as ligitimate as that it was stolen. To say that the servants were generally careful, does not establish as a question of law, that they were not careless in respect to this article. It was incumbent on the defendants to show that the loss of this trunk was not attributable to the want of care of their servants and the evidence was such that the referee was justified in finding that they had failed to do it.

If this trunk was delivered to the wrong person the circumstances should have been shown, otherwise it would be presumed negligent, as no such delivery would be proper without the presentation of the duplicate, check, or satisfactory evidence of its loss, and of the ownership of the property. If the trunk had been delivered upon such evidence as vigilant, careful persons would regard as sufficient the defendants might have been relieved from liability, but no evidence of this character was produced, and we think the finding of the referee was fully warranted.

The order granting a new trial must be reversed, and the judgment affirmed.

Ordered accordingly.

Canadian Pacific Railway.

The report of Mr. Sanford Fleming on the Canadian Pacific Railway exploration survey has been laid before Parliament. It states that a point opposite Lake Nipissing, named Mattawa, was selected as the eastern end of the survey. This point, it is claimed, is easily connected by projected local lines. The Pacific terminus is undetermined, the line of route through British Columbia being still a matter of uncertainty. The physical features of the country naturally divide the country into three great divisions, as follows, viz :—1st, from Mattawa to Fort Garry; 2nd, from Fort Garry to the Rocky Mountains; 3rd, from the Rocky Mountains to the Pacific Coast. The distance from Mattawa to Fort Garry was sub-divided into eleven different surveys of seventy-five to ninety miles in length. The country is densely wooded, and the survey was therefore unusually difficult. A branch surveying party explored the country from Nipissing to Sault St. Marie, to connect with lines south of Lake Superior, or steamboat navigation. Another expedition was sent north to James Bay. West of Fort Garry, owing to the simple and well known features of the country, a continuous instrumental survey was not thought necessary. The number of rivers in this region flowing through deep and wide beds, are said to be suggestive of bridging on a gigantic scale. A double expedition was organized to proceed westward of Fort Garry, and to penetrate the Howe Pass and Yellow Head Pass of the Rocky Mountains. One of these passes, it is believed, would be most eligible for a railway. The obstacles to railway construction in British Columbia are represented as most serious. Six surveying parties in all were organized to explore the interior of the Province, and ascertain the route affording the fewest difficulties to that section of the line. Twenty-one surveying parties in all were organized, and no small portion of the duty devolving on the department arose out of the necessity for supplying the staff with sufficient commissariat, in a region "uninhabited, trackless and seemingly impenetrable." The total number of persons employed in the survey was nearly 800. The first detachment left on the 10th of June, and others at subsequent periods. The engineer feels satisfied, although communication has been beset with many difficulties, that the surveys between Mattawa and Nepigon are completed, and that there are only two breaks between Nepigon and Fort Garry. From the Ottawa to the north of Lake Superior, no serious engineering difficulties were met with; but for one hundred miles eastward of Lake Nepigon, the country is extremely rough and mountainous, and no practicable line for a railway could be discovered. With respect to the British Columbia survey, the report says: "Some hopes are entertained that a line may be found from the north Thompson across the Selkirk range, to the Quesnel Lakes, and thence via Quesnel to Bute Inlet; but should this fail, a careful examination will be made about 50 miles further to the south, on a line projected through Horse Lake and Lake La Roche. Should all these prove fruitless, it is confidently believed that it will be quite possible to reach Bute Inlet by a practicable line from Tete Jaune Cache, going round the Cariboo country on the north side, along the banks of the Fraser river, and thence across the Chilcotin Plains. The only objection to the latter route would be its length. The gradients can scarcely fail to be favorable on account of the line following the river for over 250 miles of a uniform and gradual descent. The harbors spoken of as accessible from the Pacific for the terminus are Burrard's Inlet, Esquimault, Alberni (at the head of Barclay Sound), a harbor on the Nootka Sound, Bentinck Arm, and Port Essington. A map accompanies the report and also a diagram showing the levels at which the proposed lines will run, in comparison with the Union Pacific. From this it appears that the latter runs for 1,306 miles at a higher level than the Yellow Head Pass, and that this point, the highest summit traversed by the Canadian Pacific Railway line, is less than half the elevation attained at several points on the line now being constructed across the continent. An approximate estimate of the length of the line is formed, and it is calculated that the distance of the Canadian Pacific between Montreal and Fort Garry is 1,[illegible] miles, while the line by Sault Ste. Marie and Pembina is 1,440, and by Chicago and St. Paul, 1,843 miles. From Toronto the distance to Fort Garry would be 1,110 miles; or via Sault Ste. Marie, the distance is 1,290 miles, and by Chicago 1,507 miles. The distance via the Union Pacific Railway, from New York to San Francisco is 3,363 miles; and from New Westminster to Montreal only 2,730 miles. The Canadian Pacific Railway, it is asserted, would, even from New York, Boston or Portland offer an advantage in distance of from 300 to 500 miles, as compared with the Union Pacific. The Canada route will shorten the distance between Liverpool more than a thousand miles. The Indians met with during the survey are reported to have proved friendly on the object of the expedition being explained to them.—*Monetary Times.*

☞ The Philadelphia *Ledger* of 10th inst., reports the net anthracite coal tonnage for the week ending on the 1st inst., from all sources, at 439,891 tons, and for the year 7,033,665 tons, against 2,646,213 tons to the same date last year, being an increase in the tonnage of anthracite coal of 4,387,452 tons. The production of bituminous coal for the week was 62,080 tons, and for the year 974,234 tons, against 830,633 tons to the corresponding time last year—an increase of 143,601 tons. The total production of all kinds of coal for the week was 502,781 tons, and for the year 8,010,899 tons, against 3,476,896 tons to corresponding time last year, showing an increase of 4,534,003 tons.

☞ The directors of the Lake Ontario Shore Railway have decided to pass Rochester on the north at Charlotte (the mouth of the Genesee river), and to terminate their line at Lewiston, where, by a suspension bridge, they will connect with the Canada road. The line will proceed west from Charlotte along the lake shore, thus giving a new set of small towns the benefit of railroad facilities.

☞ At the recent annual meeting of the stockholders of the Milwaukee and St. Paul Railway Company, the following directors were chosen: Frederick P. James, Walter S. Gurnee, James Buell, E. L. Franks, of New York; S. S. Merrill, of Milwaukee; F. A. Mueller, of Rotterdam, Holland. Alexander Mitchell, was unanimously elected president, and Russell Sage vice-president.

☞ The town of Gardner, Me., has voted to subscribe for 250 additional shares of stock of the Boston, Barre and Gardner Railroad, when it appears that stock enough is subscribed to secure the extension of the road to Winchendon.

Safe and Profitable!

THE CANADA SOUTHERN

First Mortgage Sinking Fund 30 Years

7 PER CT. GOLD BONDS

AT

90 AND ACCRUED INTEREST.

The Road runs from Buffalo to the Detroit River, and is the Eastern link in the new AIR LINE FROM BUFFALO TO CHICAGO, and has been under construction for about two years past by railroad men who have seen the necessity for a STEEL RAIL, LOW GRADE, SHORT ROUTE between the great railroad systems which diverge from Chicago, Toledo and Buffalo.

Among the builders of the road, by whose cash subscriptions 220 miles (out of 290) have already been graded, bridged and made ready for the superstructure, a large part of the steel rails bought, all of the materials for the stations and a part of the equipment purchased, are:

MILTON COURTRIGHT, JOHN F. TRACY, DAVID DOWS, WM. L. SCOTT, HENRY H. FARNHAM, R. A. FORSYTH, HENRY PORTER, JOHN M. BURKE, M. L. SYKES, Jr., B. F. ALLEN, all directors, either in the Chicago and North West or the Chicago, Rock Island and Pacific; GEO. OPDYKE of the Midland Road; JOHN B. ALLEN, SIDNEY DILLON, DANIEL DREW, J. S. CASEMENT, J. & J. CASEY, O. S. CHAPMAN, JOHN ROSS, DAVID STEWART, and F. H. WINSTON.

THE ROAD will be

33 Miles Shorter than any other Road,

either BUILT or in contemplation between Buffalo and Chicago, and will also shorten the distance between Toledo and Buffalo 23 miles.

THE MAXIMUM GRADE on the entire line does not exceed FIFTEEN FEET to the mile—and Ninety six per cent. of the road IS STRAIGHT.

THE ROAD WILL BE COMPLETED and in running order on or before Dec. 31 of this year.

The principal and interest of the bonds are payable either in New York, London, or Frankfort.

We confidently recommend the bonds to all classes of investors.

LEONARD, SHELDON & FOSTER,
No. 10 Wall-St.

NOTICE.

HAVING BECOME ASSOCIATED WITH Messrs. LEONARD, SHELDON & FOSTER in the Agency of the CANADA SOUTHERN RAILWAY CO., we offer the above named Bonds for sale.

After a thorough investigation, we recommend them to our friends and customers as a SURE AND RELIABLE INVESTMENT.

Pamphlets and all information furnished on application.

Winslow, Lanier & Co.,
27 PINE ST.

Texas and Pacific Railroad.

AN ACT supplementary to an act entitled "An act to incorporate the Texas Pacific Railroad Company and to aid in the construction of its road, and for other purposes; approved March third, eighteen hundred and seventy-one.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the name, style and title of the Texas Pacific Railroad Company shall hereafter be "The Texas and Pacific Railroad Company;" and the said The Texas and Pacific Railway Company shall have, possess and enjoy all the rights, privileges and franchises heretofore conferred upon the said Texas Pacific Railroad Company.

Section 2. That the said Texas and Pacific Railway Company shall have power and authority to issue the construction and land bonds authorized by the eleventh section of said act of incorporation, for such amounts, not exceeding forty thousand dollars per mile of said road, of construction bonds, as said company may deem needful to provide for the construction and equipment of its line, and to include in the mortgage or mortgages to secure said construction bonds all or any portion of the lands granted in aid of the construction of said Railroad: and in the mortgage or mortgages to secure said land bonds, any portion of said lands not so used to secure the construction bonds aforesaid; and all or any portion of the lands acquired by the terms of consolidation lawfully authorized by the fourth section of said act of March third, eighteen hundred and seventy-one, with any railroad company or companies to whom grants of land may have been made, or may hereafter be made, by any congressional, State, or Territorial authority, or who may have purchased the same previous to any such arrangements or consolidation, and within the time limited for the completion of the road, and all such lands of every description shall be subject to all limitations and conditions now by law existing in relation thereto, and as modified by this act; and this act shall not be construed to revive, enlarge, extend or create any land grant whatever, beyond that heretofore granted by Congress, and which shall duly inure to said company upon compliance with the terms of this act in relation to the times fixed for completion of said railway, and all such mortgages shall be subject to all the conditions and limitations by law existing under this act and the acts to which it is supplementary in respect to such lands, and shall not be held to vest any title in the mortgage or create any lien on such lands, other than such company is or may become lawfully entitled to vest or create thereunder; but the amount of said land bonds shall not exceed two and half dollars per acre for all lands covered by the mortgage or mortgages securing the same.

Section 3. That all the mortgages made and executed by said railroad company shall be filed and recorded in the Department of the Interior, which shall be a sufficient evidence of their legal execution: *Provided*, That the aforesaid bonds and the authorized capital stock, or the proceeds thereof, shall be applied only for the purpose of securing the construction, operation and equipment of the contemplated railroad line, under lawful contracts with such parties, and on such terms and conditions as said company may deem needful, and for the further purpose of purchase, consolidation, completion, equipment and operating of the other roads, as contemplated by said act and specified therein, being a part of the aforesaid railroad line, and for the expenses necessary and incident to the works authorized thereby: *Provided, however*, That said road and its equipment shall be of the standard heretofore required by the United States Government for the existing Pacific railway lines: *And further Provided*, That said mortgage or mortgages shall in nowise impair or affect any lien existing on the property of said company or companies at or before the time of such consolidation.

Section 4. That said road shall be constructed of iron or steel rails manufactured from American ore, except such as may have been contracted for before consolidation by any railroad company which may be purchased by or consolidated with this company.

Section 5. That the said Texas and Pacific Railway Company shall commence the construction of its road at or near Marshall, Texas, and proceed with its construction, under the original act and this supplement, or in pursuance of the authority derived from any consolidation as aforesaid, westwardly from a point near Marshall, and towards San Diego, in the State of California, on the line authorized by the original act, and so prosecute the same as to have at least one hundred consecutive miles of railroad from said point complete and in running order within two years after the passage of this act; and so continue to construct, each year thereafter, a sufficient number of miles, not less than one hundred, to secure the completion of the whole line, from the aforesaid point on the eastern boundary of the State of Texas to the bay of San Diego, in the State of California, as aforesaid, within ten years after the passage of this act; and said road from Marshall, Texas, throughout the length thereof, shall be of uniform gauge: *Provided, however*, That the said company shall commence the construction of said road from San Diego eastward within one year from the passage of this act, and construct not less than ten miles before the expiration of second year, and, after the second, not less than twenty-five miles per annum in continuous line thereafter between San Diego and the Colorado river until the junction is formed with the line from the east at the latter point or east thereof; and upon failure to so complete it Congress may adopt such measures as it may deem necessary and proper to secure its speedy completion; and it shall also be lawful for said company to commence and prosecute the construction of its line from any other point or points on its line; but nothing in this act shall be so construed as to authorize the grant of any additional lands or subsidy, of any nature or kind whatsoever, on the part of the Government of the United States: *Provided*, That said Texas and Pacific Railway Company shall be and is hereby authorized and required to construct, maintain, control and operate a road between Marshall, Texas, and Shreveport, Louisiana, or control and operate any existing road between said points, of the same guage as the said Texas and Pacific Railroad; and that all roads terminating at Shreveport shall have the right to make the same running connections, and shall be entitled to the same privileges, for the transaction of business in connection with the said Texas and Pacific railway, as are granted to roads intersecting therewith: *Provided farther*, That nothing herein shall be construed as changing the terminus of said Texas and Pacific railway from Marshall, as provided in the original act.

Section 6. That all acts or parts of acts inconsistent with this supplement be and the same are hereby repealed.

Approved May 2, 1872.

Chicago and Northwestern Railway Extension.

The contractors on the Northwestern Extension of the Chicago and Northwestern Railway, Messrs. Wolf & Carpenter, are pushing their work along north of Menominee as fast as possible under the circumstances. About 25 miles of the timber north from Menominee is cut out and about five miles graded. About 350 men are employed on the work and more are being secured daily. It is the design to increase the force to 1,000 men. The first locomotive crossed the Marinette and Menominee bridge last week, and the iron is being laid Northwest as fast as possible. The line of the road about midway between Menominee and Escanaba is not yet located. Several lines have been run but it is desirable to select one offering less topographical difficulties than any of them. The engineers working from either end are now within about eight miles of each other on what will probably be the final line. The branch tracks of the road are being built, or rather the grading being done, on both sides of the river, in Marinette and Menominee. The Menominee road bed for a considerable distance is being formed by dredging through the lowlands and throwing up an embankment.—*Green Bay Advocate.*

☞ The stockholders of the Boston, Concord and Montreal Railroad have adopted the following plan for consolidating the different classes of stock: the whole capital to be represented by a single class of stock, to be apportioned to stockholders in place of stock which they now hold, on this basis—three shares for every two shares of preferred stock, one share for every two shares of new stock, and one share for every five shares of old stock, the whole amount of stock thus apportioned to the stockholders will be $1,562,000, and it is believed that the income of the road will be sufficient to insure regular dividends at the rate of $4 per share per annum on that amount. It was also voted to unite the Boston, Concord and Montreal Railroad with the White Mountain Railroad, and to increase the capital stock $2,000,000.

☞ The *Financier* says that a contract has been entered into between the Illinois Central, the Mississippi Central and the New Orleans, Jackson and Great Northern Railroad Companies, to consolidate these roads into one line under one management, so as to have one continuous line from Chicago, by way of Cairo and Jackson, to New Orleans. The road from Cairo southward toward Jackson, is at once to be built, so as to complete the connection; and the Illinois Central is to furnish $6,000,000 of funds, in the way of money and bonds, for the purpose. The continuous line to Cairo from the south will be completed about the first of January next.

☞ At a late meeting of the board of railway assessors, held at Topeka, Kan., ten railroads in the state reported their gross earnings for 1871, as follows: Atchison, Topeka and Santa Fe, $487,086 72; Leavenworth, Lawrence and Galveston, $593,992 33; Central Branch Union Pacific $179,042 86; Missouri, Kansas and Texas, $447,808 90; Kansas Pacific, $3,119,936 03; Missouri River, Fort Scott and Gulf, $683,882 35; St. Jo and Denver, $197,217 04; Atchison and Nebraska, $81,966 06; Atchison and N. W., $49,015 45; Missouri River, $88,794 49.

☞ The gentlemen selected by Councils to test the Worthington pumps at the Waterworks in West Philadelphia, for the purpose of ascertaining whether they were able to perform the work according to contract, have completed their labors. We understand that the tests applied show the pumps capable of performing all the work which they were contracted to do.

☞ Street railroads are to be laid in Paris. Thirteen have been projected, and four are to be commenced immediately. First and second-class cars will be run, the fares being charged according to distance, at the rate of three cents per mile for the first-class and two cents per mile for the second.

☞ The Decatur and State Line Railroad Company has filed, with the Secretary of State of Illinois, a notice of the change of its name to the Chicago, Decatur and St. Louis Railroad Company.

☞ At a meeting of the stockholders of the Cobourg, Peterboro' and Marmora Railway and Mining Company at Cobourg, Ca., on the 17th ult., a resolution was passed conferring on the directors full power to push forward the proposed completion of the road to Peterboro,' and the extension to Mud Lake. Col. Chambliss, Managing Director, stated that the mine had turned out a complete success, and that it was the intention of the board to push the road on to Peterboro' and Fenelon Falls, and ultimately to Parry Sound, without delay, provided the proposed bonus already granted by the town of Cobourg and that from Peterboro' was obtained with the grant from the Government.

☞ The survey of the two routes for the proposed Lowell and Andover Railroad has been completed, and the estimates of cost for suitably preparing either route are now under consideration, and will soon be submitted to the proper authorities of the road. Both routes pass over the Lawrence Railroad, near Shedd's crossing in Tewksbury, and both are said to be quite feasible and favorable, requiring comparatively slight cuts and but moderate filling and grading. By either route three bridges will have to be constructed. When the route shall have been adopted the work of building will be immediately commenced.

☞ Stock to the amount of $852,000 has been taken in the Ontario and Quebec Railway, and ten per cent paid thereon. It was agreed between Sir Hugh Allan, representing the stockholders, and the provisional directors, that Mr. Keefer's line between Carleton Place and Peterboro' would be taken; that the survey would be commenced within two months and prosecuted with vigor, and that the work of construction shall be commenced at the earliest possible moment. The gauge is to be 4 ft. 8½ in. from Ottawa to Toronto.

☞ The officers of the New York Bridge Company, recently elected, are: Henry C. Murphy President, John H. Prentice Treasurer, and O. P. Quintard Secretary.

Executive Committee—Seymour L. Husted, Abram S. Hewitt, James S. T. Stranahan, Wm. H. Applegate and Henry W. Slocum.

Finance Committee—C. A. Sprague, Andrew H. Green, Wm. Marshall, Lloyd Aspinwall and John W. Lewis.

☞ The contract for building the Massachusetts Central Railroad bridge across the Connecticut River at Northampton has been awarded to J. R. Smith of Springfield. The total contract price is upwards of $130,000. The bridge will be 1,400 feet long and will be completed by September, 1873. Work will begin at once, and will be vigorously pushed during the Summer.

☞ At an adjourned meeting of the Penobscot Central Railroad, held in Bangor on the 6th inst. Wm. T. Pearson of that city was chosen President, and Timothy P. Batchelder of Kenduskeag Treasurer. Engineers will commence in about two weeks to make a preliminary survey of the route up the Kenduskeag valley.

☞ The total expenditures on the Intercolonial Railway up to March 30, 1872, have been $8,641,104—of which $3,565,692 had been expended prior to December 31, 1870.

THE CINCINNATI & TERRE HAUTE
Railway Company,

Desirous of enlisting the attention of manufacturers to the advantage of locating manufacturing establishments upon the line of their Railway, will give to any Rolling Mill or Blast Furnace Company so locating forty (40) acres of ground for works, and the coal in one hundred (100) acres of Clay or Owen County, Indiana, block coal field; the ore from one hundred (100) acres of the Hardin, Pope or Massac County, Illinois, brown hematite beds, and agree to furnish them with all orders for merchant iron required for the Railway's use for a period of two years.

To any Railway Car Manufactory located upon its line, they will give twenty acres of ground required for works, the timber from one hundred acres of the best oak timbered land in Owen County, and an order for one thousand cars to commence work upon.

To any Car Wheel Foundry or Axle Forge, the necessary grounds for works, and liberal orders for their products in kind.

To all other manufacturing establishments ample facilities in the locating and successful prosecuting of their works.

Circulars descriptive of the manufacturing points upon the line of the Railway will be mailed to any address upon application to

MATT. P. WOOD,

Northern Pacific Railroad.

The Northern Pacific Company has filed its route through Montana, and the Commissioner of the General Land Grant Office has accordingly ordered the lands to be withdrawn from the market. The road enters the territory at or near the intersection of the forty-seventh parallel with the eastern boundary, thence southeasterly, following the Yellow Stone River to the Bozeman divide, over which it passes; thence north of Bozeman City and Hamilton down to Gallatin, crossing the Gallatin River at Gallatin City; thence up the Jefferson River to Big Hole, and following that stream for a short distance; thence through the Deer Lodge Pass; thence down the Deer Lodge, Hell Gate, and Missouri Rivers; thence southwesterly, leaving the territory on the north side of Clark's Fork of the Columbia, about twelve or fifteen miles north of the intersection of the forty-eighth parallel with the boundary of the territory.

Work is progressing favorably on the Pacific end of the Northern Pacific Road. A steamer is to be put on the upper Cowlitz, to run as a ferry between Pumphey's and the end of the 25 miles until the road is completed to and across the Cowlitz, which will probably be about Sept. 1. From New York 1,372 tons of iron has just arrived, and another cargo was expected shortly.

SEVEN-THIRTY GOLD BONDS.

The NORTHERN PACIFIC 7-30 GOLD BONDS are issued in denominations of $100 to $1,000 Coupon, and $100 to $10,000 Registered, have thirty years to run, bear interest 7-30 per cent. in gold, and are exempt from United States tax to the holder.

They are secured by a First and only Mortgage upon the Railroad, its franchises, earnings, and all the lands and property possessed by the company.

These bonds are now selling at par and accrued interest, in currency, and, with their ample security and high rate of interest, we believe there is no investment accessible to the people which is more profitable or safe. They furnish to the public an investment security which combines the ready negotiability, the convenience and high credit of a first-class Railroad Bond, with the solidity and safety of a Real Estate Mortgage on land worth at least twice the amount loaned.

JAY COOKE & CO.,

New York, Philadelphia and Washington.

POOR'S MANUAL.—We are informed by DR. R. S. FISHER, the industrious compiler of the work, that the "Manual" for 1872-'73 is completed, and that if the binders are as industrious and persevering as the projector and author of the work that a few copies will be ready for delivery on this day (Saturday). During next week the general delivery to bankers and others interested will commence.

St. Joseph and Denver City Railroad.

We hear a good account of the progress making by the great American railways whose bonds have been offered for sale through our columns during the past few months. Notably among these stands the St. Joseph and Denver City, whose financial agents, the Messrs. Tanner, have just received a message from the engineers in charge announcing the completion within the previous ten days of an additional ten-mile section of road, leaving of the entire route of 280 miles only forty to be finished. For these forty miles the iron and all other materials are on the ground, and the work is to be continued at the rate of one mile per day. The ready cash resources of the Company have enabled it to carry on this great work with an economy of expenditure and a regularity of progress scarcely parallel in the history of railroad building, reflecting the highest credit upon the financial agents as well as upon the engineers in charge. In 40 days more at the past and present rate of progress, the entire route will be completed, when the company will at once enter upon a through traffic between the City of St. Joseph on the East, and Fort Kearney junction with the Union Pacific Road on the West, which, it is believed by its projectors, will tax its utmost resources of transportation, while it will accommodate a vast amount of business that, to reach the same Western point, must now travel 200 miles out of its way. Inasmuch as the Union Pacific is prohibited, by the terms of its charter, from discriminating against connecting roads, it is confidently believed that this through trade alone will pay all expenses, including the interest upon the bonds, leaving the Company with a portion of the issues of land grants still on hand, a profitable and gradually increasing way business, and 1,500,000, more or less, acres of valuable land, from the sales of which, it is believed, the entire issue of bonds may be redeeming long before maturity. With the same judicious management that has heretofore characterized its affairs, the St. Joseph and Denver City Railroad Company ought to become one of the wealthiest in our country, since it is quite likely to be the last to receive any such grant of land as that owned by it and pledged, with the road itself, for the re-

demption of its Western Division First Mortgage bonds.

Georgia Railroad and Banking Co.

The earnings of this road for the years ending March 31, 1871 and 1872, were as follows:

	1871.	1872.
From passengers	$395,153 65	$368,638 39
" freight	1,082,119 71	940,045 29
" mail	22,825 21	25,328 64
	$1,500,098 57	$1,334,012 32
Expenses, viz:		
Conducting transp.....	$228 905 41	$219,932 53
Motive power	273,704 77	257,041 60
Maintenance of way...	276,009 14	243,998 44
Maintenance of cars...	54,939 95	85,262 53
	$832,559 27	$806,235 00
Earnings less expenses.	$667,539 80	$527,777 32

Out of which have been paid—

For five new locomotive engines	$66,742 58	
For new passenger depot at Atlanta.....	26,867 58	
For new depots at way stations.....	2,300 76	
For 2 new passenger cars and expenses to Augusta	10,453 24	
For new baggage car (mail and baggage combined).	3,300 00	
For new cab car (first class)	2,000 00	
For ⅛ interest in 8 Thro' express cars on line between Mobile and Augusta.....	4,839 80	
For new steam pump at Oconee.....	2 034 52	
For new culverts.....	1,008 00	
		119,546 48
Net income.....		$408,230 84

Compared with the previous year the gross earnings of 1871–'72 show a decrease of $166,086 25; with a decrease in expenses and payments, both ordinary and extraordinary, of $112,217 80—making the decrease in net income only $53,-868 45. The President in his report says:

The income of the company, both gross and net, from all sources, may be thus stated:

Receipts from road operations.....		$1,334 012 32
Dividends on stock, interest and rent		39,008 05
		$1,373,020 37
Charged with railroad expenses and all expenditures on road account.		925,781 48
Profits from road operations, dividends, &c.....		$447,238 89
Charged with incidental expenses and salaries	$13,410 35	
Charged with interest on bonds.....	50,977 50	
Charged with State tax..	2,339 75	
Charged with circulation redeemed.....	5.137 85	
		71,865 45
		$375,373 44
Add net profits of bank.....		11,991 81
Net profits from all sources.....		$387,365 25
From these profits two dividends of $4 per share have been paid, free of tax to the stockholders.	$336 490 70	
United State tax.....	8,008 98	
		344,499 68
Carried to credit profit and loss.....		$42,865 57

It may be here observed that income account is entitled to a credit of $16,000 for January dividend on Atlanta and West Point Railroad stock, declared, but not yet collected.

The past year has been a trying year upon Southern Railroads. The long and continuous spells of wet weather have rendered the duty of keeping track in adjustment impracticable, and our rolling stock has greatly suffered in consequence. The ditches will be thoroughly dried this Summer by an extra force, and as much new iron put on the track as the disposable means of the company will allow. The rail is of uniform pattern, and the fish-bar fastening is used. When completed, the company will have a first-class road the entire length of main line. This will, of course, greatly cheapen the operating expenses.

Through the cheapening influences and extended operations of the Green Line, and the improved condition and management of the Western and Atlantic Railroad, our Provision trade has been greatly enlarged and extended. On this Western trade we mainly rely for a Summer business, and the loss of it would greatly affect our income.

As the organization and operations of "the Green Line" have not been generally understood, the Superintendent, in answer to various inquiries, has given a full and lucid explanation of its system and management, which will doubtless be interesting to some of the stockholders. It may sometimes affect local interests, but to the great mass of consumers, who depend on foreign supplies, it is an unmitigated blessing!

Notwithstanding the very short crop, and the heavy loss at all competing points by the Yellow Fever in Charleston, the falling off in cotton transported over the road has been only 7,797 bales, being 162,470 bales against 170,267 the previous year.

The Board will not here dwell upon the many changes in the bearings of trade, occasioned by the war and its results. For obvious reasons, the center of population is moving Westward from the Northern and Eastern States. Many articles which were formerly supplied from the Northern cities and Baltimore, and sent from our own seaports, over our own roads, for consumption in the interior, are now more cheaply manufactured in the West, creating a demand for more direct exchanges between the two sections. Hence arises a tendency in North and South roads to encroach upon fields which the East and West roads of the South had formerly considered exclusively their own. Weakened and impoverished by the war, and without capital, they cannot control this tendency, and they should adapt their policy with a sound discretion to the new state of things. This is one of the objects of "the Green Line."

It will be seen that the expenditures, both ordinary and extraordinary, have been large. They must continue so until the road is thoroughly renewed, and war damages fully repaired. With some increase of rolling stock, and fifty miles more of new iron, this expensive job will be drawing to a close. With a full equipment, and the road in first-class condition, the relation between gross receipts and net profits will be materially changed. This relation, however, has been greatly affected by causes of a more discouraging character, growing out of our civil conflict—

1st. By heavy taxation, not only upon income, but every element of cost in operating railroads.

2d. By low rates from increased competition, and especially by roads built and sustained by the unjust and pernicious system of State aid! Well located roads, really needed and resting on an honest basis, may merit judicious encouragement, but no policy can be more impolitic and oppressive than to tax the honest industry of the country to encourage useless enterprises and wild and wasteful speculation!

3. From the demoralized condition of the country, in some localities, and a total disregard of all moral duty where corporations are concerned, is often little better than a judicial farce! Some protection has been found in the judiciary, but for this, the railroad interests of the country would be subjected to a spoliation equivalent to confiscation. Protection to property honestly acquired is essential to good government. Without this there is no encouragement to private industry, and no accumulation of national wealth. It is hoped the legislature will see the necessity of doing something for the protection of this important interest, which constitutes a large portion of the little productive wealth remaining to us. It is now virtually in a state of outlawry, and unless something be done for its protection, it will soon become worthless as an investment.

Since the chartering of the Port Royal Railroad Company, various applications have made to our company for material aid. But with one exception, and under a misapprehension of facts, the board has not seriously entertained any proposition for the aid required. The board has always recognized the importance of that improvement as an additional outlet from our Eastern terminus to deep water. They have always recognized its importance to Augusta, with whose interests those of the road are mainly identified. They believed it very important to the whole planting and exporting interests of Middle Georgia, and the country West tributary to our road. Believing all this, but in spite of all this, the directors had come to the conclusion, almost unanimously, to give no aid to the Port Royal Railroad, or in any way to identify our company with its interests, by relations any closer than with other roads connecting at Augusta. The directors had settled upon this policy for several seasons:

1st. We have no surplus means for aid to other enterprises.

2d. We believed it to be injustice to other roads terminating at Augusta.

3d. And mainly, we wished to avoid any policy that would appear aggressive upon the interests of Savannah or Charleston, or the railroads connecting us with those cities, with whom we had long enjoyed mutual and friendly business *relations*. We do not wish to be placed in a position that would seem to make it the duty of the officers to favor one connecting route more than another. They could not do so without opposing the traditional policy of the city, which has been for free competition, and a perfect choice between all outlets from Augusta as a terminus and entrepot.

But early in the present year reports were current that an unfriendly combination was engaged in purchasing a controlling interest in the South Carolina Railroad, with a view of restricting our Eastern Connections to other routes! We were, at first, incredulous! We hesitated and inquired. The evidence was unbroken in its tenor, and came from both sides! One side was jubilant with hope, and the other full of apprehension and despair! We were admonished by friends and goaded by the press! At length, when all reasonable doubt vanished, a special meeting was called, and the evidence laid before the board. With some hesitation, and great reluctance, the board yielded to the pressure. A proposition, previously made and rejected, was finally, with some modifications, accepted with great unanimity! This proposition was to endorse the First Mortgage Bonds of the Port Royal Railroad for one million dollars, and receive a controlling interest in the stock. Not much value is attached to the stock, except for its voting and controlling power. Without this controlling power, the stock might again change hands, and fall into the hands of speculators and rivals, and all advantage from the arrangement be lost.

The directors declined to take the responsibility, and required the ratification of the stockholders. The question is an important one, and should receive attention in proportion to its importance. It involves a large responsibility, and may be attended with loss. The question is, whether these risks are not more than counter-balanced by more threatening danger?

Though Charleston is in another State, a free and unrestricted connection with it is almost vital to our interest. We do not underestimate the value of our connection with Savannah, the

seaport of our own state, but Charleston is vastly more important to us. It is equally well located for the foreign trade and much better located for the coasting trade, in connection with our road. Shipments made from or through Charleston, to points west of Augusta, all go over our road. From or through Savannah, the chances are that we lose them. We feel no hostility to Savannah, or Charleston either, but feel bound, to a fair extent, to protect our own interests, as we understand them.

In this connection it may be observed, that the proposition required us to purchase control of the Savannah and Charleston Railroad. This was respectfully declined.

The company have 53 locomotives, 26 passenger, 8 baggage, 3 mail, 3 express, 403 box, 13 cab, 102 platform, 35 stock, 22 coal, 17 shanty and 2 wood cars. Miles run by locomotives, 971, 050, an increase over the previous year of 60,297. Miles of road in use, 231. Bales of cotton transported, 162,470. Bushels of grain, 887,531. Barrels of flour 77.875. Pounds of guano, 31,545, 418. The Superintendent in his report says:

It is impossible to say, with any degree of certainty, to what extent, if any, the earnings of your road may be effected by new competition which will be offered, upon the completion of the South and North Road, opening up the line under one management from Louisville, Ky., to Montgomery, Ala.; and upon the completion of the Air Line (as it is termed) from Atlanta to Charlotte, with one management from Atlanta to the Eastern cities; the former bidding at Montgomery, and the latter at Atlanta, for business which has formerly been done almost exclusively by the Georgia and Central Railroads.

The managers of both these projected lines calculate largely upon carrying cotton from the interior of Georgia and Alabama to the Eastern cities by their all rail routes. Those managing the Louisville line expect to load cars from the West with produce, live stock, agricultural implements, &c., and return the same cars over their road loaded with cotton. We apprehend that the managers of the route via Charlotte, from Atlanta to the Eastern cities, will offer low rates for carrying merchandize traffic from the Eastern cities to the interior with the hope of loading the cars back with cotton.

These are unwelcome truths. But it would be unwise not to see them, discuss and meet them.

How much this spirit of competition, when fully developed, may effect your interest, cannot now be seen; but its extent and influence will depend greatly upon the facilities which your route can offer and the promptness with which business over it can be dispatched. The management of the Western and Atlantic Railroad is in the hands of parties friendly to the Railroads of Georgia, and has uniformly refused to enter into any combination for ruinous competition.

The officers of your road will not ignore the fact of these threatened dangers, but look them squarely in the face, and, if possible, meet and avert their damaging influence by enlightened, liberal and energetic management.

The earnings of the Macon and Augusta Railroad were $94,130 02; and the expenses, $120,-031 89—showing an excess of expenses over receipts of $25,901 87. To put this road in condition to do much increased business satisfactorily will require considerable outlay for bridging, grading, new depot buildings, etc. In reference to the system and management of "the Green Line," referred to in the Report of the President, the Superintendent says:

Previous to the present arrangement, freight between distant points—between Louisville, Ky., and Augusta, Ga., for instance—was transferred from the Cars of one Road to the Cars of the Connecting Road at the terminus of each Road. At Nashville, Chattanooga and Atlanta, each Company using its own Cars exclusively on its own Road, required three transfers between Louisville and Augusta, or four transfers between St. Louis and Augusta.

This system was found to be very expensive to the Railroad Companies and damaging to shippers in direct loss and in delay of freight.

To obviate this loss and delay to both shippers and the Railroad Companies, the present system of running Through Cars, and of painting them green, was adopted, which is nothing more nor less than the following arrangement and agreement:

Each Road is assessed for Cars pro rata, according to the volume of its Through Western business. These Cars are appropriated to this Through business exclusively, and to insure certainty and regularity in the service they are all painted green.

An Agent is appointed and paid jointly (in proportion to revenue received) by all the Roads, who keeps at Atlanta the mileage account of these cars. He receives detailed reports from the officers of each Road of the mileage made over their respective Roads by cars in the "Green Line" belonging to other Roads. At the close of each month this Central Agent balances the mileage account of each Road, with such checks as to do exact justice to each Company in the settlement of the mileage accounts. As remarked, it is intended that each Road should put in cars in proportion to this Western business passing over the respective Roads; but this is not always done. For instance, at present the Nashville and Chattanooga Railroad has 165 cars in the Green Line; the Western and Atlantic Railroad 250; while the Georgia Railroad has only 38. At present some of the Roads have in the Line less than their proportion, while others have in the Line a greater number of cars than their proportion; but this is equalized and made just by the balancing of the mileage accounts at the close of each month.

There are fifteen Roads running cars under the Green Line system.

The Tariffs for Freight under this arrangement are considered and agreed to by the officers of the different Companies, just as they were when the freight was transferred at the terminus of each Road, and the whole revenue derived divided exactly pro rata per mile between the Roads over which the freight passes.

This line is unlike most of the fast Freight Lines in the country, in this, that there is no private interest in any way connected with it, but it is conducted exclusively for the interest and profit of the Railroad Companies furnishing the cars.

The arrangement has proven eminently satisfactory to both shippers and Railroad Companies, and must continue to prove profitable to both in lessening losses and preventing delays.

The following is a condensed statement of the condition of the Georgia Railroad and Banking Company on the 30th day of March, 1872:

The road and its outfit		$4,156,000 00
Real estate		116,458 61
Banking house and lot		35,000 00

President.—JOHN P. KING.

Directors.—E. E. Jones, Geo. T. Jackson, Edward R. Ware, James S. Hamilton, Antonie Poullain, M. P. Stovall, James W. Davies, D E Butler, L. M. Hill, Wm. M. Reese, Thos. J. Burney, George Hillyer, Josiah Sibley, John Davison, Stevens Thomas, Wm. W. Clark.

Superintendent.—E. W. COLE.

Treasurer.—J. MILLIGAN.

☞ The Philadelphia *Ledger* of 17th inst., reports the net anthracite coal tonnage for the week ending on the 8th inst., from all sources, at 454,411 tons, and for the year 7,622,945 tons, against 3,-200,784 tons to the same date last year, being an increase in the tonnage of anthracite coal of 4,-432,161 tons. The production of bituminous coal for the week was 62,444 tons, and for the year 989,679 tons, against 888,939 tons to the corresponding time last year—an increase of 100,740 tons. The total production of all kinds of coal for the week was 516,855 tons, and for the year 8,622,624 tons, against 4,089,723 tons to corresponding time last year, showing an increase of 4,-532,901 tons.

☞ The Washington, Cincinnati and St. Louis (narrow gauge) Railway was formally organized at Luray, Page Co., Va., on the 19th inst., by the election of a board of directors with Hon. P. B. Borst as President. The road is to run from Washington city, through Virginia and West Virginia, thence westward to St. Louis. It will pass through one of the grandest agricultural, iron and coal regions on this continent. The charter of the road, which was granted by the Virginia Legislature last winter, is one of most favorable provisions. The enterprise has met with a most favorable reception from the people of Virginia and West Virginia along the line of its contemplated route.

☞ Two sets of engineers are now engaged in surveying the route of the Baltimore and Drum Point Railroad. One party is running a line from Rutland to Crownsville, in Anne Arundel Co., Md., and the other from Davidsonville to a point near Millersville. The latter route is near the line run by the late Col. Hughes.

☞ Judge Sargent having dissolved the injunction restraining the directors of the Nashua and Rochester Railroad from collecting subscriptions and transacting business, contracts for building the road will be closed at once and ground broken.

☞ Henry Colony has been elected president and E. Hatch clerk of the Manchester and Keene (N. H.) Railroad. It is expected the work of constructing the road will soon be commenced.

Hanover Branch Railroad.

The annual report of this company, whose road, extending from the Northern Central Railway west to Hanover, Pa., is 12¼ miles long, is a very good statement of what can be done with a short local line, with careful and honest management. The capital account gives the cost of road, real estate, rolling stock, etc., at $272,868 50, which is at the rate $21,830 per mile. The company owns, besides material, etc., $36,000 in the stocks and bonds of connecting roads. Its capital stock amounts to $116,850, and there is no bonded debt, that having been paid out of the profits, which stand recorded in capital account, at $229,615 13. The following is a statement of the operations of the last fiscal year, ending March 31, 1872:

RECEIPTS.

From through freight		$39,790 68
" local freight		1,228 42
" passengers		18,597 10
" Adams Express Company		333 36
" United States mails		650 00
" interest on loans		1,727 69
" rents		430 66
" materials sold		6,428 98
Earnings of the Hanover Branch Railroad proper		$69,187 48
To which is to be added receipts—		
For working Gettysburg Railroad	$12,371 54	
For working Littlestown Railroad	2,665 20	
		15,036 75
Total receipts		$84,224 23
The expenditures were—		
Transportation	$36,750 31	
Maintenance of road and buildings	11,850 33	
Taxes on dividends and U. S. taxes	3,332 04	
Contingencies, office expenses, &c	638 86	
General superintendent	600 00	
Salaries and expenses of board	1,228 00	
		54,399 54
Balance		$29,824 69
Balance, in treasury from last year		36,834 24
Total		$66,708 93

The expenses were about 64 per cent. of the gross receipts, and the net earnings were equivalent to 25 per cent. of the capital stock. A ten per cent. dividend was made, half as much was expended for new construction, rolling stock and other additions to the property, and an investment equal to about 20 per cent. was made in the stock and bonds of the connecting railroads, though part of this came from a previous year's balance. Altogether the stockholders should be very well satisfied with their property. The connecting roads which this company is assisting are the Frederick and Pennsylvania Line, which is an extension of its leased Littlestown Railroad from Littlestown (two or three miles from the Maryland line), southwestward to Frederick, Md., about 30 miles, and the Bachman Valley Railroad, from a point on its line southward 13 miles to Ore Bank, Md., through hematite iron ore deposits.

Florida Ship Canal.

A Ship Canal across the peninsula of Florida is proposed. The route is up the St. John's river 127 miles, then up the Ocklawaha river 60 miles. To this point a ship canal for the distance of 40 miles must be cut through the swamps to the Amaxara river, at a spot 35 miles from its mouth, where it empties into the Gulf of Mexico, near Cedar Keys. By this route 650 miles will be saved on the voyage between the mouth of Mississippi and the Atlantic ports. As the trade of 1871 between the ports on the Gulf of Mexico and those on the Atlantic coast amounted to 800,000 tons, it is believed a handsome revenue would be derived from the proposed canal.

Delaware and Hudson Canal.

The Board of Managers herewith submit to the stockholders the annual statement of the business of the company for the year ending December 31, 1871, showing a net profit of $1,665,622 78, or a fraction over 11 per cent. on the capital stock.

At the date of the last annual meeting the operations of the company had been for some months suspended by a general strike in the mining region. This strike continued until the 20th day of May, when the men accepted the reasonable terms offered them by us, and work was resumed.

Notwithstanding the loss of nearly one-half of the year by this interruption, our production for the season was 2,011,133 tons, being only a very little short of that of 1870.

Before the end of 1871, it became apparent that the productive ability of the various coal companies was greater than the current demand. The market price had subsequently begun to show symptoms of weakness, when the occurrence of the great fire in Chicago, causing a general depression in trade, precipitated the decline, and the season closed with large stocks, a light demand, and a very gloomy outlook for the business of 1872. There are, as yet, no indications of a recovery in prices. Coal is now relatively lower than any other important article of general consumption; and in view of the large and increasing capacity for production and transportation, there is no reason to expect any advance during the present year. The low prices which now rule will, however, extend and stimulate consumption, and so gradually bring about a more satisfactory state of things in our branch of trade. Meanwhile we must aim, by an increased volume of business, to make up for the loss occasioned by the fall in price, and thus keep ourselves in a position to reap the sure and not distant harvest when consumption shall have again overtaken the ability to produce.

On the 1st day of May last this company completed an arrangement for the perpetual lease of the property of the Rensselaer and Saratoga Railroad Company. By the terms of the lease we are to pay the interest on the funded debt of the Rensselaer and Saratoga Company, and after 1871, eight per cent. on its stock. The experience of the past year has abundantly satisfied the Board that this lease will prove to be a good one for our company, both directly in the income from the leased property, and indirectly in furnishing a greatly extended and profitable market for the sale of our coal.

During the past year the branch road from Nineveh to Susquehanna, known as the Lackawanna and Susquehanna Railroad, has been constructed, by which the distance between our mines and the Northern and Eastern markets has been shortened about 20 miles. A third rail has also been laid on the Albany and Susquehanna road for the use of narrow gauge cars, and with a view to the ultimate abandonment of the wider and more expensive gauge. A greatly increased traffic has already resulted from these improvements, exceeding our best hopes, and is is now more than ever evident that the acquisition of the Albany and Susquehanna road will prove of the highest permanent value in its bearing on the success of our company.

It is hoped that arrangements may soon be completed for the extension of the Rensselaer and Saratoga line of road along the west short of Lake Champlain to connect with the roads leading into Montreal. This will secure for us not only a large market for coal, but also profitable return freights of iron ore and lumber for our cars.

The President of the company, Mr. Thomas Dickson, has been for some months absent from the country. His return, which will be warmly welcomed by all interested in the company, is expected in the course of the coming summer. By order of the Board, GEO. TALBOT OLYPHANT, President pro-tem.

Statement of the business of the Delaware and Hudson Canal Company, for the year ending December 31, 1871:

To coal on hand January 1, 1871	$372,831 00
To coal purchased	810,741 85
To mining coal	2,619,902 68
To R. R. transportation and repairs	786,818 81
To freight on coal on canal	966,405 82
To canal expenses, repairs, etc	280,611 53
To Rondout expenses	151,615 76
To freight of coal via Erie Railway	895,448 17
To harbor and yard expenses	118,690 16
To salaries, rent, law expenses and current expenses at N. Y. office	185,911 60
To Government and State taxes	239,282 50
To interest	434,562 90
To balance	1,665,622 78
	$9,028,410 56
By sales of coal to Dec. 31, 1871	$7,604,456 10
By canal tolls collected	111,361 38
By miscellaneous profits	670,580 82
By coal on hand December 31, 1871, at Honesdale, on line of canal, Rondout and New York	642,042 26
	$9,028,440 56

Condensed balance sheet Delaware and Hudson Canal Company, January 1, 1872:

Cost of canal	$6,339,210 49
Cost of railroad and equipment	4,533,857 68
Cost of Lackawanna and Susq. R.R.	975,632 82
Cost of opening mines and improvements	1,285,332 71
Cost of mine fixtures and equipment	246,682 85
Cost of telegraph lines	12,000 00
Cost of real estate	5,918,831 82
Cost of boats and barges	942,592 04
Cost of coal yards and fixtures, tools, implements, etc	195 774 11
Supplies on hand	413,035 89
Advances to business, 1872	266,984 27
Miscellaneous assets	3,310,085 73
Cash assets, notes receivable, etc., deducting liabilities	1,028,130 03
Coal on hand	688,189 89
	$26,156,839 83
Capital stock	$15,000,000 00
Funded debt	8,491,000 00
*Profit and loss	2,665,839 83
	$26,156,339 83

*Dividends payable February 1, 1872, $750,000 (not declared at date of this report, and since paid), to be deducted.

Statement of tolls received on the Delaware and Hudson Canal and Railroad in each year since the completion of the works:

1830	$16,422	1851	$158,441
1831	20,554	1852	293,174
1832	28,717	1853	378,479
1833	37,004	1854	587,849
1834	36,946	1855	652.362
1835	41,976	1856	583,737
1836	45,154	1857	435,198
1837	44,832	1858	307 698
1838	40,828	1859	311,597
1839	40,095	1860	397,677
1840	35,450	1861	367 963
1841	39,888	1862	316,376
1842	33,894	1863	954 822
1843	30,996	1864	1,213 570
1844	33 525	1865	201,679
1845	25,880	1866	118,482
1846	26,068	1867	96,530
1847	38,971	1868	89,846
1848	46,548	1869	110,172
1849	34,817	1870	110,258
1850	97,990	1871	123,886
		Total	$8,604,824

Board of Managers: Charles N. Talbot, Edward J. Woolsey, George Talbot Olyphant, Abiel A. Low, Robert Lenox Kennedy, James M. Halsted, Le Grand B. Cannon, James R. Taylor, Thomas Dickson, John Jacob Astor, Thomas Cornell, W. J. Hoppin, Isaac N. Seymour.

President—Thomas Dickson, Scranton, Pa.
Treasurer—Charles P. Hartt, New York city.
Secretary—Daniel Wilson, New York city.
Sales Agent—James C. Hartt, New York city.

General Superintendent—Coe F. Young, Honesdale, Pa.; Superintendent of Coal Department—E. W. Western, Providence, Pa.; Superintendent of Railroad Department—R. Manville, Carbondale, Pa.; Superintendent of Canal Department—Asher M. Atkinson, Honesdale, Pa.; Sales Agent Southern and Western Departments—Joseph J. Albright, Scranton, Pa.

Railroads of Ohio.

The resignation of Gen. George B. Wright, and the appointment in his place of the Hon. R. D. Harrison, as Commissioner of Railroads and Telegraphs of the State of Ohio, took place late in October, 1871—just about the time the Annual Report of the Commissioner was expected to be published. This event resulted in an unanticipated delay in its publication; and the subsequent and more recent death of the successor of Gen. Wright has evidently had the effect of delaying the operations of the department over which these gentlemen successively presided. General Wright's resignation was the consequence of his election to the Vice-Presidency of the Atlantic and Great Western Railway Company as re-organized.

The incident drawbacks of such a condition of the department are very apparent in the report before us, but are natural, and such as might easily be anticipated, but not so easily provided against. It requires considerable experience, let alone natural tact, to conduct the intricate machinery of the office. Gen'l W. was the proper man to organize such machinery; and when his successor came into office he could but continue the processes adopted by the organizer of the department in question. And so he did, with great credit to himself; and in his death the public, interested in internal commerce, lost a faithful and efficient representative.

The report recently published, covering a respectably sized volume, in consequence of the difficulties above represented, is not therefore what it would have been had no changes been made in the department. We find also that several important companies have failed to comply with the law establishing the department, and have sent in very bare, inadequate, and, in some instances, faithless summaries of their affairs. It is impossible, however, for us to go behind or after the figures given in the Report (even when our information is more complete), and hence the table which accompanies these remarks is simply a codification of what had been accepted and acknowledged by the official authorities.

We have not the name of the successor of the late Mr. Harrison; but we must say that in the compilation of the statistics for the official year ending June 30, 1872, we hope for not only a continuance of the form of compilation adopted by his predecessors, but also for a gradual enlargement of the several chapters in railroad economy, and finance, to proportions adequate to the proper representation of the grand subject he has to treat upon.

Ohio Falls Car Company.

The great car works at Jeffersonville, Indiana, which suffered a disastrous conflagration on the 20th of March last, is now rapidly undergoing the process of rebuilding, much to the gratification of the people of that town. The stanch and durable brick buildings, which are fast assuming shape under the handiwork of the busy bricklayers, is a sight at once enchanting to all who love the prosperity of the town and vicinity. The new car-works will not have any resemblance whatever to the old car-works; the buildings will be thirty in number, and in their arrangement will be entirely different to those of old. The walls of the "hardwood" machine shop are all up, and the roof is being put on. Three freight-erecting shops have already been commenced and the iron machine-shop was commenced last Monday. The bricklaying work of the latter is expected to be completed by Saturday night, ready for the roofing. The foundry is being erected just adjoining the eastern limits of the car-works grounds, four hundred feet back from the front fence. It will be the largest foundry west of the Allegheny mountains. President Sprague expects to commence building freight cars in August. The following is a list of the buildings (all of which are to be fireproof which will comprise the new car-works when they are rebuilt: Large wood machine-shop, 230 by 82½; small wood machine shop, 108 by 37. The first is intended for working the heavy lumber, the second for light material; blacksmith shop, 200 by 90; iron machine shop, 110 by 82; foundry, 822 by 88; wheel and axle shop, 62 by 55; truck house, 70 by 35; three erecting-shops, respectively 126, 96 and 111 feet long, and 47½ feet wide. Two erecting-shops, respectively 105 and 140 feet long, by 77 feet wide; machine-shop, 140 by 60; cabinet-shop, 140 by 75. To this list should be added three sets of engine and boiler-rooms, the pattern loft and shop, and various storehouses. The large wood machine shop is being roofed in, the three freight-erecting shops, foundry, engine and boiler-rooms, in connection with the wood machine shop, are in various stages of construction.

Canada Southern Railway.

The managers are pushing the work on their road, and will have the entire line between Buffalo and the Detroit river completed and in operation during the present year. The larger portion of the road has been graded, 9,000 tons of iron are already on the ground, and track laying will be commenced at once. A contract has also been made with J. S. Casement, the well known railroad builder, who undertakes the construction within four months of a road from Toledo to the western terminus of the Canada Southern at Amherstburg. This link will form the connection between the Canada Southern and Toledo, Wabash and Western roads, and shorten the distance between Buffalo and Toledo 23 miles. The road will give an outlet to Toledo for a large amount of freight which the Wabash Road brings to that place, and has in the past been detained there during the winter for want of railway facilities. When finished, the road will form the most direct route from Buffalo to Chicago, with no grades above 15 feet to the mile. At Chicago the road will connect with the Chicago, Rock Island and Pacific, which is also represented in direction of the Canada Southern Company. The managers of the road anticipate that the easy grades of road and shorter distance to be traversed will have an important influence in cheapening freights between the Atlantic and the Great West.—*Railroad Record.*

Safe and Profitable!

THE

CANADA SOUTHERN

First Mortgage Sinking Fund 30 Years

7 PER CT. GOLD BONDS

AT

90 AND ACCRUED INTEREST.

The Road runs from Buffalo to the Detroit River, and is the Eastern link in the new AIR LINE FROM BUFFALO TO CHICAGO, and has been under construction for about two years past by railroad men who have seen the necessity for a STEEL RAIL, LOW GRADE, SHORT ROUTE between the great railroad systems which diverge from Chicago, Toledo and Buffalo.

Among the builders of the road, by whose cash subscriptions 220 miles (out of 290) have already been graded, bridged and made ready for the superstructure, a large part of the steel rails bought, all of the materials for the stations and a part of the equipment purchased, are:

MILTON COURTRIGHT, JOHN F. TRACY, DAVID DOWS, WM. L. SCOTT, HENRY H. FARNHAM, R. A. FORSYTH, HENRY PORTER, JOHN M. BURKE, M. L. SYKES, Jr., B. F. ALLEN, all directors, either in the Chicago and North West or the Chicago, Rock Island and Pacific; GEO. OPDYKE of the Midland Road; JOHN B. ALLEN, SIDNEY DILLON, DANIEL DREW, J. S. CASEMENT, J. & J. CASEY, O. S. CHAPMAN, JOHN ROSS, DAVID STEWART, and F. H. WINSTON.

THE ROAD will be

33 Miles Shorter than any other Road,

either BUILT or in contemplation between Buffalo and Chicago, and will also shorten the distance between Toledo and Buffalo 23 miles.

THE MAXIMUM GRADE on the entire line does not exceed FIFTEEN FEET to the mile—and Ninety-six per cent. of the road IS STRAIGHT.

THE ROAD WILL BE COMPLETED and in running order on or before Dec. 31 of this year.

The principal and interest of the bonds are payable either in New York, London, or Frankfort.

We confidently recommend the bonds to all classes of investors.

LEONARD, SHELDON & FOSTER,
No. 10 Wall-St.

NOTICE.

HAVING BECOME ASSOCIATED WITH Messrs. LEONARD, SHELDON & FOSTER in the Agency of the CANADA SOUTHERN RAILWAY CO., we offer the above named Bonds for sale.

After a thorough investigation, we recommend them to our friends and customers as a SURE AND RELIABLE INVESTMENT.

Pamphlets and all information furnished on application.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterick (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, June 22, 1872.

Stock Exchange and Money Market.

Money has been quite plenty, and rates have favored borrowers, throughout the week, closing with call loans quoted easy at 4@6, and choice to very good discounts at 6@8 per cent. per annum, on which basis all the current requirements of responsible borrowers have been promptly met, lenders having been generally quite liberal of aid. The city banks have been responding very readily to the calls of their customers. The market is assisted by free offers of private banking balances and by loans of London credits by the Canadian Banks. These loans and the success of one or two American negotiations abroad, have increased the supply of Exchange, and diminished the export demand for Gold. The latter has suddenly fallen off one-half, as compared with the previous four or five weeks, which is all the more remarkable in view of the extraordinary rush of pleasure travel to Europe, requiring, of course, a large amount of Exchange. The U. S. Sub-Treasury office again reduced its coin balance nearly 1½ millions and enlarged its currency over 1½ millions. The city banks added to their loan and discount average 1⅝ millions during the week, and increased their outstanding circulation slightly. The U. S. Sub-Treasury held a currency balance at the close of business on Tuesday of $8,264,867, and a coin reserve of $47,610,950.

The city banks, in their latest return, show an increase of $316,400 of legal tender notes with a decrease of $46,300 of specie, and an increase of $1,693,900 of deposits, also an addition of $1,651,100 to their loan and discount averages, and $16,800 to their item of circulation. The city bank exchanges, last week, averaged 96⅜, and thus far, this week, about 91 millions daily. The banks now hold $11,595,550 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $20,299,700, against $12,989,910 same time last year. The city bank deposits are now $228,995,300 against $243,276,150, week ending June 17, 1871. The legal tender reserve amounts to $55,424,500, against $72,178,964 same time last year. The circulation now stands at $27,519,300 against $30,662,098 same time last year. The loans are now $288,764,300 against $293,134,532 at this date last year.

The coin reserve of the city banks is now about 20¼ millions as against about 28⅞ millions on the 6th of January; the legal tender reserve is about 55½ millions against $46,616,000 on the statement of February 10th.

Government revenues have been yielding more satisfactorily in the way of excises, though moderately in that of customs. The excises yielded within the week about 3½ millions, and thus far since July 1, 1871, $125,340,776. The customs at the port of New York last week were $1,681,962; at the outports, equal to about $550,000 all in coin, or coin certificates.

Under the June programme of the Treasury Department, Government proposes to sell Gold, as follows: Thursday, June 27—Two Millions. And to buy in bonds as follows: Wednesday, June 26—Two Millions.

The Treasury Department, on Monday, controlled a coin reserve of $86,779,932, (including $24,729,000 represented by outstanding coin certificates) and a currency balance of $5,429,727.

Gold has been less active and less firm as to price. There has been less speculative inquiry noted. The customs demand is comparatively light, owing mainly to the amount of Merchandise now going into Bond to await the operation of the revised Tariff. The export drain is on a reduced scale.

The range of the price during the week has been from 113⅝@114⅜ and the closing quotation on Wednesday was 113⅝ against 114⅛ the preceding Wednesday. The specie outflow, last week, was $2,183,680. The Gold Exchange Bank clearances have averaged about 45⅞ millions per day during the week.

The specie exports from this port on Tuesday were only $80,000.

The customs demand for Gold last week, averaged $292 000 a day; thus far, this week, it has averaged $298,000 a day, or equal to a weekly aggregate of $1,788.000. The arrivals of specie from Europe, Havana and other foreign ports last week were $4,058, and since Jan. 1, 1872, $712,918, against $3,163,221 same time in 1871.

The total customs revenue of the Government, in coin, at this port, from July 1, 1871, has been $150,179,958 against $142,948,473 same time in the preceding fiscal year 1870-'71.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from July 1, 1871, to June 15, 1872, $76,201,623, against $85,245,611 same time in 1870-'71.

The export drain of specie was $2,183,680 last week, against $1,392,491 same week preceding year. The shipments since July 1, 1871, have been $55,702,165 against $78,604,732 same time in 1870-'71.

Foreign Exchange has been rather more freely offered and has been in quite moderate request at easier rates, closing dull. Bankers' sixty day bills on London closed on Wednesday at 109½@109¾; sight bills on London, 110¼@110½.

The produce exports from this port, week ending with June 18, were to the currency value of $4,395,843.

Government securities have met with a fair sale at generally firm prices. The offerings of the favorite issues have been on a very moderate scale. On Wednesday, government bought in $921,900 of Five-Twenties at 113 55@113 62, out of an aggregate offering of $3,104,750.

U. S. sixes of 1881 closed here on Wednesday of the current week at 119⅞@120; U. S. Five-Twenties of 1862, (other than the bonds called in) ex May coupon 114⅛@114⅜; U. S. Five-Twenties of 1864 at 114⅛@114⅜; U. S. Five-Twenties of 1865, 114¾@115; U. S. Five-Twenties of 1865 consolidated, 116⅜@116½; U. S. Five Twenties of 1867, 117⅜@117½; U. S. Five-Twenties of 1868, 117@117⅜ U. S. Ten-forties at 111¼@111⅜; U. S. Fives of 1881 (Funding Loan) 112⅛@113; Six per cent. currency bonds, 114⅛@114⅜.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	June 5.	June 12.	June 19.
Consols	92½	92⅜	92½
U. S. 5-20's of 1862..	90½	90¾	91
U. S. 5-20s, 1865	91½	91¾	91⅞
" 1867	93½	93¾	91⅜
" 10-40s	89½	89½	89¼
New Fives of 1881...	89¾	89¾	89¾
Erie.	50⅛	48½	42¾

State bonds have been quite moderately sought after at variable and less buoyant prices.

There has been a good investment inquiry noted for the most popular of the Railway mortgage loans at well supported prices. Central Pacific Sixes have been in fair request at 105@105¼. Chesapeake and Ohio have been in good demand at 94 per cent. and accrued interest.

Railway and Miscellaneous share property has been much less confidently dealt in, and values have been quoted lower, decidedly so in the instances of Erie shares, under a pressure to realize, particularly on speculative account. On Wednesday of this week, Erie went down to 50⅞, and up again to 55.

In the Metal line business has shown less animation. Scotch Pig-Iron is depressed, owing to the large arrivals; Glengarnock, $47, without sales; American Pig is firm at $50@$52 for No. 1. In Old Rails, 1,000 tons sold on private terms. English Rails are unchanged in price. Pig-lead is steadily held with a quiet market. Pig Tin has has been very dull at 36¾c.@37c., gold, for Straits. Tin Plates have been in moderate demand at steady figures. Sales embrace 500 boxes Charcoal at $13 25, gold; 500 boxes Coke, 14x20, at $12 25, gold. Ingot Copper has been quite active and prices have advanced; sales foot up 1,000,000 lbs. at 33½c.@34c., cash, and 34c.@34½c. for forward delivery; also, 50,000 tons English Best at 32½c @33c. Spelter is quiet at 7c.@7½c., gold.

General business has been moderately active in the leading kinds of domestic produce. Flour, Wheat, Corn, Oats, Hay, Butter and Cheese have been quoted cheaper, Pork and Lard steadier. Tobacco, Wool and Hops firm. Middling upland cotton closed on Wednesday at 26¼ cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,648,457 bales, against 3,840,858 bales same time in the preceding year; exports 1,885,251 bales against 3,006,657 bales in the previous year; stock at the ports at latest dates, 166,917 bales against 237,914, bales same date 1871.

At the Live Stock Markets, Beeves have been in moderate request at 11½@14 cts.; Veals at 6@9½ cts.; Sheep at 5@7¼; Lambs 9@13 cts.; Swine, dull at 4½@4¾ cts. per lb., all live weight. The week's receipts were 8,050 Beeves, 3,248 Veal Calves, 21,509 Sheep and Lambs; and 37,962 Swine.

Foreign goods have been less sought after at about former prices. The week's imports of foreign goods reached the amount of $8,528,534 including $1,551,820 of dry goods.

Ocean freights have been moderately active, with the main business in the line of Grain engagements but at easier rates.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ Passenger trains have commenced running into Cincinnati over the Cincinnati and Baltimore Railroad, which is the new road through Mill Creek Valley just completed for the use of the Marietta and Cincinnati and Baltimore and Ohio Railroads.

☞ The production of petroleum for the month of May, as reported by the Titusville (Pa.) *Herald*, reached 568,695 bbls. The total shipments for the month were 509,286 bbls. of 42 gallons each.

☞ The Coal-Gas Tax imposed by the Act of Congress of June 30th, 1864, and amendatory acts, has been repealed. After August 1st, 1872, no tax will be imposed on gas made of coal, wholly or in part, or of any other material.

☞ E. S. Nutter of Concord has been elected President, Josiah Carpenter of Pittsfield Treasurer, and George R. Fowler of Concord Clerk of the Manchester and North Weare Railroad Company.

☞ The British Government has agreed to subscribe $12,500,000 to the projected Canada Pacific Railroad.

☞ George S. Richardson has been elected President, and Thomas D. Purnell, Treasurer, of the Worcester (Md.) Railroad Company.

HARVEY FISK. A. S. HATCH.

☞ FISK & HATCH, BANKERS,
No. 5 NASSAU ST., New York.

THE CHESAPEAKE AND OHIO RAILROAD, extending from the Chesapeake Bay to the Ohio River, and connecting at its eastern terminus with European and coastwise lines of steamers, and at the western termini with 12,000 miles of inland river routes, as well as the whole railroad saystem of the West, Northwest and Southwest, 30,000 miles in extent, is now nearly finished, and within the present year will be prepared for extensive business in the transportation of products between the principal cities at the West and the Atlantic coast cities, for which ITS SHORT LINE AND LOW GRADES RENDER IT PECULIARLY FAVORABLE. It also affords a new outlet for a large and superior agricultural territory, and opens to market the richest coal and iron deposits on this Continent besides traversing a beautiful and picturesque country abounding in medicinal Springs and Summer resorts.

We have for sale on behalf of the Company, and recommend as a substantial and secure investment, the remainder of their

SIX PER CENT. GOLD BONDS.

Secured by mortgage on the whole railroad line, equipment, franchises, &c. Principal redeemable in coin, 1899; interest payable also in Gold, May and November; denominations $1,000, $500, and $100, coupon or registered. Price, 94 and accrued interest. Full information furnished on application.

FISK & HATCH.

Cairo and Fulton Railroad.

Col. Hughes, assistant engineer of the Cairo and Fulton railroad, was in our town a few days since. He is surveying the route of the road south of Little Rock, preparatory to its permanent location. We understand that on Thursday night the corps pitched their tents at Easley's about eleven miles northeast of this place, and that they will be through here next week. Col. Hughes speaks confidently of the early completion of the road. Everything looks favorably for its location through this place, and the early completion of the Cairo and Fulton railroad may now be regarded as a fixed fact.—*Arkadelphia Standard, June 8.*

☞ The Indiana and Ohio divisions of the Baltimore and Ohio Railroad have been consolidated, and Mr. C. J. Bates, superintendent of the divisions has established his headquarters at Tiffin, Ohio, where they will remain.

☞ The Chicago, Clinton and Dubuque Railroad has been completed to Bellevue, 40 miles below Dubuque. J. K. Graves, Esq., is president of the company.

☞ Work on the new branch of the Rensselaer and Saratoga Railroad, across Green Island, is rapidly progressing. The grading is finished, and the track is laid for a portion of the distance.

☞ The last spike was driven on the Baltimore and Potomac Railroad at Huntington, Md., on the 10th inst. This completes the road between Huntington and Pope's Creek.

☞ The traffic receipts of the European and North American Railway for the month of May, 1872, were $29,779 29, against $25,818 69 in May, 1871, and $19,189 59 in May, 1870.

THE

St. Joseph & Denver City

RAILROAD COMPANY'S

First Mortgage Bonds

are being absorbed by an increasing demand for them.

Secured as they are by a first mortgage on the Road, Land Grant, Franchise and Equipments, combined in one mortgage, they command at once a ready market.

A Liberal Sinking Fund provided in the Mortgage Deed must advance the price upon the closing of the loan. Principal and interest payable in *gold*. Interest at eight (8) per cent. per annum. Payable, semi-annually, free of tax. Principal in thirty years. Denominations, $1,000, $500 and $100, Coupon or Registered.

Price 97½ and accrued interest in currency, from February 15, 1872.

Maps, circulars, documents and information furnished.

Trustees, Farmers' Loan and rust Company of New York.

Can now be had through the principal Banks and Bankers throughout the country, and from the undersigned, who unhesitatingly recommend them.

TANNER & CO.,

BANKERS,

NO. 11 WALL STREET.

☞ The estimated earnings of the Erie Railway for the week ending June 15, 1872, were $412,947; against $403,441 for the corresponding period of 1871—an increase of $9,506. Total earnings since April 1, 1872, $4,104,747—an increase over the same time in 1871 of $658,173.

☞ A dividend of four cent. for the past six months will be paid to the stockholders of the Oil Creek and Allegheny River Railroad Company by Geo. P. Little, at Room No. 8, Pennsylvania Railroad Buiding, Philadelphia, Pa., on and after July 1.

☞ Dividends of 3½ per cent. will be paid to the stockholders of the Albany and Susquehanna and Rensselaer and Saratoga Railroad Companies on and after July 1st, at the National Bank of Commerce, New York.

☞ Messrs. MEAD & CLARK, having placed the first mortgage bonds of the Wallkill Valley Railroad Company, are now advertising for sale the second mortgages at 80 and accrued interest.

☞ The West Troy Bridge Company will be ready to receive proposals for building the bridge on or before July 1st.

Journal of Railroad Law.

RAILROAD COMPANIES—PRECAUTIONS TO BE TAKEN BY PERSONS AT CROSSINGS.

The case of Gorton *vs.* The Erie Railway Company (45 N. Y., 660,) was an action brought to recover for personal injuries sustained by the plaintiff, as well as injuries to his property by reason of having been struck down by one of the defendant's locomotives while he was attempting to cross the defendant's railroad in the town of Corning, Steuben county. The plaintiff was familiar with the crossing, and knew that a train was liable to pass at that time. The plaintiff, although the view is uninterrupted for a long distance, did not look up and down the track; had he done so, he might have avoided the accident. Evidence was given showing that no bell was rung, nor whistle sounded, as the train approached the crossing.

The Circuit Court rendered a verdict for the plaintiff, which was affirmed by the General Term.

The following is the opinion of the Court delivered by—

ALLEN, J.—At the close of the evidence on the part of the plaintiff, the defendant moved that the plaintiff be non-suited, upon the ground that he was shown to have been negligent in approaching as well as in crossing the railroad track; that is, that the plaintiff was not wholly without fault, but that the injury was in part attributable to his own negligence and want of care. Evidence had been given tending very strongly to show that as the train of cars approached the road crossing the bell upon the locomotive was not rung or the whistle sounded, as required by statute, and that no signal of the approaching train was given by the persons in charge. In the absence of proof of any negligence or other fault on the part of the plaintiff contributing to the injury, this would have authorized a verdict for the plaintiff.

The omission to ring the bell, or sound the whistle, or give other signal, to warn persons who might be upon the highway, in the vicinity of the intersection of the railroad track with the public traveled road, of the approach of the train, was, *per se*, negligent, subjecting the defendant to liability for all damages that might accrue to any one by reason of such omission.

The highway crossed the railway at an acute angle, and the plaintiff was moving along the road and across the railroad in a south-easterly direction approaching the railroad from the north-west, and the colliding train of cars approached from the west, on the southernmost of the two railroad track. The course of the railroad at that point was in a direct line both east and west, and the plaintiff testified that when he got on to the track there was nothing to prevent him from looking both east and west; that is, there was nothing, as he approached and reached the railroad track to intercept or obstruct his view, or prevent his seeing the approaching train had he looked in that direction; that the space between the two tracks was three or four feet; that when he drove up to the rail (that is, to the north rail) he made no effort to look west to see whether a train was coming; that he did not try to look west at that time. Another of the witnesses testified that some years before he had come direct to the track when a train of cars going east had passed, and that he supposed he could have seen a mile up the road if he had looked, but he was not paying attention, and came near being caught.

Dr. Graves, the attending physician, and a witness for the plaintiff, had just crossed the railroad from the south, and was sitting in his wagon by the roadside, some twelve or fifteen rods northwesterly from the railroad crossing when plaintiff passed him going toward the crossing. He had seen the coming train as he approached the railroad from the south, and he saw it as he was crossing the railroad, and it was then just going into or coming out of a bridge some distance from the road crossing. There was no doubt upon the evidence given by the plaintiff and his witnesses, that had he looked to the west, as he drew near the railroad, he could have seen the train of cars approaching from the west, and avoided the collision. There was no proof of, or attempt to prove any obstruction or hindrance to the view westward along the line of the road, or that a train of cars coming from that direction was not in plain sight for a long distance. Dr. Graves, and a Mr. Goff, with whom the Doctor was conversing when the plaintiff passed them on the road, saw the train from their position on the road before it reached the crossing, and testified that it was in sight from Rowley's crossing, which is some distance west of the crossing at which the plaintiff received the injury complained of. Mr. Goff, who lives at that place, testified that a person near to the western bound (that is the northern) track, could see the track westward to the culvert bridge; that he could see up a mile and a quarter, he thought, and no trouble about it. It was the clear duty of the plaintiff as he came near and upon the railroad track, to use all proper precautions to avoid injury, and the least that he could do was to look in both directions.

It is not imposing an onerous duty upon the traveler crossing a railroad in broad daylight, over which trains of cars were frequently passing, and are liable to pass at any time, to make use of the most common and lowest degree of observation and care, and to cast his eyes in both directions, and in every direction, from which danger may be apprehended. He may not shut his eyes and stop his ears, and rush on regardless of the peril, and hold the railroad company as the insurer of his life, not only against the acts of its servants, but against his own suicidal negligence. The doctrine has been declared by this Court, and reaffirmed that a traveller approaching a railroad track is bound to use his eyes and ears so far as there is an opportunity, and when, by the use of those senses, danger may be avoided, notwithstanding the neglect of the railroad servants to give signals, the omission of the plaintiff to use his senses and avoid the danger is concurring negligence entitling the defendant to a non-suit. (Ernst *vs.* Hud. R. R. R. Co., 35 N. Y., 9 S. C. 39 N. Y. 61.) There was no conflicting evidence upon this point. There was a conflict as to the existence of objects obstructing the view of a train approaching from the west, at points on the highway, between the railroad and Goff's house, and up to within from two to four rods of the railroad; and the evidence upon that subject presented a fair question for the jury; but these obstacles, if they existed and hid from view the railroad and approaching trains to the extent claimed, did not relieve the plaintiff from the duty of looking for an eastward bound train at the first opportunity, but rather rendered a cautious approach to the crossing the more necessary. Upon the undisputed evidence, that if the plaintiff had looked to the west as he approached and reached the north track of the railroad, he could have seen the approaching train; and that he did not look, he should have been non-suited. This may be explained upon another trial, but upon this record the judgment should be reversed and a new trial granted.

Judgment reversed.

Richness of the Kanawha Valley.

The opportunities presented to the capitalist are always more or less numerous, but an opportunity to realize 100 to 200 per cent. on a legitimate investment is but seldom found. The Kanawha Valley, West Virginia, possesses mineral resources as yet undeveloped. There are to be found lime, coal, fire clay, and iron ore, together with ample railroad and water communication. It is claimed by those familiar with the subject that iron can there be manufactured five to ten dollars cheaper than anywhere else in the United States. The raw or uncoked coals of Kanawha have proved to be equal to any in the country for the manufacture of iron. They are hard, dry, splint coals, remarkably free from sulphur, and can be mined and delivered at a furnace (parties owning their own coal) at an actual cost of three to five cents per bushel, twenty-five bushels to the ton, according to location or furnace.

Iron ore can be transported also from the Alleghany ore region to Kanawha county at a cost (freight included) of less than $3 per ton, to which must be added a fair profit or royalty on the ores, if parties do not own their own mines, and thus the total cost would be about $3 50 per ton. About two tons of the ore make one of iron in practical furnace-working. These ores are very easily smelted, requiring less fuel than most ores, and much less than the hard ores of Lake Superior and Iron Mountain. The quality is also excellent, and the United States Government preferred it to any other for the manufacture of guns.

It is estimated that at these rates for ores and coal, iron can be made, at the most, for $15 per ton; and as iron is now worth $50 to $55 per ton in the market, there is left a large margin of profit after the payment of freight, &c.

It addition to the Alleghany ores, there are also fine deposits of ore in Kanawha, giving thirty-three to fifty per cent. to the ton, which would be valuable for mixing, and would also cost but very little. Good coal lands, conveniently located to the river and railroad, can be bought from $10 to $50 per acre.

Sites will be given to those who will erect furnaces, and $25,000 to $50,000 will be subscribed toward a furnace which shall cost $100,000. It is estimated that such a furnace could not fail to pay 100 per cent. on its cost the first year.

It may be asked why, if these things be, these people do not build these furnaces themselves? But unfortunately they have not the means, and although rich in lands and minerals they are poor in ready money, and therefore look to outside capital to develop the mineral riches by which they are surrounded.—*Boston Commercial Bulletin.*

☞ The Fredericksburg *Ledger* says that the latest rumor relating to the through line just completed between that place and Alexandria is that the contract between the Pennsylvania and Richmond Fredericksburg and Potomac Railroads is for a term of 15 years, and that the all-rail route will be used for night trains only, except during the winter months, when navigation of the Potomac is likely to be obstructed by ice.

Toledo, Wabash and Western Railway.

Kansas City has been called upon to consider, *seriatim*, the projected extension of the Toledo, Wabash and Western Railway from Moberly, its present western terminus in Missouri, to that point. At a recent meeting of its Board of Trade, Mr. Anderson, Vice-President of the Company, stated their desire to have a direct line to that point. From Moberly it would take about 125 miles of road, passing through Lafayette, Saline and Jackson counties, to reach that city. Col. Lamb, President of the Hannibal and Central Missouri Railroad (running from Hannibal to Moberly) urged the prosecution of the enterprise whether the Louisiana road be built or not. With the latter and the extension proposed, Kansas City would have two competing lines to the East and without it would have a direct Eastward connection, in any event, if a helping hand be given in favor of the extension, which the Toledo, Wabash and Western Company stood ready to build at once. The company ask of Jackson county the means to grade and fit the road for its iron: Says the *Times* (we condense):

"The Board of Trade and several gentlemen in the interests of the above company, have been in communication for some time in regard to the extension of the Toledo and Wabash Railway to Kansas City. The company would probably ask from Jackson county, to complete the road through it, $100 000. The difficulties in the way are that there are already two subscriptions for which the county stands pledged—$450,000 to the Louisiana road, and $300,000 to the Kansas City and Memphis road. * * * The former company have commenced and are pushing work rapidly. The affairs of the Memphis road remain in *statu quo*, nevertheless the subscription stands in the name of company. Such being the *facts*, the Board of Trade are to consider some other plan to aid the Toledo and Wabash enterprise. The county is in no condition to subscribe for any road, but townships to be benefitted might. Private subscriptions also might and should be obtained. If $100 000 are all that it required, some plan might be adopted to guarantee it. No one can deny the importance of the road."

Notwithstanding these discouragements, we have faith to believe that this important line, so vital to the interests of every mile along the line, will be extended as proposed. The sum called for from Jackson county, even supposing it is already down for a large sum, is not additionally enough to justify a wet blanket to be thrown over a project so beneficial. All the aid that may be subscribed for it will be amply repaid. The "Toledo and Wabash," it must be remembered, are already successfully operating 1,000 miles of road, and are abundantly able—as they profess to be willing—to iron, equip and operate the extension; and that, too, in a manner which will remunerate—although indirectly—all the local aid it seeks.—*Railway Review.*

Arkansas Central Railroad.

We again announce that work has been resumed on the Arkansas Central Railroad, and there will be no stoppage until the road is completed to White river. Col. Dorsey telegraphs that he will be here on Monday to pay off their indebtedness. Col. Gregg, of the Central road, sends cheering news to the friends of this enterprise. We were shown yesterday a telegram from him, from New York, saying that work would be vigorously resumed at once, and he predicted the cars would be running out to Palmer's station by the 1st of September next.—*Helena World.*

☞ A committee of the American Association of Railway Master Mechanics has reported that for packing stuffing boxes, hemp is more effective than soapstone dust, metal rings, or any other material. By the use of hemp no danger from fire is apprehended, as this substance will stand 500 degrees of heat.

☞ An iron steamer was launched at Wilmington, Del., on the 15th inst., by the Harlan Hollingsworth Company, for the Messrs. Morgan, of New York, designed for the Southern trade.

Notice to Contractors.

PROPOSALS will be received at the Office of the President of the Northeast Penna. Railroad Co., at Hatboro, Montgomery, Co., Pa., until June 29th, for furnishing materials for and building about 1,000 lineal feet of trestle work.

Also for laying seven (7) miles of track.

Specifications at the Office of the Engineer, F. H. Saylor, 530 Walnut street, Philada.

THE CINCINNATI & TERRE HAUTE
Railway Company,

Desirous of enlisting the attention of manufacturers to the advantage of locating manufacturing establishments upon the line of their Railway, will give to any Rolling Mill or Blast Furnace Company so locating forty (40) acres of ground for works, and the coal in one hundred (100) acres of Clay or Owen County, Indiana, block coal field; the ore from one hundred (100) acres of the Hardin, Pope or Massac County, Illinois, brown hematite beds, and agree to furnish them with all orders for merchant iron required for the Railway's use for a period of two years.

To any Railway Car Manufactory located upon its line, they will give twenty acres of ground required for works, the timber from one hundred acres of the best oak timbered land in Owen County, and an order for one thousand cars to commence work upon.

To any Car Wheel Foundry or Axle Forge, the necessary grounds for works, and liberal orders for their products in kind.

To all other manufacturing establishments ample facilities in the locating and successful prosecuting of their works.

Circulars descriptive of the manufacturing points upon the line of the Railway will be mailed to any address upon application to

SAMUEL FOX & CO.'S
Bessemer Steel Rails.

RAILROAD SECURITIES NEGOTIATED.

ENGINEER'S FIELD BOOK,
By **C. S. CROSS, Civil Engineer.**

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent **free by mail,** upon receipt of the price. For sale at this office. Price **$1.50.**

CAMP'S IMPROVED DUMPING CAR.

(Used by the American Dredging Company.)

RIGHTS FOR SALE BY

N. H. CAMP,

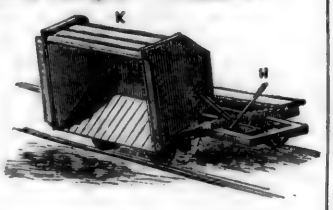

Fig. No. 1, Car Loaded. **TO DUMP THE CAR.** Fig. No. 2, Car Dumped.

The Brakeman seizes the lever H, and raises it, thus removing the step from under the box-support A, when the weight of the load causes the box to roll over to the position shown in Fig. 2.

To replace the box in readiness for another load.

The Brakeman, standing on the platform, reaches over, and grasping the corner of the box, pulls it back to its place.

Address, N. H. CAMP,
Care N. C. MILLER, 61 Broadway, New York City:
or HAWKINS, WILLARD & CO., 28 Market St., Chicago.

HAND'S IMPROVED DUMPING CART.

PATENTED APRIL 4th, 1871.

THE MOST PERFECT YET INVENTED.

Can be dumped by a single motion of one hand while you hold the horse with the other.

The tail-board being attached to the shafts, lifts of its own accord when the cart is dumped, as seen on the right of the engraving. As soon as the load is dumped all you have to do is to start the horse, and the cart will resume its proper position, as seen in the left of the engraving, hook itself and replace the tail-board, without any assistance of the driver whatever. The shafts are attached to the outside of the body, near the hubs, which gives the horse great control over the cart, and prevents the body from playing from side to side as they do when the shafts are pivoted underneath.

Manufactured and for Sale by **WILLIAM & HENRY HAND,**

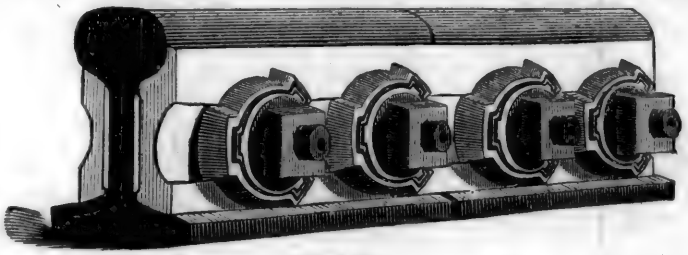
FISHER'S PATENT

Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

American Railroad Journal.

New York, Saturday, June 29, 1872.

Baltimore and Ohio Railroad.

The two cases of the State against the Baltimore and Ohio Railroad Company, decided by the Court of Appeals, as published in the court report on Saturday, involved not only the gold claim of the State for dividends on the preferred stock, but also the claim of the State for the arrears of the one-fifth of the passenger receipts on the Washington Branch road, which amounted to some $320,000.

The gold case being decided in favor of the railroad company, relieves it, as heretofore stated, of the payment of the $285,000 claimed by the State as the difference between currency and gold, and establishes the fact that the company is only obligated to pay the dividends on the State preferred stock in currency. The other decision was in favor of the State, reaffirming the former decision of the Court of Appeals and the judgment of the Superior Court, in favor of the State's claim for arrears of its one-fifth of the passenger receipts on the Washington Branch road.—*Balt. Sun.*

Denver and Rio Grande Railway.

The Denver and Rio Grande Railway was completed to Pueblo, Col., on the 19th inst., the last rail having been laid at 7 P. M. Freight and passengers for New Mexico will now go by railroad *via* Denver to Pueblo, saving over one hundred miles of transportation by wagon or coach. Another hundred miles of the road southward will be soon under contract. Arrangements are being perfected for its speedy completion to El Paso, where it will connect with a narrow gauge railroad to be built through the Mexican States of Chihuahua, Durango and Zacatecas to the City of Mexico, forming a continuous narrow gauge line of about two thousand miles.

JULY INVESTMENTS.

The Large Sales of Northern Pacific 7-30 Gold Bonds show their popularity with investors, and we recommend them to the public because of their ABSOLUTE SAFETY, both as a first-class Railroad Security and a Real Estate Mortgage on Lands worth twice the amount of the proposed Loan.

The Bonds have thirty years to run—payable, principal and interest, in Gold—exempt from United States Tax to the Holder—are a first and only mortgage on the Road and its earnings, and upon 50,000,000 acres of land—mainly agricultural, timbered and mineral.

The Bonds are issued in denominations of $100 to $10,000, Coupon and Registered, and are sold at par and interest in Currency.

The semi-annual Interest on the Registered Bonds, is paid with GOLD CHECKS, sent to the Post office address of the holder.

All marketable securities received in exchange.

Maps, pamphlets and full information will be furnished on application to Banks and Bankers, agents for the loan throughout the United States and Canada.

JAY COOKE & CO.,
New York, Philadelphia and Washington.

Montana Territory.

A correspondent writes from Stevensville, Montana Territory, under date of June 18, that the weather in Montana is beautiful and warm, and that the rivers and mountain streams are rapidly rising in consequence of the melting snow from the Sierras. The grain crops are looking finely, in fact everything betokens an abundant harvest and a prosperous season, which only needs, he adds, the rumble of the locomotives of the Northern Pacific Railroad through the Territory to render it complete.

Progress of Railway Construction in Arkansas.

Before the war Arkansas had only about forty miles of railroad in operation in the State. Now she has several important lines in an encouraging condition of progress, with prospects of an early completion. The Memphis and Little Rock Road (131 miles in length,) was finished about a year ago and is doing a handsome business. The Cairo and Fulton is graded over sixty miles, and forty miles of track laid from Little Rock, with the certainty of being finished by Fall to the point of intersection with the Iron Mountain Road, thus forming an unbroken line from Little Rock to St. Louis. The Little Rock and Fort Smith Road is in operation over 65 miles from Little Rock up the Arkansas Valley, and arrangements are now in progress for the completion of the entire line to Fort Smith by 1st of next January. The Arkansas Central is graded to a point several miles beyond the White river, and over twenty miles of track laid, with sufficient iron at Helena to lay forty miles more.

Having negotiated their first mortgage bonds in Europe, the company intend to push the work ahead with all possible despatch. When completed this will give Little Rock an important eastern connection with the rich agricultural districts of the White river region and the growing city of Helena.

The Little Rock, Pine Bluff and New Orleans Railroad is graded to Pine Bluff, a distance of 60 miles from the Mississippi river, and track-laying is now progressing at the rate of half a mile per day. Already thirty four miles have been laid and the iron purchased to secure its completion to Pine Bluff this Fall.

The Mississippi, Ouachita and Red River Railroad is graded about 70 miles west from the town of Chicot, and is in operation a distance of thirty-two miles, with trains running twice a day each way. The road is doing a good business, and during the last season an immense amount of cot-

ton passed over the road. The road will be completed to the Saline river in time for the Fall trade.

There are other projected roads now being located, and it is safe to assume that in two or three years Arkansas will have from six to eight hundred miles of road in operation in different sections of the State.

Chicago, Rock Island and Pacific Railroad.

The income of this company for the years ending March 31, 1871, and 1872, was as follows:

	1871.	1872.
From passengers	$1,713,123 16	$1,394,140 12

		2,173,883 00
Leaving a balance of		$997,652 13
Add balance of income account March 31, 1871		2,719,377 89
Total, as in Balance Sheet		$3,717,030 02

Passenger earnings, as compared with the previous year, show a decrease of $318,983 04, while the earnings from freight increased $190,100 05. The gross income show an increase of $94,510 70; with a decrease in expenditures of $454,796 20—making the increase in net income $548,706 90. The balance after payment of rent, interest and dividends, is $47,041 65 more than at the close of the previous year. The report says:

During the fiscal year ending March 31st, 1872, the operations of your road have been conducted wi h a good degree of regularity and success, the road-bed and track have been maintained in excellent condition, the equipment has been largely increased, and its efficiency improved. No serious injury to passengers, or large loss of property by accident has occurred, with the single exception of loss occasioned by the Chicago Fire. Passengers and freight have been promptly transported, and the net earnings show a fair increase compared with the previous year.

LAND GRANT.

The land commissioner reports sales of 13,-964.42 acres, realizing the sum of $107,692 86. $4,013 80 of the above have been received as a compromise on swamp lands, to which the company's title has never been fully established. The balance has averaged $8 65 per acre.

The policy heretofore adopted of selling in small tracts to actual settlers has been closely adhered to, and increased efforts have been made in advertising in English and German, to attract the attention of immigrants and others to the superior advantages claimed for the company's lands. $40.-000 derived from sales of lands, have been paid over to the Commissioners of the Sinking Fund, to be invested by them in bonds of the company, as directed by resolutions of the executive committee.

SINKING FUND.

The Commissioners of the Sinking Fund report that they hold securities for the final redemption of the Sinking Fund Bonds as follows:

197 bonds of the Chicago, Rock Island and Pacific Railroad Co., of $1,000 each, which have been fully registered on the books of the company in the name of the c mmissioners, and the coupons canceled	$197,000 00
24 bonds of the Peoria, Pekin & Jacksonville Railroad Company of $1 000 each	24,000 00
Cash on hand in Corn Exchange Bank	430 26
Making a total of	$221,430 26

BRANCHES.

During the past year the Des Moines, Indianola and Missouri Railroad has been completed from Des Moines to Indianola, a distance of twenty two miles, and has been in operation since last November.

Another branch, extending from Somerset, a point on the Indianola road, fifteen miles south of Des Moines, has been constructed to Wintersett, Madison County, a distance of twenty-six and a half miles, known as the Des Moines, Wintersett and Southwestern Railway. It is expected this line will be so far completed as to allow of running trains in May.

The right of way, grading, bridging, and ties for these roads were furnished from proceeds of taxes and private subscriptions, your company furnishing iron and laying the track, taking therefor the bonds of the companies, and a controlling interest in the stock, thus virtually becoming owner of the roads.

There has been expended, on account of construction of the above branch roads, the sum of $352,461 23.

These roads reach two important towns situated midway between your main line and the Burlington and Missouri River Railroad, and will command the traffic of two of the richest and best agricultural counties in Iowa.

The extension of the Washington Branch Railroad to Sigourney, has been vigorously prosecuted, and will be in operation about the middle of May. This extension is twenty-nine miles long, and has cost to date, $501,901 17.

CHICAGO AND SOUTHWESTERN RAILWAY.

It is well known that this company, by action of their board of directors, approved by vote of the stockholders, endorsed the bonds of the Chicago and Southwestern Railway Company to the extent of five millions of dollars.

It was believed this enterprise, designed to connect your line with Kansas and her system of railroads, leading West and South, would prove a valuable feeder to your main line, and help develop a large territory in Southern Iowa and Northern Missouri, as yet but partially supplied with railway facilities.

With the aid and encouragement thus given, the Chicago and Southwestern Railway Company constructed a railroad from Washington, Iowa, to the Missouri River, opposite Leavenworth, a distance of two hundred and sixty-nine miles, which was opened for traffic on the 9th of October.

Previous to that date, portions of the line when ready for use had been stocked, and operated by your company, the Chicago and Southwestern Company not having provided rolling stock.

Owing to various causes, prominent among which may be named, the want of bridge and railroad connections at Leavenworth, short crops caused by drought and insects through a considerable portion of the territory traversed by the road, and the derangement of business caused by the Chicago fire, the earnings of the line thus far have not equaled the expectations of the board.

It has been found necessary, in order to complete, equip and operate this line, to expend a large sum, about $500,000, in excess of the entire earnings, which has been taken from the surplus earnings of your main line, and charged to account of construction of Chicago and Southwestern Railway.

A considerable additional amount will yet be required to furnish side tracks, water and station accommodations, fencing, ballasting, etc, etc.

As settlements increase, towns and villages will spring up along the line, creating a demand for lumber and merchandise, which must be supplied mainly from Chicago and the towns on the Mississippi River. These towns in return will invite immigration, make large shipments of grain, live stock, etc., and this rapidly growing local traffic, together with the share of through business from Kansas and territories west, it is confidently believed, will soon enable the road to pay its own expenses, and ultimately repay in full the investments now being made to complete and carry on the work.

The Chicago and Southwestern Company are constructing a branch from their main line to Atchison, Kansas, twenty-nine miles in length, by which connections will be made with the Atchison, Topeka and Santa Fe Railroad, the Central Branch Union Pacific Railroad, and the Atchison and Nebraska Railroad.

This branch will doubtless prove a valuable feeder to the main line, and the Chicago and Southwestern Company expect to have it ready for service in June.

Parties interested in the different railroads centering in Atchison are negotiating a contract that will ensure the building of a bridge across the Missouri at an early day. Until completed, transfers will be made by steam ferry, already established.

The Kansas and Missouri bridge, a fine structure of iron, crossing the Missouri River opposite Fort Leavenworth, is nearly completed and will be ready for the passage of trains in April.

To connect the bridge with the system of railroads running to and through the city of Leavenworth, it was necessary to construct about two miles of railroad in the State of Kansas, known as the Fort Leavenworth Railroad. It is expected this will be in use in May.

The following amounts have been expended during the year, and charged to construction and equipment account:

Land and land damages	$22,719 68
New equipment	863,943 74
Grading, including masonry	50 130 06
New side tracks	35,664 10
Station buildings, shops and fixtures	32,312 40
Ballasting track with stone	17,644 00
New st'k feeding yards,(at Geneseo,)	16 348 75
New fences	53,425 13
New bridge and approaches, Rock Island	45,890 20
Indianola and Wintersett Railroads.	352,461 33
Sigourney Railroad	501,901 17
Fort Leavenworth Railroad	61,869 75
	$2,054,310 31

New equipment account includes cost of thirty-seven new engines, two sleeping coaches, and six hundred and ninety-three new freight cars of all classes.

The aggregate amount expended in the construction of branch roads as before specified, is $916,232 25, covering seventy-nine miles of road, or $11,597 88 per mile. One (the Indianola) has been in operation since the first of November; the others will be opened for traffic in May.

The expenditures on account of permanent improvements to roadway, additional side tracks, new buildings, and stone ballast, amount to $135,750 56.

The leading items of expenditures for repairs and renewals of track have been as follows:

257,330 ties	$111,696 57
4,074 iron rails, re-rolled	120,375 94
649 iron rails, new	53,938 02
237 steel-capped rails	23,581 43
146 Bessemer steel rails	11,614 45
194,300 lbs. railroad spike	8,467 46
276,900 lbs. fish bars and bolts	11,395 75
18,223 rails repaired in company's shops	14,920 28

During the year 54.86 miles of track were relaid with iron and steel. The company have laid in all 5,855 tons of Bessemer steel rails, and 348 tons of steel capped rails. The superintendent says "the Bessemer steel is doing great service. The steel capped rails have not in all cases proved as satisfactory." Owing to the increased demand and consequent large advance in the cost of steel rails, but a trifling addition was made during the past year. It is expected a considerable quantity will be laid the current season.

The company own of main and branch lines, 565 miles; and lease the Peoria and Bureau Valley Railroad, 46½ miles. There is of second track, 21 miles, and of side tracks, 114 miles—equivalent to a single track of 746½ miles.

The company owned at date of last report 145 locomotives; to which have been added by purchase during the year 25, and by construction in the company's shops 12—making a total of 182. The company have also 9 sleeping coaches, 51 day coaches, 6 baggage and passenger coaches (combined), 5 railway post office, 21 baggage, mail and express, 1 paymaster's, 2,358 box freight, 404 stock freight, 830 flat, 66 caboose and drovers', 2 pile driving, 1 wrecking, and 40 dumping gravel cars. There have been added during the year and cost charged to equipment account: by purchase, 400 box cars; and by building in company's shops, 237 box and stock cars, 50 flats, and 2 sleeping coaches. The company lost by the Chicago fire, 3 sleeping and 8 day coaches, 5 baggage and mail and 6 freight cars. There have been built in the company's shops, to fill the place of those destroyed by the Chicago fire and otherwise, and their cost charged to repairs: 7 passenger coaches, 4 U. S. postal, 4 baggage and express, 1 combined passenger and baggage, and 74 freight cars of all classes. Thirty-six cars have had Miller's Platform and Buffer applied.

The number of miles run by locomotives on passenger trains was 980,001; on freight trains, 2,588,184; on wood, construction and gravel trains, 305,371—total 3,873,556, at an average cost per mile run for repairs, oil, waste, fuel and wages of engineers, firemen and wipers of 18.99 cents. Earnings per mile run by passenger and freight trains, $1 63. Expenses per mile run by all trains, $0 76.

The number of passengers transported during the year was 708,448, of which, 698,548 were first-class, 7,678 second-class, and 2,217 emigrant. Of the total number, 51,952 were through and 656,491 way; 348,431 going east, and 360,012 west. Number of passengers carried one mile, 38 580,595; equivalent to carrying each passenger 55.1 miles. Av. rate per passenger per mile, 3.617 cents.

The amount of freight transported during the year was 2,028,695,240 lbs.—an increase over the previous year of 200,005,136 lbs., or 100,000 tons. Freight carried one mile,168,764,688 tons; equivalent to moving each ton 166 miles. Av. earnings per ton per mile, 2.49 cents.

The number of pounds of freight transported over the Mississippi Bridge during the year was 882,026,060. The number of loaded cars passed over the bridge was 64,707. Number of foot passengers, 158,224. The number of steamers, barges and rafts passing the draw, was 2,325.

BALANCE SHEET, APRIL 1, 1872.

Capital stock account		$18,999,200 00
Fractional scrip unconverted into stock		800 00

Due from other railroads	195,728 12	
Balance in hands of cashier, Chicago	953,138 00	
Cash, and loans payable on demand	1,167,023 88	
		$31,489,842 14

President.—JOHN F. TRACY.

Vice Pres't and Gen'l Sup't.—HUGH RIDDLE.

Directors.—David Dows, Francis H. Tows, A. G. Dulman, Charles R. Mervin, H. Kennedy, New York; Rob't A. Forsyth, Newburg, N. Y. Milton Courtright, Wm. L. Scott, Erie, Pa; John F. Tracy, Hugh Riddle, Henry H. Porter, Chicago, Ill.; Geo. L. Davenport, Davenport, Iowa; B. F. Allen, Des Moines, Iowa.

Secretary and Treasurer.—FRANCIS H. TOWS.

Ass't Treasurer.—F. D. SHERMAN.

Ass't Gen'l Superintendent.—P. A. HALL.

☞ Track laying is progressing finely on the western end of the Bedford and Bridgeport railroad, connecting Bedford with the P. B. & W. R. R., and trains are now running regularly to Buffalo Mills, ten miles west of Bedford.

The Stamp Taxes.

The Act of Congress recently passed for reducing the customs duties and internal revenue taxes, repeals all the taxes imposed by stamps under Schedule B of section 170 of the act of June 30th, 1864, and the several acts amendatory thereof, excepting only the tax of two cents on bank checks, drafts or orders. The legal instruments released from the necessity of being stamped are as follows: agreements, bills of exchange or promissory notes, bills of lading, bills of sale, bonds of every description, certificates of stock, certificates of profits, certificates of damage, certificates of deposit, certificates of any description, charter parties, contracts for sale of property of any kind, conveyances, entries at Custom House, insurance policies, leases, manifests, mortgages, passage tickets, powers of attorney for any purpose, probates of wills, protests of notes and protests of marine losses. This repeal of the stamp tax goes into effect on and after October 1st 1872. The stamp tax on brokers' sales, it appears, is not repealed, but in full force. The tax on borrowed capital was abolished.

☞ The Boston *Advertiser* says that the route for the extension of the Athol and Enfield Railroad from Barrett's station (Belchertown) to Springfield, is surveyed and definitely located for nearly the whole distance. Mayor Spooner has not yet made the subscription of $300,000 to the stock of the road which was recently voted by the city, but he will probably do so in a few days, and, this done, the road will immediately be placed under contract, and, if possible, will be completed by the 15th of December. This action is expected to give new life to the Portland (Ct.) Railroad project. The Connecticut people are ready to build the road north to the State line, whenever they have assurances that Springfield will meet them there. It is said the $400,000 voted by the city some time ago for the Springfield and Stafford Railroad is available for the Portland road.

☞ The Philadelphia *Ledger* of 24th inst., reports the net anthracite coal tonnage for the week ending on the 15th inst., from all sources at 455,869 tons, and for the year 8,089,416 tons, against 8,504,318 tons to the same date last year, being an increase in the tonnage of anthracite coal of 4,585,098 tons. The production of bituminous coal for the week was 62,872 tons, and for the year 1,052,751 tons, against 943,498 tons to the corresponding time last year—an increase of 109,253 tons. The total production of all kinds of coal for the week was 518,741 tons, and for the year 9,071,967 tons, against 4,447,816 tons to corresponding time last year, showing an increase of 4,624,151 tons.

☞ At a meeting of the stockholders of the New York and Albany Railroad Company, held June 19, 1872, the following were chosen Directors for the ensuing year: Geo. Talbot Olyphant, Robert Lenox Kennedy, Abiel A. Low, Otis D. Swan, New York; Thomas Cornell, Kingston; Robt. A. Forsyth, Newburgh; Joseph H. Ramsey, Thomas W. Olcott, Erastus Corning, Robert H. Pruyn, James Kidd, John Tracy, Daniel S Lathrop, Albany.

Railroads of the State of Pennsylvania.

A tabular statement of their Capital, Length, Cost, Earnings, Expenses, Dividends, &c., for the year 1870–'71.

Compiled from the Annual Reports of the several Companies made according to Law to Hon. J. F. Hartranft, Auditor General of the State.

Safe and Profitable!

THE CANADA SOUTHERN

First Mortgage Sinking Fund 30 Years

7 PER CT. GOLD BONDS

AT

90 AND ACCRUED INTEREST.

The Road runs from Buffalo to the Detroit River, and is the Eastern link in the new AIR LINE FROM BUFFALO TO CHICAGO, and has been under construction for about two years past by railroad men who have seen the necessity for a STEEL RAIL, LOW GRADE, SHORT ROUTE between the great railroad systems which diverge from Chicago, Toledo and Buffalo.

Among the builders of the road, by whose cash subscriptions 220 miles (out of 290) have already been graded, bridged and made ready for the superstructure, a large part of the steel rails bought, all of the materials for the stations and a part of the equipment purchased, are:

MILTON COURTRIGHT, JOHN F. TRACY, DAVID DOWS, WM. L. SCOTT, HENRY H. FARNHAM, R. A. FORSYTH, HENRY PORTER, JOHN M. BURKE, M. L. SYKES, Jr., B. F. ALLEN, all directors, either in the Chicago and North West or the Chicago, Rock Island and Pacific; GEO. OPDYKE of the Midland Road; JOHN B. ALLEN, SIDNEY DILLON, DANIEL DREW, J. S. CASEMENT, J. & J. CASEY, O. S. CHAPMAN, JOHN ROSS, DAVID STEWART, and F. H. WINSTON.

THE ROAD will be

33 Miles Shorter than any other Road,

either BUILT or in contemplation between Buffalo and Chicago, and will also shorten the distance between Toledo and Buffalo 23 miles.

THE MAXIMUM GRADE on the entire line does not exceed FIFTEEN FEET to the mile—and Ninety six per cent. of the road IS STRAIGHT.

THE ROAD WILL BE COMPLETED and in running order on or before Dec. 31 of this year.

The principal and interest of the bonds are payable either in New York, London, or Frankfort.

We confidently recommend the bonds to all classes of investors.

LEONARD, SHELDON & FOSTER,
No. 10 Wall-St.

NOTICE.

HAVING BECOME ASSOCIATED WITH Messrs. LEONARD, SHELDON & FOSTER in the Agency of the CANADA SOUTHERN RAILWAY CO., we offer the above named Bonds for sale.

After a thorough investigation, we recommend them to our friends and customers as a SURE AND RELIABLE INVESTMENT.

Pamphlets and all information furnished on application.

Winslow, Lanier & Co.,

Commerce of New York.

The foreign imports at New York for the month of May, 1871 and 1872, are officially stated as follows:

	1871.	1872.
Entered for consumpt'n.	$16,544,919	$16,368,458
Do. for warehousing	14,842,869	23,002,975
Free goods	2,768,231	3,111,784
Specie and bullion	142,477	96,023
Total entered at port...	$34,288,496	$42,579,240
Withdrawn fr. wareh'use	10,070,612	10,199,829

The foreign imports at New York for the five months from January 1, were:

	1871.	1872.
Entered for consumpt'n..	$88,865.927	$98,985,328
Do. for warehousing	64,242,927	88,374,363
Free goods	13,736,707	14,038,539
Specie and bullion.....	8,390,046	733,854
Total entered at port...	$170,235,607	$202,127,084
Withdrawn fr. wareh'se.	54,487,088	56,468,319

The foreign imports at New York for the eleven months ending May 30, were:

	1871.	1873.
6 months ending Jan. 1.	$156,339,208	$183,028,276
January	28,792,062	35,679,496
February	35,491,324	38,206,143
March	38,696,064	39,218,268
April	32,967,661	46,443,987
May.	34,288,496	42,579,240
Total	$326,574 815	$385,155,360
Deduct specie	8,091,781	2,340,410
Total mdse	$318,483,084	$382 814,950

The duties received at New York for eleven months ending with May, were:

	1871.	1872.
6 mos. ending Jan. 1.	$67,729,184 75	$74,078,181 75
January...	12,010,020 67	13,817 086 82
February.	12,258,147 69	14,710,928 08
March	15,305,799 14	14,095,994 24
April	12,535,090 06	13,948,999 00
May	11,490,140 42	10,806,468 92
Eleven months...	$131,318,382 73	$140,957,658 81

The exports from New York to foreign ports in the month of May, were:

	1871.	1872.
Domestic produce	$17,066,928	$14,746,837
Foreign free goods	169,250	86,977
Do. dutiable.....	783,607	1,097,183
Specie and bullion.....	9,615,698	14 850,556
Total exports	$27,635,483	$30,781,508
Do. exclusive of specie.	18,019,785	15,880,947

The exports from New York to foreign ports for five months from January 1, were:

	1871.	1872.
Domestic produce	$92,832,816	$81,894,156
Foreign free goods	461,388	581.823
Do. dutiable	3,372 605	4,390,944
Specie and bullion	32,949,884	24,576,697
Total exports....	$129,616,693	$110,943,620
Do. exclusive of specie..	96,666,809	86,366,923

The exports (exclusive of specie) from New York to foreign ports for eleven months ending with May, were:

	1871.	1872.
6 months ending Jan. 1.	$107.654,919	$119,604.290
January.....	18,837,876	18.951,004
February.....	18,789,742	17,915.169
March	22 139,832	16,530,019
April	18,930.074	17.089,784
May	18,019,785	15,880,947
Total produce	$204,321,728	$205,971,213
Add specie	74,300,759	46,887,621
Total exports	$278,622,487	$252,858,834

Pennsylvania Railroad.

Colonel John W. Forney, now on a trip to Texas, in company with Colonel Thomas A. Scott, writes the following in a letter from Louisiana:

"It is at the beginning of another great railroad triumph that we may dwell a little upon some of the achievements of John Edgar Thomson, the chief of the Pennsylvania Railroad and its dependencies, and the career of his daring Vice President, Colonel Thos. A. Scott.

"The Pennsylvania system of roads commences at Philadelphia with a line from New York intersecting at Philadelphia, and a line from Baltimore and Washington intersecting at Harrisburg, thence diverging to Erie, forming connections at Erie with the system of Lakes and Lake Shore roads, and all the various connections throughout the entire Northwest. The main line of the Pennsylvania Railroad extends to Pittsburg and connects at that point with all the roads now under the control of the Pennsylvania Company, a corporation which the Pennsylvania Railroad controls by the ownership of its stock. This last company is now under the control of Colonel Thomas A. Scott as President, who still retains his position as Vice President of the parent company at Philadelphia. The Pennsylvania Company now controls all the lines west of Pittsburg in the Pennsylvania system.

"It owns the road to Cincinnati by way of Columbus, then a line from Columbus to Louisville, controls a line from St. Louis, and another from Columbus by way of Logansport to Chicago; also, the Pittsburg, Fort Wayne and Chicago, direct to Chicago, the Cleveland and Pittsburg Road from Cleveland to Pittsburg, and the Erie and Pittsburg Road to Erie. These various lines, with their branches to Washington, Pennsylvania, the Muskingum Valley Road, and their branches from the several main lines, now aggregate over thirty-two hundred miles of road, all connected and all equipped. These, when added to the line controlled by the Pennsylvania Company east of Pittsburg, embracing 1,884 miles, make a grand aggregate of about 4,600 miles, all connected, equipped and managed under one interest, the Pennsylvania Railroad, of which John Edgar Thomson is President, and were built from the time he took charge as Chief Engineer in 1847, embracing a little over a quarter of a century in the service of the company, and accomplishing a result by his combination of roads that has never before been achieved by any man in railroad life. During all that period he has paid his stockholders an average of over ten per cent. per annum."

Pittsburg, Washington and Baltimore Railroad.

A meeting of the directors of the Pittsburg, Washington and Baltimore Railroad Company took place at Pittsburg on the 20th inst., when President Wm. O. Hughart, so long the head of that road, resigned the position, and Wm. Keyser, of Baltimore, second vice-president of the Baltimore and Ohio railroad, was elected to fill the vacancy. Under the severe labors which Mr. Hughart has undergone in the completion of this road his health had suffered considerably. He goes to Tennessee, it is understood, in connection with railroad enterprises there, not involving, however, such laborious exertion as the bringing the Connellsville road through its difficulties has in the past imposed. The trade of the Pittsburg, Washington and Baltimore road is now so steadily increasing and its prospects are such that the Baltimore and Ohio Company has ordered for it 25 additional locomotives and 700 freight cars, to be built outside the company's shops. The opening to Washington of the Metropolitan Branch road this fall, on which the track is now being laid, will of course add largely to the business of this road.—*Balt. Sun.*

☞ A survey is being made for the proposed straightening of the Boston and Albany Railroad between Worcester and Leicester.

From the Toledo Blade.

Toledo, Thorntown and St. Louis Railroad.

At the annual meeting of this Company, held in this city on the 15th inst., President Sprague reported the consolidation of the Toledo, Thorntown and St. Louis, of Indiana, and the Toledo and St. Louis Air-Line of Ohio, under the first named title. Another Company has been organized for the line between Crawfordsville, Indiana, and the Illinois State Line, known as the Crawfordsville and Illinois Railroad Company; and also, consolidated with the T., T. & St. Louis. Mr. Sprague says:

In June last the services of Hon. W. W. Murphy were obtained, and in July he sailed for Europe to interest foreign capitalists in taking the bonds of the company to enable it successfully to complete its work. The interest taken by these gentlemen was so great that in October last they sent a confidential agent, duly accredited, to make a thorough examination of the proposed route, its prospects for future business, and its financial basis. After frequent interviews with the agent, and such examination as he thought proper to make, extending over four months of time, an arrangement was concluded on the 5th of January, for placing the funds of the company at $20,000 per mile, at the rate authorized at your last meeting.

One of the conditions of this loan for thirty years, so negotiated, was that the company should raise local aid to the amount of $4,000 per mile and provide the right of way. And another was, that the contract for the construction of the Road should be let to responsible and experienced contractors.

He further reports that from Putnam county, Ohio, to Vermillion county, Ind., including both of these counties—a distance of 200 miles—$743,770 has been secured.

The contract for performing the second condition, viz;

The construction and equipment of the entire line in a first class manner, to a heavy, responsible and experienced firm, Messrs. Goss, Gardner & Co. The right of way for the entire line has been pledged, so that it only remains for the company to make good any deficit in the local aid, to make an immediate and rapid commencement of the work, which, when once begun, will be pushed to as rapid a completion as men and money will allow. The same parties have taken, upon like terms, the contract for the Illinois division, thirty-two miles of which, it is expected, will be completed in a few months. The contractors also bind themselves to complete fifty miles of the Ohio and Indiana divisions within a year from the date of the contract, (April 10th, last,) and to have the whole line completed and equipped on or before the 1st of January, 1875.

The preliminary surveys were commenced in Illinois in March last, under the supervision of chief engineer Bush, and were completed in May. In the same month like surveys were commenced at Ottawa, Ohio, and will be completed during this month through the state of Indiana. In Illinois the final survey and permanent location of the line is now being made, and as rapidly completed as possible.

With a very little more work, the enterprise inaugurated and carried forward with such unparalleled success, will be fully under way, and be brought to a favorable issue.

☞ The progress being made in the construction of the Chesapeake and Ohio Railroad westward from White Sulphur Springs, in Greenbriar Co., W. Va., is rapid and satisfactory. The cars are now running eight miles west of the springs, and the entire road to the Ohio river will be completed in the month of October.

American Railroad Journal.

Saturday, June 29, 1872.

Stock Exchange and Money Market.

Money has been offered quite freely, by the banks as well as by private lenders, and rates have been quoted easier, both on call, and in the discount form. The demand for aid from speculative sources has been much less urgent. The local inquiry for mercantile purposes has been quite moderate. There has been more demand noted from the interior, for funds, to move forward the new wool clip, and this drain has had a perceptible influence on the reserve averages of the city banks. Call loans have been quoted at from 3@5, generally 4@5, and choice to very good discounts at 5½@7½ per cent. per annum. Toward the close, there was rather more animation, in the market, due, in part, to the active preparations for July disbursements of interest and dividends which promise to be unusually liberal, and which in July will undoubtedly operate in favor of an easy money movement. The U. S. Sub-Treasury office again reduced its coin balance about half a million and enlarged its currency nearly 1⅜ millions. The city banks added to their loan and discount average over four millions during the week, and increased their outstanding circulation slightly. The U. S. Sub-Treasury held a currency balance at the close of business on Tuesday of $9,866,536, and a coin reserve of $48,537,405.

The city banks, in their latest return, show a reduction of $1,495,100 of legal tender notes, $387,700 of specie, and $64,300 of deposits, with an addition of $4,042,500 to their loan and discount averages, and $8,800 to their item of circulation. The city bank exchanges, last week, averaged 97½, and thus far, this week, about 93⅝ millions daily. The banks now hold $9,726,625 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $19,912,200, against $14,015,216 same time last year. The city bank deposits are now $228,931,000 against $243,521,513, week ending June 24, 1871. The legal tender reserve amounts to $53,929,400, against $71,361,168 same time last year. The circulation now stands at $27,528,100 against $30,560,606 same time last year. The loans are now $292,806,800 against $293,979,645 at this date last year.

The coin reserve of the city banks is now about 19⅞ millions as against about 28⅞ millions on the 6th of January; the legal tender reserve is about 54 millions against $46,616,000 on the statement of February 10th.

Government revenues have been yielding rather less satisfactorily since our last. The excises yielded within the week about three millions, and thus far since July 1, 1871, $128,242,930. The customs at the port of New York last week were $1,504,410; at the outports, equal to about $500,000 all in coin, or coin certificates.

Telegrams from Albany state that the new State Loan was awarded at 107 to 107¼.

The Treasury Department, on Tuesday, controlled a coin reserve of $85,000,000, (including $26,000,000 represented by outstanding coin certificates) and a currency balance of $9,000,000.

Gold has been in better supply in the open market and easier as to price, on a much lighter movement, both on speculative account, and in the export line. The customs call has also been on a restricted scale.

The Treasury Department ordered the prepayment of the July Gold Interest on the Public Debt to be commenced on Wednesday, June 26. The amount to be paid out at all the Government Offices on the July account this year is $26,546,213.

The range of the price during the week has been from 113@113¾ and the closing quotation on Wednesday was 113⅝ against 113⅝ the preceding Wednesday. The specie outflow last week, was $753,243. The Gold Exchange Bank clearances have averaged about 39½ millions per day during the week.

The specie exports from this port on Wednesday were only $281,030.

The customs demand for Gold last week, averaged $276,670 a day; thus far, this week, it has averaged $330,000 a day, or equal to a weekly aggregate of $1,980,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $19,158, and since Jan. 1, 1872, $732,076, against $3,167,507 same time in 1871. The total customs revenue of the Government, in

coin, at this port, from July 1, 1871, has been $151,811,700 against $145,335,323 same time in the preceding fiscal year 1870-'71.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from July 1, 1871, to June 22, 1872, $76,455,716, against $85,524,679 same time in 1870-'71.

The export drain of specie was $753,243 last week, against $2,464,430 same week preceding year. The shipments since July 1, 1871, have been $56,239,548 against $81,718,748 same time in 1870-'71.

Foreign Exchange has been offered less freely and has been in rather more confident demand at steadier rates. Bankers' sixty day bills on London closed on Wednesday at 109½@109¾; sight bills on London, 110⅛@110⅜.

The produce exports from this port, week ending with June 25, were to the currency value of $4,817,307.

There has been a fair investment business reported, since our last, in Government securities, at generally firm prices. The offerings of bonds of all issues have been on a restricted scale. On Wednesday, government bought in $1,084,400 of Five-Twenties at 113 08@113 24, out of an aggregate offering of $1,834,900.

U. S. sixes of 1881 closed here on Wednesday of the current week at 119⅝@120⅞; U. S. Five-Twenties of 1862, (other than the bonds called in) ex May coupon 114@114¼; U. S. Five-Twenties of 1864 at 114@114¼; U. S. Five-Twenties of 1865, 114⅝@115⅞; U. S. Five-Twenties of 1865 consolidated, 116⅜@116⅝; U. S. Five-Twenties of 1867, 117⅜@117⅝; U. S. Five-Twenties of 1868, 117⅛@117⅜ U. S. Ten-forties at 111¼@111¼; U. S. Fives of 1881 (Funding Loan) 112⅝@112⅞; Six per cent. currency bonds, 114½@114¾.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	June 12.	June 19.	June 26.
Consols	92⅜	92½	92⅝
U. S. 5-20's of 1862	90¾	91	91

" 10-40s	89½	89¼	89¼
New Fives of 1881	89¾	89¼	89¾
Erie	48½	42¾	46⅝

State bonds have been less inquired for, and irregular in price.

The investment inquiry for the better class of Railway bonds has been fair, and values have been well supported. Central Pacific Sixes have been in fair request at 104⅞@105. Chesapeake and Ohio have been in fair demand at 94 per cent. and accrued interest. It is stated that nearly five thousand men are now employed for the completion of the small unfinished portion of this road, and that it will undoubtedly be entirely prepared for business through the entire length from tidewater to the Ohio Valley, in October next.

Among the passengers who returned by the Russia from Europe, was Mr. James A. Garland, of the New York House of the Messrs. Jay Cooke & Co., who comes home in fine health, and spirits, to the satisfaction of his many friends in this city.

Railway and Miscellaneous share property has been moderately active, but quite irregular as to price, the later dealings indicating, however, a steadier movement.

The Stock and Cotton Exchanges have decided, by vote, to adjourn from Wednesday July 3, to Monday July 8, in view of the occurrence of the great national anniversary on the intervening Thursday.

There has been rather more animation in the line of Metals. Ingot Copper has been held with a fair show of confidence, on lighter offerings and a moderately active inquiry; sales 350,000 lbs. at 34c@34¼c. cash, and 34¼c.34½c. for forward delivery. Scotch Pig-iron has been in more request at about previous figures, with sales reported of 800 tons Glengarnock, at $47@$49; 200 tons Gartsherrie, and 100 tons Coltress on private terms. American Pig iron has been more sought after and quoted stronger in price, with sales of 400 tons Allentown at $53 for prompt, and $52 for November delivery, mainly the latter. Iron Rails have been held firmly, though not active. There has been very little call for Lead Spelter or Zinc, prices of which remain nominally as last quoted. Pig Tin, though quiet, has been steady in price; 100 slabs Straits were sold at 37¾c., gold, per lb. Tin Plates have been quite brisk, the demand having been partly speculative, and prices closing steadier and in favor of holders, with sales reported of 6,000 boxes Charcoal, deliverable after Aug. 1, at $12 75, with holders asking for early deliveries $13 25@13 50; 1,000 boxes Charcoal Terne, deliverable after Aug. 1, at $11 12½ held for early delivery at $11 25@$11 50; 2,000 boxes Coke, deliverable in August, on private terms, with prompt deliveries quoted at $12@$12 25 as the asking rates; 1,000 boxes B. C. Coke Terne, August delivery, at $9 75, and 1000 boxes Coke, diamond Y brand, at $11, all gold rates.

General business has been fairly active, more especially in the leading kinds of domestic produce. Flour, Wheat, Rye and Oats, declined in price. Corn was steadier toward the close. Lard and Butter firmer. Middling upland cotton closed on Wednesday at 26¼ cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,655,928 bales, against 3,863,555 bales same time in the preceding year; exports 1,898,223 bales against 3,045,277 bales in the previous year; stock at the ports at latest dates, 152,777 bales against 207,494, bales same date 1871.

At the Live Stock Markets, Beeves have been in less request at 10@13¼ cts.; Veals at 5@9¼ cts.; Sheep at 5@6¾; Lambs 7@12 cts.; Swine, dull at 4⅜@4⅝ cts. per lb., all live weight. The week's receipts were 9,491 Beeves, 3,620 Veal Calves, 22,655 Sheep and Lambs; and 44,217 Swine.

Foreign goods have been in rather slack demand as a rule, with values generally quoted less firmer. The week's imports of foreign goods reached the amount of $7,918,883 including $6,573,976 of dry goods.

Ocean freights have been quoted lower toward the close.

At the auction sale of Scranton Coal on Wednesday 100,000 tons were disposed of within a range of from $3 25 to $4 00, as against $3 32½@3 90 at the sale in May.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ Work is progressing on the Michigan division of the Canada Southern Railroad. The surveys have been nearly completed, and work upon the road bed from Trenton to the State line, it is announced, will shortly begin. Work upon the bridge from Trenton to Grosse Isle has begun.

New York & Long Island Bridge Company.

The New York and Long Island Bridge Company, which was formed to build a bridge connecting Long Island with this city, the bridge to have central towers on Blackwell's Island, have elected the following Board of Directors: John L. Brown, A. M. Bliss, Shepherd F. Knapp, I. D. Coleman, A. W. Winans, P. L. Tyler, S. C. Walker, H. Vandewater, J. A. Fithian, C. Corson, J. T. Conover, D. L. Pettee, H. W Genet, George Wilkes, C. R. Trafford, J. M. Long, H. T. Livington, Wm. C. Conner, James M. Sweeney, G. L. Knapp and Edward J. Shandley.

At a meeting of the directors held at No 25 Chambers St., this city, on the 24th inst., the following officers were elected:

John L. Brown, president; A. M. Bliss, secretary; Heman T. Livingston, treasurer.

John T. Conover, A. W. Winans, Jacob M. Long, D. L. Pettee and S. F. Knapp, executive committee.

Heman T. Livingston, George Wilkes and C. R. Trafford, auditing committee.

Stephen C. Walker, William C. Conner, Henry Vandewater and Isaac D. Coleman, financial committee.

It was ordered that, under the provisions of the general railroad act, due notice be given at an early day to the Common Council of the city of New York, the Board of Supervisors of the county of New York, the Commissioners of the Sinking Fund of the city and county of New York, the Commissioners of Charities and Correction (who control Blackwell's Island), the Supervisors of Queen's county, the Common Council of Long Island city, and the property owners directly interested, of the intention of the company to take possession of and use such property as may be necessary for the purpose of constructing the bridge.

It was resolved to proceed forthwith in the work of obtaining possession of the required property and of constructing the bridge.

☞ The Duluth (Minn.) *Herald* reports the arrival at that port, on the 16th instant, of three vessels containing railroad iron for the Northern Pacific, the aggregate quantity being 1,540 tons. The point of departure of one of the vessels was Erie, Pennsylvania, while the other two sailed from Cleveland, Ohio. The time consumed in the voyage from Erie was fourteen days, while the voyages from Cleveland were each made in fifteen days.

☞ Cumberland Coal is quoted at $4 25 at Georgetown and Alexandria, at Baltimore $4 50, at New York $6 60, at Springfield, Mass., $10, at Boston $7 25a$7 50, at San Francisco $25a$29. The Cumberland companies, it is said, will not change their prices at all in consequence of the new tariff, the effect of which was discountered long ago, when rates were put at the lowest reasonable points.

☞ The gross earnings of the Union Pacific Railroad for the month of May, 1872, were $890,442 07; expenses $470,715 11, including $79,387,37 taxes; net earnings $419,726 96.

☞ The Eastern Railroad Extension to North Conway, N. H., was formally opened to travel on the 24th inst.

THE

St. Joseph & Denver City

RAILROAD COMPANY'S

First Mortgage Bonds

are being absorbed by an increasing demand for them.

Secured as they are by a first mortgage on the Road, Land Grant, Franchise and Equipments combined in one mortgage, they command a once a ready market.

A Liberal Sinking Fund provided in the Mortgage Deed must advance the price upon the closing of the loan. Principal and interest payable in *gold*. Interest at eight (8) per cent. per annum. Payable, semi-annually, free of tax. Principal in thirty years. Denominations, $1,000 $500 and $100, Coupon or Registered.

Price 97½ and accrued interest in currency from February 15, 1872.

Maps, circulars, documents and information furnished.

Trustees, Farmers' Loan and rust Company of New York.

Can now be had through the principal Bankers and Bankers throughout the country, and from the undersigned, who unhesitatingly recommend them.

TANNER & CO.,

BANKERS,

NO. 11 WALL STREET

☞ The stock of the Camden and Amboy Railroad Company is now called, at the Philadelphia Board of Brokers, under the new designation of United Companies of New Jersey. Under this appellation it will hereafter be quoted in the official Stock lists, and by that name all transactions in Camden and Amboy will hereafter be designed.

☞ The regular quarterly dividend of 2½ per cent. upon the capital stock of the United New Jersey Railroad and Canal Company will be paid on and after the 10th of July at the offices of the Pennsylvania Railroad Company, Phliadelphia and at 57 Broadway, New York.

☞ Men, to the number of about two hundred are now employed on the River du Loup Railway and have already graded several miles of the road and prepared it for sleepers. The prospect now is hopeful.

☞ The Attleborough Branch Railroad Company has declared a semi-annual dividend of $2 50 per share, free of taxes, payable July 1.

☞ The Granite Railway Company has declared a dividend of $4 per share, payable July

Journal of Railroad Law.

COMMON CARRIERS—DELIVERY TO WRONG PERSON AT THEIR PERIL.

The late case of McEntee *vs.* The New Jersey Steamboat Company, (45 N. Y., 34,) was an action brought against the defendants for the conversion of chattles claimed by the plaintiff. The defendants, as common carriers between Albany and New York, received from Mr. Guyer, at Albany, and carried to New York, in 1868, several bundles of sash and blinds addressed to "McEntee," New York. After these arrived at New York, the plaintiff claimed them, and gave evidence tending prove that he demanded the goods and tended the charges, and that the agents of the defendants refused to deliver them. The jury rendered a verdict for the plaintiff for the value of the property.

The following is the opinion of the court delivered by—

ALLEN, J.—The defendants were charged for the conversion of the goods upon evidence of a demand and a refusal to deliver them. If the demand was by the person entitled to receive them, and the refusal to deliver them was absolute and unqualified, the conversion was sufficiently proved, for such refusal is ordinarily conclusive evidence of a conversion; but if the refusal was qualified, the question was whether the qualification was reasonable; and if reasonable, and made in good faith, it was no evidence of a conversion, (Rogers *vs.* Weir, 34 N. Y., 463). If, at the time of the demand, a reasonable excuse be made in good faith for the non-delivery, the goods being evidently kept with a view to deliver them to the true owner, there is no conversion.

This action is not upon the contract of the carriers, but for a tortious conversion of the property; but the rights and duties of the defendants as carriers are, nevertheless, involved.

The defendants were bailees of the property under an obligation to deliver it to the rightful owner. They would have been liable had they delivered the goods to a wrong person. Common carriers deliver property at their peril, and must take care that it is delivered to the right person, or if the delivery be to the wrong person, either by an innocent mistake or through fraud of third persons, as upon a forged order, they will be responsible, and the wrongful delivery will be treated as a conversion. (Guillaume *vs.* Hamburgh and Am. Packet Co., 42 N. Y., 212.) The duties of carrier may be varied by the differing circumstances of cases as they arise; but it is their duty in all cases to be diligent in their efforts to secure a delivery of the property to the person entitled, and they will be protected in refusing delivery until reasonable evidence is furnished them that the person claiming is the party entitled, so long as they act in good faith and solely with a view to a proper delivery. The circumstances of this case, the very defective address of the parcels, and the omission of the plaintiff to produce any evidence of title to the property, or identifying him as the consignee, justified the defendants in exercising caution in the delivery; and it should have been submitted to the jury whether the refusal was qualified, as alleged by the defendants; and if so, whether the qualification was reasonable, and was the true reason for not delivering the goods. The judge also erred in his instructions to the jury as to the duty of the defendants as common carriers, in the delivery of goods. They may not properly, or without incurring liability to the true owner, deliver goods to any person who calls for them, other than the rightful owner. The judgment must be reversed and a new trial granted, costs to abide event.

Judgment reversed and new trial ordered.

Extension of an Important Railroad.

We have taken occasion several times to refer to the building of the Logansport, Crawfordsville and South-western Railway in Indiana, and the resources it has in its rich country and coal fields for a large local traffic. Our correspondent at Crawfordsville, President Tuttle of Wabash College—a gentleman of intelligence in such matters, as well as of the highest position and character—has kept us informed in respect to this road. From the same source we have just learned that it is soon to be in running order to Logansport, where it comes into an important railroad centre, where the two great branches of the Pan Handle (Chicago Division), the Toledo, Peoria, and Warsaw Railroad and the Eel River Railroad cross. This connection at once opens a vast market for the Parke county bituminous and block coal. Recently Mr. Cutler and his co capitalists have contracted to build a Branch of the Logansport, Crawfordsville and Southwestern Railway from Frankfort to Kokoma, some twenty-eight miles, where it will meet another important railway center, opening one more market for coal and produce. The work of grading is to be begun immediately. This is an important step toward the great Northern trunk lines at Toledo and Detroit.

A very important move has just been made at the south-west end of the road. The Evansville and Crawfordsville Railroad some time since built an excellent extension of the road from Terre Haute to Rockville, twenty-three miles, but is has not been profitable for lack of connections North and East. Recently the Logansport, Crawfordsville and South-western Railway has leased this road to Terre Haute, which gives it a fine, large city as its South-western terminus, and a very fine St. Louis connection over the Vandalia route. This is an important step and is in the line of still larger success. Under the able management of Messrs. Cutler and Dawes, the Logansport, Crawfordsville and South-western Railway is becoming an important road in Indiana.—*New York Evangelist.*

Atchison, Topeka and Santa Fe Railroad.

The news that the Atchison, Topeka and Santa Fe Railway has been completed to the Arkansas river and is stretching toward us at the rate of over one mile a day, will be hailed with joy by the citizens of the Arkansas valley. While we have as yet no assurance, positive and complete, that this road will be built through this portion of our Territory, yet it is a great step in advance to have it constructed to our eastern boundary. Its construction even to that point will make an outlet for our surplus of beef and for a great deal of the wool raised in Bent and Las Animas counties. Besides we are fully satisfied that when the line is complete to the western boundary of Kansas, its directory will be impressed with the necessity of extending it up the valley to Pueblo. The wide open valley, with its rich, irrigable soil and the wealth of pasturage on either side, will offer an opportunity to build up a way trade enjoyed by no other corporation west of the Missouri. The natural water gradient offered by the river without any bluff lands encroaching upon its banks, render the construction of a line to Pueblo as cheap as a section of the same length along the Platte.

A road built over this route will offer a much more direct means of communication with the East for the people of Southern Colorado and New Mexico, than any yet built. It will develop through its entire extent a greater amount of way trade than can ever be enjoyed by any rival line. It will form a section of a road over the best route across the continent, which is through the pass at the head of the Arkansas. The road can be operated through the whole season, without the loss of a trip by reason of snow blockades. All these manifest advantages will impress themselves upon the directory of that road before preparation is made for the construction of its next section. Gentlemen acting in the interest of this line will soon be in Pueblo, and we hope that substantial citizens will not fail to place these few, and a number of additional considerations, in their proper light, and so do everything in their power to aid us in securing direct eastern communication through the medium of the Atchison, Topeka and Santa Fe Railway.—*Pueblo, (Col.) Advertiser.*

The Narrow Gauge Railroad Convention.

The following is an official list of the topics under consideration by the convention of railroad men at St Louis:

1. The want of railroad facilities.
2. The comparative costs of the two systems.
3. Our means of constructing the broad gauge as compared with the narrow gauge.
4. The comparative cost of operating the two gauges.
5. Can narrow gauge locomotives be constructed of sufficient power and speed to answer general requirements.
6. Can the passenger coaches be made safe, comfortable and popular with the traveling public?
7. Can freight cars be constructed of convenient size for the transportation of cotton, live stock and general freights?
8. What saving in dead weight will the narrow gauge effect?
9. How will the saving in first cost and dead weight affect the rates of freight and passage?
10. Break of gauge or connections.
11. Experience and opinions of experts.
12. The narrow gauge, as compared with the broad gauge, as the means of development.

Cairo and East St. Louis Railway.

A narrow gauge railway is building from this city to Cairo. When completed it will have a length of 147 miles, and be equipped with 26 locomotives and 1,500 cars. This road begins at East St. Louis, and proceeds down along the river bank to a point opposite Carondolet; then turning southeastward, it pursues its way to Cairo, passing directly through the Big Muddy coal region. One of the designs of this road is to supply coal cheap to the Carondolet iron furnaces, hence the heavy equipment of rolling stock. Work is actively going forward on this line. One hundred miles of the grading will be finished by the 1st of July. The ties for the whole road are nearly ready. The iron is purchased and the money all in hand to pay for it. A large portion of it is now en route to this city, and will soon arrive. Upon all of the heavy grades steel rails will be used, and the balance of the iron will be 45 pounds to the yard. Broad-gauge rails weigh 65 pounds to the yard. Although the equipment of this road is unusually large for so short a line, and though the country built over is a very rough and hilly one for most of the way, the cost will probably fall within $15,000 per mile. The gauge of this road is to be three feet.—*St. Louis Democrat.*

Boston, Hartford and Erie Railroad.

In the suit of equity brought by George Ellis and others against the Boston, Hartford and Erie Railroad Company, arising out of a contract made between the railroad company and the Adams Express Company, the Superior Court has sent down the following rescript:

"Decree for receivers for amount of earnings due under the contract as reported, from Oct. 20, 1870, to Aug 17, 1871. Also for such portion of the like earnings so reported, prior to Oct. 20, 1870, as may be necessary, together with other income received by them, to cover their reasona-

ble expenses and charges in operating the road and conducting the business of the corporation during the same period. If not adjudged between the parties, a master is to be appointed to ascertain the amount for which the decree shall be entered in accordance herewith."

In the bill brought by the Adams Express Company to be made a party to the above suit, a decree has been entered dismissing the bill.—*Boston Journal.*

Kansas Railroads.

A correspondent of the Milwaukee *Wisconsin*, writing from Fort Scott, Kansas, says:

We have first the Missouri, Ft. Scott and Gulf road running from Kansas City south to Baxter Springs, 160 miles. This road is without doubt one of the most ably managed in the southwest and its equipments are first class.

The Missouri, Kansas and Texas Railroad is our St. Louis outlet and runs from Sedalia, Mo., through the southern part of the State and the Indian territory into Texas, and is now built to the South Canadian, Indian territory. This is one of the grandest railroad enterprises of the country, and is ably managed.

The Ft. Scott and Allen County Railroad running from Ft. Scott to Wichita, about 200 miles due west, is now in course of construction.

Then we have the Laclede and Ft. Scott Railroad, from Lebanon, Mo., on the Atlantic and Pacific; then the St Louis and Santa Fe Air Line; the Fort Scott, New Chicago and Fredonia; the Lexington Lake and Gulf, and the Memphis, Fort Scott and Topeka narrow-guage, all of which are now under contract and construction. Fort Scott is destined at no distant day to be an important railroad centre.

☞ The Baltimore and Ohio Railroad Company has decided to build another iron working mill in Cumberland for the manufacture of merchant bar iron of all descriptions, and also for the manufacture of nuts, screws, bolts, &c., for use on their great line of railway.

☞ During the month of May the Land Department of the Union Pacific Railroad Company disposed of 16,835 acres of land, for which $67,746 were received, and from July 28th, 1869, to the end of May, 1872, the total sales amounted to 547,269 acres, yielding the sum of $2,295,799 93.

☞ Five miles of the Erie canal, between Albany and West Troy, have been set apart for experiments for the towage of canal boats by road steam engines.

☞ The Canal Railroad Company of Connecticut, having determined to relay their track with steel rails, have received their first instalment of 1,000 tons, which will be put down immediately.

☞ W. O. Hughart, Esq., of Pittsburg, has resigned his position as president of the Pittsburg, Washington and Baltimore (Connellsville) Railroad Company.

THE SEMI-ANNUAL INTEREST, due July 1st, on Arkansas Funded Debt Bonds, will be paid at the office of the Union Trust Company, in this city, on and after that date.

HENRY PAGE, State Treasurer.

SUPERIOR QUALITY, FOR SALE BY
WM. BAILEY LANG & CO.,
54 Cliff Street, New York

NOTICE TO CONTRACTORS.—DELAWARE AND HUDSON CANAL COMPANY—CONSTRUCTION OF NEW YORK AND CANADA RAILROAD.—Sealed proposals will be received by the undersigned, for the Delaware and Hudson Canal Company, at the Engineer's Office, in Whitehall, until Tuesday, the 16th day of July next, at noon of that day, for the construction of the graduation, masonry, bridging and fencing of about thirty-eight miles of the line of the New York and Canada Railroad, extending from Whitehall, along the west side of Lake Champlain, to Port Henry.

The line will be divided into sections of convenient length, and will be ready for examination after the 6th ult. The maps, profiles, plans and specifications will be ready for examination at the Engineer's Office, in Whitehall, after that date, where all information in regard to the work may be obtained, and where blank proposals will be furnished.

Proposals should be sealed and endorsed "Proposals for N. Y. & C. R. R.," and addressed to the undersigned, at Whitehall, Washington Co., N. Y.

The right is reserved to reject any or all proposals that may be received as may be deemed for the interest of the company. Dated Chief Engineer's Office, Albany, June 19th, 1872.

C. W. WENTZ, Chief Engineer.

SPENCERIAN
DOUBLE ELASTIC
STEEL PENS.

These Pens are of superior English manufacture, and are a nearer approximation to the real SWAN QUILL than anything hitherto invented. We have recently added a new pen to the number, of great superiority where fine writing is desirable, which

we designate **THE QUEEN,** Or, No. 15.

The Spencerian Pens are for Sale everywhere, in gross and quarter gross boxes.

☞ A *Sample* Card, containing all the **15 numbers,** securely enclosed, will be sent by mail, on receipt of **25 cents.** Address

IVISON, BLAKEMAN, TAYLOR & CO.,
138 and 140 GRAND STREET, N. Y.

THE CINCINNATI & TERRE HAUTE Railway Company,

Desirous of enlisting the attention of manufacturers to the advantage of locating manufacturing establishments upon the line of their Railway, will give to any Rolling Mill or Blast Furnace Company so locating forty (40) acres of ground for works, and the coal in one hundred (100) acres of Clay or Owen County, Indiana, block coal field; the ore from one hundred (100) acres of the Hardin, Pope or Massac County, Illinois, brown hematite beds, and agree to furnish them with all orders for merchant iron required for the Railway's use for a period of two years.

To any Railway Car Manufactory located upon its line, they will give twenty acres of ground required for works, the timber from one hundred acres of the best oak timbered land in Owen County, and an order for one thousand cars to commence work upon.

To any Car Wheel Foundry or Axle Forge, the necessary grounds for works, and liberal orders for their products in kind.

To all other manufacturing establishments ample facilities in the locating and successful prosecuting of their works.

Circulars descriptive of the manufacturing points upon the line of the Railway will be mailed to any address upon application to

Bessemer Steel Rails.

RAILROAD SECURITIES NEGOTIATED.

ENGINEER'S FIELD BOOK
By C. S. CROSS, Civil Engineer.

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment for canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent **free by mail,** upon receipt of the price. For sale at this office. Price **$1.50.**

CAMP'S IMPROVED DUMPING CAR.

(Used by the American Dredging Company.)

RIGHTS FOR SALE BY

N. H. CAMP,

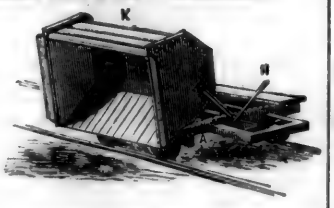

Fig. No. 1, Car Loaded. Fig. No. 2, Car Dumped.

TO DUMP THE CAR.

The Brakeman seizes the lever H, and raises it, thus removing the step from under the box-support A, when the weight of the load causes the box to roll over to the position shown in Fig. 2.

To replace the box in readiness for another load.

The Brakeman, standing on the platform, reaches over, and grasping the corner of the box, pulls it back to its place.

Address, N. H. CAMP,

Care N. C. MILLER, 61 Broadway, New York City:

HAND'S IMPROVED DUMPING CART.

PATENTED APRIL 4th, 1871.

THE MOST PERFECT YET INVENTED.

Can be dumped by a single motion of one hand while you hold the horse with the other.

The tail-board being attached to the shafts, lifts of its own accord when the cart is dumped, as seen on the right of the engraving. As soon as the load is dumped all you have to do is to start the horse, and the cart will resume its proper position, as seen in the left of the engraving, hook itself and replace the tail-board, without any assistance of the driver whatever. The shafts are attached to the outside of the body, near the hubs, which gives the horse great control over the cart, and prevents the body from playing from side to side as they do when the shafts are pivoted underneath.

Manufactured and for Sale by **WILLIAM & HENRY HAND,**
PLAINFIELD, N. J.

STATE AND COUNTY RIGHTS FOR SALE.

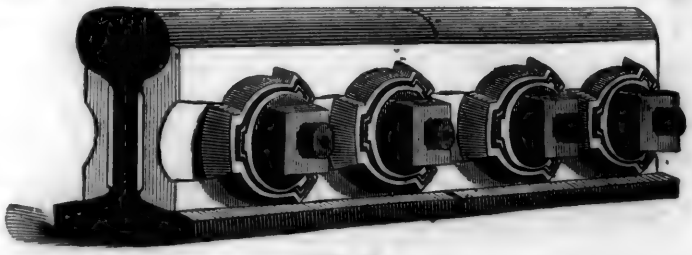
FISHER'S PATENT

Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

American Railroad Journal.

New York, Saturday, July 6, 1872.

☞ The Wilmington and Reading Railroad Co. have nearly finished the grading of their road from Birdsboro to Reading, and contracts are advertised for grading the Berks County Railroad, which connects the Wilmington and Reading with the Lehigh Valley. The Wilmington and Western Railroad, which runs from Wilmington to Landenberg, Chester county, is expected to be open on the 4th of July. The Pennsylvania and Delaware Railroad from Pomeroy to Delaware City, is rapidly pushing ahead. A corps of engineers is now surveying a line through Chester county, a part of a proposed road from Baltimore to Philadelphia. The survey runs from the Maryland State line keeping as nearly as possible halfway between the Pennsylvania and the Baltimore Central Railroads.

☞ The grading of the Bachman's Valley Railroad will be finished to the Chestnut Hill Ore Banks by the 15th of August. The track is now laid a distance of three miles, up a branch of the Codorous stream, diverging from the Hanover Branch Railroad near Leib's Mill. The remaining two miles, graded as far as Klinefeltersville will be completed by July 6th, when regular traffic on the road will be opened to that place.

Grand Rapids and Indiana Railroad.

The entire grading on the line of this road from the junction with the Traverse City Branch to the Straits of Mackinac has been let. By the contract, nearly 100 miles of new track are to be laid this season to nearly 75 miles north of Clam Lake. From there to the Straits is about thirty miles. This company have called in $50,000 of the unguaranteed bonds of 1869. Work on the line is progressing finely. Nearly all that can be done in grading to the junction, north of the Manistee, is completed, and but little except surface work is to be done. The line for the Traverse City Branch has been definitely located; the junction to be near Erie Lake, some five miles northeast of the point first chosen, and over two miles shorter; passing through a better country. It is to be completed to Traverse City by Oct. 1.

☞ The Provisional Directors of the Interoceanic Railway Company of Canada held their first meeting on the 24th ult., and organized the company by electing as President the Hon. D. L. Macpherson, Senator; Vice-President, C. H. Fairweather, Esq., President Board of Trade, St. John, New Brunswick; Executive Committee—President and Vice-President, Walter Shanley, Esq., M. P., F. W. Cumberland, Esq., M. P., and W. H. Howland, Esq. Provisional Secretary, John Hague, Esq.

☞ At a meeting of the Provisional Directors of the Canada Pacific Railway Company, held in Montreal on the 20th ult., Sir Hugh Allan was elected President of the Company; Donald Mc Innes, Esq., Vice-President; E. Lef. de Bellefeuille, Esq., Secretary: and Hon. J. J. C. Abbott, Solicitor. Sir Hugh Allan and Louis Beaubien, Esq., M.P.P., were appointed to form the Executive Committee of the Provisional Board.

☞ The estimated earnings of the Erie Railway for the week ending June 23, 1872, were $344,286; against $408,440 for the corresponding period of 1871—an increase of $59,154. Total earnings since April 1, 1872, $4,449,033—an increase over the same time in 1871 of $599,019.

☞ The Attleboro' Branch Railroad Company will pay a semi annual dividend of 3½ per cent. on and after July 1.

☞ The Philadelphia *Ledger* of 1st inst., reports the net anthracite coal tonnage for the week ending on the 22d ult., from all sources, at 436,651 tons, and for the year 8,527,976 tons, against 8,978,464 tons to the same date last year, being an increase in the tonnage of anthracite coal of 4,549,512 tons. The production of bituminous coal for the week was 60,946 tons, and for the year 1,113,498 tons, against 895,152 tons to the corresponding time last year—an increase of 218,346 tons. The total production of all kinds of coal for the week was 497,597 tons, and for the year 9,641,474 tons, against 4,963,616 tons to corresponding time last year, showing an increase of 4,677,858 tons.

☞ We are authorized to state that the rumor which has found its way into some of the papers in Western New York to the effect that the Rome, Watertown and Ogdensburgh Railroad has been, or is about to be, leased to the Delaware, Lackawanna and Western Railroad Company, is entirely destitute of truth.

☞ Engineer Hilton has completed the plans for the new bridge at Troy. Bids for its erection will be received by Treasurer Vail until the 11th of July. It is to be completed by the 1st of April, 1873.

The Northern Central Railway and its Connections.

The two links necessary to complete the all-rail connection between the North and the South will soon be welded into the grand trunk line. The Alexandria and Fredericksburg Railway, which connects Washington with Richmond, has been in operation for some time. The officers of this road are gentlemen whose long connection with the Northern Central Railway has made the public tolerably familiar with their names: J. N. DuBarry is Vice President and General Manager; E. S. Young, General Passenger Agent; Jas. M. Drill, General Freight Agent; S. Little, Auditor and Secretary; and J. S. Leib, Treasurer.

The Baltimore and Potomac Railroad, one branch of which connects the Northern Central with the Alexandria and Fredericksburg Railway, thus establishing direct communication between Baltimore and Washington by a new route, is finished with the exception of the tunnel at Baltimore. In a few days regular trains will be put upon the track, which will run in connection with the trains on the Northern Central. The officers of this road are as follows: President, ex-Gov.

The remaining two miles, graded as far as Klinefeltersville will be completed by July 6th, when regular traffic on the road will be opened to that place.

Grand Rapids and Indiana Railroad.

The entire grading on the line of this road from the junction with the Traverse City Branch to the Straits of Mackinac has been let. By the contract, nearly 100 miles of new track are to be laid this season to nearly 75 miles north of Clam Lake. From there to the Straits is about thirty miles. This company have called in $50,000 of the unguaranteed bonds of 1869. Work on the line is progressing finely. Nearly all that can be done in grading to the junction, north of the Manistee, is completed, and but little except surface work is to be done. The line for the Traverse City Branch has been definitely located; the junction to be near Erie Lake, some five miles northeast of the point first chosen, and over two miles shorter; passing through a better country. It is to be completed to Traverse City by Oct. 1.

☞ The Provisional Directors of the Interoceanic Railway Company of Canada held their first meeting on the 24th ult., and organized the company by electing as President the Hon. D. L. Macpherson, Senator; Vice-President, C. H. Fairweather, Esq., President Board of Trade, St. John, New Brunswick; Executive Committee—President and Vice President, Walter Shanley, Esq., M. P., F. W. Cumberland, Esq., M. P., and W. H. Howland, Esq. Provisional Secretary, John Hague, Esq.

☞ At a meeting of the Provisional Directors of the Canada Pacific Railway Company, held in Montreal on the 20th ult., Sir Hugh Allan was elected President of the Company; Donald Mc Innes, Esq., Vice-President; E. Lef. de Bellefeuille, Esq., Secretary: and Hon. J. J. C. Abbott, Solicitor. Sir Hugh Allan and Louis Beaubien, Esq., M.P.P., were appointed to form the Executive Committee of the Provisional Board.

☞ The estimated earnings of the Erie Railway for the week ending June 23, 1872, were $344,286; against $403,440 for the corresponding period of 1871—an increase of $59,154. Total earnings since April 1, 1872, $4,449,033—an increase over the same time in 1871 of $599,019.

☞ The Attleboro' Branch Railroad Company will pay a semi annual dividend of 3½ per cent. on and after July 1.

☞ The Philadelphia *Ledger* of 1st inst., reports the net anthracite coal tonnage for the week ending on the 22d ult., from all sources, at 436,651 tons, and for the year 8,527,976 tons, against 3,978,464 tons to the same date last year, being an increase in the tonnage of anthracite coal of 4,549,512 tons. The production of bituminous coal for the week was 60,346 tons, and for the year 1,113,498 tons, against 895,152 tons to the corresponding time last year—an increase of 218,346 tons. The total production of all kinds of coal for the week was 497,597 tons, and for the year 9,641,474 tons, against 4,963,616 tons to corresponding time last year, showing an increase of 4,677,858 tons.

☞ We are authorized to state that the rumor which has found its way into some of the papers in Western New York to the effect that the Rome, Watertown and Ogdensburgh Railroad has been, or is about to be, leased to the Delaware, Lackawanna and Western Railroad Company, is entirely destitute of truth.

☞ Engineer Hilton has completed the plans for the new bridge at Troy. Bids for its erection will be received by Treasurer Vail until the 11th of July. It is to be completed by the 1st of April, 1873.

The Northern Central Railway and its Connections.

The two links necessary to complete the all-rail connection between the North and the South will soon be welded into the grand trunk line. The Alexandria and Fredericksburg Railway, which connects Washington with Richmond, has been in operation for some time. The officers of this road are gentlemen whose long connection with the Northern Central Railway has made the public tolerably familiar with their names: J. N. DuBarry is Vice President and General Manager; E. S. Young, General Passenger Agent; Jas. M. Drill, General Freight Agent; S. Little, Auditor and Secretary; and J. S. Leib, Treasurer.

The Baltimore and Potomac Railroad, one branch of which connects the Northern Central with the Alexandria and Fredericksburg Railway, thus establishing direct communication between Baltimore and Washington by a new route, is finished with the exception of the tunnel at Baltimore. In a few days regular trains will be put upon the track, which will run in connection with the trains on the Northern Central. The officers of this road are as follows: President, ex-Gov.

ernor Oden Bowie; Vice President and General Manager, J. N. DuBarry; Superintendent E. L. DuBarry; General Passenger Agent, E. S. Young; General Freight Agent, James M. Drill; Auditor and Secretary, S. Little; Treasurer, J. S. Leib.—*Balt. American.*

Sodus Point and Southern Railroad.

Another link in the great chain of railways that are destined to develop the resources of our state and enrich our citizens, is drawing near a successful completion. We refer to the Sodus Point and Southern Railroad, which will shortly be in running order from Sodus Bay, on Lake Ontario, to Stanley's Corners on the Northern Central Railway of Pennsylvania, a distance of thirty-five miles.

The track is now laid and the road ready for traffic between Newark, on the N. Y. C. R. R., and Sodus Centre. It will go into immediate operation. Trains will run to Sodus Bay by the middle of July. The road is now graded to that point. South of Newark the road is graded to Stanley's Corners with the exception of a few miles of easy work.

We congratulate the stockholders and the public on the fact that the road has been well built. The bed is made in the most substantial manner in order to transport safely the heavy freight that is certain to pass over the rails. There is a surface width of sixteen feet on embankments, and eighteen feet in cuttings. The slopes are regular and evenly finished. The masonry is of the most solid and enduring kind, the bridge abutments being built of coursed rock. All culverts, water passes and cattle guards are made of the best quarry stone, and their beds laid in good cement. The principal bridges are of the best wrought iron and will sustain a rolling weight of three thousand pounds to the lineal foot. It is confidently expected that the entire road will be in complete running order by the 15th of September.

The road connects with many important railway, lake and canal lines of freight and travel. First in local importance is the Lake Ontario Shore Road. Then the New York Central at Newark, and its Auburn and Rochester branch between Phelps and Clifton Springs. The through connection at Stanley's, Corners with the Northern Central opens up direct communication with the immense coal deposits in the Shamokin coal fields and other parts of Pennsylvania, with fertile agricultural valleys and mineral hills, and the commercial and passenger trade of Baltimore and the eastern and southern Atlantic sea-board cities, as it will be the shortest direct route to and from those points.

The road now building from Seneca Falls to Waverly will give the company a direct connection with the Lehigh Valley Road, thus affording easy access to the immense coal deposits in that section. Here the road will likewise connect with the important coal roads Sullivan and Erie, and the Barclay. This will open up the shortest and cheapest route for the business men of Philadelphia and neighboring towns transacting business at the lakes.

The connection with the Geneva and Ithaca road will place the Sodus Point line in direct communication with several important roads meeting at Ithaca, including the Delaware, Lackawana and Western. This will ultimately lead to a large and lucrative business.

The completion of the projected line from the Blossburg mines to Pen Yan will prove of first class importance to the Sodus Point road. Coal will be shipped in large quantities from that point to meet the growing demand for it on the lakes, and it must all pass over this road as a natural result of the shortness of the route and the cheapness of the freight.

The road from Bath, near the head of Crooked Lake, which will form a junction at Stanley's Corners, will prove a valuable adjunct to the road.

The growing scarcity and value of timber in the vicinity of the thriving cities and towns bordering on Lake Ontario and in the interior of the Canadas, will inevitably soon call for large shipments of coal. This coal will naturally pass over the readiest and cheapest route, and the income from this traffic alone will undoubtedly reach a highly remunerative sum.

At Newark the road crosses the Erie canal, which makes it an important coal and freight distributing point. Boats will be enabled to receive here the coal shipped at Watkins, at the head of Seneca Lake, thus saving 120 miles of navigation, and making Newark an important point for the distribution of coal east and west on the Erie canal. A projected line S. W. from Stanley's Corners will also tap the Erie at Hornellsville, from which point transfers of freight can be easily made.

On the completion of the proposed direct route from Lake Ontario to Lake Huron, by means of the proposed ship canal, for which a charter has been obtained and surveys made, the distance between these points will be diminished nearly four hundred miles. This will divert, on account of the cheaper rate of freight, a large portion of the western trade to Lake Ontario, and greatly increase business at Sodus Bay.

From the above it will be seen that no railroad in the country has more valuable connections than the Sodus Point road.

The company have sufficient motive power, with a full supply of freight and coal cars, to do all the business of the road, and have ample facilities to increase the rolling stock sufficiently to meet the growing requirements of traffic. Coal pockets, shutes and grain elevators are to be immediately erected at all the principal shipping points, for the cheap transfer and storage of large quantities of coal, grain, timber, and all the great staples. Some of these are to be built in conjunction with other roads.

Commodious wharves are to be built at Sodus Bay, so as to avoid the inconvenience and detention now experienced at other ports on the arrival of large quantities of grain and lumber. Depots will be erected at Flint Creek village, Castleton, Orleans, Phelps, Newark, Fairville, Sodus Centre and Sodus Bay.

A large revenue must also accrue from the local freight and passenger traffic. The direct line traverses a very populous section in a high state of cultivation and rich in agricultural productions. There are likewise large deposits of iron ore, plaster and limestone along the road.

The difference in the rates of through freight in favor of Sodus Point can be estimated from the article of barley, of which there are large shipments to Philadelphia. From Suspension Bridge, the rates are $6 00 per ton; from Oswego, (by boat) $6 80; from Sodus Point, $4 82. The same ratio will also apply to all other kinds of freight.

The purchase of the entire available water front of Sodus Bay by the company was a wise and far seeing operation. This Bay forms the safest and most commodious harbor on the great inland sea of Lake Ontario, and must in a short time become very valuable. They have also secured all the desirable land on Sodus Point, and will soon greatly improve the property. Further extensive improvements are to be inaugurated on that portion of the water front known as the Rogers' property, where all the company's buildings will be erected and their principal business transacted.

Although the company have secured a perpetual title to this valuable harbor property, they freely give long leases (with privilege of renewal) of water fronts to business men who wish to improve the same. Many keen-sighted men are already negotiating for leases on the Rogers' section. They foresee that at no distant day the industrous people on the borders of Lake Ontario will transact the bulk of their business through the port of Sodus Bay. That this is no vague dream is shown from the fact that last year the custom-house officers at the ports of Genesee and Oswego reported the entries and clearances at 1,774,069 tons. And the U. S. Chief Engineer, in speaking of Oswego harbor, said; "I have been informed that last year 60,000,000 feet of lumber was diverted from that port for want of sufficient wharf accommodations." The business at these two ports last year included 6,800,000 bushels of wheat; 7,400,000 bushels of barley, malt, rye, corn and oats, to say nothing of flour, coal, iron, wool, live stock, provisions, etc.

The difference in the distances from all the principal shipping points of the chief products of the country, such as coal, lumber, grain, iron and salt, is largely in favor of Sodus Point. The Point is situated immediately inside of the Government Piers, at the entrance to Sodus Bay. There is an average depth of forty feet of water, the harbor is protected on all sides from the heavy seas that sometimes roll on the lake, and it is the first to open in the spring and the last to close in the fall.

Among the many men to whom honor is due for the speedy and successful completion of this great enterprise, none deserves a larger share than the respected president of the road, Hon. Stephen K. Williams. At times when others were lukewarm and discouraged, he worked on quietly, steadily and confidently. By his sagacious foresight and tact, he has succeeded in making negotiations that have secured the success of the undertaking, saved the stockholders from losses, placed the road on a firm footing, and advised investments that must result in large profits in the future.—*Newark (N. Y.) Courier.*

Terre Haute and Indianapolis Railroad.

The earnings of this road for the years ending November 30, 1870 and 1871, were as follows:

	1870.	1871.
From passengers	$382,169 48	$263,583 18
" freight	535,101 57	456,651 77
" coal	136,341 75	209,046 07
" express	15,059 51	9,023 04
" U. S. mail	14,600 00	14,600 00
" other sources	4,254 28	49,816 68
	$1,087,526 49	$1,002,720 74
Expenses, viz:		
Running road	$205,916 99	$208,940 00
Repairs of road	143,329 65	126,698 23
Repairs of bridges, buildings, etc	25,839 98	10,982 73
Repairs of machinery	120,686 66	110,198 18
General expenses	132,288 16	134,968 49
	$628,061 44	$591,787 63
Net earnings	$459,465 05	$410,933 11
To which add—		
Dividends on stocks		42,132 00
Interest on bonds		80,905 00
Real estate sold		1,008 61
Material sold		36,786 30
Rents received		3,488 15
Profit and loss		2 108 42
Total		$527,356 59
Disbursed as follows:		
State, county and municipal taxes		$14,680 74
Internal revenue taxes		599 25
Interest and exchange		69,873 08
Construction and equipment		157,122 51
Dividends June and December, six per cent. each and U. S. tax		244,695 38
Surplus for the year		40,385 63
Total as above		$527,356 59

It will be seen that the transportation earnings for the year 1871 are $1,002,720 74; and from other sources, $116,423 48—making the gross receipts $1,119,144 22, being $52,882 31 less than the previous year. The amount expended for operating the road, for the payment of taxes and interest, and for additional construction and equipment upon the main line and branches was $884,063 21, being $46,588 49 less than the preceding year. There have been expended upon

branch roads, for coal purposes, $89,846 75. The expenditure for equipment has been $47,203 12. The president in his report says:

The gross earnings of the St. Louis, Vandalia and Terre Haute Railroad, of which this company is lessee, were $1,053,129 33. The operating expenses were $716,503 09; leaving $336,626 24 as the net amount of transportation earnings. The 30 per cent. of gross earnings required to be paid your company under the lease was $315,938 79. The first and second mortgage bonds of the St. Louis, Vandalia and Terre Haute Railroad Company amount to $4,500,000, bear 7 per cent. interest and require the payment of $315,000 per annum. Thus it will be seen that the 30 per cent. of gross earnings paid to the St. Louis, Vandalia and Terre Haute Railroad Company exceed that company's interest requirement $938 79; and that the net transportation earnings have exceeded the 30 per cent. gross earnings, $20,687 45.

Comparing the months of July, August, September, October, and November of last year with the same months of the previous year, it will be seen that the earnings of the St. Louis, Vandalia and Terre Haute Railroad have increased $47,819 17.

The business of the road is in a satisfactory condition. The rapid development of the block coal fields lying upon the line between Indianapolis and Terre Haute, and the increasing agricultural and commercial wealth along the whole line to St. Louis, all combine to promise a large increase of business in the future. This will involve the necessity for a further increase of equipment to meet the demand for transportation, especially in the article of coal, which is now shipped from the Brazil mines to all the leading Western cities, and in large quantities to Chicago, by the Evansville, Terre Haute and Chicago Railroad, since the completion of that road.

The ruinous competition of the Eastern trunk lines and the low rates, have been felt during the whole of the past year, and the hope is indulged that some remedy may be adopted by which rates may be better maintained.

It is satisfactory to know that there have been so few casualties upon the line during the year, a fact which reflects the highest credit upon the operating employes.

The advantages of steel over iron rails have been so satisfactorily demonstrated—especially over roads where the traffic is heavy—that it has been deemed advisable to replace the old rails with steel. About three miles have been relaid with steel rails and a contract made for enough to replace twelve miles during the ensuing year. The great durability of these rails is well understood, and the demand for them in the United States is rapidly increasing. If the Bessemer process of steel manufacture shall be generally introduced in this country, and manufactories for that purpose established at the point where iron ore and block coal can be brought together at the least cost, then we may, at no distant day, place these rails upon the entire line, with a saving of the cost of transportation from England, or from distant parts of our own country—for there is no point where this can be done more cheaply and advantageously than upon your road, at or near Terre Haute.

The reports of the general superintendent, the secretary, and the superintendent of motive power, will command especial attention. They set forth in detail the management of the road and the financial condition of the company. The recommendations of the general superintendent are worthy of the most attentive consideration, as showing the necessity for some additional expenditures during the ensuing year. Increased facilities for coal transportation will become indispensible, as will also the extension of the branch roads still further in the block-coal fields. The increased and increasing demand for coal will lead to the opening of a number of additional mines south of Brazil, and the transportation of the coal produced by them must pass into other hands if suitable arrangements are not made for it. There is no section of country exhibiting a more rapid improvement, in all that contributes to agricultural, manufacturing and commercial wealth, than that through which the Terre Haute and Indianapolis and the St. Louis, Vandalia and Terre Haute Railroads pass. These roads must become the lines of transit for the iron ores of Missouri, in greatly increased quantities, in order that it may be brought directly to the block-coal region for manufacturing purposes. And while it is impossible to anticipate the extent to which these business operations may be carried, and the increase of railroad facilities they may require, we should not fail to keep ourselves in a condition to be prepared for them.

Secretary.—W. H. Buckingham.

Treasurer.—J. H. Hager.

General Superintendent.—J. E. Simpson.

☞ The track is now laid over the bridge and tunnel works over Big Pipe Creek at Bruceville, on the Frederick and Pennsylvania Line Railroad, and the connection with the Western Maryland Railroad and the Pennsylvania roads is complete. The Pennsylvania Railroad Company now run their own engines over the road, and bring all the iron *via* Northern Central and Hanover Junction. The track layers are rapidly approaching Renner's warehouse, 1½ miles north of Woodsboro', Frederick county.

☞ The Burlington, Cedar Rapids and Minnesota Railroad Company are preparing to build a branch westward from Vinton, besides the branch northeast to Postville. Work on the westward branch has commenced.

20 PER CENT.

INVESTMENT.

BOOKS CLOSE JULY 15.

THE AMERICAN BRIDGE CO.,

OF CHICAGO, ILL.

L. B. BOOMER, of Chicago, President.

(Organized August 1, 1870.

Authorized Capital Stock, - - - $1,000,000.

The whole amount of the authorized Capital Stock of this Company not having been issued, the balance thereof will be issued to subscribers at par, payments for same to be made in four instalments of 25 per cent. each, viz:

25 per cent.	- - July	15, 1872.
25 "	- - August	1, 1872.
25 "	- - September	1, 1872.
25 "	- - October	1, 1872.

The Subscription Books now open at the office of the undersigned will be closed July 15, or as soon as the new stock is fully subscribed.

The total amount of stock issued at this time is $414,-700, and on this basis the Compan shows a present surplus of $136,280 97, and is now doing a flourishing business. One thousand men are constantly employed in their extensive works, and they now have on hand $1,-25",000 of work for various Railroads in the United States, among which may be mentioned the

CHICAGO, R. I. & PACIFIC,
CHICAGO & N. WESTERN,
MICH. CENTRAL,
MISSOURI PACIFIC,
ATLANTIC & PACIFIC, &c.

and the Company is now offered work to the amount of over $6,000,000, including some of the largest bridges ever built in this country, to accept of which and further business necessitates a larger working capital, as immense amounts of material have to be kept constantly on hand, and the Company are frequently obliged to receive in part payment for their work Railroad and other Bonds, which are perfectly good securities, but not always immediately marketable.

The career of the American Bridge Company, though brief, has already fully demonstrated the profitableness of the enterprise. The Company has constructed, since its organization and up to the 31st of December, 1871, a total of 38,137 feet of bridges, 18 turning tables, and 18 iron roofs, and pneumatic and screw pile substructures, costing $3,400,000, and have facilities for the construction of pneumatic piles unsurpassed by any company in the country, and a capacity for the construction of at least 150 feet of Bridges for every working day in the year.

The Iron Railroad and Highway Bridge at Leavenworth, of three spans of 340 feet each, and the Union Pacific Bridge across the Missouri River, of eleven spans of 250 feet each, were constructed by this Company.

The net profit arising from this business, as shown by the books of the Company, up to the 31st March, 1872, was the sum of $373,483 14, or at the rate of $344,089 28 *per annum*, being over 50 *per cent.* upon the capital stock then outstanding. With the proposed new structures, machinery, &c., the Company will have much greater capacity, and the proceeds of the increased issue of stock will enable them to buy material for cash, thereby making a saving of from $50,000 to $7 ,000 per year.

The Company can undoubtedly, on above basis, make dividends of from 20 to 25 *per cent. per annum* on the full amount of capital, $1,000,000, with a fair prospect of a considerable increase.

The undersigned are prepared to give to those inquiring the fullest details and entire satisfaction regarding the reliability of the Company's statements, and the unquestioned integrity and ability of its officers.

We confidently commend to capitalists the above as an investment worthy their attention.

Sodus Point and Southern Railroad.

Another link in the great chain of railways that are destined to develop the resources of our state and enrich our citizens, is drawing near a successful completion. We refer to the Sodus Point and Southern Railroad, which will shortly be in running order from Sodus Bay, on Lake Ontario, to Stanley's Corners on the Northern Central Railway of Pennsylvania, a distance of thirty-five miles.

The track is now laid and the road ready for traffic between Newark, on the N. Y. C. R. R., and Sodus Centre. It will go into immediate operation. Trains will run to Sodus Bay by the middle of July. The road is now graded to that point. South of Newark the road is graded to Stanley's Corners with the exception of a few miles of easy work.

We congratulate the stockholders and the public on the fact that the road has been well built. The bed is made in the most substantial manner in order to transport safely the heavy freight that is certain to pass over the rails. There is a surface width of sixteen feet on embankments, and eighteen feet in cuttings. The slopes are regular and evenly finished. The masonry is of the most solid and enduring kind, the bridge abutments being built of coursed rock. All culverts, water passes and cattle guards are made of the best quarry stone, and their beds laid in good cement. The principal bridges are of the best wrought iron and will sustain a rolling weight of three thousand pounds to the lineal foot. It is confidently expected that the entire road will be in complete running order by the 15th of September.

The road connects with many important railway, lake and canal lines of freight and travel. First in local importance is the Lake Ontario Shore Road. Then the New York Central at Newark, and its Auburn and Rochester branch between Phelps and Clifton Springs. The through connection at Stanley's, Corners with the Northern Central opens up direct communication with the immense coal deposits in the Shamokin coal fields and other parts of Pennsylvania, with fertile agricultural valleys and mineral hills, and the commercial and passenger trade of Baltimore and the eastern and southern Atlantic sea-board cities, as it will be the shortest direct route to and from those points.

The road now building from Seneca Falls to Waverly will give the company a direct connection with the Lehigh Valley Road, thus affording easy access to the immense coal deposits in that section. Here the road will likewise connect with the important coal roads Sullivan and Erie, and the Barclay. This will open up the shortest and cheapest route for the business men of Philadelphia and neighboring towns transacting business at the lakes.

The connection with the Geneva and Ithaca road will place the Sodus Point line in direct communication with several important roads meeting at Ithaca, including the Delaware, Lackawana and Western. This will ultimately lead to a large and lucrative business.

The completion of the projected line from the Blossburg mines to Pen Yan will prove of first class importance to the Sodus Point road. Coal will be shipped in large quantities from that point to meet the growing demand for it on the lakes, and it must all pass over this road as a natural result of the shortness of the route and the cheapness of the freight.

The road from Bath, near the head of Crooked Lake, which will form a junction at Stanley's Corners, will prove a valuable adjunct to the road.

The growing scarcity and value of timber in the vicinity of the thriving cities and towns bordering on Lake Ontario and in the interior of the Canadas, will inevitably soon call for large shipments of coal. This coal will naturally pass over the readiest and cheapest route, and the income from this traffic alone will undoubtedly reach a highly remunerative sum.

At Newark the road crosses the Erie canal, which makes it an important coal and freight distributing point. Boats will be enabled to receive here the coal shipped at Watkins, at the head of Seneca Lake, thus saving 120 miles of navigation, and making Newark an important point for the distribution of coal east and west on the Erie canal. A projected line S. W. from Stanley's Corners will also tap the Erie at Hornellsville, from which point transfers of freight can be easily made.

On the completion of the proposed direct route from Lake Ontario to Lake Huron, by means of the proposed ship canal, for which a charter has been obtained and surveys made, the distance between these points will be diminished nearly four hundred miles. This will divert, on account of the cheaper rate of freight, a large portion of the western trade to Lake Ontario, and greatly increase business at Sodus Bay.

From the above it will be seen that no railroad in the country has more valuable connections than the Sodus Point road.

The company have sufficient motive power, with a full supply of freight and coal cars, to do all the business of the road, and have ample facilities to increase the rolling stock sufficiently to meet the growing requirements of traffic. Coal pockets, shutes and grain elevators are to be immediately erected at all the principal shipping points, for the cheap transfer and storage of large quantities of coal, grain, timber, and all the great staples. Some of these are to be built in conjunction with other roads.

Commodious wharves are to be built at Sodus Bay, so as to avoid the inconvenience and detention now experienced at other ports on the arrival of large quantities of grain and lumber. Depots will be erected at Flint Creek village, Castleton, Orleans, Phelps, Newark, Fairville, Sodus Centre and Sodus Bay.

A large revenue must also accrue from the local freight and passenger traffic. The direct line traverses a very populous section in a high state of cultivation and rich in agricultural productions. There are likewise large deposits of iron ore, plaster and limestone along the road.

The difference in the rates of through freight in favor of Sodus Point can be estimated from the article of barley, of which there are large shipments to Philadelphia. From Suspension Bridge, the rates are $6 00 per ton; from Oswego, (by boat) $6 30; from Sodus Point, $4 82. The same ratio will also apply to all other kinds of freight.

The purchase of the entire available water front of Sodus Bay by the company was a wise and far seeing operation. This Bay forms the safest and most commodious harbor on the great inland sea of Lake Ontario, and must in a short time become very valuable. They have also secured all the desirable land on Sodus Point, and will soon greatly improve the property. Further extensive improvements are to be inaugurated on that portion of the water front known as the Rogers' property, where all the company's buildings will be erected and their principal business transacted.

Although the company have secured a perpetual title to this valuable harbor property, they freely give long leases (with privilege of renewal) of water fronts to business men who wish to improve the same. Many keen-sighted men are already negotiating for leases on the Rogers' section. They foresee that at no distant day the industrous people on the borders of Lake Ontario will transact the bulk of their business through the port of Sodus Bay. That this is no vague dream is shown from the fact that last year the custom-house officers at the ports of Genesee and Oswego reported the entries and clearances at 1,774,059 tons. And the U. S. Chief Engineer, in speaking of Oswego harbor, said; "I have been informed that last year 60,000,000 feet of lumber was diverted from that port for want of sufficient wharf accommodations." The business at these two ports last year included 6,800,000 bushels of wheat; 7,400,000 bushels of barley, malt, rye, corn and oats, to say nothing of flour, coal, iron, wool, live stock, provisions, etc.

The difference in the distances from all the principal shipping points of the chief products of the country, such as coal, lumber, grain, iron and salt, is largely in favor of Sodus Point. The Point is situated immediately inside of the Government Piers, at the entrance to Sodus Bay. There is an average depth of forty feet of water, the harbor is protected on all sides from the heavy seas that sometimes roll on the lake, and it is the first to open in the spring and the last to close in the fall.

Among the many men to whom honor is due for the speedy and successful completion of this great enterprise, none deserves a larger share than the respected president of the road, Hon. Stephen K. Williams. At times when others were lukewarm and discouraged, he worked on quietly, steadily and confidently. By his sagacious foresight and tact, he has succeeded in making negotiations that have secured the success of the undertaking, saved the stockholders from losses, placed the road on a firm footing, and advised investments that must result in large profits in the future.—*Newark (N. Y.) Courier.*

Terre Haute and Indianapolis Railroad.

The earnings of this road for the years ending November 30, 1870 and 1871, were as follows:

	1870.	1871.
From passengers....	$382,169 43	$263,583 18

Surplus for the year		40,385 63
Total as above.....		$527,356 59

It will be seen that the transportation earnings for the year 1871 are $1,002,720 74; and from other sources, $116,423 48—making the gross receipts $1,119,144 22, being $52,382 31 less than the previous year. The amount expended for operating the road, for the payment of taxes and interest, and for additional construction and equipment upon the main line and branches was $884,063 21, being $46,588 49 less than the preceding year. There have been expended upon

branch roads, for coal purposes, $89,846 75. The expenditure for equipment has been $47,203 12. The president in his report says:

The gross earnings of the St. Louis, Vandalia and Terre Haute Railroad, of which this company is lessee, were $1 053,129 33. The operating expenses were $716,503 09; leaving $336 626 24 as the net amount of transportation earnings. The 30 per cent. of gross earnings required to be paid your company under the lease was $315,938 79. The first and second mortgage bonds of the St. Louis, Vandalia and Terre Haute Railroad Company amount to $4,500,000, bear 7 per cent. interest and require the payment of $315 000 per annum. Thus it will be seen that the 30 per cent. of gross earnings paid to the St. Louis, Vandalia and Terre Haute Railroad Company exceed that company's interest requirement $938 79; and that the net transportation earnings have exceeded the 30 per cent. gross earnings, $20,687 45.

Comparing the months of July, August, September, October, and November of last year with the same months of the previous year, it will be seen that the earnings of the St. Louis, Vandalia and Terre Haute Railroad have increased $47,819 17.

The business of the road is in a satisfactory condition. The rapid development of the block coal fields lying upon the line between Indianapolis and Terre Haute, and the increasing agricultural and commercial wealth along the whole line to St. Louis, all combine to promise a large increase of business in the future. This will involve the necessity for a further increase of equipment to meet the demand for transportation, especially in the article of coal, which is now shipped from the Brazil mines to all the leading Western cities, and in large quantities to Chicago, by the Evansville, Terre Haute and Chicago Railroad, since the completion of that road.

The ruinous competition of the Eastern trunk lines and the low rates, have been felt during the whole of the past year, and the hope is indulged that some remedy may be adopted by which rates may be better maintained.

It is satisfactory to know that there have been so few casualties upon the line during the year, a fact which reflects the highest credit upon the operating emp oyes.

The advantages of steel over iron rails have been so satisfactorily demonstrated—especially over roads where the traffic is heavy—that it has been deemed advisable to replace the old rails with steel. About three miles have been relaid with steel rails and a contract made for enough to replace twelve miles during the ensuing year. The great durability of these rails is well understood, and the demand for them in the United States is rapidly increasing. If the Bessemer process of steel manufacture shall be generally introduced in this country, and manufactories for that purpose established at the point where iron ore and block coal can be brought together at the least cost, then we may, at no distant day, place these rails upon the entire line, with a saving of the cost of transportation from England, or from distant parts of our own country—for there is no point where this can be done more cheaply and advantageously than upon your road, at or near Terre Haute.

The reports of the general superintendent, the secretary, and the superintendent of motive power, will command especial attention. They set forth in detail the management of the road and the financial condition of the company. The recommendations of the general superintendent are worthy of the most attentive consideration, as showing the necessity for some additional expenditures during the ensuing year. Increased facilities for coal transportation will become indispensible, as will also the extension of the branch roads still further in the block-coal fields. The increased and increasing demand for coal will lead to the opening of a number of additional mines south of Brazil, and the transportation of the coal produced by them must pass into other hands if suitable arrangements are not made for it. There is no section of country exhibiting a more rapid improvement, in all that contributes to agricultural, manufacturing and commercial wealth, than that through which the Terre Haute and Indianapolis and the St. Louis, Vandalia and Terre Haute Railroads pass. These roads must become the lines of transit for the iron ores of Missouri, in greatly increased quantities, in order that it may be brought directly to the block-coal region for manufacturing purposes. And while it is impossible to anticipate the extent to which these business operations may be carried, and the increase of railroad facilities they may require, we should not fail to keep ourselves in a condition to be prepared for them.

President.—W. R. McKeen.

Directors.—Chauncey Rose, Demas Deming, W. K. Edwards, A. McGregor, W. R. McKeen, F. Nippert, Josephus Collett, Jr.

Secretary.—W. H. Buckingham.

Treasurer.—J. H. Hager.

General Superintendent.—J. E. Simpson.

☞ The track is now laid over the bridge and tunnel works over Big Pipe Creek at Bruceville, on the Frederick and Pennsylvania Line Railroad, and the connection with the Western Maryland Railroad and the Pennsylvania roads is complete. The Pennsylvania Railroad Company now run their own engines over the road, and bring all the iron *via* Northern Central and Hanover Junction. The track layers are rapidly approaching Renner's warehouse, 1½ miles north of Woodsboro', Frederick county.

☞ The Burlington, Cedar Rapids and Minnesota Railroad Company are preparing to build a branch westward from Vinton, besides the branch northeast to Postville. Work on the westward branch has commenced.

20 PER CENT.

INVESTMENT.

BOOKS CLOSE JULY 15.

THE AMERICAN BRIDGE CO.,

OF CHICAGO, ILL.

L. B. BOOMER, of Chicago, President.

(Organized August 1, 1870.

Authorized Capital Stock, - - - $1,000,000.

The whole amount of the authorized Capital Stock of this Company not having been issued, the balance thereof will be issued to subscribers at par, payments for same to be made in four instalments of 25 per cent. each, viz:

25 per cent. - - July 15, 1872.
25 " - - August 1, 1872.
25 " - - September 1, 1872.
25 " - - October 1, 1872.

The Subscription Books now open at the office of the undersigned will be closed July 15, or as soon as the new stock is fully subscribed.

The total amount of stock issued at this time is **$414,700**, and on this basis the Company shows a present surplus of **$136,280 97**, and is now doing a flourishing business. One thousand men are constantly employed in their extensive works, and they now have on hand **$1,250,000** of work for various Railroads in the United States, among which may be ment oned the

CHICAGO, R. I. & PACIFIC,
CHICAGO & N. WESTERN,
MICH. CENTRAL,
MISSOURI PACIFIC,
ATLANTIC & PACIFIC, &c.

and the Company is now offered work to the amount of over **$6,000,000**, including some of the largest bridges ever built in this country, to accept of which and further business necessitates a larger working capital, as immense amounts of material have to be kept constantly on hand, and the Company are frequently obliged to receive in part payment for their work Railroad and other Bonds, which are perfectly good securities, but not always immediately marketable.

The care of the American Bridge Company, though brief, has already fully demonstrated the profitableness of the enterprise. The Company has constructed, since its organization and up to the 31st of December, 1871, a total of 38,137 feet of bridges, 18 turning tables, and 4 iron roofs, and pneumatic and screw pile substructures, costing **$3,400,000**, and have facilities for the construction of pneumatic piles unsurpassed by any company in the country, and a capacity for the construction of at least 150 feet of Bridges for every working day in the year.

The Iron Railroad and Highway Bridge at Leavenworth, of three spans of 340 feet each, and the Union Pacific Bridge across the Missouri River, of eleven spans of 250 feet each, were constructed by this Company.

The net profit arising from this business, as shown by the books of the Company, up to the 31st March, 1872, was the sum of **$373,482 14**, or at the rate of **$244,089 28** *per annum*, being over **50** *per cent.* upon the capital stock then outstanding. With the proposed new structures, machinery, &c., the Company will have much greater capacity, and the proceeds of the increased issue of stock will enable them to buy material for cash, thereby making a saving of from **$50,000** to **$7 ,000** per year.

The Company can undoubtedly, on above basis, make dividends of from **20** to **25** *per cent. per annum* on the full amount of capital, **$1,000,000**, with a fair prospect of a considerable increase.

The undersigned are prepared to give to those inquiring the fullest details and entire satisfaction regarding the reliability of the Company's statements, and the unquestioned integrity and ability of its officers.

We confidently commend to capitalists the above as an investment worthy their attention.

MARVIN BROS.

BANKERS.

No. 49 Exchange Place, N. Y.

Sole Financial Agents in the East.

Chesapeake and Delaware Canal.

The following statement made from the Treasurer's balance sheet, cash account and exhibits will show in a condensed form, the financial condition of the company:

The revenue from tolls for the year ending May 31, 1872, is		$365,988 60
From other sources		7,790 97
		$373,779 57
Add cash on hand, May 31, 1871		175,073 63
		$548,853 20

The expenditures for the same period are as follows:

For materials, wages, repairs, interest on mortgage debt, taxes, salaries of officers, rents, etc.	$241,977 55	
For purchase of land to secure riparian rights on Back creek	7,790 50	
For dividends on capital stock, June and December, 1871	114,372 44	
	$364,140 49	
For this sum expended in purchase of funded debt of the company, to be converted into stock of the company for dividends, as required by the terms of the mortgage	24,993 45	
Total expenditures	$389,133 94	
Add five months' accrued interest on mortgage loan	49,842 08	
		438,976 02
Net cash balance in treasurer's hands		$109,877 18

A dividend of three per cent. out of this balance for the last six months is recommended. This dividend will require an appropriation of $56,425 50.

The amount of capital stock now outstanding is $1,881,050; the amount of funded debt is $1,993,683 12.

The contingent fund account stands as follows:

Securities on hand July 1, 1862, to credit of this fund	$20,000 00
Securities purchased since July 1, 1862, to date	102,200 00
Cash on hand, May 31, 1872	2,139 11
	$124,339 11

Steam Superseded.

Are we on the eve of another revolution? Not a civil war, but such a revolution as resulted from the invention of the locomotive and electric telegraph. Only thirty years ago Professor Morse was struggling to get aid from Congress to make trial of his wonderful invention. And now another inventer has gained permission of the Government to make another experiment, which may yet become as interesting an event in history as the trial of the famous electric wire between Baltimore and Washington. The coming man is Albert Brisbane, for a time a resident of Irvington, and his invention is a kind of pneumatic tube, by means of which time and space are to be annihilated. His unremitting efforts last winter succeeded in getting from Congress an appropriation of $15,000 for the purpose of laying a tube between the Capitol at Washington and the Government Printing Office—a distance of half a mile, and if this experiment proves satisfactory another appropriation will be granted for the construction of a tube between Washington and Baltimore, the ground of the first telegraphic triumph. The method of transit will be by hollow spheres propelled through the tube by compressed air, and some idea of the velocity with which they can be driven may be got from Mr. Brisbane's prophecy that the New York papers will be sent to Chicago and St. Louis in time for their eight o'clock breakfast tables. The general establishment of this mode of transportation would be a sad blow to the railroad system of the country. An immediate loss of all freight traffic would ensue to the railroads, and they with steamboats that ply our rivers would be consigned to the insignificance of mere pleasure-excursion party conveyances. Although Mr. Brisbane's invention has been achieved upon the basis of an old theory, he will deserve none the less credit in case of success, for the man who most deserves the world's gratitude is he by whose efforts the world derives practical benefit. The inventor's confidence in the result and the generally acknowledged feasability of a practical application of the pneumatic theory seem to promise success, and it is to be hoped that the coming experiment may be a satisfactory one.—*Newark Advertiser.*

One Cent Postal Cards.

The new postal bill, which became a law just before the session closed, makes some changes in the existing postal regulations which are of general interest. The most important is the authorization of one cent postal cards for correspondence or for printed circulars, similar to those which were introduced in Great Britain nearly two years ago, and are now in use in nearly all European countries. The House provided in the bill for cards, with paper flap, to cover and conceal the writings. The Senate changed this to an open card. In the conference committee the style of the card was left to the discretion of the Postmaster General, who prefers the open card, and will order that kind only to be manufactured. The face of the card will bear a one-cent stamp, and will be provided with lines for the address, and the back will be ruled for the letter. The price of the card and stamp will be only one cent. It will probably be three or four weeks before they will be ready for sale, as the plates for printing have yet to be prepared.

The postage on circulars, newspapers and other transient printed matter, which, under the old law was two cents for every four ounces or less, is now one cent for two ounces or less; small circulars, which formerly cost two cents to mail, can now be sent for one cent. The change is now in force, the law being immediate in its effects.

Locomotive Boilers.

At the meeting of the Railway Master Mechanics' Association, held recently in Boston, an interesting discussion took place on the subject of boilers and boiler materials. On the question whether rivet holes should be drilled or punched in boiler plates, it was decided that drilling was preferable, experiments having shown that the drilled plates were able to stand thirty per cent greater pressure than those punched. In reference to the thickness of fine sheets, a report of a committee was read, recommending that back flue sheets of locomotives should be composed of half-inch iron or of seven-sixteenths of an inch steel, and that front flue sheets should be composed of seven-sixteenths of an inch thick iron or three-eighths steel. On the question of the relative merits of the wagon top and straight locomotive boilers, an animated discussion took place. The straight boilers were generally considered stronger and cheaper, but the use of the wagon top was advocated on the ground of the convenience of entering the boilers to clean them from the impurities deposited by the water. The question was submitted to the meeting, and a preference of the wagon top to straight boilers, on four-wheeled drivers was expressed by a vote of twenty-eight to thirteen.

Narrow-Gauge Railroads.

The committee appointed by the St. Louis convention to report upon "the peculiar merits and advantages of the narrow-gauge railway system" have made an elaborate report, recommending the adoption of the three-feet gauge, and concluding their review of its advantages as follows:

1. Costing only about one-half as much as the broad-gauge, it is within the means of all sections to build them; hence will enable them to avail themselves of railway facilities where otherwise they will be compelled to dispense with them.

2. From their small cost, light operating expenses, and small interest account they will prove to be paying investments.

3. They will supply the great want of the age, cheap transportation.

4. Cheapening transportation, they will develop dormant interests more rapidly than our present costly structures with their high rates can possibly do.

5. Their general adoption in sections without railway facilities will enhance the value of properties largely in excess of their cost.

6. Penetrating those sections, and rapidly developing their resources by low rates, they will bring a large new business to the broad-gauge roads, enabling them to reduce their rates and thereby stimulate old and develop new interests.

7. A failure to adopt the narrow-gauge in the sections referred to will necessarily defer the construction of railways until such time as their means will admit of the more costly broad-gauge with its consequent high rates.

Locomotives.

At the recent meeting of the American Railway Mechanics' Association, in Boston, a report was read on the comparative cost of operating eight-wheeled and ten-wheeled locomotives. The statements received from sixteen railroads give the following figures for the eight-wheeled locomotives: Repairs, 4.11 per cent.; fuel, 9.53, and stores, .85. For ten-wheeled locomotives the figures are: Repairs, 5.78 per cent.; fuel, 11.23, and stores, 1.05. The number of tons hauled in proportion to the weight of the locomotives was greatly in favor of the eight-wheeled engines. In reference to the comparative performance of ten-wheeled engines with six drivers coupled, and eight-wheeled engines with four drivers coupled, a report was read giving the preference to the eight-wheeled engine, it being shown that a particular engine of the latter class could be run at one-third less expense. In reference to safety valves a report was read recommending the Richardson valve in connection with one of the old styles, the former to be arranged so as to be out of the control of the engineer, and the latter to blow off steam at stations.

Cairo and Fulton Railroad.

We publish this week two notices to stockholders of the Cairo and Fulton railroad—one from the secretary of the company, stating that assessments on the stock have been made to the amount of fifty per cent., and requiring payment thereof to be made within sixty days, or the stock will be forfeited; the other notice is from the land commissioner, to the effect that old stockholders who do not care to make further payments on their subscriptions, can receive certificates of fully paid stock for the amount which they have already paid in cash. This unusually liberal action on the part of the company is prompted, we presume, by a desire that the citizens who originally subscribed stock in the road should retain an interest in it, and not lose, out right, the amounts which they have paid.—*Arkansas Gazette.*

☞ The officers of the Flint and Pere Marquette Railroad Company, recently elected, are: President, E. B. Ward; Vice President, Samuel Farwell; Secretary and Treasurer, H. C. Potter; Superintendent, Geo. C. Kimball.

Horse Railroads of the State of Pennsylvania.

In the original reports of Street Railroad Companies, dividends are stated at so much per share. In the above table they are reduced to a per centage on paid up stock.

Safe and Profitable!

THE

CANADA SOUTHERN

First Mortgage Sinking Fund 30 Years

7 PER CT. GOLD BONDS

AT

90 AND ACCRUED INTEREST.

The Road runs from Buffalo to the Detroit River, and is the Eastern link in the new AIR LINE FROM BUFFALO TO CHICAGO, and has been under construction for about two years past by railroad men who have seen the necessity for a STEEL RAIL, LOW GRADE, SHORT ROUTE between the great railroad systems which diverge from Chicago, Toledo and Buffalo.

Among the builders of the road, by whose cash subscriptions 220 miles (out of 290) have already been graded, bridged and made ready for the superstructure, a large part of the steel rails bought, all of the materials for the stations and a part of the equipment purchased, are:

MILTON COURTRIGHT, JOHN F. TRACY, DAVID DOWS, WM. L. SCOTT, HENRY H. FARNHAM, R. A. FORSYTH, HENRY PORTER, JOHN M. BURKE, M. L. SYKES, Jr., B. F. ALLEN, all directors, either in the Chicago and North West or the Chicago, Rock Island and Pacific; GEO. OPDYKE of the Midland Road; JOHN B. ALLEN, SIDNEY DILLON, DANIEL DREW, J. S. CASEMENT, J. & J. CASEY, O. S. CHAPMAN, JOHN ROSS, DAVID STEWART, and F. H. WINSTON.

THE ROAD will be

33 Miles Shorter than any other Road, either BUILT or in contemplation between Buffalo and Chicago, and will also shorten the distance between Toledo and Buffalo 23 miles.

THE MAXIMUM GRADE on the entire line does not exceed FIFTEEN FEET to the mile—and Ninety-six per cent. of the road IS STRAIGHT.

THE ROAD WILL BE COMPLETED and in running order on or before Dec. 31 of this year.

The principal and interest of the bonds are payable either in New York, London, or Frankfort.

We confidently recommend the bonds to all classes of investors.

LEONARD, SHELDON & FOSTER,
No. 10 Wall-St.

NOTICE.

HAVING BECOME ASSOCIATED WITH Messrs. LEONARD, SHELDON & FOSTER in the Agency of the CANADA SOUTHERN RAILWAY CO., we offer the above named Bonds for sale.

After a thorough investigation, we recommend them to our friends and customers as a SURE AND RELIABLE INVESTMENT.

Pamphlets and all information furnished on application.

Winslow, Lanier & Co.,
27 PINE ST.

Chesapeake and Delaware Canal.

The following statement made from the Treasurer's balance sheet, cash account and exhibits will show in a condensed form, the financial condition of the company:

The revenue from tolls for the year ending May 31, 1872, is		$365,988 60
From other sources		7,790 97
		$373,779 57
Add cash on hand, May 31, 1871		175,073 63
		$548,853 20
The expenditures for the same period are as follows:		
For materials, wages, repairs, interest on mortgage debt, taxes, salaries of officers, rents, etc.	$241,977 55	
For purchase of land to secure riparian rights on Back creek	7,790 50	
For dividends on capital stock, June and December, 1871	114,372 44	
	$364,140 49	
For this sum expended in purchase of funded debt of the company, to be converted into stock of the company for dividends, as required by the terms of the mortgage	24,993 45	
Total expenditures	$389,133 94	
Add five months' accrued interest on mortgage loan	49,842 08	
		438,976 02
Net cash balance in treasurer's hands		$109,877 18

A dividend of three per cent. out of this balance for the last six months is recommended. This dividend will require an appropriation of $56,425 50.

The amount of capital stock now outstanding is $1,881,050; the amount of funded debt is $1,993,683 12.

The contingent fund account stands as follows:

Securities on hand July 1, 1862, to credit of this fund	$20,000 00
Securities purchased since July 1, 1862, to date	102,200 00
Cash on hand, May 31, 1872	2,139 11
	$124,339 11

Steam Superseded.

Are we on the eve of another revolution? Not a civil war, but such a revolution as resulted from the invention of the locomotive and electric telegraph. Only thirty years ago Professor Morse was struggling to get aid from Congress to make trial of his wonderful invention. And now another inventer has gained permission of the Government to make another experiment, which may yet become as interesting an event in history as the trial of the famous electric wire between Baltimore and Washington. The coming man is Albert Brisbane, for a time a resident of Irvington, and his invention is a kind of pneumatic tube, by means of which time and space are to be annihilated. His unremitting efforts last winter succeeded in getting from Congress an appropriation of $15,000 for the purpose of laying a tube between the Capitol at Washington and the Government Printing Office—a distance of half a mile, and if this experiment proves satisfactory another appropriation will be granted for the construction of a tube between Washington and Baltimore, the ground of the first telegraphic triumph. The method of transit will be by hollow spheres propelled through the tube by compressed air, and some idea of the velocity with which they can be driven may be got from Mr. Brisbane's prophecy that the New York papers will be sent to Chicago and St. Louis in time for their eight o'clock breakfast tables. The general establishment of this mode of transportation would be a sad blow to the railroad system of the country. An immediate loss of all freight traffic would ensue to the railroads, and they with steamboats that ply our rivers would be consigned to the insignificance of mere pleasure-excursion party conveyances. Although Mr. Brisbane's invention has been achieved upon the basis of an old theory, he will deserve none the less credit in case of success, for the man who most deserves the world's gratitude is he by whose efforts the world derives practical benefit. The inventor's confidence in the result and the generally acknowledged feasability of a practical application of the pneumatic theory seem to promise success, and it is to be hoped that the coming experiment may be a satisfactory one.—*Newark Advertiser.*

One Cent Postal Cards.

The new postal bill, which became a law just before the session closed, makes some changes in the existing postal regulations which are of general interest. The most important is the authorization of one cent postal cards for correspondence or for printed circulars, similar to those which were introduced in Great Britain nearly two years ago, and are now in use in nearly all European countries. The House provided in the bill for cards, with paper flap, to cover and conceal the writings. The Senate changed this to an open card. In the conference committee the style of the card was left to the discretion of the Postmaster General, who prefers the open card, and will order that kind only to be manufactured. The face of the card will bear a one-cent stamp, and will be provided with lines for the address, and the back will be ruled for the letter. The price of the card and stamp will be only one cent. It will probably be three or four weeks before they will be ready for sale, as the plates for printing have yet to be prepared.

The postage on circulars, newspapers and other transient printed matter, which, under the old law was two cents for every four ounces or less, is now one cent for two ounces or less; small circulars, which formerly cost two cents to mail, can now be sent for one cent. The change is now in force, the law being immediate in its effects.

Locomotive Boilers.

At the meeting of the Railway Master Mechanics' Association, held recently in Boston, an interesting discussion took place on the subject of boilers and boiler materials. On the question whether rivet holes should be drilled or punched in boiler plates, it was decided that drilling was preferable, experiments having shown that the drilled plates were able to stand thirty per cent greater pressure than those punched. In reference to the thickness of fine sheets, a report of a committee was read, recommending that back flue sheets of locomotives should be composed of half-inch iron or of seven-sixteenths of an inch steel, and that front flue sheets should be composed of seven-sixteenths of an inch thick iron or three-eighths steel. On the question of the relative merits of the wagon top and straight locomotive boilers, an animated discussion took place. The straight boilers were generally considered stronger and cheaper, but the use of the wagon top was advocated on the ground of the convenience of entering the boilers to clean them from the impurities deposited by the water. The question was submitted to the meeting, and a preference of the wagon top to straight boilers, on four-wheeled drivers was expressed by a vote of twenty-eight to thirteen.

Narrow-Gauge Railroads.

The committee appointed by the St. Louis convention to report upon "the peculiar merits and advantages of the narrow-gauge railway system" have made an elaborate report, recommending the adoption of the three-feet gauge, and concluding their review of its advantages as follows:

1. Costing only about one-half as much as the broad-gauge, it is within the means of all sections to build them; hence will enable them to avail themselves of railway facilities where otherwise they will be compelled to dispense with them.

2. From their small cost, light operating expenses, and small interest account they will prove to be paying investments.

3. They will supply the great want of the age, cheap transportation.

4. Cheapening transportation, they will develop dormant interests more rapidly than our present costly structures with their high rates can possibly do.

5. Their general adoption in sections without railway facilities will enhance the value of properties largely in excess of their cost.

6. Penetrating those sections, and rapidly developing their resources by low rates, they will bring a large new business to the broad-gauge roads, enabling them to reduce their rates and thereby stimulate old and develop new interests.

7. A failure to adopt the narrow-gauge in the sections referred to will necessarily defer the construction of railways until such time as their means will admit of the more costly broad-gauge with its consequent high rates.

Locomotives.

At the recent meeting of the American Railway Mechanics' Association, in Boston, a report was read on the comparative cost of operating eight-wheeled and ten-wheeled locomotives. The statements received from sixteen railroads give the following figures for the eight-wheeled locomotives: Repairs, 4.11 per cent.; fuel, 9.53, and stores, .85. For ten-wheeled locomotives the figures are: Repairs, 5.78 per cent.; fuel, 11.23, and stores, 1.05. The number of tons hauled in proportion to the weight of the locomotives was greatly in favor of the eight-wheeled engines. In reference to the comparative performance of ten-wheeled engines with six drivers coupled, and eight-wheeled engines with four drivers coupled, a report was read giving the preference to the eight-wheeled engine, it being shown that a particular engine of the latter class could be run at one-third less expense. In reference to safety valves a report was read recommending the Richardson valve in connection with one of the old styles, the former to be arranged so as to be out of the control of the engineer, and the latter to blow off steam at stations.

Cairo and Fulton Railroad.

We publish this week two notices to stockholders of the Cairo and Fulton railroad—one from the secretary of the company, stating that assessments on the stock have been made to the amount of fifty per cent., and requiring payment thereof to be made within sixty days, or the stock will be forfeited; the other notice is from the land commissioner, to the effect that old stockholders who do not care to make further payments on their subscriptions, can receive certificates of fully paid stock for the amount which they have already paid in cash. This unusually liberal action on the part of the company is prompted, we presume, by a desire that the citizens who originally subscribed stock in the road should retain an interest in it, and not lose, out right, the amounts which they have paid.—*Arkansas Gazette.*

☞ The officers of the Flint and Pere Marquette Railroad Company, recently elected, are: President, E. B. Ward; Vice President, Samuel Farwell; Secretary and Treasurer, H. C. Potter; Superintendent, Geo. C. Kimball.

Horse Railroads of the State of Pennsylvania.

A tabular statement of their Capital, Length, Cost, Earnings, Expenses, Dividends, &c., for the year 1870–'71.

Compiled from the Annual Reports of the several Companies made according to Law to Hon. J. F. HARTRANFT, Auditor General of the State.

In the original reports of Street Railroad Companies, dividends are stated at so much per share. In the above table they are reduced to a per centage on paid up stock.

Safe and Profitable!

THE

CANADA SOUTHERN

First Mortgage Sinking Fund 30 Years

7 PER CT. GOLD BONDS

AT

90 AND ACCRUED INTEREST.

The Road runs from Buffalo to the Detroit River, and is the Eastern link in the new AIR LINE FROM BUFFALO TO CHICAGO, and has been under construction for about two years past by railroad men who have seen the necessity for a STEEL RAIL, LOW GRADE, SHORT ROUTE between the great railroad systems which diverge from Chicago, Toledo and Buffalo.

Among the builders of the road, by whose cash subscriptions 220 miles (out of 230) have already been graded, bridged and made ready for the superstructure, a large part of the steel rails bought, all of the materials for the stations and a part of the equipment purchased, are:

MILTON COURTRIGHT, JOHN F. TRACY, DAVID DOWS, WM. L. SCOTT, HENRY H. FARNHAM, R. A. FORSYTH, HENRY PORTER, JOHN M. BURKE, M. L. SYKES, Jr., B. F. ALLEN, all directors, either in the Chicago and North West or the Chicago, Rock Island and Pacific; GEO. OPDYKE of the Midland Road; JOHN B. ALLEN, SIDNEY DILLON, DANIEL DREW, J. S. CASEMENT, J. & J. CASEY, O. S. CHAPMAN, JOHN ROSS, DAVID STEWART, and F. H. WINSTON.

THE ROAD will be

33 Miles Shorter than any other Road,

either BUILT or in contemplation between Buffalo and Chicago, and will also shorten the distance between Toledo and Buffalo 23 miles.

THE MAXIMUM GRADE on the entire line does not exceed FIFTEEN FEET to the mile—and Ninety-six per cent. of the road IS STRAIGHT.

THE ROAD WILL BE COMPLETED and in running order on or before Dec. 31 of this year.

The principal and interest of the bonds are payable either in New York, London, or Frankfort.

We confidently recommend the bonds to all classes of investors.

LEONARD, SHELDON & FOSTER,
No. 10 Wall-St.

NOTICE.

HAVING BECOME ASSOCIATED WITH Messrs. LEONARD, SHELDON & FOSTER in the Agency of the CANADA SOUTHERN RAILWAY CO., we offer the above named Bonds for sale.

After a thorough investigation, we recommend them to our friends and customers as a SURE AND RELIABLE INVESTMENT.

Pamphlets and all information furnished on application.

Winslow, Lanier & Co,
27 PINE ST.

International Bridge.

Annexed to the report of the proceedings at the last meeting, just circulated amongst the Proprietors, is the interesting report of Captain Tyler upon the International Bridge, which is destined, we believe, to play a most important part in making the fortunes of the Grand Trunk, and in improving those of the Great Western of Canada. From that report—which is lengthy—we make no apology, and we are sure our readers will say none is needed, for reproducing the following extracts—

"This bridge is being constructed between Buffalo and Fort Erie, at a point two miles north of the present Grand Trunk Ferry, and three and a half miles north of the Dummy light at the entrance to Buffalo harbour. The contract for its construction was signed on the 19th May, 1870, between the International Bridge Company and Messrs. C. S. Gzowski and the Hon. D. L. Macpherson. Mr. Edmund P. Hannaford, C. E., is the engineer for the International Bridge Company; Mr. Joseph Hobson, C. E., is the resident engineer; and Mr. George Hughes, C. E., is the inspector for the iron work. The current in the Niagara river varies from 5 to 12 miles an hour in the centre of the river, under different circumstances of wind and water—the greater current being occasioned by strong south-west winds, which drive the water of Lake Erie down the river. The greatest depth of water at the site of the bridge varies from 43 to 47 feet, according to the direction of the wind. The Niagara river at this point is about 1,887 feet wide, between the abutments on the Canadian shore and on Squaw Island; the distance across Squaw Island is about 1,300 feet; and the Erie Canal, on the further side of Squaw Island, is, from abutment to abutment, 437 feet in width. Across the main river, Squaw Island, and the Erie Canal, the total length of the Bridge, from the abutment on the Canadian side of the river to the abutment on the American side of the Erie Canal, is therefore about 3,600 feet. Squaw Island is to be crossed in the first instance on timber piles, supporting a temporary roadway, and afterwards by an embankment, to be filled up after the track has been first used over the piles. Over the Erie Canal there will be a swing-bridge, with two openings of 90 feet each, resting on a pivot 34 feet in diameter, and one fixed opening with girders having a span of 215 feet. The main river is crossed by 9 spans, of which, from the Canada side, there are :—First, three openings of 90 feet each in the clear; then three openings of 240 feet each; then two swing openings of 160 feet each, on a pivot of 34 feet in diameter; and then one span, connected with the abutment on Squaw Island, of 190 feet. The length of bridge, from face to face of abutment being 1,887 feet, and the length of each abutment 40 feet, the total length of the bridge across the main river is 1,967 feet. Similarly the length of bridge across the Erie Canal is, including the two abutments of 40 feet each, 437+80=517 feet. There are thus eight piers in the main river, between the abutment on the Canadian side and the abutment on Squaw Island; and there are two piers in the Erie Canal, between the abutment on the east of Squaw Island and that on the American shore; making, altogether, 4 abutments and 10 piers, of which two are pivot-piers for swing-bridges. At the present time, three piers from the Canadian side, and the abutment on that side, have been completed, and three spans over those piers and that abutment have been placed in their positions. * * I have examined the masonry of the piers and abutments, completed in the manner and to the extent above described, and the iron superstructure for the three spans that have been erected; and I am satisfied, as the results of observation and enquiry, that the work of those piers and abutments, and on those three spans, has been performed in a satisfactory and efficient manner. The piers are constructed, not of 'dressed' but of 'rock-faced ashlar' masonry, and with a sandstone which presents appearances of iron-bands, flaws, and seams, on the surface. This sandstone, from Georgetown, Ontario, has previously been extensively used on the Grand Trunk railway; and I have no hesitation in saying that the masonry of those piers and abutments, though not constructed in a costly or highly finished manner, is sound, durable, and well adapted for the purposes for which it is required. I have had the opportunity of seeing the same description of stone in the Credit viaduct, with piers 110 feet high, and in other structures, and of observing that while showing similar bands, seams, and flaws, it exhibits in those structures no appearance of deterioration, after being exposed to the influence of a Canadian climate for 17 years. I have made particular inquiry into the thickness and force of the ice which those piers will have to resist, and have visited numerous other structures exposed to the action of ice under various circumstances; and I have come to the conclusion that the cut waters of the three piers now erected are calculated, when shod with iron, with the slope on which they are constructed of ½ to 1, to cut through, and to resist, without danger of failure, any ice which can come in contact with them. The cut-water of No. 3 pier has been partially shod with iron as already described; and I have recommended, with a view not merely to resistance against the effects of ice, but also to avoid danger from rafts, scows, and floating vessels and things of all descriptions, that the iron sheathing shall be similarly completed over the whole surface of the cut-waters of that and of all other piers. * * The cost of preliminary expenses, and engineering and legal charges, may be set down at $40,000; and the total of these sums, for which it was expected the bridge would be completed, is $1,170,000. An additional cost must now be contemplated, which will amount, for alterations required by the Government engineers of the United States, and for alterations subsequently decided on, to £7,500; and this amount is, in fact, for extra iron work and fixing of the same upon the bridge. The cause of the above increase in the amount of the ironwork was partly on account of changes made in the superstructure for the Erie Canal, and partly in consequence of changes in the superstructure for the main river. As regards the Erie Canal, the United States Government engineers required the swing bridge to be for a longer span, increasing it from two spans of 75 feet each, with a pivot 34 feet in diameter, to two spans of 90 feet each, with a similar pivot; and as a result of this alteration in the swing bridge, the other two spans in the Erie Canal were thrown into one, which was shorter than the two added together. One pier was therefore omited in the canal; and an extra amount of iron work, to the extent of 55 tons was required by the substitution of a longer swing bridge and a longer span, in place of a shorter swing bridge and two shorter spans in the canal. As regards the main river, the United States Government Engineers required that the swing bridge should be placed on the Squaw Island side, instead of near the middle of the river; and after the failure of the foundations of the piers Nos. 4 and 5, and the experience in regard to the scour that was obtained during the attempt to found those piers, it was thought better not to reduce the water-way in the river, as would have been done if the proposal of the United States engineers had been simply carried out. The abutment, as originally provided for and sanctioned by the United States engineers, extended to a distance of not less than 140 feet from the shore of Squaw Island into the water of the main river, with an embankment from the abutment to the island. The obstruction to the water-way of the river from this abutment would have been considerable; and in order, to avoid such an obstruction, and the increase to the scour in other parts of the river which it might have occasioned, it was wisely decided to throw this abutment back on Squaw Island, to build it 40 feet inland, and thus to provide against the probable contingency of a portion of the Island outside of it, which is of a swampy character, being carried away in future years by the current. An extra span of 190 feet was thus rendered necessary in the main river, with an extra weight of iron amounting to 129 tons. There was thus required 174 extra tons of iron for the whole bridge; and the cost of this, together with the fixing and the liability to accident during the fixing (which the contractors take upon themselves), occasioned an extra expense of £7,500 as above stated on this account. There is no excess in masonry beyond what was previously contemplated. Certain additions in the thickness of the piers, and one extra pier in the main river, have increased the amount of it on the one hand; whilst the omission of one pier originally contemplated in the canal, and the substitution of timber and crib-work for the upstream rests of the two swing bridges, have decreased it in a corresponding degree on the other hand. The most serious addition to the cost of the bridge, as now to be constructed, arises in consequence of the failure of the foundations for the deep water piers, it being obvious that those piers cannot now be constructed in the mode (by merely sinking caissons to the bottom of the river) provided for in the contract and specification. It was a surprise to the engineers as well as to the contractor to find, contrary to all previous belief, that the bottom in the middle of the river, where the current was strongest, was composed of a varying thickness of stone and gravel over the bed of the rock; and as the result of this discovery it becomes necessary to adopt the means above referred to, for obtaining solid and reliable foundations for piers Nos. 4, 5, and 6. The additional cost for bottomless caissons, for scows for dredges, for excavations, and for other necessary work, with machinery and appliances, will render it necessary to expend £20,000 more than was expected to be required. It is arranged that the contractor shall bear the losses that have heretofore been experienced in vainly attempting to obtain foundations for piers Nos. 4 and 5; but inasmuch as the foundations now required for piers Nos. 4, 5, and 6, and the appliances necessary to obtain those foundations, are beyond what was included in the contract and specification, it is quite clear that the contractors cannot be saddled with the expenses of such extra work. The extra iron and the further means and appliances necessary for those foundations will cost altogether, as above shown, £27,500. To this must be added, say £20,000 of interest to be paid on the money raised for the construction of the bridge, in consequence of the delay which will occur in opening it for public traffic. In the course of serious and prolonged discussions with the contractors, I have, however, indicated to them that no sum could be fixed upon, to be paid them for extra work and extra appliances, except upon the terms that they would now undertake to complete the work for that sum, and within a given time, say by the 1st December, 1872. They have now agreed to adopt the course thus suggested to them, and they are ready, as will be seen by the annexed document, which they have addressed to Mr. Bridges as president of the International Bridge Company, to complete the bridge and approaches by the date above named, on condition of their receiving the sum of £27,500 in excess of the price named in their contract of the 19th of May, 1870."

We believe this great bridge will be remarkable for economical and solid construction, and for the large business it will do when constructed. —*Herapath*.

☞ The surveys and plans of the New York, Westchester and Boston Railroad, have been completed, and the specifications of the depots chosen have been filed in the register's office. At Harlem river, arrangements have been made for consolidation with the New York and Eastern Railroad. The branch road from Port Morris, across Westchester county to White Plains, will connect with the main road at Hall's Corners. A branch will also be constructed to Fort Schuyler, between which place and Whitestone, L. I., a ferry will be established.

International Bridge.

Annexed to the report of the proceedings at the last meeting, just circulated amongst the Proprietors, is the interesting report of Captain Tyler upon the International Bridge, which is destined, we believe, to play a most important part in making the fortunes of the Grand Trunk, and in improving those of the Great Western of Canada. From that report—which is lengthy—we make no apology, and we are sure our readers will say none is needed, for reproducing the following extracts—

"This bridge is being constructed between Buffalo and Fort Erie, at a point two miles north of the present Grand Trunk Ferry, and three and a half miles north of the Dummy light at the entrance to Buffalo harbour. The contract for its construction was signed on the 19th May, 1870, between the International Bridge Company and Messrs. C. S. Gzowski and the Hon. D. L. Macpherson. Mr. Edmund P. Hannaford, C. E., is the engineer for the International Bridge Company; Mr. Joseph Hobson, C. E., is the resident engineer; and Mr. George Hughes, C. E., is the inspector for the iron work. The current in the Niagara river varies from 5 to 12 miles an hour in the centre of the river, under different circumstances of wind and water—the greater current being occasioned by strong south-west winds, which drive the water of Lake Erie down the river. The greatest depth of water at the site of the bridge varies from 43 to 47 feet, according to the direction of the wind. The Niagara river at this point is about 1,887 feet wide, between the abutments on the Canadian shore and on Squaw Island; the distance across Squaw Island is about 1,300 feet; and the Erie Canal, on the further side of Squaw Island, is, from abutment to abutment, 437 feet in width. Across the main river, Squaw Island, and the Erie Canal, the total length of the Bridge, from the abutment on the Canadian side of the river to the abutment on the American side of the Erie Canal, is therefore about 3,600 feet. Squaw Island is to be crossed in the first instance on timber piles, supporting a temporary roadway, and afterwards by an embankment, to be filled up after the track has been first used over the piles. Over the Erie Canal there will be a swing-bridge, with two openings of 90 feet each, resting on a pivot 34 feet in diameter, and one fixed opening with girders having a span of 215 feet. The main river is crossed by 9 spans, of which, from the Canada side, there are :—First, three openings of 90 feet each in the clear; then three openings of 240 feet each; then two swing openings of 160 feet each, on a pivot of 34 feet in diameter; and then one span, connected with the abutment on Squaw Island, of 190 feet. The length of bridge, from face to face of abutment being 1,887 feet, and the length of each abutment 40 feet, the total length of the bridge across the main river is 1,967 feet. Similarly the length of bridge across the Erie Canal is, including the two abutments of 40 feet each, 437+80=517 feet. There are thus eight piers in the main river, between the abutment on the Canadian side and the abutment on Squaw Island; and there are two piers in the Erie Canal, between the abutment on the east of Squaw Island and that on the American shore; making, altogether, 4 abutments and 10 piers, of which two are pivot-piers for swing-bridges. At the present time, three piers from the Canadian side, and the abutment on that side, have been completed, and three spans over those piers and that abutment have been placed in their positions. * * I have examined the masonry of the piers and abutments, completed in the manner and to the extent above described, and the iron superstructure for the three spans that have been erected; and I am satisfied, as the results of observation and enquiry, that the work of those piers and abutments, and on those three spans, has been performed in a satisfactory and efficient manner. The piers are constructed, not of 'dressed' but of 'rock-faced ashlar' masonry, and with a sandstone which presents appearances of iron bands, flaws, and seams, on the surface. This sandstone, from Georgetown, Ontario, has previously been extensively used on the Grand Trunk railway; and I have no hesitation in saying that the masonry of those piers and abutments, though not constructed in a costly or highly finished manner, is sound, durable, and well adapted for the purposes for which it is required. I have had the opportunity of seeing the same description of stone in the Credit viaduct, with piers 110 feet high, and in other structures, and of observing that while showing similar bands, seams, and flaws, it exhibits in those structures no appearance of deterioration, after being exposed to the influence of a Canadian climate for 17 years. I have made particular inquiry into the thickness and force of the ice which those piers will have to resist, and have visited numerous other structures exposed to the action of ice under various circumstances; and I have come to the conclusion that the cut waters of the three piers now erected are calculated, when shod with iron, with the slope on which they are constructed of ½ to 1, to cut through, and to resist, without danger of failure, any ice which can come in contact with them. The cut-water of No. 3 pier has been partially shod with iron as already described; and I have recommended, with a view not merely to resistance against the effects of ice, but also to avoid danger from rafts, scows, and floating vessels and things of all descriptions, that the iron sheathing shall be similarly completed over the whole surface of the cut-waters of that and of all other piers. * * The cost of preliminary expenses, and engineering and legal charges, may be set down at $40,000; and the total of these sums, for which it was expected the bridge would be completed, is $1,170,000. An additional cost must now be contemplated, which will amount, for alterations required by the Government engineers of the United States, and for alterations subsequently decided on, to £7,500; and this amount is, in fact, for extra iron work and fixing of the same upon the bridge. The cause of the above increase in the amount of the ironwork was partly on account of changes made in the superstructure for the Erie Canal, and partly in consequence of changes in the superstructure for the main river. As regards the Erie Canal, the United States Government engineers required the swing bridge to be for a longer span, increasing it from two spans of 75 feet each, with a pivot 34 feet in diameter, to two spans of 90 feet each, with a similar pivot; and as a result of this alteration in the swing bridge, the other two spans in the Erie Canal were thrown into one, which was shorter than the two added together. One pier was therefore omited in the canal; and an extra amount of iron work, to the extent of 55 tons was required by the substitution of a longer swing bridge and a longer span, in place of a shorter swing bridge and two shorter spans in the canal. As regards the main river, the United States Government Engineers required that the swing bridge should be placed on the Squaw Island side, instead of near the middle of the river; and after the failure of the foundations of the piers Nos. 4 and 5, and the experience in regard to the scour that was obtained during the attempt to found those piers, it was thought better not to reduce the water way in the river, as would have been done if the proposal of the United States engineers had been simply carried out. The abutment, as originally provided for and sanctioned by the United States engineers, extended to a distance of not less than 140 feet from the shore of Squaw Island into the water of the main river, with an embankment from the abutment to the island. The obstruction to the water-way of the river from this abutment would have been considerable; and in order, to avoid such an obstruction, and the increase to the scour in other parts of the river which it might have occasioned, it was wisely decided to throw this abutment back on Squaw Island, to build it 40 feet inland, and thus to provide against the probable contingency of a portion of the Island outside of it, which is of a swampy character, being carried away in future years by the current. An extra span of 190 feet was thus rendered necessary in the main river, with an extra weight of iron amounting to 129 tons. There was thus required 174 extra tons of iron for the whole bridge; and the cost of this, together with the fixing and the liability to accident during the fixing (which the contractors take upon themselves), occasioned an extra expense of £7,50) as above stated on this account. There is no excess in masonry beyond what was previously contemplated. Certain additions in the thickness of the piers, and one extra pier in the main river, have increased the amount of it on the one hand; whilst the omission of one pier originally contemplated in the canal, and the substitution of timber and crib-work for the upstream rests of the two swing bridges, have decreased it in a corresponding degree on the other hand. The most serious addition to the cost of the bridge, as now to be constructed, arises in consequence of the failure of the foundations for the deep water piers, it being obvious that those piers cannot now be constructed in the mode (by merely sinking caissons to the bottom of the river) provided for in the contract and specification. It was a surprise to the engineers as well as to the contractor to find, contrary to all previous belief, that the bottom in the middle of the river, where the current was strongest, was composed of a varying thickness of stone and gravel over the bed of the rock; and as the result of this discovery it becomes necessary to adopt the means above referred to, for obtaining solid and reliable foundations for piers Nos. 4, 5, and 6. The additional cost for bottomless caissons, for scows for dredges, for excavations, and for other necessary work, with machinery and appliances, will render it necessary to expend £20,000 more than was expected to be required. It is arranged that the contractor shall bear the losses that have heretofore been experienced in vainly attempting to obtain foundations for piers Nos. 4 and 5; but inasmuch as the foundations now required for piers Nos. 4, 5, and 6, and the appliances necessary to obtain those foundations, are beyond what was included in the contract and specification, it is quite clear that the contractors cannot be saddled with the expenses of such extra work. The extra iron and the further means and appliances necessary for those foundations will cost altogether, as above shown, £27,500. To this must be added, say £20,000 of interest to be paid on the money raised for the construction of the bridge, in consequence of the delay which will occur in opening it for public traffic. In the course of serious and prolonged discussions with the contractors, I have, however, indicated to them that no sum could be fixed upon, to be paid them for extra work and extra appliances, except upon the terms that they would now undertake to complete the work for that sum, and within a given time, say by the 1st December, 1872. They have now agreed to adopt the course thus suggested to them, and they are ready, as will be seen by the annexed document, which they have addressed to Mr. Brydges as president of the International Bridge Company, to complete the bridge and approaches by the date above named, on condition of their receiving the sum of £27,500 in excess of the price named in their contract of the 19th of May, 1870."

We believe this great bridge will be remarkable for economical and solid construction, and for the large business it will do when constructed. —*Herapath.*

☞ The surveys and plans of the New York, Westchester and Boston Railroad, have been completed, and the specifications of the depots chosen have been filed in the register's office. At Harlem river, arrangements have been made for consolidation with the New York and Eastern Railroad. The branch road from Port Morris, across Westchester county to White Plains, will connect with the main road at Hall's Corners. A branch will also be constructed to Fort Schuyler, between which place and Whitestone, L. I., a ferry will be established.

American Railroad Journal.

Saturday, July 6, 1872.

Stock Exchange and Money Market.

There has been a fairly active inquiry reported for Money during the week, which, however, has been generally met with promptness, on the basis of 3@5 per cent. on call, and 6@8 per cent. per annum in the discount form. The main street demand for aid has been from speculative purposes. There has been more than the usual changing of loans preparatory to the July interest and dividend disbursements at this centre, which latter will be very heavy, and later on in the month will undoubtedly add largely to the available supply of funds seeking investment in safe and lucrative forms. Monday and Tuesday of the current week were busy days with the various disbursing agencies, in paying off the July coupons and dividend claims. The disbursements in New York for interest and dividends this month reach nearly 70 millions, which will give ample employment to the bankers and brokers who deal in securities recognized as investments in finding profitable employment for so much money. The fiscal year of the United States of 1871–72, which closed on Saturday last, June 29, proved a prosperous, and in many respects a remarkable year, prosperous for the country in its trade, and freedom from losses or revulsions; prosperous for the treasury and the public credit, in ample revenues, on reduced rates of taxation, and in the fullest liquidation of the public debt, and permanent relief to the yearly interest charge thereon, and remarkable in adding 7,500 miles to our railway system, and thereby adding nearly 15 per cent. to our material advancement, and in the steady increase in our foreign trade and domestic manufactures. The U. S. Sub-Treasury office again last week reduced its coin balance nearly a million and its currency over half a million. The city banks contracted their loan and discount average over 8¾ millions during the week, and their outstanding circulation about ⅛th of a million. The U. S. Sub-Treasury held a currency balance on Tuesday of $8,928,251, and a coin reserve of $45,148,879.

The city banks, in their latest return, show an increase of $1,022,000 of legal tender notes, $2,883,500 of specie, and $3,456,900 of deposits, with a reduction of $3,804,000 in their loan and discount averages, and $112,000 to their item of circulation. The city bank exchanges, last week, averaged 81, and thus far, this week, about 83 millions daily. The banks now hold $12,195,900 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $22,195,520, against $16,526,451 same time last year. The city bank deposits are now $232,387,900 against $248,308,693, week ending July 1, 1871. The legal tender reserve amounts to $54,951,400, against $71,348,828 same time last year. The circulation now stands at $27,416,100 against $30,494,457 same time last year. The loans are now $289,002 800 against $296,237,959 at this date last year.

The coin reserve of the city banks is now about 22¼ millions as against about 28⅞ millions on the 6th of January; the legal tender reserve is about 55 millions against $46,616,000 on the statement of February 10th.

Government revenues have been up to a fair average, in the line of excises, though moderate in that of customs, since our last. The excises yielded within the week about 3⅛ millions, and during the fiscal year ending with June 30, 1872, $131,307,214. The customs at the port of New York last week were $1,603 260; at the outports, equal to about $550,000 all in coin, or coin certificates.

U. S. Assistant Treasurer Hillhouse, at this port, under Washington instructions, has given notice to the holders of 3 per cent. Temporary Loan Certificates, issued under the acts of March 2, 1857, and July 25, 1868, that all such certificates bearing date from August 1, 1868, to September 1, 1868, of the denomination of $5,000, between the numbers 3,857 and 3,949 inclusive, and of the denomination of $10,000, between the numbers 4,151 and 4,395 inclusive, will be paid on presentation at this office; and that from and after the 31st day of August such certificates will cease to bear interest, and will be no longer available as a portion of the lawful reserve of any National Banking Association.

Under the Treasury programme for July, Government proposes to sell, at least, four million of Gold, as follows: Wednesday, July 3, $1,000,000; Thursday, July 11, $1,000,000; Thursday, July 18, $1,000,000; Thursday, July 25, $1,000,000 And to buy in five millions of Five Twenties, as follows: Tuesday, July 2, $1,000,000; Wednesday, July 10, $1,000,000; Wednesday July 17 $1,000,000; Wednesday July 24, $1,000,000; Wednesday July 31, $1,000,000.

The Treasury Department, on Tuesday, controlled a coin reserve of $85,000,000, (including $26,000,000 represented by outstanding coin certificates) and a currency balance of $9,000,000.

The outstanding circulation of U. S. notes of all issues on July 1, 1872 amounted to $399,245,362.

The receipts of the U. S. Sub-Treasury at New York from all sources, in June were $50,388,825, including $7,463,681 from customs; payments, $47 933,689, including $2,308,836 of coin interest.

Gold has been less active, and quite variable in price, though showing more firmness, on the later dealings.

The range of the price during the week has been from 113@114⅛ and the closing quotation on Tuesday was 113⅞ against 113⅜ the preceding Wednesday. The specie outflow last week, was $3,200,821. The Gold Exchange Bank clearances have averaged about 37¼ millions per day during the week.

The customs demand for Gold last week, averaged $298,500 a day; thus far, this week, it has averaged $315,000 a day, or equal to a weekly aggregate of $1,890,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $10,639, and since Jan. 1, 1872, $742,715, against $3,179,957 same time in 1871 The total customs revenue of the Government, in coin, at this port, during the fiscal year ending with June 30, 1872 was $153,635,385 against $147,224 131 the preceding fiscal year 1870-'71.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, year ending with June 30th 1872, $77,073,752, against $85,515,831 year ending June 30, 1871.

On Tuesday, the specie exports were $55,000.

The export drain of specie was $3,200,821 last week, against $4,983,268 same week preceding year. The shipments during the year ending with June 30, 1872, were $59,440,369 against $82,905,497 during the preceding fiscal year.

Foreign Exchange has been quoted stronger in price, though the dealings have been on a restricted scale. Bankers' sixty day bills on London closed on Wednesday at 109¾@110; sight bills on London, 110⅜@110⅝.

The produce exports from this port, week ending with July 2, were to the currency value of $4,472,957.

On Tuesday, government bought in $300,850, of Five-Twenties at 113 73@113 74¼, out of an aggregate offering of only $323,250.

The U. S. sixes of 1881 on Wednesday forenoon of the current week were quoted at 116⅞@117; U. S. Five-Twenties of 1862, (other than the bonds called in) ex May coupon 114⅝@114⅞; U. S. Five-Twenties of 1864 at 114⅝@114⅞; U. S. Five-Twenties of 1865, 115¼@115⅜; U. S. Five-Twenties of 1865 consolidated, 113⅞@114; U. S. Five Twenties of 1867, 115⅛@115¼; U. S. Five-Twenties of 1868, 114¾@115 U. S. Ten-forties at 112¼@112½; U. S. Fives of 1881 (Funding Loan) 113¼@113½; Six per cent. currency bonds, 114⅞@115.

There has been a more urgent investment inquiry noted for Government securities, since our last at advanced prices, though the later dealings showed less animation. The public debt statement for July 1, indicates a further reduction of $2,031,035. The six per cents of 1881, and the later issues of the Five-Twenties are now quoted ex the July three per cent. coupons.

State bonds have been in quite moderate request at irregular prices.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	June 19.	June 26	July 2.
Consols	92½	92⅝	92⅝
U. S. 5-20's of 1862..	91	91	91

" 1867	91⅜	91½	92
" 10-40s	89¼	89¼	89¾
New Fives of 1881...	89¾	89¾	90¼
Erie.	42¾	46⅝	45

The better class of Railway Mortgage Loans have been attracting more attention from investment purchasers at firm rates. Central Pacific Sixes have been in good request at 101¾@102 ex July coupon. Chesapeake and Ohio have been selling to a fair extent at 94 per cent. and accrued interest.

Railway and Miscellaneous share property has been less active, and values have shown less buoyancy, the general market closing tamely.

There has been a moderate movement noted in the principal kinds of domestic produce but prices have been generally quoted less firm, closing weak for Flour, Wheat, Corn, Oats, Pork, Lard, Cheese, Petroleum, and Naval Stores. Tobacco and Wool about as before. Middling upland cotton closed on Tuesday at 25½ cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,664,764 bales, against 3,874,844 bales same time in the preceding year; exports 1,900,783 bales against 3 075,582 bales in the previous year; stock at the ports at latest dates, 149,440 bales against 174,710, bales same date 1871.

At the Live Stock Markets, Beeves have been in quite moderate request at 8½@13¼ cts.; Veals at 6@8¼ cts.; Sheep at 4½@7; Lambs 7@11 cts.; Swine, dull at 4⅜@4⅝ cts. per lb., all live weight. The week's receipts were 6,912 Beeves, 3,980 Veal Calves, 22,302 Sheep and Lambs; and 39,040 Swine.

Foreign goods have been moderately sought after at generally steady rates. The week's imports of foreign goods reached the amount of $5,729,383 including $1,295,686 of dry goods.

Ocean freights have been rather more active and steadier as to rates.

American Bridge Company.

Attention is called to the advertisement of the Bonds of this Company, which will be found in another column. The Subscription Books, now open, will be closed July 15th, or as soon as the new stock is fully subscribed.

The total amount of stock issued at this time is $414,700, and on this basis the Company shows a present surplus of $136,280 97, and is now doing a flourishing business. One thousand men are constantly employed in their extensive works, and they have on hand $1,250,000 of work for various Railroads in the United States.

The net profit arising from the business, as shown by the books of the Company, up to the 31st of March, 1872, amounted to $273,482 14, or, at the rate of $224,089 28 *per annum*, being over 50 *per cent.* upon the capital stock then outstanding. With the proposed new structures, machinery, &c., the Company will have much greater capacity, and the proceeds of the increased issues of stock will enable them to buy material for cash, thereby making a saving of from $50,000 to $75,000 per annum.

☞ The Directors of the Illinois Central Railroad Company have declared the usual semi-annual dividend of 5 per cent, free of taxes, payable August 1. The transfer books will close on the 13th inst. and reopen on the 5th day of August.

☞ The Calumet and Hecla Mining Company will pay (July 22) an extra dividend of $5 per share on its 80,000 shares, or $400,000. The regular quarterly payment of a like sum will be due August 15.

☞ The Quincy mining Company have declared a semi-annual dividend, $5 per share, and extra dividend, $2 50 per share, payable Aug. 1.

☞ A dividend of four dollars per share has been declared by the Granite Railway Company, payable July 1.

HARVEY FISK. A. S. HATCH.

FISK & HATCH, BANKERS,

No. 5 Nassau st., New York.

Having been associated with the Chesapeake and Ohio Railroad Company as their financial agents for nearly three years, we have the most conclusive evidence and satisfactory knowledge:

(1.) *Of the immense value and importance of the Road.*

(2.) *Of the thorough ability, economy and integrity of its management.*

(3.) *Of its resources for an enormous and profitable traffic.*

(4.) *Of the perfect security of the 6 per cent. Gold Bonds of the Company.*

We are consequently enabled to recommend these Bonds as an entirely safe and reliable investment, which may be held with as much satisfaction and freedom from anxiety by the most prudent and careful investor as Governments or Central Pacifics.

A large profit, or increase of investment, may now be realized by exchanging either of the above for the Chesapeake and Ohio Bonds.

Denominations $100, $500, $1,000.

Interest payable May 1 and November 1.

Principal and interest payable in gold in New York.

Price, 94 and accrued interest.

FISK & HATCH, Bankers.

Chesapeake and Ohio Railroad.

The Chesapeake and Ohio Railroad Company have made arrangements for summer travel to the Virginia Springs this season, either by the old Dominion line of Steamship outside to Richmond, or by all rail route via Washington. Trains from New York to White Sulphur Springs occupy about 24 hours. Tickets over the Western end of this line are also issued from Cincinnati or Louisville—the gap of 75 miles, between Gauley River and the Greenbrier crossing, being traversed by stages until the railroad is ready in the autumn. The following is a list of the principal Mineral Springs and places of resort along the line of the Chesapeake and Ohio Railroad:

	Distance from R. R. Station.
Greenbrier White Sulphur	0
Hot Springs	18
Healing Springs	15
Blue Sulphur Springs	26
Rockbridge Alum Springs	8
Rockbridge Baths	9
Cold Sulphur Springs	2
Bath Alum Springs	10
Warm Springs	15
Sweet Chalybeate Springs	9
Old Sweet Springs	9
Salt Sulphur Springs	24
Red Sulphur Springs	41
Natural Bridge	35
Weyer's Cave	17
Cave of Fountains	17

☞ A San Francisco dispatch, dated July 1, states that an additional section of the main line of the Southern Pacific Railroad had been completed, establishing a continuous rail line of 260 miles from that city toward the Colorado River. In a few days there will also be completed 50 miles of the Salinas Valley Branch of the Southern Pacific, which will furnish an outlet for the grain crop of that region.

THE

St. Joseph & Denver City

RAILROAD COMPANY'S

First Mortgage Bonds

are being absorbed by an increasing demand for them.

Besides being the obligation of a wealthy corporation, composed of men of experience and high-toned commercial integrity, they are secured by a first mortgage on the road, revenues, land grant, franchise and equipments, combined in one mortgage, and are readily negotiable both in the markets of this country and Europe.

A liberal sinking fund provided in the mortgage deed must advance the price upon the closing of the loan. Principal and interest payable in Gold. Interest at eight (8 p. c.) per cent. per annum, payable, semi-annually, free of tax. Principal in thirty years. Denominations, $1,000, $500 and $100, Coupons or Registered.

Price 97½ and accrued interest in currency, from February 15, 1872.

Maps, circulars, documents and information furnished.

Trustees, Farmers' Loan and Trust Company of New York.

The diminished quantity of these Bonds for sale, and the increased demand absorbing them, warrant the belief they will soon be sought for at an advance considerably above the present subscription price at which they can now be had through the principal Banks and Bankers throughout the country, and from the undersigned, who unhesitatingly recommend them.

TANNER & CO.,

BANKERS,

NO. 11 WALL STREET.

☞ Messrs. Tanner & Co. report a continued demand for the St. Joseph and Denver City eight per cent. gold bonds at 97¼ and accrued interest. The settlement of the Alabama controversy at Geneva has stimulated foreign orders for American Railroad securities, and we understand there are important orders here for these bonds. The semi-annual interest is payable next month, and in sterling and continental money, as well as American coin here. These bonds have become so thoroughly known that there is a ready market for them, and it would not be surprising if the price should be advanced within a short time. Messrs. Tanner & Co. report that the advices from the West shows a steadily increasing traffic on the road, which for all practical purposes is completed.

Journal of Railroad Law.

RAILROAD COMPANIES—COMPARATIVE DEGREE OF CULPABILITY BETWEEN TWO LINES OF CARS WILL NOT AFFECT LIABILITY TO 3D PERSON.

The facts in the recent case of Barrett *vs.* The 3rd Ave. Railroad Company, (45 N. Y., 628,) are fully and clearly stated in the following opinion by—

ALLEN, J.—There was no question of contributory negligence on the part of the plaintiff, she was injured without fault on her part, and the question upon the merits was, whether the collision causing the injury was exclusively the result of the negligent or careless acts of the agents and servants of the defendant, having the control and management of the car in which the plaintiff was a passenger, or of such negligence in connection with negligence on the part of those in charge of and controlling the movements of the colliding car on the Harlem road. If the acts of the defendant's servants contributed to the injury, the defendant must respond in damages to the plaintiff, although the negligent acts of the person in charge of the other car also contributed to the same result, and the comparative degree in the culpability of the two will not affect the liability of either. If both were negligent in a manner and to a degree contributing to the result they are liable jointly and severally (Webster and Hudson River R. R. Co., 38 N. Y., 260.)

The defendant, by not objecting to submitting the question of negligence to the jury, conceded that there was evidence tending to prove the fact of negligence, and consented to a decision of the question by that tribunal, and having taken his chance of a favorable verdict cannot now be heard to allege that the verdict is without evidence, and therefore, against law. The question of law, sought to be made here, should have been made on the trial. If there was no evidence of negligence, it was error to submit the question to the jury, and, upon timely objection would have been the subject of an objection, reviewable in this court. But by not taking the objection and exception at the trial, the defendant waived it, and it cannot be raised by a motion, addressed to the discretion of the court, to correct the error of the jury. But if there was any evidence of negligence or from which negligence could have been inferred, it was the right of the plaintiff to have the issue submitted to the jury, and it would have been error to take it from them; and this court could not review the action of the jury notwithstanding there might be room for a difference in opinion, and we should think the jury had erred. Errors of the jury in the determination of issues of facts upon trials by jury, as regulated by the code of procedure, are not cognizable here. There was a conflict of evidence upon the trial, and the witnesses, upon either side, being unimpeached, the jury had a discretion to believe or disbelieve either or any of them. The testimony of some of the witnesses, if believed, tended strongly to fix the charge of negligence and gross carelessness upon the persons in charge of the defendant's car.

The night was shown to be dark and foggy, and it was not easy to discern objects in the distance, and the evidence of at least one of the plaintiff's witnesses was, that the defendant's car, before reaching the point of intersection of the two roads, was proceeding on a down grade at an unusual speed; that just before the point of intersection was reached, the speed was greatly increased, and that at the time of collision, the horses were on a full run; that the car approaching on the other road was seen by a person standing by the side of the driver, when 150 to 200 feet distant, and that the defendant's car could have been broken up and stopped while passing over less than thirty feet.

This evidence, unexplained and uncontradicted, with the other circumstances in the case, raised a fair question to be submitted to the jury, upon the alleged careless and reckless management of the defendant's car by the persons in charge, and whether the collision was attributable in whole or in part by those acts, and whether by a proper performance of their duty the collision might not have been avoided.

It is undoubtedly true that this evidence was greatly shaken and its force impaired by the testimony of other witnesses, but it was the province of the jury to determine where the truth lay, and although the evidence may be doubtful and such as we might, were we sitting as jurors, regard as unreliable, the verdict of the jury is conclusive here. There was no error in the charge of the judge, to the effect that the rate of speed of the defendant's car was an important element in considering the question of negligence, and that if the car was driven at an unusual rate of speed and by reason of such rapid speed the collision occurred, the plaintiff was entitled to recover.

There was no fact bearing more directly upon the question of negligence than the rate of speed at which the car was being driven, and the rate of speed before and as the car was approaching the place of intersection of the two roads as well as at the time of actual collision, was material and relevant.

The approach and the manner of approach of the defendant's car to the place of actual collision was a part of the *res gestae*, and could not be excluded from the consideration of the jury. The instruction to the jury that, if the defendant's driver saw the large car in time to break up and avoid the collision, he was bound to do so, was clearly proper. He had no right at the peril of the persons and lives of the passengers to hazard the experiment of passing beyond the point of collision before the other car would arrive at that point. The carrier of passengers has no right to experiment at the risk of those whom he carries. His duty is to exercise the utmost care and caution, and he is liable for slight neglect and for the result of hazardous experiments.

The jury were told that, if the driver thought he could cross in safety, he had no right to make the attempt unless there was sufficient time and sufficient space for him to pass without collision, of which the jury were the judges. This was a declaration in substance, although not in words, that, if the attempt to cross under the circumstances would have been deemed safe by prudent and discreet men, situated as the driver was, the act of crossing was not careless or negligent.

The exceptions to the refusals to charge as requested upon the subject of negligence, were not pressed upon the argument of this appeal. The refusal to each request was to charge otherwise than had been charged. Upon comparing the requests with the charge, as spread out upon the record, it will be seen that the judge had charged in accordance with the several requests, and it was not error to decline to repeat the instructions, or to adopt the precise language of the defendant's counsel.

The defendant set up as a defence to the action, a settlement with and release of the Harlem Railroad Company for the injury complained of. The rule is, that a party receiving an injury from the wrongful acts of others, is entitled but to one satisfaction, and that an accord and satisfaction by, or a release or other discharge by the voluntary act of the party injured, of one, of two or more joint *tort feasors* is a discharge of all.

There was no evidence of a release of the Harlem Company. The plaintiff commenced an action against both corporations for the injury, which was discontinued, after an answer by the present defendant, and before the other defendant in that action had answered. The evidence was that the attorney for the Harlem Company paid the attorney for the plaintiff $100 for the costs of the discontinuance, and the plaintiff's attorney paid the attorney of the present defendant his costs of that action. Twenty-five dollars were paid the plaintiff upon her calling upon her attorney and telling him that she was out of work and was in need, and, as she testifies, was given to her to help her. It does not appear that she knew the source from which the money came, or that she authorized her attorney to compromise and settle her claim against either company. There was no accord and satisfaction with or release by the plaintiff, and the authority of the attorney does not extend to a compromise or release. He may discontinue an action, because that relates to the conduct of the suit, and is within his retainer, and not to the cause of action. (Gaillord *v.* Smart, 6 Cow., 384.) An attorney cannot settle a suit and conclude a client in relation to the subject in litigation, without his consent.

The court was requested to charge the jury that, if they believed that there had been a settlement with the Harlem Railroad Company for the injury claimed in this action, no matter how slight the consideration, this action could not be maintained. The request was proper in terms and should have been complied with, if there was any evidence of such settlement.

The evidence only discloses an agreement to discontinue the action then pending, and the consideration paid was for that and nothing else, if the only witness who spoke upon the subject is to be credited, and without his evidence there is no evidence of the payment of any money, or any agreement with the Harlem Company. It was competent for the attorney, without the consent of his client, to discontinue the action and commence a new one against one of the defendants for the same cause, or he might have discontinued the action as against the Harlem Company, and continued it against the other defendants. He might enter a *nolle prosequi* as to one of the defendants, and proceed against the others. In some of the earlier cases, a *nolle prosequi* was considered in the nature of a retraxit, operating as a release or discharge of the action and an absolute bar to any future action for the same cause. The law is now well settled that a *nolle prosequi* or nonsuit

is no bar to an action for the same cause. There was no evidence that any compensation was paid or accepted for the injury. The money paid was upon another consideration, and not in satisfaction for the injury to the plaintiff now complained of. There was no error in declining to submit the question to the jury, for the palpable reason that a verdict for the defendant, upon the ground that there had been accord and satisfaction for the injury, would have been without evidence and against evidence. Upon the statement of the attorney, who alone gave evidence upon this branch of the case, there is nothing to bar a new action against the Harlem Company for the same injury, and if there was any agreement to release, or not to sue that company in future, there is no evidence of such an agreement of that character which should bind his client.

The Judgment should be affirmed.

Judgment affirmed.

☞ The Chief Engineer of the Chicago, St. Joseph and Santa Fe Railroad reports that he has made a preliminary survey of a route commencing at a point on the St. Joseph and Denver City Railroad, about two miles west of the junction of that road with the Atchison and Nebraska Railroad to Manhattan on the Kansas Pacific Railway, making the whole distance from St. Joseph to Mahattan, as surveyed, about 122 miles. He estimates the cost of grading, bridging and masonry for a first-class railroad at $6,000 per mile, and possibly less. The maximum grade assumed 52.8 feet per mile. No very sharp curves, or curves with a small radius, would be required.

CIRCULAR SLIDE VALVE.—TO RAILROAD Managers and other Users of Steam Power.—I will guarantee an addition to the working-power of any locomotive or slide-valve engine of one-third to one-half, at very small cost and no increase of running expenses. Tests desired everywhere. Circulars free.
4127 J. F. TALLANT, Burlington, Iowa.

ROME, WATERTOWN AND OGDENSBURGH RAILROAD,
PRESIDENT'S OFFICE, 52 WALL ST.,
NEW YORK, June 27, 1872.

ELECTION AND DIVIDEND NOTICE.—AT the recent annual meeting of Stockholders, the following named persons were chosen Directors of this Company for the ensuing year:

W. C. PIERREPONT, JOHN T. DENNY,
MARCELLUS MASSEY, GARDNER COLBY,
C. ZABRISKIE, Jr., JOHN S FARLOW,
MOSES TAYLOR, T. H. CAMP,
SAMUEL SLOANE, S. D. HUNGERFORD,
WM. E. DODGE, THEODORE IRWIN,
WM. M. WHITE,

At a subsequent meeting of the Board, the following officers were duly elected:

MARCELLUS MASSEY, President.
T. H. CAMP, Vice-President.
J. A. LAWYER, Sec'y and Treasurer.

A Semi-Annual Dividend of FOUR PER CENT. will be paid on and after the 15th of July, as usual, at the Mercantile National Bank in this city, and at the Company's office at Watertown, N. Y., to stockholders of record at this date. Transfer books will be closed to day of payment.

2127 MARCELLUS MASSEY, President.

OFFICE OF ILLINOIS CENTRAL RAILROAD CO.,
NEW YORK, July 2, 1872.

A DIVIDEND OF FIVE PER CENT., free of Government tax, has been declared by this Company, payable on the first day of August next, to the holders of full-paid shares registered at the close of the thirteenth day of July instant, after which, and until the fifth day of August next, the transfer books will be closed.

L. V. F. RANDOLPH, Assistant Treasurer.

SUPERIOR QUALITY, FOR SALE BY
WM. BAILEY LANG & CO.,
54 Cliff Street, New York

NOTICE TO CONTRACTORS.—DELAWARE AND HUDSON CANAL COMPANY—CONSTRUCTION OF NEW YORK AND CANADA RAILROAD.—Sealed proposals will be received by the undersigned, for the Delaware and Hudson Canal Company, at the Engineer's Office, in Whitehall, until Tuesday, the 16th day of July next, at noon of that day, for the construction of the graduation, masonry, bridging and fencing of about thirty-eight miles of the line of the New York and Canada Railroad, extending from Whitehall, along the west side of Lake Champlain, to Port Henry.

The line will be divided into sections of convenient length, and will be ready for examination after the 6th ult. The maps, profiles, plans and specifications will be ready for examination at the Engineer's Office, in Whitehall, after that date, where all information in regard to the work may be obtained, and where blank proposals will be furnished.

Proposals should be sealed and endorsed "Proposals for N. Y. & C. R. R." and addressed to the undersigned, at Whitehall, Washington Co., N. Y.

The right is reserved to reject any or all proposals that may be received as may be deemed for the interest of the company. Dated Chief Engineer's Office, Albany, June 19th, 1872.

C. W. WENTZ, Chief Engineer.

RAILROAD SECURITIES NEGOTIATED.

ENGINEER'S FIELD BOOK,
By C. S. CROSS, Civil Engineer.

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent free by mail, upon receipt of the price. For sale at this office. Price $1.50.

The best and cheapest material for FIREBOX PLATES, and all Machinery uses.

CAMP'S IMPROVED DUMPING CAR.

(Used by the American Dredging Company.)

RIGHTS FOR SALE BY

N. H. CAMP,

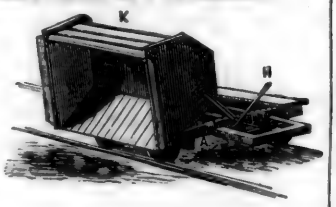

Fig. No. 1, Car Loaded. Fig. No. 2, Car Dumped.

TO DUMP THE CAR.

The Brakeman seizes the lever H, and raises it, thus removing the step from under the box-support A, when the weight of the load causes the box to roll over to the position shown in Fig. 2.

To replace the box in readiness for another load.

The Brakeman, standing on the platform, reaches over, and grasping the corner of the box, pulls it back to its place.

Address, N. H. CAMP,
Care N. C. MILLER, 61 Broadway, New York City:
or HAWKINS, WILLARD & CO., 28 Market St., Chicago.

HAND'S IMPROVED DUMPING CART.

PATENTED APRIL 4th, 1871.

THE MOST PERFECT YET INVENTED.

Can be dumped by a single motion of one hand while you hold the horse with the other.

The tail-board being attached to the shafts, lifts of its own accord when the cart is dumped, as seen on the right of the engraving. As soon as the load is dumped all you have to do is to start the horse, and the cart will resume its proper position, as seen in the left of the engraving, hook itself and replace the tail-board, without any assistance of the driver whatever. The shafts are attached to the outside of the body, near the hubs, which gives the horse great control over the cart, and prevents the body from playing from side to side as they do when the shafts are pivoted underneath.

Manufactured and for Sale by WILLIAM & HENRY HAND,
PLAINFIELD, N. J.

STATE AND COUNTY RIGHTS FOR SALE.

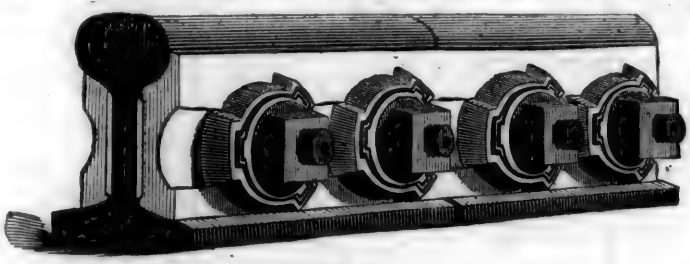
FISHER'S PATENT

Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

American Railroad Journal.

New York, Saturday, July 13, 1872.

☞ The Philadelphia *Ledger* of 8th inst., reports the net anthracite coal tonnage for the week ending on the 29th ult., from all sources, at 477,746 tons, and for the year 9,033,167 tons, against 4,467,950 tons to the same date last year, being an increase in the tonnage of anthracite coal of 4,565,217 tons. The production of bituminous coal for the week was 58,220 tons, and for the year 1,167,794 tons, against 1,054,797 tons to the corresponding time last year—an increase of 112,997 tons. The total production of all kinds of coal for the week was 534,966 tons, and for the year 10,200,961 tons, against 5,522,747 tons to corresponding time last year, showing an increase of 4,678,214 tons.

☞ The Delaware and Hudson Canal Company have laid down a third rail on the Sharon Springs and Cherry Valley branch, enabling them to carry passengers through from New York without change of cars.

☞ The sales of the land department of the Union Pacific Railroad Company for the month of June, 1872, were 23,900 acres, amounting to $103,610, at an average of $4 30 per acre. The total sales from July 28, 1869, to the present date are 571,169 acres amounting to $2,399,410, at an average of $4 20 per acre.

INVESTMENT SECURITIES.

The Northern Pacific Railroad Company, through its Financial Agents, offers for sale its First Mortgage 7-30 Gold Bonds. They fall due in 30 years, bear 7 3-10 per cent. gold interest, payable semi-annually, are exempt from U. S. tax to the holder, and are secured by a first and only mortgage on

1. The Railroad, its Right of Way, Franchise, Rolling Stock, and other Property.

2. Its Traffic or Net Earnings.

3. A Government Grant of Land averaging on completion of the Road about 23,000 acres per mile of track.

The Road follows what is known as the Valley Route to the Pacific, flanked most of the way by an excellent country, and is assured in advance of a vast and profitable traffic which already awaits its completion. The work of construction is steadily and satisfactorily progressing; the settlement of the adjacent country and the building of towns keep pace with the advance of the road; a large body of the Company's lands is already in market, and the proceeds of sales will constitute a Sinking Fund for the redemption of the Company's Bonds, which are convertible at 110 into the Company's Lands at market prices.

Believing that these bonds, both in point of safety and profitableness, constitute such a security as judicious investors can approve, we recommend them to the public. Government bonds and all marketable securities are received in exchange at current quotations without cost to the investor.

JAY COOKE & CO.,

New York, Philadelphia and Washington.

☞ C. B. Morse has been appointed superintendant of the Syracuse Northern Railroad, in place of E. H. Bancroft resigned.

How to Prevent Them.

"Another fearful accident!—A train thrown from the track!—Scores killed, and many more wounded!—The cars telescoped, and passengers scalded to death by the steam!"

Such is the familiar announcement that has again met our eyes during the past week.

But the public has become indifferent. It has shuddered for a moment as the shrieks of the wounded and dying have rung in its ears, but the world moves on, and already it is nearly forgotten. Apparently no attempt has been made to investigate the real cause of the accident. A broken rail, or something of the kind, is the answer given to all inquiries, and the public is satisfied to let it rest there without inquiring how was it broken? or whether it could have been prevented?

The three great *desiderata* of railway travel are speed, comfort, and safety. Is it not strange that while so much attention has been paid to the first two—that while thousands upon thousands have been expended for palace cars and for every appliance which can add to the comfort of passengers, so little attention should have been paid to the matter of safety? It seems to be regarded as a sort of necessity that accidents should take place. Is it so? Are there no means of preventing their recurrence? Must the slaughter go on? We believe that there are such means. It may be almost or quite impossible to provide against the occasional negligence of employees; but every railroad should see to it that every mechanical device which tends in any way to enhance safety, is used on all its trains. New inventions of this kind are frequently made, and the time will doubtless come, if it has not already arrived, when accidents of this kind will be wholly unnecessary and inexcusable. Even on the score of economy it behooves railroad companies to give every such invention a fair trial. If they refuse to do so, it should be made incumbent upon them by law.

Some time since we published a decision of one of our higher courts, which places this matter in its true light. The plaintiff brought suit against a railroad company to recover the value of certain goods shipped over their line, which were set on fire by a spark from the locomotive. The

bill of lading exempted the company from all liability "from damage or loss to any article from or by fire, or explosion of any kind." But the court held "that the defendants were not, by the stipulation in the bill of lading, released from liability for loss arising from its own negligence. It was the duty of the defendant to provide safe and proper machinery for working its road, and it was negligent if the engine hauling the goods was, in its construction, lacking in anything which sound rules require it should have. If there was known and in practical use an apparatus, which, if applied to an engine would prevent the emission of sparks, the defendant was negligent if it did not avail itself of such appliances. But it was not bound to use every possible prevention which scientific skill might have suggested, nor to adopt an untried machine. There must not only exist scientific skill to make, but there must have been in practical use, and known, locomotives consuming their own sparks, before a railway company can be charged with negligence in not employing them."

Now, there are known and in practical use, many inventions which tend to decrease the dangers of railway travel. Among these, there is one which has given the very best of satisfaction, and which has doubtless saved many lives, besides adding greatly to the comfort of traveling. We refer to the invention known as "MILLER'S TRUSSED PLATFORMS, COMPRESSION BUFFERS AND AUTOMATIC COUPLERS." It may not be generally known that it is exceedingly dangerous for a train using the common coupler to run at a higher speed than 12 or 15 miles per hour, and that, according to the principle of law laid down above, a company running such a train is indictable. This fact has long been known in Europe, and the common coupler has been superseded by one which holds the cars more firmly together.

We apprehend that if the cases were examined into, it would be found that rails are rarely broken by the locomotive, but almost always by the rear cars of a train. It is not done by vertical but by horizontal pounding and pressure caused by loose couplings. It will be found that the locomotives and first cars have passed over in safety, or that the rail has been broken by a preceding train. Now, if this be true, as we believe it to be, this danger can be entirely averted by the use of Mr. MILLER'S inventions, and every railroad company should be obliged to adopt them.

"Telescoping" and "oscillation" are unknown where these inventions are used. Many of the best roads in the country have already adopted them. But a few are still deterred by false notions of economy, and the desire of gain at whatever expense. We are glad, however, to see them continually coming into more general use, and we hope that the time is not far distant when every passenger train in the country will be equipped with them. We believe that the true interests of the railroad companies, as well as of the traveling public, demand it, and that old fogy ideas must give way.

Besides this, there are many other considerations of importance which should have their influence. They add greatly to the comfort of passengers, by causing the cars to move steadily, and by preventing the disagreeable jerking in starting and stopping. Injury to men when coupling cars, and to persons falling between the cars, are entirely prevented. Space forbids our speaking of these details more at length at present. The point which we wish chiefly to press is that of *safety*. We believe that these inventions tend to secure this greatest *desideratum*, and that their adoption cannot be too warmly urged.—*St. Louis Railway Register, June* 28.

Northern (N. H.) Railroad.

The earnings of this road for the years ending March 31, 1871 and 1872, were as follows:

	1871.	1872.
From passengers	$352,150 01	$212,021 58
" merchandise	675,378 52	489,834 61

Locomotive "	331,435 22	165,541 99
Maintenance of way	200,639 52	122,469 49
General expenses	31,447 04	18,414 44
Miscellaneous expenses	53,447 54	33,953 02
State tax	69,502 37	56,357 10
United States tax	8,421 31	
	$699,654 52	$464,285 29
Balance of earnings	$358,160 78	$258,489 36
Less new rail account	65,954 01	70,748 01
Net earnings	$292,206 77	$187,741 35
Add balance of income per last report		201,838 58
Total income		$389,579 93
From which deduct—		
Balance of interest account	$2,138 45	
Dividend Dec. 1, 1871, $4 per share	119,924 00	
Dividend June 1, 1872, $4 per share	120,856 52	
		242,918 97
Balance of income account		$146,660 96

There have been purchased and cancelled during the last year $3,100 of the bonds of the company, leaving outstanding, March 31, 1872, only $102,100, payable April 1, 1874.

The contingent fund is increased to $92,628 76, and remains principally invested as heretofore.

During the past year 2,316 tons of new rails and 66,177 new sleepers have been placed in the track; and 2,200 tons of rails have been taken up, repaired, and re-laid. These are much more than the average repairs in former years; and place the road-way in good condition.

We have built one new freight locomotive, and three merchandise cars, which are an addition to the equipment of the road. We have also built one mail and smoking car and twenty-one merchandise cars to re-place old ones; and the road and furniture in other respects have been kept in good order.

The Sugar River Railroad has been in operation from Bradford to Newport since last November, and will be completed to Claremont in July next. We think that the road ultimately will be profitable to this corporation, which is largely interested in it; and that it will be advantageous to this road in other respects.

For the purpose of securing to the line of which this road forms a part, the business from the Ogdensburg road and the West, contracts for a long term of years have been made between the roads composing the line. The charges on the receipts from that business, under the contracts, will be large at present, but it is expected that the business will prove to be remunerative eventually, when the resources are more fully developed.

The equipment of the road March 31, 1872, was as follows; 11 passenger and 15 freight locomotives, 408 long and 108 short merchandise cars, 15 passenger, 5 baggage and 20 gravel cars. Number of miles run by passenger trains, 180,122; by freight trains, 336,956; by other trains, 6,514—total, 523,592. Number of passengers carried 181,109; do., carried one mile, 7,268,112. Tons of merchandise carried, 445,210; do., carried one mile, 27,752,968.

Erie Railway.

At a meeting of the stockholders of the Erie Railway Company, held in this city on the 9th inst., the following gentlemen were elected directors to serve for the ensuing year: Samuel D. Babcock, Samuel L. M. Barlow, John J. Cisco, Charles Day, Alexander S. Diven, John A. Dix, W. Butler Duncan, John T. Johnston, Henry L. Lansing, G. Talbot Olyphant, Edwin D. Morgan, John V. L. Pruyn, Homer Ramsdell, Frederick Schuchardt, William W. Shippen, William R. Travers, Peter H. Watson.

At a meeting of the Board of Directors held after the election, the following-named gentlemen were elected as officers for the ensuing year: P. H. Watson, president; A. S. Diven, vice-president; W. W. Sherman, treasurer, and H. N. Otis, secretary.

The Vice-President submitted a report of the business of the company for the last nine months, which was ordered to be printed for general distribution. The report shows that the earnings of the company from all sources, from October 1, 1871, to May 1, 1872 (seven months), were $10,374,599 50. Expenses, including interest on mortgage, rents of railroads, taxes and hire of cars, and operating leased lines, $9,801,980 93; leaving a surplus of $572,618 57. Showing an increase over the corresponding months of the previous year of $1,335,197 74, or 14¼ per cent. The

capital stock and debt of the company on the 1st of July were as follows:

STOCK.

Common stock	$78,000,000
Preferred stock	8,536,910
	$86,536,910

FUNDED DEBT.

First mortgage	$3,000,000
Second mortgage	4,000,000
Third mortgage	6.000,000
Fourth mortgage	4,441,000
Fifth mortgage	926,500
Buffalo branch bonds	182,600
Sterling bonds, £1,000,000.	4,844,400
Consolidated mortgage,1920, issued	6,446,000
Scrip dividend	199,640
	30,040,140
Total stock and funded debt	$116,577,050

FLOATING DEBT.

Including loans on demand, bills payable, outstanding vouchers and payrolls, and accrued interest on funded debt	$6,463,668 20

The Auditor makes the following statement in connection with the report:

The earnings and expenses of the Erie Railway Company for the first six months of the calendar year, 1872, were as follows:

	Earnings.	Expenses.
January	$1,332,974 35	$1,365,891 99
February	1,294,076 27	1,355,628 30
March	1,460 173 69	1.39.9712 81
April	1,548,812 69	1,505,083 80
May	1,729,211 00	1,425,000 00
June	1,463,963 00	1,400,000 00
Total	$8,829,231 00	$8,451,346 90
Net earnings		$377,884 10
Less 3½ per cent. on preferred stock, payable July 15, 1872		298,791 85
Surplus		$79,092 25

Narrow Gauge Railroads.

A great deal of interest is just now being manifested in the subject of narrow gauge railroads, especially at the West. In fact, a narrow gauge railroad convention has lately been held in St. Louis, at which various projects of the kind were discussed, and some of them so far matured that they will probably soon be carried into effect. The practical success which has thus far attended the opening of these roads, in England and some of the Western territories, seems to have fully confirmed the theory first advanced in regard to their economical character, and special adaptation to the work of opening up the resources of new and sparsely settled regions, where the topography of the country is mountainous, and the initial traffic to be secured is not sufficient to justify the outlay required for building a broad gauge road.

These narrow-gauge lines, which, it is said, may be built, equipped and operated at about one half the expense of the ordinary roads, are exactly calculated to meet the wants of the new mining terrritories lying West of the Rocky Mountains, where, under the most favorable circumstances, there are steep grades and sharp curves to be encountered. They will, also, cover a great exigency, long and seriously felt by those farmers of the West whose location is remote from any great commercial centre or trunk line, and whose surplus products are rendered comparatively worthless from the lack of facilities for reaching a market.

There are thousands of these Western farmers, who live in out-of the-way places hundreds of miles away from any railroad centre, who, in seasons of plenty and low prices, find it more economical to burn their corn for fuel than to undertake to send it to market, where the price received for it, sometimes, will hardly cover the cost of transportation.

But the worst of this difficulty lies in the fact that thousands upon thousands of acres of the most fertile and productive lands in the great Northwestern States are thus doomed to perpetual unfruitfulness. They cannot be sold, settled or cultivated owing to their remoteness from and lack of communication with the markets, and thus the country at large loses the vast benefit which would otherwise accrue from these important undeveveloped source of wealth. These lands might all be brought under cultivation in a few years, with a cheap narrow gauge railroad system run through them and connecting with the principal trunk lines between the seaboard and the West. This would not only provide homes for the surplus population of Europe and the Eastern States, but in a short time would more than double the cereal and other great food crops of the West.

The excess of these crops, which would then find its way to our Atlantic markets, and help to swell the volume of our export trade, would soon pay off the entire sum of our national indebtedness to Europe, and turn the balance of trade in our favor. Even if no more corn, wheat, beef and pork were actually produced than at present, the quantity sent forward to the seaboard would be greatly increased. The cost of getting this produce to the seaboard markets to a great extent determines the quantity received here. The difference of a cent a bushel, or of two or three cents a barrel in freights, would make a difference of many thousands in the number shipped overland during ordinary seasons.

At present, this overland transportation, from the time such produce leaves the farmer's hands until it is laid down here in Boston or New York costs more than the outward freight charges hence to any port in Europe. If the former can by any method, be materially reduced, one of the results will, of course, be to greatly stimulate and expand the Western and foreign trade of our Atlantic seaports. Hence our Eastern merchants and capitalists can readily appreciate the bearing of this narrow gauge railroad system, in developing the resources of the West, upon their commercial and navigation interests. In fact, they cannot help understanding that these interests are promoted by every additional acre that is put under cultivation in the great Mississippi valley, and every new railroad enterprise, however remote, which reduces the cost of transportation to the seaboard, even the fraction of a cent.

We have already either completed or in contemplation, about as many broad gauge trunk lines of communication between the East and West as will be needed for the accommodation of our overland trade for many years to come. The great want of domestic commerce, in the immediate future, is cheap feeders or branches to these trunk lines, such as will enable them to reach out and grasp those minor points of trade and production at the West which lie on either hand, and to render them tributary to their main line traffic. To build these latteral lines with a broad gauge track in many cases is out of the question. But the narrow gauge will pay with but a comparatively small volume of business to begin with, and when this increases so as to warrant the change, the broad may be substituted for it.

In these remarks, we have considered this subject exclusively in reference to freight transportation. What part these narrow gauge roads are destined to play in the passenger traffic of the country, we shall not undertake to predict. That part of the experiment has not yet been fully tried, though we see no good reason why, with a proper adaptation of details, it should not succeed well on routes where travel is not a specialty and confined almost exclusively to express trains. At any rate, the matter is worthy of the most careful and profound attention of our great railroad companies who control through lines, and we regret that the railroad interest of the East was not more fully represented at the St. Louis convention.—*Boston Commercial Bulletin.*

Movements of Produce.

Receipts of certain articles of domestic produce at the port of New York for six months from January 1st:

	1871.	1872.

Light Railways.

The following are extracts from a paper read by Mr. H. S. Ellis before a meeting of the Exeter Chamber of Commerce, held at the Guildhall, Exeter, Eng., on the 18th of June; Mr. Porter, vice-president, in the chair.

Since the annual meeting of the Exeter Chamber of Commerce, when, at your invitation, I had the honor of describing the light railway recently constructed by the Duke of Buckingham, I have been asked by several landowners, engineers, and others interested in the construction of cheap railways, to furnish them with a fuller description of it. I gladly avail myself, therefore, of your invitation to bring the subject of light railways again before the Chamber. I firmly believe that the attention which you are directing to the subject will lead to a greater use of such railways in this part of the kingdom, where thin population and agricultural produce scarcely justify the construction of expensive extensions of the usual Parliamentary description. The value of light railways and tramways in agricultural districts cannot well be over-estimated, as, from the absence of cheap transit, manure, lime, &c., are almost at prohibitory prices. Farmers in the neighborhood of Northmolton have to pay the sum of half-a-crown a bushel for lime, and at Hemyock the inhabitants pay no less than 5s. per ton for the cartage of coal. Within the last few weeks I have met several landowners in Devonshire who have expressed their willingness to give their land for the construction of light railways in their respective districts; and I have reason to know that engineers have already been called in to survey the country and give estimates for the construction of such lines. But the question now arises, Which kind of light railway should be constructed? There are at present three different kinds which are attracting public attention:—

1st. Light railways which follow as nearly as possible the surface of the ground, avoiding the hills and the necessities for expensive over or under bridges, and by travelling at low speeds, avoiding the necessity for expensive signal and other apparatus, usually required by the Board of Trade for through lines. The gauge is usually the national one, viz., 4 ft. 8½ inches.

2nd. The patent narrow guage railway, invented by Mr. Fell, which, by being constructed on timber supports of different heights, to suit the undulations of the country, avoids to a great extent severance of land and expensive cuttings and banks. The gauge of such lines varies from 8 inches to 2 feet. A railway of this description about a mile in length has been recently constructed at Aldershot in 45 days, for the purpose of conveying stores to the victualling office. The gauge of this line is only 18 inches, but it is capable of conveying siege guns seven tons in weight. The cost, I believe, is about £2,000 per mile.

3rd. The wire tramway, which like the Fell system, is mounted on iron or timber supports, to suit the undulations of the country; but is only adapted for the conveyance of loads not exceeding 10 cwts., and is generally employed for short distances only—250 yards to three or four miles. One has been constructed as long as 15 miles. There is one at the Devonshire Clay Works 250 yards in length, and another at Brendon hills three-quarters of a mile in length.

I have lately had an opportunity of personally inspecting all three different kinds of railways, and each has good points to recommend it; but I am satisfied that a light railway similar to the Duke of Buckingham's is the most advantageous where it is practicable, and especially so where passenger traffic may be reasonably expected. I have had the honor to receive from the Duke himself the following very full and valuable statement with regard to the cost of His Grace's railway, as also of the receipts and the working expenses, which, by his most courteous permission, I am enabled to lay before you.

The cost of the Wotton railway, including sidings and two goods sheds (one 25ft. by 25ft., and one 60ft. by 25ft.) is rather less than £1,400 per mile, exclusive of the value of the land. The main line is very nearly seven miles long. The land belongs principally to the Duke of Buckingham. The gradients from Quainton to Wotton are favorable, two short inclines of about 1 in 78 in opposite directions being the worst, and the general inclination being downwards to Wotton, which is 50 feet below Quainton. The gradients from Wotton to Brill are heavy—the ascent being, with one exception, of not quite a quarter of a mile, continuous for 2¼ miles varying from 1 in 100 to 1 in 51. The latter is a quarter of a mile; but an incline of 1 in 64 on a curve of 12 chains radius for a quarter of a mile is quite equal to the steeper gradient. The total ascent is about 130 feet in this portion of 2¼ miles. The line was commenced on 8th September, 1870. The first portion to Wotton was in use on the 1st April, 1871, and the greater portion of the remainder was brought into use for mineral class, agricultural produce, &c., in November—the last ¼ mile and Brill station were brought into use last April—a branch of 1¼ mile is now (in May) in the course of construction. The working of the line is carried on by Messrs. Chaplin and Horne; the maintenance by the Duke of Buckingham. The estimated working expenses for the current year are £650, including 10 per cent. interest on two engines. The traffic receipts for 10 months, March to December, were over £1,000, but these do not afford very certain data, as they include a large amount of material for construction, and there was no through rates with other lines until July. The earnings for this year is estimated at about £1,350 or £1,400. The actual earnings to April 1st (three months)—

Goods and minerals	£244
Coaching traffic	50
Total	£294

The line is worked by one six-horse Aveling and Porter engine assisted by one horse for shunting The engine making two double trips daily, and a third if required. A second engine of the same size is being built. The power is found to be amply sufficient; the rates are low upon agricultural produce, minerals, &c. London manure is brought at 1d. per ton per mile throughout. 500 or 600 tons of chalk have also been brought for manuring arable clay land. The speed is necessarily, from the circumstances of the line, frequent stoppages, and the power of engines, very low. Time allowed Brill to Quainton, including stoppages, one hour and five minutes. The actual running speed varies from four to eight miles per hour. It was not intended to carry passengers except persons with cattle, &c., and the workmen on the estate; but so many have sought to avail themselves of the accommodation, that the passenger carriage was borrowed, and put on in January, since which the numbers carried have been:—104 in January; 123 in February; 176 in March; 224 in April. The villages accommodated are:—Wescott, about 150; Ashendon, about 300; Wotton, about 220; Dorton, about 180; Brill, about 1,400.

☞ The New Jersey Midland Railway was formally transferred to the New York and Oswego Midland Railroad Company at Ellenville, Ulster Co., N. Y., on the 15th ult. Ellenville is the present northern terminus of the line. Between that point and the southern terminus of the road building south from Oswego, there is a break of 70 miles. It is hoped that this gap will be closed by October next, when the line will be complete from Jersey City to Oswego.

☞ The Marysville (Ky.) *Eagle* says that the Pennsylvania Railroad Company have concluded a contract with the Ohio and Kentucky Railroad Company, which will almost certainly lead to the early completion of the latter road.

Safe and Profitable

THE

CANADA SOUTHERN

First Mortgage Sinking Fund 30 Years

7 PER CT. GOLD BONDS

AT

90 AND ACCRUED INTEREST.

The Road runs from Buffalo to the Detroit River, and is the Eastern link in the new AIR LINE FROM BUFFALO TO CHICAGO, and has been under construction for about two years past by railroad men who have seen the necessity for a STEEL RAIL, LOW GRADE, SHORT ROUTE between the great railroad systems which diverge from Chicago, Toledo and Buffalo.

Among the builders of the road, by whose cash subscriptions 220 miles (out of 290) have already been graded, bridged and made ready for the superstructure, a large part of the steel rails bought, all of the materials for the stations and a part of the equipment purchased, are:

MILTON COURTRIGHT, JOHN F. TRACY, DAVID DOWS, WM. L. SCOTT, HENRY H. FARNHAM, R. A. FORSYTH, HENRY PORTER, JOHN M. BURKE, M. L. SYKES, Jr., B. F. ALLEN, all directors, either in the Chicago and North West or the Chicago, Rock Island and Pacific; GEO. OPDYKE of the Midland Road; JOHN B. ALLEN, SIDNEY DILLON, DANIEL DREW, J. S. CASEMENT, J. & J. CASEY, O. S. CHAPMAN, JOHN ROSS, DAVID STEWART, and F. H. WINSTON.

THE ROAD will be

33 Miles Shorter than any other Road,

either BUILT or in contemplation between Buffalo and Chicago, and will also shorten the distance between Toledo and Buffalo 23 miles.

THE MAXIMUM GRADE on the entire line does not exceed FIFTEEN FEET to the mile—and Ninety six per cent. of the road IS STRAIGHT.

THE ROAD WILL BE COMPLETED and in running order on or before Dec. 31 of this year.

The principal and interest of the bonds are payable either in New York, London, or Frankfort.

We confidently recommend the bonds to all classes of investors.

LEONARD, SHELDON & FOSTER,
No. 10 Wall-St.

NOTICE.

HAVING BECOME ASSOCIATED WITH Messrs. LEONARD, SHELDON & FOSTER in the Agency of the CANADA SOUTHERN RAILWAY CO., we offer the above named Bonds for sale.

After a thorough investigation, we recommend them to our friends and customers as a SURE AND RELIABLE INVESTMENT.

Pamphlets and all information furnished on application.

American Railroad Journal.

Saturday, July 13, 1872.

Stock Exchange and Money Market.

Money has been quite plenty for all legitimate purposes, the banks, as well as private lenders, having been liberal of accommodation, and rates throughout have ruled comparatively easy for the borrowing interests, whose wants have been promptly met, on the basis of 3@5 per cent. on call, and 5@7½ per cent. per annum in the discount form. The main Street inquiry has been from the Stock Exchange firms. The Gold speculation has been devoid of animation, and has not called for much pecuniary aid. There has been rather less demand for currency from the interior, though the Wool crop movement has been the source of some calls for funds, which, however, have made but little impression on the city bank reserves. The U. S. Sub-Treasury office again last week reduced its coin balance about 2⅞ millions and its currency nearly half a million. The city banks enlarged their loan and discount average about 7⅞ millions during the week, and their outstanding circulation about ⅛th of a million. The U. S. Sub-Treasury held a currency balance on Wednesday morning of $7,979,955, and a coin reserve of $43,816,914.

The city banks, in their latest return, show a falling off of $2,442,800 of legal tender notes, with an increase of $5,990,000 of specie, and $9,287,009 of deposits, $7,899,000 in their loan and discount averages, and $92,300 to their item of circulation. The city bank exchanges, last week, averaged 89½, and thus far, this week, about 87 millions daily. The banks now hold $13,973,275 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $28,785,500, against $19,445,774 same time last year. The city bank deposits are now $241,774,900 against $251,807,553, week ending July 8, 1871. The legal tender reserve amounts to $52,508,600, against $69,976,825 same time last year. The circulation now stands at $27,508,400 against $30,411,872 same time last year. The loans are now $296,901 800 against $299,078,577 at this date last year.

The coin reserve of the city banks is now about 28¾ millions as against about 28⅞ millions on the 6th of January; the legal tender reserve is about 52½ millions against $46,616,000 on the statement of February 10th.

Government revenues have been on a more liberal scale, in the excise form, though moderate in that of customs. The excises yielded within the week about four millions, and during the fiscal year ending with June 30, 1872, $131,307,214, against $144,967,066 the preceding fiscal year. The customs at the port of New York last week were $1,361,373; at the outports, equal to about $470,000 all in coin, or coin certificates.

Under the Treasury programme for July, Government proposes to sell Gold, as follows: Thursday, July 18, $1,000,000; Thursday, July 25, $1,000,000. And to buy in Five Twenties, as follows: Wednesday July 17, $1 000,000; Wednesday July 24, $1,000,000; Wednesday July 31, $1,000,000.

Gold has been quoted rather stronger, the offerings having been moderate, and more generally under the control of the operators for a rise, but the demand has lacked spirit, in all lines. The speculative inquiry has been remarkably tame. The export drain has been moderate; and the customs call light.

On Tuesday, the specie exports were $500,000; and on Wednesday, $581,048.

The range of the price during the week has been from 113⅝@114 and the closing quotation on Wednesday was 113⅞@114 against 113⅞ the preceding Wednesday. The specie outflow last week, was $2,624,812. The Gold Exchange Bank clearances have averaged about 24½ millions per day during the week.

The customs demand for Gold last week, averaged $296,400 a day; thus far, this week, it has averaged $265,000 a day, or equal to a weekly aggregate of $1,590,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $10,689, and since Jan. 1, 1872, $742,715, against $3,179,957 same time in 1871. The total customs revenue of the Government, in coin, at this port, since January 1, has been $77,742,175 against $79,096,345 during the same time in 1871.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1872, $46,138,875, against $53,551,401 during the same time in 1871.

The export drain of specie was $2,624,812 last week, against $1,710,666 same week preceding year. The shipments since January 1, 1872, have been $39,262,456 against $46,441,084 during the same portion of 1871.

Foreign Exchange has been held with confidence, on restricted offerings, though the demand has been moderate. Bankers' sixty day bills on London closed on Wednesday at 109¾@110; sight bills on London, 110⅜@110⅝.

The produce exports from this port, week ending with July 9, were to the currency value of $3,965,813.

Government securities have been fairly active at generally strong and buoyant prices, the demand having been mainly from investment purchasers.

On Wednesday Government bought in $511,750, of Five-Twenties at 113 65@113 74¾, out of an aggregate offering of only $711,850.

U. S. sixes of 1881 at the close on Wednesday of the current week were quoted at 117⅜@117½; U. S. Five-Twenties of 1862, (other than the bonds called in) 114⅞@115⅛; U. S. Five-Twenties of 1864 at 115@115⅛; U. S. Five-Twenties of 1865, 115⅝@115¾; U. S. Five-Twenties of 1865 consolidated, 114⅛@114¼; U. S. Five Twenties of 1867, 115⅛@115¼; U. S. Five-Twenties of 1868, 114⅞@115; U. S. Ten-forties at 112½@112¾; U. S. Fives of 1881 (Funding Loan) 113⅝@113⅞; Six per cent. currency bonds, 114¾@115.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	June 26	July 2.	July 10.
Consols	92⅝	92⅝	92⅝
U. S. 5-20's of 1862	91	91	91⅛
U. S. 5-20s, 1865	92	92	92½
" 1867	91½	92	92
" 10-40s	89¼	89¾	90
New Fives of 1881	89¾	90¼	90½
Erie	46⅝	45	43½

State bonds have been comparatively quiet, and unsettled in price.

Railway Mortgage Loans of the more substantial class have been in good request, chiefly on investment account, at well supported prices, in most instances. Central Pacific Sixes have been in more demand at 101¾@102 ex July coupon. Chesapeake and Ohio have been selling more freely at 94 per cent. and accrued interest.

The sales of the 7-30 gold bonds of the Northern Pacific Railroad Company are very heavy. They are recommended to judicious investors as a desirable security. They bear 7 3-10 per cent. interest in gold, have 30 years to run, and are secured by a first mortgage on the entire road and its appurtenances, on the net earnings of the road, and on a Government grant of land, which will average, on the completion of the road, about 23,000 acres per mile of track. The proceeds of the sales of these lands constitute a sinking fund for the redemption of the bonds, which are convertible at 110 into the company's lands at market prices.

Railway and Miscellaneous share property has been moderately active, and values have been unusually variable, under speculative manipulations of the market. The later dealing indicated a rather more confident temper.

Business in Ingot Copper has been on a limited scale at about the quotations noted in our last; 100,000 pounds sold at 33¼c@33½c. Scotch Pig Iron has been held more firmly, on the basis of $50, for Glengarnock, but has been comparatively quiet: 400 tons Eglinton, and 100 tons Cambroe sold on private terms. Of No. 1 American Pig, the offerings have been very light, and prices have been quoted stronger, ranging from $52@$55, but the market has been inactive. No. 2 American Pig has been plenty, dull and weak within our previous range. Iron rails and bars have been quoted steady, though trade has been slow. Of Russia Sheet Iron, 100 packs Stained, No. 2, sold on private terms. There has been very little call for Lead, Spelter or Zinc, yet quotations remain about as before. Pig Tin has been very quiet, with sales reported of only 50 slabs Straits at 36⅞c., and 100 slabs do., deliverable after Aug. 1, at 34c. gold. Tin Plates have been inactive, sales having been confined to 500 boxes assorted Charcoal, deliverable after Aug. 1 on private terms; and 250 boxes B. C. Coke Terne at $10 25 gold, per box.

The holidays, and the warm weather have been against free movements in domestic produce. Flour, Corn, Oats, Butter, Cheese, Petroleum, and Naval Stores have been quoted cheaper. Pork, Lard, Wheat, Rye, and Tobacco closed more firmly. Middling upland cotton declined materially and closed on Wednesday at 24½ cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,663,873 bales, against 3,897,186 bales same time in the preceding year; exports 1,910,174 bales against 3,073,476 bales in the previous year; stock at the ports at latest dates, 147,750 bales against 198,800, bales same date 1871.

At the Live Stock Markets, Beeves have been in less request at 7½@13 cts.; Veals in fair demand at 6@9 cts.; Sheep at 5@7; Lambs 7½@12 cts.; Swine, 4½@4⅞ cts. per lb., all live weight. The week's receipts were 8,469 Beeves, 3,300 Veal Calves, 19,691 Sheep and Lambs; and 27,807 Swine.

Foreign goods have been generally quoted about steady, but have been without activity. The week's imports of foreign goods reached the amount of $6,085,239 including $1,519,228 of dry goods.

Ocean freights have been fairly active and rates have been generally quoted stronger.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ The Washington, Cincinnati and St. Louis narrow gauge railway was formally organized at Luray, Page Co., Va., on the 13th ult., by the election of a Board of Directors with Hon. P. B. Borst as President. The road is to run from Washington city through Virginia and West Virginia, thence westward to St. Louis.

☞ The George's Creek Coal and Iron Company, Baltimore, has declared a semi-annual dividend of $5 per share, payable on and after the 18th instant, free of taxes.

☞ The Sodus Point and Southern Railroad Company opened their road on the 26th ult., by an excursion from Newark to Sodus Centre. Passenger trains will run regularly hereafter between these points.

Kansas Pacific Railway.

The following is a statement of the earnings and expenses of the Kansas Pacific Railway, derived from the annual report of the company for the year ending December 31, 1871:

	1870.	1871.
Average length of road operated, miles.	551	673
	1870.	1871.
Gross earnings.....	$3 360,786 61	$3,312,517 83
Operating expenses.	2,480,640 46	2,302,589 96
Net earnings.....	$680,746 15	$1,009,927 87
Gross earnings per m.	$6,099 43	$4,922 22
Operating expenses per mile.....	4,499 85	3,421 38
Net earnings per mile	$1,599 58	$1,500 64
Percentage expenses per earnings.....	73.79	60.51

In the total gross earnings there is an apparent falling off of $48,268 78 in 1871; but there was no new road in course of construction during the year, and no income from transportation of construction material. The revenue from this source last year amounted to $385,965 80, being the charges upon material for the Denver extension. If this item is omitted from the comparative statement, the ordinary business of the road for 1871 shows an increase of $337,697 02. This increase of earnings from ordinary business is at the rate of 11.35 per cent.

The earnings from ordinary freight traffic were as follows:

In 1871.	$1,980,289 57
In 1870.	1,856,454 09
Increase	$123,835 48

Equal to 6.67 per cent.

The earnings from passenger service were:

In 1871.	$1,285,748 09
In 1870.	1,078,602 85
Increase	$207,145 24

Equal to 19.2 per cent.

LAND DEPARTMENT.

The following were the sale of lands included in the Denver extension land grant trust (which covers 300,000 acres of land lying between the 300th mile post and Denver):

Acres sold....	21,690.08
Aggregate amount of sales..	$123,480 93
Average rate per acre....	$5 62
Bonds cancelled by trustees from sinking fund, to Dec. 31st, 1871.....	$34,000 00
Total bills receivable (bearing interest) in hands of trustees....	$92,326 92

The sales of lands and lots included in the Kansas Pacific land grant trust (which covers two million acres of land lying east of the 300th mile post) were as follows:

Acres sold....	98,783.10
Town lots....	50
Aggregate amount of sales....	$313,340 04
Average rate per acre....	$3 13
Bonds cancelled by trustees from sinking fund to December 31st, 1871...	$111,000 00
Total bills receivable (bearing interest) in hands of trustees....	$299,663 08

The 2,000,000 acres of land embraced in this trust comprise all the unsold lands belonging to the company east of the 300th mile post, and at the average rate per acre obtained from sales during the past year, they will ultimately yield an aggregate of $6,260,000.

☞ The Union Railway Company, Boston, has declared a 7½ per cent. dividend for the nine months ending July 1.

THE

St. Joseph & Denver City

RAILROAD COMPANY'S

First Mortgage Bonds

are being absorbed by an increasing demand for them.

Besides being the obligation of a wealthy corporation, composed of men of experience and high-toned commercial integrity, they are secured by a first mortgage on the road, revenues, land grant, franchise and equipments, combined in one mortgage, and are readily negotiable both in the markets of this country and Europe.

A liberal sinking fund provided in the mortgage deed must advance the price upon the closing of the loan. Principal and interest payable in GOLD. Interest at eight (8 p. c.) per cent. per annum, payable, semi-annually, free of tax. Principal in thirty years. Denominations, $1,000, $500 and $100, Coupons or Registered.

Price 97½ and accrued interest in currency, from February 15, 1872.

Maps, circulars, documents and information furnished.

Trustees, Farmers' Loan and Trust Company of New York.

The diminished quantity of these Bonds for sale, and the increased demand absorbing them, warrant the belief they will soon be sought for at an advance considerably above the present subscription price at which they can now be had through the principal Banks and Bankers throughout the country, and from the undersigned, who unhesitatingly recommend them.

TANNER & CO.

BANKERS,

NO. 11 WALL STREET.

☞ From a statement of the extent of railway mileage already opened in Peru, it appears that about 425 miles are finished and being worked, that about 833 miles are in course of active construction, and that all are expected to be completed by the end of 1873. The lines hitherto opened for traffic are stated to have proved remunerative, some of them yielding returns of from 10 to 12 per cent.

☞ The Texas Pacific railway is to be 1,515 miles in length. For two hundred and fifty miles the road is to be on an air-line, and in a stretch of eight hundred and fifteen miles there will be but six bridges.

☞ The route of the Atlantic and Pacific railroad, through New Mexico, has been filed in the land office at Santa Fe.

Journal of Railroad Law.

RAILROAD COMPANIES—CONSTRUCTION OF GENERAL RAILROAD ACT—MEANING OF WORDS "LABORER" AND "LABOR."

The recent case of Balch *vs.* N. Y. and Oswego Midland R. R. Co., (46 N. Y., 523,) was an action brought to recover for work done by the plaintiff with his team, in constructing the defendant's road, under and by virtue of § 812 of the General Railroad Act. Also for work done by one Annin with his team, and by one Eddy with his team, in constructing the same road. The persons last named assigned their several demands to the plaintiff.

The following is the opinion of the court delivered by—

ALLEN, J.—By the General Railroad Act of 1850 (Laws of 1850, Chap. 140 § 12,) a claim is given against a railroad corporation for the indebtedness of a contractor to any laborer for thirty or any less number of days' labor, performed in constructing the road of such corporation. The act requires the laborer to give notice, within a limited time, of the number of days' labor, and the time when the same was performed.

The terms "laborer" and "labor" were used in their ordinary and usual sense, and the provision was intended to secure the common laborer, one who earned his daily bread by his toil, a compensation for his own work. The terms necessarily imply the personal service and work of the individual designed to be protected.

The term "laborer" cannot be construed as designating one who contracts for and furnishes the labor and service of others, or one who contracts for and furnishes one or more teams for work! whether with or without his own services or the services of others to take charge of the teams while engaged in the service. When once an enlarged meaning is given to the words "laborer" and "labor" as used in the statute, one more extensive than that given by lexicographers, or than is popularly given to them, and so as to include those who perform work by themselves as well as by agents and servants, or themselves with a team, or with mechanical appliances, there will be little difficulty in the effort to give a liberal effect to the statute to bring within its terms all who, in any way, contribute to the construction of the road by furnishing labor of others, or in any form and by any means and without limit as to the amount or character of the labor, subject only to the limitation of thirty days for its performance. If a man is entitled to the benefit of the statute who furnishes one team, the man who furnishes fifty is within the same rule; and the fact that the man labors with or drives his team, or by himself and his servants drive all his teams, cannot affect the principle.

In neither case is the labor performed by the team of a laborer. (Conant *vs.* Van Schaick, 24 Barb., 87; Ericsson *vs.* Brown, 38 id., 390; both approved in Coffin *vs.* Reynolds, 37 N. Y., 640). In the latter case the meaning of the same terms used in an analogous statute was restricted and held not to include skilled artificers or those rendering service requiring skill, or such as are not regarded as common, ordinary labor, and the act was confined in its operation and effect to manual labor not requiring skill.

The principle of these cases should be decisive of this. The court, in Aiken *vs.* Wasson, (24 N. Y., 482), says: "It is obvious from the nature and terms of this and other provisions of the act, as from a general policy indicated by analogous statutes, that the legislature intend to throw a special protection around that class of persons who should actually perform the manual labor of the company." They say, further, that it would not harmonize with the general scope and object of the act to give the words their broadest interpretation. In the two opinions delivered in this court in Atchison *vs.* Troy and Boston R. R. Co., (6 Abb. Pr. R., N. S., 329), the very point involved here was affirmed in accordance with the judgment of the Supreme Court in this case, and the judgment of the court was in accordance with the result of these opinions. The learned reporter of the court at that time speaking from his notes, says that the precise point was not decided by the concurring opinion of five judges. But the statement of the judges as well as their argument, is high evidence of the law, and their opinions are entitled to great respect, even if they were not adopted by a sufficient number of judges to give them authority as the judgment of the court, there being in the case other grounds for the decision actually given. It does appear that the judgment was so modified as to give the plaintiff a judgment for his own labor only, on the ground that no objection was made to that in the court below.

It is not allowable, and would lead to mischief in the interpretation and application of statutes, to give this statute a latitudinarian construction which would include within it the claim of the plaintiff. It is not warranted by principle, and the authorities are opposed to it.

I am for an affirmance of the judgment.

Judgment affirmed.

Blast Furnaces, Mills and Forges in Great Britain.

The *Iron and Steel Institute Journal* gives the following tabular statements showing the number of blast furnaces, both built and in blast, and of puddling furnaces in Great Britain:

BLAST FURNACES.

	Built.	In blast.
Cleveland	94	94
Northeast of England	43	35
Northwest of England	67	60
South Staffordshire	166	104
North Staffordshire	42	38
Shropshire	30	22
Yorkshire—South and West Riding	54	44
Derbyshire	51	42
Northampton and Lincoln	26	19
Gloucester, Wilts, &c	18	12
North Wales	12	7
South Wales and Monmouth	188	120
Scotland	154	130
Total	945	727

PUDDLING FURNACES.

	No. of puddling furnaces.
North of England	1,990
Northwest of England	75
Yorkshire—West Riding	305
Yorkshire—South Riding	349
Derbyshire	130
South Staffordshire	2,049
North Staffordshire	444
Shropshire	206
Lancashire	336
Somersetshire	9
North Wales	60
South Wales and Monmouth	1,338
Scotland	565
Total	7,856

Railroad Tickets Good Either Way.

In the Superior Court in Boston, recently a case of interest to the traveling public was decided. In 1868 Mr. J. A. Coleman, of Boston, attempted to ride from New York to New Haven, on a coupon ticket, which was rejected by the conductor on the ground that, although it was good from New Haven to New York, it did not pass the holder in the opposite direction. Mr. Coleman insisted that the company were compelled to receive the ticket, as it represented money paid for a passage between those points, and he was put off the train by force, receiving such injury as to affect his health. He sued the New York and New Haven Railroad Company and recovered. The railroad obtained a new trial and were beaten again. On exception to the ruling of the Judge the defendant obtained a third trial, which terminated in a verdict for Mr. Coleman for $3,200.

Statement of the Public Debt of the United States July 1, 1872.

DEBT BEARING COIN INTEREST.

Sioux City and Pacific bonds, 1862-64	1,628,320 00	48,849 60
Totals	$64,623,512 00	$1,938,705 36

Interest paid by United States, $14,631,870 18; interest repaid by transportation of mails, &c., $3,708,934 78; balance of interest paid by United States, $10,922,935 40.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, June 29, 1872.

GEO. S. BOUTWELL,
Secretary of the Treasury.

☞ **The estimated earnings of the Erie Railway for the week ending June 30, 1872, were $340,739; against $345,806 for the corresponding period of 1871—a decrease of $5,067. Total earnings since April 1, 1872, $4,789,772—an increase over the same time in 1871 of $593,952.**

TO RAILROAD CONTRACTORS.

OFFICE OF BALTIMORE SHORT LINE RAILWAY COMPANY,
ATHENS, O., July 4, 1872.

SEALED PROPOSALS WILL BE RECEIVED at this office on the 1ST DAY OF AUGUST, 1872, until 4 o'clock P. M. for the grading and masonry of eighteen sections, averaging about one mile in length, of the Baltimore Short Line Railway, in the counties of Athens and Washington. These sections embrace large quantities of masonry, excavation and embankment, and are worthy of the attention of experienced contractors for heavy work.

The work now offered for competition is the same for which proposals were received in October, 1871, but which was not then let on account of legal impediments. All bids heretofore made will be considered as withdrawn.

Specifications and forms for contract will be in readiness for exhibitors at this office on and after July 23.

The right to reject any and all bids is reserved to the Railway Company.

JOHN WADDLF, President.

NOTICE TO CONTRACTORS.—DELAWARE AND HUDSON CANAL COMPANY—CONSTRUCTION OF NEW YORK AND CANADA RAILROAD.—Sealed proposals will be received by the undersigned, for the Delaware and Hudson Canal Company, at the Engineer's Office, in Whitehall, until Tuesday, the 16th day of July next, at noon of that day, for the construction of the graduation, masonry, bridging and fencing of about thirty-eight miles of the line of the New York and Canada Railroad, extending from Whitehall, along the west side of Lake Champlain, to Port Henry.

The line will be divided into sections of convenient length, and will be ready for examination after the 6th ult. The maps, profiles, plans and specifications will be ready for examination at the Engineer's Office, in Whitehall, after that date, where all information in regard to the work may be obtained, and where blank proposals will be furnished.

Proposals should be sealed and endorsed "Proposals for N. Y. & C. R. R." and addressed to the undersigned, at Whitehall, Washington Co., N. Y.

The right is reserved to reject any or all proposals that may be received as may be deemed for the interest of the company. Dated Chief Engineer's Office, Albany, June 19th, 1872.

C. W. WENTZ, Chief Engineer.

PHILIP S. MILLER. LENOX SMITH.

CIRCULAR SLIDE VALVE.—TO RAILROAD Managers and other Users of Steam Power.—I will guarantee an addition to the working-power of any locomotive or slide-valve engine of one-third to one-half, at very small cost and no increase of running expenses. Tests desired everywhere. Circulars free.
4t27 J. F. TALLANT, Burlington, Iowa.

ROME, WATERTOWN AND OGDENSBURGH RAILROAD,
PRESIDENT'S OFFICE, 52 WALL ST.,
NEW YORK, June 27, 1872.

ELECTION AND DIVIDEND NOTICE.—AT the recent annual meeting of Stockholders, the following named persons were chosen Directors of this Company for the ensuing year:

W. C. PIERREPONT, JOHN T. DENNY,
MARCELLUS MASSEY, GARDNER COLBY,
C. ZABRISKIE, Jr., JOHN S FARLOW,
MOSES TAYLOR, T. B. CAMP,
SAMUEL SLOANE, S. D. HUNGERFORD,
WM. E. DODGE, THEODORE IRWIN,
WM. M. WHITE,

At a subsequent meeting of the Board, the following officers were duly elected:

MARCELLUS MASSEY, President.
T. H. CAMP, Vice-President.
J. A. LAWYER, Sec'y and Treasurer.

A Semi-Annual Dividend of FOUR PER CENT. will be paid on and after the 15th of July, as usual, at the Mercantile National Bank in this city, and at the Company's office at Watertown, N. Y., to stockholders of record at this date. Transfer books will be closed to day of payment.
2t27 MARCELLUS MASSEY, President.

OFFICE OF ILLINOIS CENTRAL RAILROAD CO.,
NEW YORK, July 2, 1872.

A DIVIDEND OF FIVE PER CENT., free of Government tax, has been declared by this Company, payable on the first day of August next, to the holders of full-paid shares registered at the close of the thirteenth day of July instant, after which, and until the fifth day of August next, the transfer books will be closed.
L. V. F. RANDOLPH, Assistant Treasurer.

Bessemer Steel Rails.

RAILROAD SECURITIES NEGOTIATED.

ENGINEER'S FIELD BOOK,

By C. S. CROSS, Civil Engineer.

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. **Sent free by mail,** upon receipt of the price. For sale at this office. Price $1.50.

JOHN A. GRISWOLD & CO.,

TROY, N. Y.

J. A. GRISWOLD. E. CORNING. E. CORNING, Jr. CHESTER GRISWOLD.

HAND'S IMPROVED DUMPING CART.

PATENTED APRIL 4th, 1871.

THE MOST PERFECT YET INVENTED.

Can be dumped by a single motion of one hand while you hold the horse with the other.

The tail-board being attached to the shafts, lifts of its own accord when the cart is dumped, as seen on the right of the engraving. As soon as the load is dumped all you have to do is to start the horse, and the cart will resume its proper position, as seen in the left of the engraving, hook itself and replace the tail-board, without any assistance of the driver whatever. The shafts are attached to the outside of the body, near the hubs, which gives the horse great control over the cart, and prevents the body from playing from side to side as they do when the shafts are pivoted underneath.

Manufactured and for Sale by **WILLIAM & HENRY HAND,**

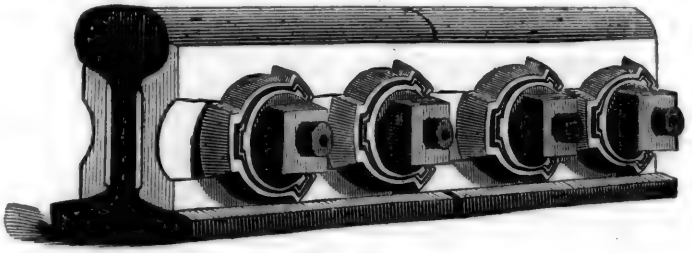
Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

Montreal and Champlain Railway.

From the report of this company to the end of the year 1871 it appears that the revenue under the agreement of the Grand Trunk Co. has amounted to $124,989 81, the largest amount accrued since the arrangement was entered into. The balance against revenue at the end of 1870, viz., $29,631 has been reduced to $14,824, notwithstanding the items which were in suspense at the close of that year, viz., $22,340, have been charged against the account. The company is practically out of debt, and no charges are now being incurred for interest on borrowed money. The joint committee report that full justice has been done to the line and rolling stock; that the increase in the gross revenue in the joint undertakings in 1871 over 1870 was $1,036,194, and that there has been an increase of about $300,000 since 1st January last. The gross receipts of the united undertakings in 1864 were $5,579,824; in 1871 they were $8,327,955; the amount of the Preferred Stock Sinking Fund, $34,600, an asset which will be realized on the completion of the arrangements with the Grand Trunk Co. for the purchase of the stock, and the amount will be divisible among the stockholders.

INVESTMENT SECURITIES.

The Northern Pacific Railroad Company, through its Financial Agents, offers for sale its First Mortgage 7-30 Gold Bonds. They fall due in 30 years, bear 7 3-10 per cent. gold interest, payable semi-annually, are exempt from U. S. tax to the holder, and are secured by a first and only mortgage on

1. The Railroad, its Right of Way, Franchise Rolling Stock, and other Property.

2. Its Traffic or Net Earnings.

3. A Government Grant of Land averaging on completion of the Road about 23,000 acres per mile of track.

The Road follows what is known as the Valley Route to the Pacific, flanked most of the way by an excellent country, and is assured in advance of a vast and profitable traffic which already awaits its completion. The work of construction is steadily and satisfactorily progressing; the settlement of the adjacent country and the building of towns keep pace with the advance of the road; a large body of the Company's lands is already in market, and the proceeds of sales will constitute a Sinking Fund for the redemption of the Company's Bonds, which are convertible at 110 into the Company's Lands at market prices.

Believing that these bonds, both in point of safety and profitableness, constitute such a security as judicious investors can approve, we recommend them to the public. Government bonds and all marketable securities are received in exchange at current quotations without cost to the investor.

JAY COOKE & CO.,

New York, Philadelphia and Washington.

FINANCIAL AGENTS NORTHERN PACIFIC RAILROAD COMPANY.

Railroad Corporations and their Relations to the Public.

It is a never failing expedient with a certain class of demagogues, resorted to for a variety of purposes, to assail those corporations which have been organized to construct and operate railroads, ranking them among the more dangerous and insiduous enemies of our institutions. And especially has it been the fashion to deprecate with much earnestness, the consolidation of railroad companies, even under circumstances which, from business considerations, seem to demand such a course. With much prating, the ideas of these people have become so fixed upon the public mind, as to largely influence the course of railroad expansion and the legislation in reference thereto; in fact, we believe that in the fundamental law of at least one State, the consolidation of "rival" railroads is prohibited.

This is all wrong. The business of building and operating railroads may, like other pursuits, be safely left to the control of purely business considerations. It is a business whose dealings with the public are of a familiar, every-day character. A railroad cannot hide itself from the public, nor can its management escape daily scrutiny and criticism. It is a business dependent in an unusual degree upon the confidence and good will of the public. Railroad corporations are no more likely to become dangerous in any political sense than manufacturing corporations. We have seen our great shipping interest uniting, and forming a Free Trade League, enter upon an active and avowed effort to influence the Legislation of Congress in a manner to promote their affairs. We have seen our great manufacturing corporations pursuing a similar course, and the efforts of the League combatted by them with the most vigorous measures; and yet nobody has seen fit to declare that our political institutions were in any manner or extent endangered thereby. The banks of New York have united in a clearing house, designed for their mutual convenience and protection. Probably, in the hands of bad men, it could be made an instrument of much wrong; the associated banks of New York have undoubtedly exerted a potent influence upon the financial legislation of the country—not ad-

versely, it may be assumed, to their own interests. But what of that? Has anybody felt that his political rights were in danger? Not one. Then why single out railroads and railroad corporations for assault? Why should they be made objects of aspersion and assault? Property is naturally timid. As our railroads increase in value, the less will their managers feel inclined to provoke popular prejudice or excite popular alarm. They will be much more inclined to refrain from meddling in public affairs, than will politicians be inclined to keep their hands off the railroads; and we have no doubt that whatever interest railway officials may seem to take in party politics is not from choice, but grows out of the circumstances in which they find themselves. There should be no more need that the managers of a railway should be conspicuous in political affairs than the directors of a bank or manufacturing corporation; that the fact is otherwise, is the result of the clamor against railway corporations which we have referred to and condemned.

It will be well for our country when the management of our railroads is in fewer and more experienced hands. There is no danger from great corporations. One or a few great corporations, if going wrong, are much more easily contended against, than a number of smaller ones, united by several interests, and exerting an influence upon a portion of the community which large corporations would overlook or could not reach.

In operating a railroad over a long line of communication, extending from one section of the country, it must be apparent to the dullest apprehension that economy, efficiency and safety will be promoted by placing the whole under one direction. For example, what a vast improvement would result from placing railway communication between New York and New Orleans under the control of one corporation. What measure of efficiency would be attained, and what measure of public confidence secured, by the Pacific Railway, if every few hundred miles it passed under a distinct direction. Witness the vast improvement that has been made in our railroad communication with the great West, since, by means of leasing and other expedients, the management of connecting lines of railroad has been practically concentrated. We need not pursue the object further; and conclude with repeating the sentiment, that the building and operation of railroads may be safely left to the considerations which control other business enterprizes.

Texas and Pacific Railroad.

This contemplated railroad, says the San Francisco *Chronicle*, begins at Marshall, Texas, about 300 miles west of New Orleans, and runs through Texas, Mexico, and Arizona, on the line of the thirty-second parallel, terminating at San Diego, in California. It has a land grant of 13,500,000 acres. This road has also a large moneyed subsidy from the State of Texas when it shall be completed to the western line of that State. This road running about 200 miles south of the Atlantic and Pacific road, may, by southern branches, be extended to the City of Mexico; the Mexican branch would be about 800 miles in length, and when completed San Diego would be brought into contact with the trade of the two rich States of Sinaloa and Sonora. This road is authorized to connect at the Colorado, near Fort Yuma, with the Southern Pacific Railroad; thus bringing the Southern and Mexican trade direct to San Francisco over the Southern Pacific road. The Southern Pacific is now being pushed rapidly through the valley of the San Joaquin, is already completed to Visalia, and by September will be at Bakersfield, in Kern County. This point is about 250 miles from the proposed point of junction with the Texas and Pacific road. The Texas and Pacific road is authorized by Congress to mortgage their lands, and it has already issued construction bonds upon the security of the lands. This company has commenced work on the eastern end, and is compelled by its charter to build 100 miles each year, and upon the western end to construct twenty-five miles per annum after this year. The general line of the road is along the thirty-second parallel. This company is under the management of Thomas Scott, of the Pennsylvania Railroad, and he promises to push the matter with the utmost expedition. For 450 miles through Texas the lands are prolific, and will be of great value as soon as they are accommodated by the road. It is safe to predict that this road will be finished in three or four years from this date, and thus open up not only in our State, but in Arizona and New Mexico, an area of territory now almost inaccessible, and make a large reach of it tributary to our State and city, and giving it an independent through line to the Southern States, open at all seasons of the year.

Toledo, Wabash and Western Railway.

The revenues and expenditures of the operating department of this road for the fiscal years 1870 and 1871, compare as follows:

Revenue:	1870.	1871.
From passengers	$1,242,891 95	$1,228,193 41
" freight	3,009,025 68	4,027,722 93
" mails	81,993 75	84,200 04
" express	78,595 88	97,652 12
" miscellaneous	132,133 66	298,897 41
	$4,544,640 92	$5,736,665 91
Expenditures, viz:		
Renewal of iron and superstructure	$450,203 81	$527,249 18
Maintenance of roadway and structures	663,272 10	659,936 71
Maintenance of cars, engines, &c	468,278 54	519,603 61
General expenses, including taxes	1,654,510 05	2,070,038 43
	$3,236,264 50	$3,776,827 93
Net revenue	$1,308,376 42	$1,959,837 98
Balance of income from previous year		478,771 79
Capital stock sold		2,680,000 00
Total		$5,118,609 77
Thus accounted for—		
Construction and equipment		$1,357,571 10
Interest account		1,353,494 08
Discount on capital stock		1,245,097 32
Profit and loss		139,984 56
Balance carried to next year		1,022,462 71
Total, as above		$5,118,609 77

Compare with the previous year, the gross revenue of 1871 shows an increase of $1,192,024 99; with an increase in expenditures of $540,563 43—making the increase in net revenue $651,461 56.

The receipts from all sources, and total disbursements in 1871, were as follows:

RECEIPTS.

Gross revenue for 1871	$5,736,665 91
Proceeds of stock sold	1,434,902 68
Decrease in wood	44,137 05
Road and individuals	16,637 55
Hannibal and Naples R. R. Co	138,000 00
Pullman Palace Car Co.	44,977 50
Total	$7,415,320 69

DISBURSEMENTS.

Operating expenses for 1871		$3,776,827 93
Construction		879,960 27
Equipment		977,610 83
Interest (less coupons unpaid)		1,333,789 00
Interest coupons of previous years		7,185 75
Bills payable		46,043 60
Paid over draft of 1870 at Toledo		379,972 70
Jacksonville depot stock		441 37
Hannibal and Naples R. R. interest account		55,058 44
Pekin Telegraph line		1,006 19
Profit and loss		34,954 52
Assets for the year	$544,069 51	
Less overdrawn at Toledo	121,599 42	
		422,470 09
Total, as above		$7,415,320 69

The company commences the year with the following available assets, viz:

First mortgage bonds G. W. R. R. Co. of 1859	$16,000 00
Redemption fund, Gt. Western 10s	3 040 65
Supplies, materials on hand	213,779 83
Supplies, fuel on hand	65,757 56
Supplies, ties on hand	17,997 64
U. S. post office department	467 00
Hannibal and St. Joseph R. R. Co	419 02
Illinois & Mississippi Telegraph Co.	11,950 00
Jacksonville depot	4,206 85
Quincy R. R. Bridge	3,900 00
South Shore Line	800 00
Buffalo and Erie R. R. Co	567 05
Pullman Palace Car Co.	13,973 32
Decatur and State Line R. R. Co	3,876 88
Red Line Transit Co	579 06
Lake Shore & Mich. South. R. W. Co	10,388 41
Snell, Taylor & Co.	8,041 97
Indianapolis, Cincinnati and Lafayette R. R. Co.	10,634 41
Uncollected passenger earnings	653 77
Uncollected freight earnings	4,766 73
Due from Railroads and individuals	4,951 19
Hannibal Bridge Company	18,870 94
Wabash Equipment Co	179,125 00
Cash on deposit in New York	371,251 96
	$965,999 24
Less cash overdrawn at Toledo	$121,599 42
Bills payable	10,647 00
	132,246 42
Total available assets	$833,752 82
The gross earnings of the road for the current year were	$5,736,665 91
The entire operating expenses including taxes were	3,776,827 93
Balance	$1,959,837 98
The total interest on the bonded debt and preferred stock, including capitalized roadway at Quincy and Hamilton	1,359,120 00
Leaving a net balance of	$600,717 98

Although the net profits of the year were equivalent to four per cent. on the entire common stock of the company, the directors, after a full and candid consideration of the subject, concluded it to be the dictate of sound policy, to omit the payment of a dividend and use the surplus for procuring additional equipment and otherwise promoting the efficiency of the road.

An analysis of the earnings of the present year shows a decrease of $14,698 54 in the passenger earnings, and an increase of $1,018,697 25 in freight and $188,026 28 in mail, express and miscellaneous earnings.

The inconsiderable decrease of passenger earnings is about equally divided between the through and local business, and considering the prevailing depression in this branch of business throughout the whole western country, the results of the year are not discouraging.

The important gain realized in our freight traffic,

is no doubt primarily due to the natural increase of tonnage with each recurring year, still it is obvious that the unusually heavy movement of grain and flour, has more immediately contributed to produce this result, as the following will show:

	1870.		1871.	
Wheat	2,199,031	Bushels.	2,786,948	Bushels.
Corn	5,008,400	"	9,697,632	"
Oats	1,612,759	"	1,995,710	"
Barley and Rye	130,093	"	110,222	"
	8,950,283		14,590,512	"
			8,950,283	"
Increase			5,640 229	"
Flour, 1871			620,556	Barrels.
" 1870			495,120	"
Increase			125,436	"

Making a total movement for the year 1871 (reducing flour to bushels) of 18,053,282 bushels, being an increase of 6,267,409 bushels over the previous year.

In this connection it seems but a simple act of duty to state that, notwithstanding the operations of the year indicate a marked increase in freight earnings, it is painfully apparent that the amount actually realized was, at a moderate calculation, fully two millions of dollars less than it ought and would have been, had our Eastern connections furnished the requisite facilities for receiving and forwarding our freight with reasonable promptitude. While it is difficult to measure the full extent of the losses sustained in consequence of this circumstance, they are partially disclosed in the frequent revocation of orders for freight cars, which often extended to the number of two and three thousand cars in the space of a single week. Indeed, the experience of the year in our freight operations, has been little else than a constant and daily reiteration of blockades, paralyzing shippers, and proving essentially ruinous to the business of our Road. This subject however, is thus referred to with no motive of recrimination or censure, but that the shareholders may clearly and fully understand why, with a traffic pressing upon every division of the Road sufficient to have produced a satisfactory dividend, the Company were rendered wholly and utterly powerless to earn it.

In pursuance of the confirmation of certain leases by the Stockholders of this Company at their meeting held in November, we have acquired the control and management of several newly constructed lines of railway. The primary object in securing the possession of these new Roads, was to attract to our own line a large and increased share of the growing business of new and productive sections of country lying immediately west of us, and secondarily to anticipate rival lines in the occupation of territory naturally tributary to our own Road, and thus prevent the diversion of an important traffic, which if left untrammeled would inevitably seek the advantages of our own shorter and more eligible route.

The leases thus far made include the following Roads, and the conditions of their possession involve an obligation on the part of this Company to pay seven per cent. interest per annum on the bonded debt of each, viz:

The Pekin, Lincoln and Decatur Railroad—Length, 67.2 miles: Bonded Debt (1st mortgage), $1,076,000.

The Hannibal and Naples Railroad, including Pittsfield Branch of 7 miles—Total length, 52 miles; Bonded Debt, 1st mortgage, $675 000; 2d mortgage, $225,000. Total Bonded Debt, $900.000.

The Hannibal and Central Missouri Railroad—70.2 miles; Bonded Debt, 1st mort. $1,100,000; 2d mortgage, $250,000. Total Bonded Debt, $1,350,000.

The Indiana Division of the Lafayette, Muncie and Bloomington Railroad—Length, 36.9 miles; Bonded Debt, 1st mortgage, $600,000; and the Lafayette, Bloomington and Mississippi Railway—Length, 80.3 miles; Bonded Debt, 1st mortgage, $1,300,000. Total Bonded Debt, $1,966,000.

The Camp Point and Quincy Division of the Chicago, Burlington and Quincy Railroad (by joint occupation)—Length, 22 miles; with obligations to pay ten per cent. on a valuation of $400,000.

Total Length of Leased Roads..... 328.6 miles.
Total Bonded Debt of the same.... $5,692,000.

The whole number of miles of railway owned and leased by this company, are as follows:

Owned:		
Ohio division	75.5	miles.
Indiana "	166.1	"
Illinois "	210	"
Keokuk "	41.2	"
St. Louis "	109	"
Naples "	4	"
	605.8	Miles.
Leased:		
Pekin and Decatur	67.2	miles.
Hannibal and Naples	52	"
Hannibal and C. M.	70.2	"
Lafayette & Bloomington	117.2	"
Camp Point and Quincy	22	"
	328.6	Miles.
Total	934.4	

The Company has added to its equipment during the year fifty-two first class locomotive engines, and about six hundred cars of various classes, at a cost of $957,605 87.

At the close of the year, the equipment stood as follows:

Locomotive Engines	182
Passenger, Mail and Baggage Cars	92
Freight Cars, all classes	3,400

Besides the large amount of manufacturing and general repairs done at the shop of the Company, there were built two Pullman drawing-room coaches for the Pullman Co., and one hundred and seventy-five box cars for the Lake Shore and Michigan Southern R. W. Co.

An arrangement was recently concluded whereby we are to secure a further increase to our rolling stock by an addition of seven locomotives and about eight hundred freight and other cars, which are to be delivered upon the road during the early part of 1872. This large accession to our equipment is to be obtained upon advantageous terms for our company, and will supply a deficiency that has hitherto seriously crippled the operations of the Road.

The renewals and repairs of the track generally have been prosecuted with more than ordinary care and thoroughness during the present year, and the improvement made have been much more extensive than have usually been made in previous years. The renewal of iron especially has been large, exceeding ten thousand tons of new, and six thousand tons of repaired iron.

The following comprise some of the improvements made:

New iron put into the track	111	Miles.
Iron taken out, repaired and replaced	64	"
New steel put into the track	9	"
New side tracks	6	"
New ties	197,677	"

Early in the season a substantial iron bridge, of 677 feet in length, was erected on the Maumee River at Defiance, and in the autumn, a like structure, of 511 feet in length, was erected over Wild Cat River, west of Lafayette, at a total cost of $83,300.

The aggregate capital of the Company remains unchanged, to wit, $15,000,000 of general stock, $1,000,000 preferred stock, and $17,700.000 of the various classes of bonds heretofore recapitulated. The only change made in the status of the bonded debt is the redemption and cancellation of $683,000 ten per cent. bonds, issued by the Great Western R. R. Co., and the substitution therefor of a corresponding amount of seven per cent. bonds, issued by that Company and held in trust for that purpose, leaving outstanding but $1,000 of the issue of ten per cent. bonds for which a like amount of seven per cent. bonds are held in trust for their payment or substitution.

TREASURER'S GENERAL BALANCE, DEC. 31, 1871.

Road bed and equipment	$33,683,000 00

	$96,414,276	$126,123,210	$139,908,902

The imports of dry goods at New York for the year ending with June, were:

	1870-71.	1871-72.
Manufactures of wool...	$37,596,727	$42,928,912
" cotton..	24,430,662	27,533 545
" silk....	35,836,132	36,971,722
" flax ...	16,781,367	19 572 647
Miscellaneous dry goods	11,478,322	12,897,076
Total imports	$126,123,210	$139,903,902

The imports of foreign dry goods at New York for each fiscal year since 1850 have been as follows:

Year.	Value.
1850-1	$64,613,747
1851-2	57,221,062
1852-3	79,192,513
1853 4	92,389,627
1854-5	62,918,443
1855 6	85,898,690
1856-7	92,669,088
1857-8	67,317,736
1858-9	93,549,083
1859-60	107,843,205
1860-1	83,310,345
1861-2	88,155,720
1862-3	61,963,037
1863-4	83 234,966
1864-5	49,853,939
1865-6	137,055,834
1866-7	103,407,278
1867-8	77,254,182
1868 9	92,499,842
1869-70	96,414,276
1870-1	126,123,210
1871-2	139,903,902

All the above figures represent only the foreign cost of the goods in gold, freight and duty not included.

Short Platforms.

The Court of Error was occupied on 17th inst. with one of those cases which are so frequent, and have been so often before the Courts, arising out of accidents resulting in injuries to passengers in getting out of trains. In this case the Great Eastern train, at Edmonton, had drawn up in the dark, and the name of the station—Edmonton—was called out. The carriage in which Mr. Gill, the plaintiff, was travelling stood opposite a part of the line where the platform was not continued, and the plaintiff on getting out, having nothing to put his foot upon, fell and was injured. The jury gave him a verdict, finding as a fact that there was no negligence on his part, and awarding 10*l.* damages. The Judge who tried the case, however (Mr. Justice Blackburn), reserved the question of liability as one of law, and the Court of Queen's Bench (Mr. Justice Blackburn, Mr. Justice Mellor, and Mr. Justice Lush) held that there was none. This was on the authority of the case of "Bridges *v.* the Great Northern," where, out of seven Judges, four held that, under similar circumstances, there was what is called contributory negligence—that is, in plain English, that it was the plaintiff's own fault. But three Judges held otherwise, the Lord Chief Baron, Mr. Justice Willes, and Mr. Justice Keating, and there had been an earlier case against the Bristol and Exeter, in which the Court of Error had held unanimously in a similar case in favor of the plaintiff. In a subsequent case last term, a case of "Cockell *v.* the South Eastern," this Court, then constituted by the Lord Chief Justice, Mr. Justice Blackburn, Mr. Justice Mellor, Baron Pigott, and Baron Cleasby, followed the authority of that case, which was in substance the same as the present, and was therefore relied on by the plaintiff as conclusive, and so considered by the Court.

The Lord Chief Baron said, in giving judgment, that this case might be distinguished from Bridges' case, and was the same as Cockell's case. In Bridges' case the majority of the Judges had rested their decision partly on the ground of negligence in the plaintiff, though how they made that a question of law he did not know. But here the jury had expressly negatived it. The case, therefore, was clear of any negligence on the plaintiff's part, and therefore, free from the authority of Bridges' case, and then it came clearly within the principle of Cockell's, for there was evidence of negligence on the part of the company's servants in drawing up the train as they had done, apparently inviting the passengers to alight at a place where it was unsafe to do so, and, therefore, according to Cockell's case, the latest case in this Court, the plaintiff was clearly entitled to recover.

Baron Martin concurred, though of opinion that the last case was stronger against the plaintiff than this. There was, it appeared, a difference of opinion among the Judges on the subject, and he did not know how it was to be settled.

Mr. Justice Willes concurred in the judgment. It is, he said, clearly the duty of the carrier to abstain from exposing passengers to unusual danger, and it is particularly his duty to give passengers the proper opportunity of alighting with safety at their destination, and that involves this—that the company's servants are not to mislead them into imagining that they may alight with safety at a spot which is unsafe for the purpose. The jury here was justified in concluding that the plaintiff did not receive the injury by reason of any fault on his own part, but, through the fault of the company's servants in putting him in a position in which he might reasonably suppose he was to get out, but where, in fact, it was unsafe for him to get out.

Mr. Justice Byles also concurred. The case of "Cockell against the South Eastern," he said, was precisely in point, and decided that drawing up a train at a spot without light, and where it was unsafe to get out, was evidence of negligence which would support a verdict against the company in the absence of contributory negligence. Mr. Justice Keating and Mr. Justice Brett also concurred. The case came clearly within the

principle of Cockell's case; and as to Bridges', he had the greatest difficulty in understanding it, except in peculiar and exceptional circumstances.

Judgment for the plaintiff, reversing the judgment of the Queen's Bench.—*London Railway Times, June* 22.

Illinois Central Railroad.

The statement of this Company for the month of June, 1872, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	2,142.78 for	$18,848 06
Acres Inter't Fund Lands Sold	30.85 for	154 25
Acres Free Lands Sold	160.00 for	2,504 00
Total sales during the m'th of June, 1872	2,333.63 for	$21,506 31
To which add Town Lot Sales	for	20 00
Total of all	2,333.63 for	$21,526 31
Cash collected in June, 1872		$57,252 20

Wellington, Grey and Bruce Railway.

At the recent annual meeting of the stockholders of this company, in Hamilton, Ca., the Secretary, Mr. Wm. McCullough, read the report of the directors for the past year, as follows:—

The directors have now the pleasure of submitting their fifth annual report. At the date of the last report the line was in operation from Guelph to Alma, a distance of 23¼ miles. Since then it has been opened from Alma to Clifford, a distance of 32 miles, making the line now open 55¼ miles, up to which point it has been accepted, equipped and operated by the Great Western Company, according to the agreement between that company and the Wellington, Grey & Bruce Company.

The conditions of the agreement between the company and the County of Bruce bind the company to finish the line to Paisely by the 7th June, 1872, and to Southampton by 7th December, 1872. The directors have pleasure in reporting that the contractors are proceeding so satisfactorily with the works that these conditions will be complied with in ample time.

The directors have to inform you that the Government of Ontario, at its last session, granted $2,000 per mile out of the "Railway Aid Fund," as a bonus for the line from Harriston to Southampton, a distance of 53¼ miles, but with the proviso that the county of Bruce should be allowed to retain out of the $250,000 voted as a bonus by that county, the sum of $43,000; thus making the amount of the Government Subsidy to the main line equivalent to $64,000.

The operation of the line has been entirely satisfactory—the traffic having shown a steady increase. The interest on the bonds has been promptly met, and the fund laid aside by the Great Western Railway Company for acquiring the bonds of this company under the agreement, amounted in the half year ending 31st January, 1871, to $7,609 16; in the last year year ending 31st July, 1871, to $4,962 38; and for the half year ending 31st January, 1872, to $7,098 96, making a total of £4,000 of bonds acquired by the Great Western Company up to the 31st January, 1872.

Since the last annual meeting arrangements have been completed for the construction of the South Bruce or Southern Extension branches from the main line at the village of Palmerston, 42¼ miles from Guelph, and will extend to Kincardine on Lake Huron, a distance of 67 miles. The bonuses voted for this extension amount to $255,000. Therefore the amount which the company has available for building to Kincardine is as follows:—

Bonuses from municipalities	$255,000
Bonds issued, sanctioned by the Great Western R. Co. at $10,000 per mile	670,000
Total	$925,000

Or nearly $14,000 per mile.

Surveys were made and tenders were asked for the building of the line to Listowel—9 miles—and on the 17th of December, 1871, the first sod was turned at Listowel, Messrs. D. D. Hay & Co. having received the contract. Tenders were also asked for the construction of a further length of 30 miles to Wingham, and in February last, the contract was awarded to W. Hendrie, Esq., of Hamilton. A supply of iron sufficient to cover the whole distance above named, and the rails will be delivered in the fall of this year. The directors hope that the line can be opened for the traffic of this fine district before the close of the present year, which will be a year in advance of the time required by the agreement with the municipalities.

Columbus and Hocking Valley Railroad.

At the regular monthly meeting of the Directors, held yesterday, the semi-annual exhibit of the affairs of the company was presented, showing a highly satisfactory condition. The past, present and future of the road were fully and freely discussed—and after a thorough examination into all departments of the road, the Directors concluded unanimously to announce to the stockholders that they feel fully justified in placing the road upon a regular ten per cent. cash dividend paying basis, and saying that the road would, from its net earnings, hereafter maintain that dividend; would pay the sinking fund required to be annually set aside by the terms of the mortgage bonds, and would have a large surplus to be applied in yearly increasing the equipment of the road, as it is plainly evident will be required by the regular and constant increase of business. Having concluded that the payment of cash dividends should not be commenced, unless they were certain that they would be hereafter regularly made each six months, and that the amount of the dividend should be as nearly as possible the same each year, they ordered the first regular cash dividend to be five per cent. for the past six months, and feel assured that each January and July will bring the same return to the stockholders.

We are happy to announce the above, and congratulate our people on the assured success of this our most important home enterprise, and feel no hesitation in saying that in a great measure it is due to the energy, economy and ability of the officers and directors, who, being so largely interested as stockholders, will look after the interests of all the stockholders as they care for their own property. The stock is now quoted at par, and it requires no peculiar foresight, in our opinion, to see that it will soon be at such premium as the certainty of ten per cent. cash, with an occasional stock dividend, will warrant. The Hocking Valley road having now passed into line as a finished, successful enterprise, let us be up and doing in putting on the right basis the projected Columbus and Toledo Railroad; and we feel authorized in saying that the same energy and ability put forth in that, as was given the Hocking Valley, will make the Columbus and Toledo Railroad an assured success, and place our city forward in her present onward march toward the one hundred thousand population, which we hope soon to see. —*Ohio State Journal*, July 11.

TWENTY PER CENT. INVESTMENT.

THE AMERICAN BRIDGE COMPANY,

OF CHICAGO, ILL.

L. B. BOOMER, of Chicago, President.

(ORGANIZED AUGUST 1, 1870.

Authorized Capital Stock, - - - $1,000,000.

The whole amount of the authorized Capital Stock of this Company not having been issued, the balance thereof will be issued to subscribers at par, payments for same to be made in four instalments of 25 per cent. each, viz:

25 per cent.	- - July	15, 1872.
25 "	- - August	1, 1872.
25 "	- - September	1, 1872.
25 "	- - October	1, 1872.

The Subscription Books now open at the office of the undersigned will be closed as soon as the new stock is fully subscribed.

The total amount of stock issued at this time is **$414,700**, and on this basis the Company shows a present surplus of **$136,280 97**, and is now doing a flourishing business. One thousand men are constantly employed in their extensive works, and they now have on hand **$1,250,000** of work for various Railroads in the United States, among which may be mentioned the

CHICAGO, R. I. & PACIFIC,
CHICAGO & N. WESTERN,
MICH. CENTRAL,
MISSOURI PACIFIC,
ATLANTIC & PACIFIC, &c.

and the Company is now offered work to the amount of over **$6,000,000**, including some of the largest bridges ever built in this country, to accept of which and further business necessitates a larger working capital, as immense amounts of material have to be kept constantly on hand, and the Company are frequently obliged to receive in part payment for their work Railroad and other Bonds, which are perfectly good securities, but not always immediately marketable.

The career of the AMERICAN BRIDGE COMPANY, though brief, has already fully demonstrated the profitableness of the enterprise. The Company has constructed, since its organization and up to the 31st of December, 1871, a total of 38,137 feet of bridges, 18 turning tables, and 16 iron roofs, and pneumatic and screw pile substructures, costing **$3,200,000**, and have facilities for the construction of pneumatic piles unsurpassed by any company in the country, and a capacity for the construction of at least 150 feet of Bridges for every working day in the year.

The Iron Railroad and Highway Bridge at Leavenworth, of three spans of 340 feet each, and the Union Pacific Bridge across the Missouri River, of eleven spans of 250 feet each, were constructed by this Company.

The net profit arising from this business, as shown by the books of the Company, up to the 31st March, 1872, was the sum of **$373,482 14**, or at the rate of **$224,089 28** *per annum*, being over **50** *per cent.* upon the capital stock then outstanding. With the proposed new structures, machinery, &c., the Company will have much greater capacity, and the proceeds of the increased issue of stock will enable them to buy material for cash, thereby making a saving of from **$50,000** to **$75,000** per year.

The Company can undoubtedly, on above basis, make dividends of from **30** to **35** *per cent. per annum* on the full amount of capital, **$1,000,000**, with a fair prospect of a considerable increase.

The undersigned are prepared to give to those inquiring the fullest details and entire satisfaction regarding the reliability of the Company's statements, and the unquestioned integrity and ability of its officers.

We confidently commend to capitalists the above as an investment worthy their attention.

Chesapeake and Ohio Railroad.

The western end of the Chesapeake and Ohio Railroad is doing a fine passenger business. Five thousand three hundred passengers were carried during the month of June. This is a great business for a road that has, we may say, no terminus. It traverses a country which has never had a railroad nearer to it than a hundred miles distant. The people, however, take to it as a duck to water, and its business is increasing in a manner quite remarkable in the history of railroads. When the line is completed all the way, and the through railway travel sets in, we shall see an increase of transportation more than realizing the promises that have been made. The eastern division has been extended thirteen miles beyond the White Sulphur Springs, and is being continued as fast as possible. The western division is completed to the Falls of the Kanawha. At that point there is very heavy work, and the work of equipment is retarded. There is a large amount of rails there ready for going ahead the moment the track is ready. It is still confidently expected that trains will run from the Ohio to Richmond in October next.—*Richmond Dispatch.*

Pawtuxet Valley Railroad.

The Pawtuxet Valley Railroad Company was organized on the 10th inst. by the election of Henry Howard, William Goddard, William A. Howard, Christopher Lippitt and Charles Jackson as a Board of Directors. At a subsequent meeting of the Board, Henry Howard was chosen President, George W. Prentice, Clerk, and H. L. Greene, Treasurer. It seems probable now that this long delayed but most needed road will soon be built. A prominent railroad expert from New York was here a few days since and remarked, after a careful examination of the subject, that there was not a section of country in the United States where a road of the same length would pay so well. It is, in fact, one continuous village for the distance it is contemplated to build the road at present. Liberal subscriptions have been made to the stock, and if owners of land along the line are alive to their interests, the trains will be soon running in the prosperous villages of the Pawtuxet.—*Providence Journal.*

☞ The LaGrange (Ga.) *Reporter* gives the following as the status of the North and South Railroad: The company was organized on the 11th of August last—less than eleven months ago. Over forty miles of heavy road is graded, the iron laid on six miles, with engine and train running, material in hand to complete fifteen more. Seventy three miles have been located, of which all not finished are under contract and being pushed to an early completion.

☞ The Boston *Journal* says: now that the building of the railroad leading from Hudson to Lee is secured, there is an increased desire and demand for its connection with the Lee and New Haven road, and its continuance on through East Lee, West Becket and Otis, and thence on to New Haven.

☞ The engineers of the Piedmont and Potomac Railway Company have completed the survey of the Aldie division. This completes the location of the road to the point at which it is to cross the Blue Ridge, near Thornton's Gap, in Rappahannock county, Virginia. The location of the road beyond the Blue Ridge is still in progress.

☞ It is now stated that the Toledo and Ann Arbor railroad north to Owosso, will be completed as soon as that portion of the line between Ann Arbor and Toledo is finished—certainly during the ensuing fall.

New York and Chicago Air Line Railroad.

The Norwalk (O.) *Reflector* says the surveying party engaged in running the line reached that town a few days since. The distance from Chicago to Norwalk is 268 miles, or some 33 miles shorter than the Lake Shore and Michigan Southern. The line as surveyed runs south of Fremont and Clyde, and touches the Lake Shore road at Bellevue, following near it to Monroeville, crossing the Huron river 100 feet south of the present railroad bridge, and as near the bridge over the east branch just west of town, when it diverges more to the southeast. Thence the route will be run on a air-line to Wellington, passing through a corner of Townsend and Hartland, and across the whole width of Clarksfield township.

Levis and Kennebec Railway.

The report of this company, which was presented at the annual meeting held on the 1st inst., states that the work of grading was commenced in June 1871; and was continued by the contractor, Mr. Hulbert, aided by several hundreds of men. The change from wooden to iron rails, as originally projected, necessitated an increase of capital to $3,000,000. The line is regarded as a continuation of the North Shore Line, and a link in the Canada Pacific Railway. The Engineer states that the line has been graded 80 miles ready for the ties.

☞ The following is the list of the officers of the Memphis and Charleston Railroad, under its sale to the Southern Railway Security Company: Joseph Jacques, General Manager; Wm. J. Ross, Superintendent Western division; C. S. Williams, Superintendent Eastern division; Harry P. Ryan, Master of Transportation; A. A. Barnes General freight and Ticket Agent; C. L. Anderson, Auditor.

☞ The Flint (Mich.) *Globe* says that as work on the Flint and Pere Marquette Railroad approaches completion preparation is making to begin on the Cass River Road, and, will probably commence next week. In a very few weeks, work will be resumed on the main line of the F. and P. M. R. R. beyond Reed City, whence it will be pushed to the margin of Lake Michigan at an early date.

☞ The Chicago and Northwestern Railroad is completed and in running order to Wonewoc, and two trains daily each way will be run over the 200 miles of road between Chicago and Wonewoc, and another between Harvard and Baraboo, in such a way as to give the greatest possible accommodation all along the line.

☞ The Painesville and Youngstown (Ohio) Narrow Gauge Railroad was formally opened for business on the 5th inst., as far as Chardon, Geauga County. Its working is all that could be desired. One thousand passengers were carried over the road on the first day that it opened.

☞ Charles M. Bissel has been appointed Superintendent of the New York and Harlem Railroad, vice Isaac C. Buckhout resigned.

☞ A new road from Cincinnati to Terre Haute, known as the 'Coal Road," will be opened on the 6th of August.

☞ Ground on the Athol and Enfield Railroad extension was broken on the 11th inst.

Safe and Profitable!

THE

CANADA SOUTHERN

First Mortgage Sinking Fund 30 Years

7 PER CT. GOLD BONDS

AT

90 AND ACCRUED INTEREST.

The Road runs from Buffalo to the Detroit River, and is the Eastern link in the new AIR LINE FROM BUFFALO TO CHICAGO, and has been under construction for about two years past by railroad men who have seen the necessity for a STEEL RAIL, LOW GRADE, SHORT ROUTE between the great railroad systems which diverge from Chicago, Toledo and Buffalo.

Among the builders of the road, by whose cash subscriptions 220 miles (out of 290) have already been graded, bridged and made ready for the superstructure, a large part of the steel rails bought, all of the materials for the stations and a part of the equipment purchased, are:

MILTON COURTRIGHT, JOHN F. TRACY, DAVID DOWS, WM. L. SCOTT, HENRY H. FARNHAM, R. A. FORSYTH, HENRY PORTER, JOHN M. BURKE, M. L. SYKES, Jr., B. F. ALLEN, all directors, either in the Chicago and North West or the Chicago, Rock Island and Pacific; GEO. OPDYKE of the Midland Road; JOHN B. ALLEN, SIDNEY DILLON, DANIEL DREW, J. S. CASEMENT, J. & J. CASEY, O. S. CHAPMAN, JOHN ROSS, DAVID STEWART, and F. H. WINSTON.

THE ROAD will be

33 Miles Shorter than any other Road,

either BUILT or in contemplation between Buffalo and Chicago, and will also shorten the distance between Toledo and Buffalo 23 miles.

THE MAXIMUM GRADE on the entire line does not exceed FIFTEEN FEET to the mile—and Ninety six per cent. of the road IS STRAIGHT.

THE ROAD WILL BE COMPLETED and in running order on or before Dec. 31 of this year.

The principal and interest of the bonds are payable either in New York, London, or Frankfort.

We confidently recommend the bonds to all classes of investors.

LEONARD, SHELDON & FOSTER,
No. 10 Wall-St.

NOTICE.

HAVING BECOME ASSOCIATED WITH Messrs. LEONARD, SHELDON & FOSTER in the Agency of the CANADA SOUTHERN RAILWAY CO., we offer the above named Bonds for sale.

After a thorough investigation, we recommend them to our friends and customers as a SURE AND RELIABLE INVESTMENT.

Pamphlets and all information furnished on application.

Winslow, Lanier & Co.,

27 PINE ST.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, July 20, 1872.

Stock Exchange and Money Market.

The Money supply has been gaining on the requirements of borrowers, particularly for speculative use, and rates have shown less firmness, within the range of from 3@5 generally 4 per cent. on call, and 5½@7 per cent, per annum in the discount form, on the choicer grades of mercantile paper, which were not offered with much freedom, and which were in more favor with lenders. The dullness at the Stock Exchange, partly owing to the oppressively warm weather, interfered with the profitable employment of balances in a temporary form. The rather more buoyant temper of the Gold market tended to stimulate the inquiry for aid, from operators at the Gold Exchange. The outflow of funds to the interior was on a restricted scale. The city bank movement was rather against the maintenance of the cash reserves, though the changes in the averages, of the leading items, were not very important, the increase in the deposit line, and the legal tender board having been the most noticeable features. The U. S. Sub-Treasury office again last week reduced its coin balance about 3⅛ millions and its currency nearly half a million. The city banks reduced their loan and discount average about ⅜ths of a million during the week, and their outstanding circulation a trifle. The U. S. Sub-Treasury held a currency balance on Wednesday morning of $8,163,933, and a coin reserve of $38,952,205.

The city banks, in their latest return, show a gain of $932,100 of legal tender notes, with a decrease of $562,100 of specie, and an increase of $3,732,100 of deposits, also a reduction of $304,000 in their loan and discount averages, and of $42,000 to their item of circulation. The city bank exchanges, last week, averaged 82, and thus far, this week, about 81⅞ millions daily. The banks now hold $13,420,500 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $28,228,400, against $19,758,280 same time last year. The city bank deposits are now $245,508,000 against $257,532,294, week ending July 15, 1871. The legal tender reserve amounts to $53,440,700, against $70.574,876 same time last year. The circulation now stands at $27,466,400 against $30,380,961 same time last year. The loans are now $296,597 800 against $299,078,577 at this date last year.

The coin reserve of the city banks is now about 28¼ millions as against about 28⅞ millions on the 6th of January; the legal tender reserve is about 53½ millions against $46,616,000 on the statement of February 10th.

Government revenues have been on a moderate scale, since our last. The excises yielded within the week about 3¼ millions, and during the fiscal year ending with June 30, 1872, $131,307,214, against $144,967,066 the preceding fiscal year. The customs at the port of New York last week were $1,622 356; at the outports, equal to about $525,000 all in coin, or coin certificates.

The specie exports from San Francisco, Jan. 1, to July 6, were $14,406,441, against $8,676 201 same time in 1871.

Under the Treasury programme for July, Government proposes to sell Gold, as follows: Thursday, July 25, $1,000,000. And to buy in Five-Twenties, as follows: Wednesday July 24, $1,000,000; Wednesday July 31, $1,000,000.

There has been a more active business reported in Gold, chiefly on speculative account, and the price has been on the advance. The customs drain has been comparatively limited. The specie outflow to foreign ports, however, has been on an enlarged scale, serving to strengthen the confidence of operators for a rise.

On Wednesday, the specie exports were $568,224 of Gold, and $2,162,323 of silver.

The range of the price during the week has been from 113¾@114¾ and the closing quotation on Wednesday was 114⅝@114¾ against 114 the preceding Wednesday. The specie outflow last week, was $4,882,534. The Gold Exchange Bank clearances have averaged about 23⅞ millions per day during the week.

The customs demand for Gold last week, averaged $270,392 a day; thus far, this week, it has averaged $380,000 a day, or equal to a weekly aggregate of $2,280,000. The arrivals of

specie from Europe, Havana and other foreign ports last week were $1,977,708, (including $1,978,086 of silver, by the *City of Mexico*, from Havana) and since Jan. 1, 1872, $2,738,255, against $3,233,500 same time in 1871. The total customs revenue of the Government, in coin, at this port, since January 1, has been $79,364,531 against $81,745,053 during the same time in 1871.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1872, $49,940,839, against $56,513,369 during the same time in 1871.

The export drain of specie was $4,882,534 last week, against $1,962,814 same week preceding year. The shipments since January 1, 1872, have been $44,627,771 against $49,004,621 during the same portion of 1871.

Foreign Exchange has been in more demand and quoted firmer, on a restricted offering of prime bills. Bankers' sixty day bills on London closed on Wednesday at 109¾@110; sight bills on London, 110⅜@110⅝.

The produce exports from this port, week ending with July 16, were to the currency value of $4,913,437.

Government securities have been offered very sparingly, especially in round sums, thus checking business, though the demand has been good, mainly from investment buyers. Prices have been quoted stronger, closing buoyantly.

On Wednesday Government bought in $1,000,000 of Five-Twenties at 114 39@114 43¾, out of an aggregate offering of $2,755,550.

U. S. sixes of 1881 at the close on Wednesday of the current week were quoted at 117⅞@118; U. S. Five-Twenties of 1862, (other than the bonds called in) 115¾@116; U. S. Five-Twenties of 1864 at 115¾@116; U. S. Five-Twenties of 1865, 116¼@116⅜; U. S. Five-Twenties of 1865 consolidated, 114¾@114⅞; U. S. Five Twenties of 1867, 115⅜@115¾; U. S. Five-Twenties of 1868, 115⅛@115¼; U. S. Ten-forties at 112⅞@113; U. S. Fives of 1881 (Funding Loan) 113⅝@113⅞; Six per cent. currency bonds, 114⅜@114¾.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	July 2.	July 10.	July 17.
Consols	92⅝	92⅝	92½
U. S. 5-20's of 1862..	91	91⅛	91⅛

" 1867	92	92	91⅝
" 10-40s	89¾	90	90¼
New Fives of 1881...	90¼	90¼	89¼@⅜
Erie..	45	43½	42

State bonds have been rather more sought after, but at irregular prices.

Railway Mortgage Loans have been in fair request, chiefly for investment purposes, and as the more popular of the older issues have been scarce, prices have favored sellers. Central Pacific Sixes have been in good demand at 102¼@102½ Chesapeake and Ohio have been more inquired for at 94 per cent. and accrued interest.

Messrs. Jay Cooke & Co. are recommending to investors the 7-30 Gold Bonds of the Northern Pacific Railroad Company, which are secured by property and franchises of the road, including a land grant of 23,000 acres to each mile of track. Already great progress has been made in construction on the eastern end of the line, and work is now being pushed on the western end. The Bonds are exempt from United States tax, and both interest and principal are payable in Gold. The present selling price is par and accrued interest in currency. We are informed that the sales are larger this month than ever before; and that the Coupons are re-invested in the Bonds—showing the confidence of holders.

Railway and Miscellaneous share property has been in quite moderate speculative demand as a rule, and values have been variable and without buoyancy, though the later dealings showed a rather more confident temper.

The Metal trade has been generally moderate. Ingot Copper has been very quiet and quoted weaker on the basis of 33c.; sales, 100,000 lbs. Scotch Pig Iron has been quoted higher, and offered less freely, holders storing supplies with more confidence. The demand has been fair. Sales have been reported since our last of 400 tons Glengarnock, at $50, subsequently held at $51@$52, with Eglinton, quoted at $48@50. American Pig-iron has been held with confidence, on the basis of $52@$53 for No. 1, but has been without activity. Iron Rails have been more sought after, with sales reported of 2,000 tons English on private terms, the ruling quotations having been $72@75 gold, and for American, $84@$87 50, currency. Wrought Scrap Iron has been more freely dealt in and quoted firm; 1,700 tons sold to arrive on private terms. Lead has been quoted about steady as to price, but has been without any important movement. Of Regulus Antimony, 85 casks were sold at 14½c.@15½c., gold, per lb. Spelter and Zinc dull at old rates. Pig Tin has been quiet, with English quoted at 36c., and Straits at 36½c., gold, for prompt delivery, and the latter at 34½c., for forward delivery. Tin Plates have been in fair demand and stronger in price on reduced offerings; sales, 2,000 boxes I. C. Coke, 14x20, for September delivery, on private terms; 700 boxes Coke Terne, for August delivery, at $10 75@$11, and 250 boxes Charcoal Terne at $11 50 gold.

Business in the leading kinds of domestic produce has been up to a fair average for the season, but at irregular prices. Flour, Wheat, Corn, Oats, Cheese, and Bacon closed more firmly. Rye, Lard, Butter, Petroleum, Hay, Hides, and Wool less buoyantly. Middling upland cotton again declined and closed on Wednesday at 23¾ cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,666,188 bales, against 3,910,667 bales same time in the preceding year; exports 1,912,663 bales against 3 080,578 bales in the previous year; stock at the ports at latest dates, 134,362 bales against 182,454, bales same date 1871.

At the Live Stock Markets, Beeves have been in moderate request at 8@13 cts.; Veals in good demand at 3½@9 cts.; Sheep quiet at 4¾@7¼; Lambs 7½@12½ cts.; Swine 4⅝@4⅞ cts. per lb., all live weight. The week's receipt were 7,744 Beeves 2,342 Veal Calves, 21,704 Sheep and Lambs; and 31,257 Swine.

Foreign goods have been moderately sought after, as a rule. Coffee and Sugars have been quoted cheaper. The week's imports of foreign goods reached the amount of $6,565,469 including $1,723,559 of dry goods.

Ocean freights have been more active and rates have been again quoted stronger, though toward the close, the average supply of tonnage was against a free outward movement.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Georgia 7s, 88; N. Y. State 7s, B. L., reg., 106½; South Carolina 6s, 1888, 33; do. 6s, old, 56; do. 6s, new, Jan. and July, 29; do. April and Oct., 27; Arkansas 7s, issued to Central R. HARVEY FISK. A. S. HATCH.

OFFICE OF FISK & HATCH,
No. 5 Nassau Street.

The First Mortgage Six Per Cent. Gold Bonds of the Chesapeake and Ohio Railroad Company may be bought and held with the fullest confidence as a perfectly safe and reliable investment.

They are amply secured upon one of the most valuable and important East and West Trunk Lines of Railway in the United States, and are the obligations of a powerful and responsible corporation of the highest standing and credit.

Holders of Government Bonds and other high-priced securities may realize an important difference by an exchange for these Bonds, without any hesitation or apprehension as to the equal security of their investment. Full information may be obtained at our office or by mail.

FISK & HATCH, Bankers.

☞ The Philadelphia *Ledger* of 15th inst., reports the net anthracite coal tonnage for the week ending on the 6th inst., from all sources, at 315,451 tons, and for the year 9,355,778 tons, against 4,444,404 tons to the same date last year, being an increase in the tonnage of anthracite coal of 4,511,374 tons. The production of bituminous coal for the week was 52,934 tons, and for the year 1,221,751 tons, against 1,110,032 tons to the corresponding time last year—an increase of 111,719 tons. The total production of all kinds of coal for the week was 368,387 tons, and for the year 10,576,529 tons, against 5,954,436 tons to corresponding time last year, showing an increase of 4,622,093 tons.

☞ The machinery of one of the oldest establishments for manufacturing Railroad Spikes and Joints is offered for sale, and advertised in our columns. The goods made by this concern have always stood high in the market, and commanded the best prices on account of quality and workmanship. The machinery by which this was accomplished is for sale, and offers a rare opportunity for buying good machinery at low figures. Three Burden Spike Machines we notice in the list. It is not often that a Burden Spike Machine can be purchased. We are informed that this company has been very successful and profitable.

☞ The earnings of the Central Pacific Railroad Company for the month of June, 1872, were $1,222,140; for the month of June, 1871, $795,176—increase this year over 1871, $426,964. Earnings first six months, 1872, $5,592,483; earnings first six months, 1871, $4,044,882—increase this year over 1871, $1,547,601.

☞ Ground was broken on the 9th inst., for the Lee and Hudson Railroad, in West Stockbridge, half a mile east of that village.

THE

St. Joseph & Denver City

RAILROAD COMPANY'S

First Mortgage Bonds

are being absorbed by an increasing demand for them.

Besides being the obligation of a wealthy corporation, composed of men of experience and high-toned commercial integrity, they are secured by a first mortgage on the road, revenues, land grant, franchise and equipments, combined in one mortgage, and are readily negotiable both in the markets of this country and Europe.

A liberal sinking fund provided in the mortgage deed must advance the price upon the closing of the loan. Principal and interest payable in GOLD. Interest at eight (8 p. c.) per cent. per annum, payable, semi-annually, free of tax. Principal in thirty years. Denominations, $1,000, $500 and $100, Coupons or Registered.

Price 97½ and accrued interest in currency, from February 15, 1872.

Maps, circulars, documents and information furnished.

Trustees, Farmers' Loan and Trust Company of New York.

The diminished quantity of these Bonds for sale, and the increased demand absorbing them, warrant the belief they will soon be sought for at an advance considerably above the present subscription price at which they can now be had through the principal Banks and Bankers throughout the country, and from the undersigned, who unhesitatingly recommend them.

TANNER & CO.

BANKERS,

NO. 11 WALL STREET.

☞ The estimated earnings of the Erie Railway for the week ending July 7, 1872, were $353,451; against $396,941 for the corresponding period of 1871—a decrease of $43 490. Total earnings since April 1, 1872, $5,143.223—an increase over the same time in 1871 of $550,462.

☞ The Chicago and Alton Railroad Company have commenced running passenger trains through from Chicago to Jefferson City over their main line from Chicago to Bloomington, thence to Road house over the Jacksonville division, and thence to Jefferson City over the Missouri division of their road.

☞ The Tunkhannock and Montrose (Penn.) Railroad, it is expected, will be completed the beginning of the coming winter. It will open a fruitful dairy and stock country.

Journal of Railroad Law.

RAILROAD COMPANIES—RIGHT OF EMINENT DOMAIN—TAKING OF LAND FOR PASSENGER DEPORTS.

The facts in the late case of the New York and Harlem R. R. Co., *vs.* Kip and others, (46 N. Y., 546,) are fully and clearly stated in the following opinion by—

ALLEN, J.—That the land and premises, the title to which the applicant seeks to acquire by these proceedings, are required for the purposes of the corporation is beyond dispute, as is also the fact that the corporation has been unable to agree for the purchase, by reason of the unwillingness or inability of the owners, the present applicants, to treat for the sale of the same for railroad purposes.

The best and highest evidence of the necessities of the applicant is that, since, 1858, the company has been in the actual use and occupation of the land, at a large annual rent, and at a large expenditure for structures thereon, for purposes connected with the running and operating its railroad. While courts will not allow railroad corporations to avail themselves of the statutory grant of power to take lands *in invitum*, by taking that which they do not require for a *bona fide* purpose, sanctioned by the act of the legislature, when really required in good faith for the purposes of the act, they will not interfere to prevent the taking. (Webb *v.* The Manchester and Leeds R. Co., 4 Mylne and Craig, 116). It is now quite too late to object, that the objects and purposes of railroad corporations are not public, or that the duties devolved upon them, and the services rendered by them, are not of a public character, and in furtherance of public interests.

The public have an interest in the use of a railroad, and in the proper performance of every power within the franchise conferred upon a railroad corporation, and hence every facility needed by such corporation is for public purposes, and whatever is required to enable the corporation to perform its duty to the public, is within the principle which permits a delegation of power to it. The right of eminent domain, which is but a right of the people or government to resume the possession of lands for public use and, subject to which right property is always held, may be delegated to individuals, corporations, or municipalities for like use, and that the construction and operating of a railroad is such a use as justifies a delegation of this right is now beyond question, and is not open for consideration, (*In re* R. & S. R. Co. *v.* Davis, 43 N. Y., 137; Beekman, *v.* Saratoga and Schenectady R. Co., 3 Page, 45.) It is undoubtedly true, as claimed in behalf of the appellants, that the grant of power being in derogation of common rights is not to be extended by application; and that the act conferring the power must be strictly complied with. These principles are elementary. But statutes granting these powers are not to be construed so literally, or so strictly as to defeat the evident purposes of the legislature. They are to receive a reasonably strict and guarded construction, and the powers granted will extend no further than expressly stated, or than is necessary to accomplish the general scope and purpose of the grant. It there remains a doubt as to the extent of the power, after all reasonable intendments in its favor, the doubt should be solved adversely to the claim of power. The purposes for which lands may rightfully be condemned to the uses of a railroad company are not necessarily confined to those needful for the track; but the legislature may confer the right to take lands compulsorily for all needful purposes of the road and works proper and necessary to enable it to perform the public service authorized by its charter. The extent of the power depends upon the terms of the grant. The act under which the power is sought to be exercised by the present applicant, authorises the taking of any such estate which it shall require, "for the purposes of its incorporation, or for the purpose of running or operating its road." (Laws of 1869, Chap 237 § 1.) The language of the act is very general and comprehensive. If lands are required for any of the purposes of the incorporation, or for the purpose of operating and running the road, that is, in the proper enjoyment and exercise of the franchise conferred, and in the performance of the service to the public assume by it, they may be taken *in invitum*. The only limit to the power is the reasonable necessity of the corporation in the discharge of its duty to the public. The right to take lands upon which to erect a manufactory of cars, or dwellings for operatives is not included in the grant. Such purposes are not legitimately and necessarily connected with the management, the running and operating of the railroad. (Eldridge *v.* Smith 34 Vt., 484; Brainerd *v.* Peck, id., 496) Neither can lands be taken for a mere subsidiary or extraordinary purpose. But passenger depots, convenient and proper places for the storing and keeping cars and locomotives when not in use, proper, secure and convenient places having reference to the public interests to be subserved, for the receipt and delivery of freight, and for the safe and secure keeping of property between the time of its receipt and despatch, or after its arrival and discharge, and before its removal by the owner or consignee, are among the acknowledged necessities for the running and operating the railroad, to the proper prosecution of the business in the interests of the public. They may be regarded as indispensable to the accomplishment of the general purposes of the corporation, and the design of the legislative grant.

The purpose and object for which these lands are required are clearly within the scope of the grant. In the Rensselaer and Saratoga Railroad Company *v.* Davis (supra), the application was not for the *bona fide* purposes of the corporation, but for speculative purposes, and in fraud of the act conferring the power. The lands were not wanted for any legitimate purpose authorized by the act; and the court, in the just exercise of the power vested in it, to supervise and control the discretion of corporations in the exercise of statutory powers, and following well established precedents, by its decision prevented the appropriation of individual property to private use. (Flower *v.* London, Brighton and South Coast R. Co., 2 Drew and Sm., 330.) It is claimed that there are other lands in the same vicinity, equally well adapted to the use of the applicant, as those sought to be acquired by these proceedings, and which, possibly might be acquired by purchase from the owners. But such objections to these proceedings are untenable. The location of the buildings of the company is within the discretion of the managers, and courts cannot supervise it. The legislature has committed to the discretion of the corporation the selection of lands for its uses, and if the necessity of lands for such purposes is shown, and the lands sought are suitable, the courts cannot control the exercise of the discretion, or direct which of several plats of ground shall be taken. If the taking of one plat of ground in preference to another could be shown to work great mischief, and result in great loss, which could be prevented by taking another, and the proceeding to take one parcel compulsorily, in preference to another equally well adapted to the use of the company, is from some unworthy or malicious motive, and not in the interests of the public, the court might entertain the question, and in the exercise of a sound discretion withhold its consent to the appropriation. But in this case there are good reasons, resulting from the present occupation of, and the expensive improvements put upon these premises by the appellant, why they should be taken, if suitable and proper, for the purposes required, the owners not claiming that they will sustain any especial injury peculiar to themselves, which would not be sustained by the owners of adjacent lands if taken.

The only other question that need be considered, is the objection that there is no present necessity for these proceedings, for the reason that the applicant is now the lessee of the premises for a term having several years yet unexpired, with the right to occupy them for any of the purposes of the incorporation. The evidence shows, that since the taking of the lease by the applicant, the business of the road has greatly changed in character, as well as increased in amount and volume; that the growth and increasing commerce of the city has made necessary great and material changes in the location of the depots, freight and car houses, and other works and structures of the company; that the protection of the city against fires, as well as the proper security and protection of property intrusted to the corporation, while legitimately in its custody in the prosecution of its authorized business, as well as to enable it to furnish to the public the reasonable and proper facilities which are demanded by the necessities of the appropriate business of the corporation, require that the present temporary and combustible structures on the land should be removed, and larger and more permanent structures take their place, less liable to destruction by fire, and which would furnish a better and more desirable, as well as more safe and secure, deposit for goods while necessarily in its custody, and that such improvements would cost at least $125,000. The making of these improvements are directly in and for the public interests, and not merely a matter of convenience or profit to the corporation. The public cannot reasonably require these expensive and permanent buildings to be put upon lands of which the railroad company is not the owner, and of which it has the use for a period less than ten years, without the privilege of a renewal of the lease, or a right to purchase the premises at the expiration of the term. The value of the materials upon a removal of the buildings would be but trifling compared with the cost and value of the buildings themselves. The necessity is a permanent necessity and the uses

are permanent and not temporary. The right to use the property under the lease is temporary, and does not supply the permanent necessities of the company. A usufructuary, either temporary as to its continuance, or limited in its character, does not give to the applicant the property, the land which it has a right under the statute to acquire for its purposes. Whenever the interest acquired under its lease is not such an interest as the proper running and operating its road requires, there can be no good reason why proceedings may not be taken to acquire the land in place of the term under the lease. The necessity is a present, having respect to the present wants of the public, and the application is based upon the present business of the corporation, and the wants of the public, and not upon any future and contingent or conjectural needs, either of the corporation or the public. The taking of the lease does not create an estoppal against this application. The application is not to condemn the rent, or the right to the rent for the term. It is to acquire the land, subject to the lease, the remedy which has become necessary for the purposes of the corporation.

The order must be affirmed with costs.

San Francisco and St. Louis Railroad.

The Atlantic and Pacific Railroad Company, which proposes to build a road from San Francisco to St. Louis, has inaugurated its work by leasing the Pacific Railroad of Missouri for a period of 999 years, the Atlantic and Pacific guarantying 5 per cent. per annum on double the amount of the present stock of the Pacific of Missouri (which now stands at $3,635,750) for the next two years, and 7 per cent. for the remaining 995 years. The Pacific Railroad of Missouri extends from St. Louis to Kansas City, 283 miles, with a branch from the latter place northward to Atchison, 46 miles. The next step would naturally be a negotiation for the control of the Kansas Pacific, extending from Kansas City to Denver, 638 miles, which would leave between 1,300 and 1,400 miles of road to build from that point to San Francisco. It is reported that San Francisco will donate $10,000,000 toward building this road, and the question of St. Louis donating a similar sum is being agitated in that city.—*Chicago Tribune.*

Toledo, Tiffin and Eastern R. R.

The contract for building the bridge over the Maumee river at this point, for the Toledo, Tiffin and Eastern Railroad, has been let to the Smith Bridge Company of this city. The preliminaries for active work along the entire section of the road through this city and to the State Line, are being arranged, and in a few days we expect to be able to chronicle the fact that ground has been broken on both sides of the river. Iron for this road is being delivered both at Tiffin and this city, and the ensuing three months will witness great activity along the entire line.—*Toledo Blade.*

☞ The new road between Tecumseh and Adrian is all graded with the exception of about two miles, and the work is being pushed along rapidly. A large force is at work north of Adrian, and it is said all the difficulties that existed between that place and Fort Wayne have been overcome.

☞ The track laying on the East St. Louis and Falling Springs railroad is completed as far as Cahokia, and J. W. Conlogue, the contractor, intends to have the whole line finished by the first of August, to Falling Springs, as also the branch to Carondelet.

☞ The Vineyard Sound Railway, a branch of the Old Colony and Newport Railroad, was opened to Wood's Hole on the 18th inst.

☞ Col Thos. A. Scott has appointed Major George N. Smith quartermaster and chief engineer of the Southern Pacific Railroad.

☞ The Missouri, Kansas and Texas railroad is now finished to Limestone Gap, a distance of 555 miles from St. Louis.

☞ The trains are now running regularly from Bridgeport to Bedford Springs, Penn.

NOTICE.

All the Machinery of the New York Railroad Chair Works at private sale. Two Chair Machines; Three Burden Spike Machines; Bolt Heading Machine; Patent Bolt Cutters; Cold Pressed Nut Machine; Heavy Presses, Shears; One 60-horse Engine; One 20-horse do., Boilers, Lathes, &c., &c., at low prices. All in the best order. Apply at factory cor. Morgan and Washington streets, Jersey City, or J. B DAVENPORT, 85 John street, N. Y. (Box 3,041, P. O.) Lists at both places. This is a rare opportunity to buy *good* machinery.

STEEL AND IRON RAILS.

Sole Agents in the United States for

SAMUEL FOX & CO.'S

Bessemer Steel Rails.

RAILROAD SECURITIES NEGOTIATED.

TO RAILROAD CONTRACTORS.

OFFICE OF BALTIMORE SHORT LINE RAILWAY COMPANY,
ATHENS, O., July 4, 1872.

SEALED PROPOSALS WILL BE RECEIVED at this office on the 1ST DAY OF AUGUST, 1872, until 4 o'clock P. M. for the grading and masonry of eighteen sections, averaging about one mile in length, of the Baltimore Short Line Railway, in the counties of Athens and Washington. These sections embrace large quantities of masonry, excavation and embankment, and are worthy of the attention of experienced contractors for heavy work.

The work now offered for competition is the same for which proposals were received in October, 1871, but which was not then let on account of legal impediments. All bids heretofore made will be considered as withdrawn.

Specifications and forms for contract will be in readiness for exhibitors at this office on and after July 23.

The right to reject any and all bids is reserved to the Railway Company.

JOHN WADDLE, President.

CIRCULAR SLIDE VALVE.—TO RAILROAD Managers and other Users of Steam Power.—I will guarantee an addition to the working-power of any locomotive or slide-valve engine of one-third to one-half, at very small cost and no increase of running expenses. Tests desired everywhere. Circulars free.
4t27 J. F. TALLANT, Burlington, Iowa.

OFFICE OF ILLINOIS CENTRAL RAILROAD CO.,
NEW YORK, July 2, 1872.

A DIVIDEND OF FIVE PER CENT., free of Government tax, has been declared by this Company, payable on the first day of August next, to the holders of full-paid shares registered at the close of the thirteenth day of July instant, after which, and until the fifth day of August next, the transfer books will be closed.

SPENCERIAN

DOUBLE ELASTIC

STEEL PENS.

These Pens are of superior English manufacture, and are a nearer approximation to the real **SWAN QUILL** than anything hitherto invented. We have recently added a new pen to the number, of great superiority where fine writing is desirable, which

we designate, **THE QUEEN,** Or, **No. 15.**

The Spencerian Pens are for Sale everywhere, in gross and quarter gross boxes.

☞ A *Sample* Card, containing all the **15 numbers,** securely enclosed, will be sent by mail, on receipt of **25 cents.** Address

IVISON, BLAKEMAN, TAYLOR & CO.,

138 and 140 GRAND STREET, N. Y.

ENGINEER'S FIELD BOOK,

By **C. S. CROSS, Civil Engineer.**

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. **Sent free by mail,** upon receipt of the price. For sal at this office. Price **$1.50.**

HAND'S IMPROVED DUMPING CART.

PATENTED APRIL 4th, 1871.

THE MOST PERFECT YET INVENTED.

Can be dumped by a single motion of one hand while you hold the horse with the other.

The tail-board being attached to the shafts, lifts of its own accord when the cart is dumped, as seen on the right of the engraving. As soon as the load is dumped all you have to do is to start the horse, and the cart will resume its proper position, as seen in the left of the engraving, hook itself and replace the tail-board, without any assistance of the driver whatever. The shafts are attached to the outside of the body, near the hubs, which gives the horse great control over the cart, and prevents the body from playing from side to side as they do when the shafts are pivoted underneath.

Manufactured and for Sale by **WILLIAM & HENRY HAND,**
PLAINFIELD, N. J.

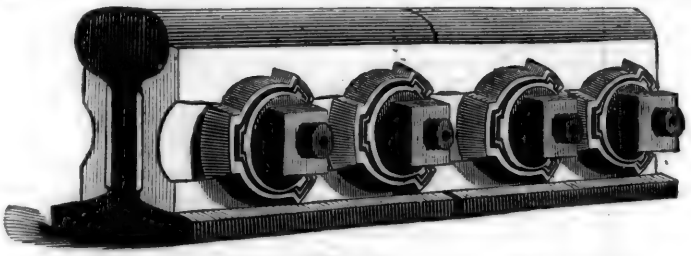
FISHER'S PATENT

Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail,* with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

RAILROAD IRON.

ENGLISH and AMERICAN Railroad Iron for delivery in New York and other markets in the United States and England. For sale by

S. W. HOPKINS & CO.,
71 Broadway, New York

RAILROAD IRON.

THE undersigned agents for the manufacturers, are prepared to contract to deliver best quality **American or Welsh Rails,** and of any required weight and pattern

PERKINS, LIVINGSTON & POST,
31 New St., cor. of Exchange Place, NEW YORK.

RAILROAD IRON.

THE undersigned, agents for the manufacturers are prepared to make **CONTRACTS FOR RAILS** delivered free on board at ports in England, or exship at ports in the United States.

American Railroad Journal.

New York, Saturday, July 27, 1872.

New York, West Side and Chicago Railway.

The officers of this road have executed to the Farmers' Loan and Trust Company of New York a mortgage on the whole line from New York to Buffalo, to secure the payment of the first mortgage bonds of the company to be issued to the amount of $35,000 per mile, and to be appropriated for the construction and equipment of the road. The mortgage has been recorded in this county and in all other counties through which the line of the road passes. The line as described in the mortgage runs up the west shore of the Hudson to Catskill, thence to the Mohawk valley at Schenectady, and thence along the south side of the Mohawk to Utica, thence to Syracuse, Rochester and Buffalo. Mr. Courtney, the president of the company, is now in Europe negotiating the bonds, and has recently telegraphed back that the negotiations are progressing favorably. He has also telegraphed to have the work begun at once. The heaviest and most important piece of work on the whole line will be the tunnel at West Point. It will be three-fourths of a mile in length, and two years will be required for its completion. The contract has been let and the contractor has commenced work. The Ohio and Indiana portions of the New York, West Shore and Chicago Railway have been recently organized in those States. It is now said that similar organizations are to be extended through Iowa and Missouri, and to be connected with a southern route to the Pacific, the whole to be styled the "Continental Railway Company." It is reported that preparations are being made to commence work at Little Falls.—*Syracuse Courier.*

Diamond Rock Drilling.

For penetrating rock no material has yet been found so efficient in proportion to cost as the bort, or black diamond. Leschot was probably the first who struck upon the right method of ultilizing this valuable material for the purpose named. But his appliances were so inadequate to meet the formidable practical difficulties experienced in the attempt to perfect machinery suitable for applying the principle he adopted, viz., the arming of iron drill-points with borts, that it took a long time for the present owners of his patent to supply the deficiencies of his crude mechanism.

The American purchasers were fortunate in selecting Mr. John North, of this city, as the engineer to supply these defects. Through his genius and their own perseverance they have, one by one, surmounted the practical difficulties at first experienced, and have brought out a class of machinery adapted to the various wants of miners, quarrymen, and surveyors which is an honor to American engineering.

The American Diamond Drill Company, now organized and having full control of the patents of Leschot in this country, have demonstrated the value of their machinery in situations calculated to test its merits to the utmost.

At the Hell Gate Tunnel, Hallett's Point, East River, is to be found some of the most obdurate rock ever encountered in a work of such magnitude. Through this intractable material the diamond drill cuts its way with a facility no less remarkable than gratifying to engineers familiar with the tedious process of hand-drilling.

It is evident this system of drilling has only begun its brilliant career, and that, having struggled up through innumerable obstacles, it will hereafter take its place in the front rank of engineering resources for piercing both hard and soft rock.

☞ The Kansas Central Narrow-Gauge Railroad has been opened to Grasshopper Falls, a distance of thirty-six miles, and another section of twenty miles will be completed by the 1st of August.

Madison, Monticello and Griffin Railroad.

We acknowledge the pleasure of a visit from Col. Boynton, the sagacious and energetic president of the above road, now in progress of construction. Col. Boynton speaks cheeringly of the prospect of a friendly connection between the Eastern and Western parts of the State, through Middle Georgia, by means of the road which his company is now constructing. The road may now be considered an established success. Iron for forty miles of the road has been secured, deliverable during the Summer. Twenty miles of road, coming East from Griffin, and two miles, going West from Madison, have been graded. There is cash at command sufficient to grade eighteen miles more; and, unless some accident not now foreseen should prevent, there will be, before the close of the year, forty miles of road completed, ironed and in operation—twenty miles at each end of the road—leaving a gap of only twenty-three miles to be constructed. Of course, on the Griffin line, produce seeking an outlet will not look, with the present gap, for that outlet in this direction, and it would seem highly desirable to parties whose interests are most affected thereby, that the gap should be closed at as early a day as possible.—*Augusta (Ga.) Chronicle.*

Railways in Australia.

Some time since we had occasion to comment upon the great growth of enterprise in Australia, and mentioned that there was a proposal on foot to construct a line of railway side-by side with the telegraph from Adelaide to Port Darwin. We now learn from the South Australian *Register* that the scheme is even more ambitious than we at first imagined it to be, for not only do the projectors contemplate a trunk line from north to south across New Holland, but also propose to construct branches to Melbourne, to Sydney, and to Brisbane, so as to weld each one of the colonies into one. The nominal capital is small, but it is said to include amongst its shareholders influential colonists connected with every one of the producing and commercial interests of South Australia. Its managing director is Mr. R. D. Ross, late of the Commissariat Department, who for years has exhibited a lively interest in the development of the Northern Territory. It is anticipated that the first cost of this great Trans-Continental Railway will not be less than £10,000,000; and to induce English capitalists to engage in the undertaking, a concession of 200,000,000 acres of land, laid out in thirty-five alternate blocks along the proposed course of the line, is asked for. The bulk of territory to be included in this endowment is at present worthless, but with a facile means of communication with the seaboard established, it will all to a greater or less extent become valuable for pastoral purposes.

whilst much of it will be available for the growth of tropical products. There is also a strong probability of gold and other minerals being found in quantity at various points near the route of the railway. The company solicit five years within which to place the scheme upon the London market, and fourteen years beyond that for carrying out the work. They anounce themselves prepared to deposit a moderate sum as a guarantee of *bona fides*, and in the authorized statements of their intentions they point out that the scheme will not only facilitate the conveyance of mails and passengers to and from Europe, but that it will open up the interior of the continent to pastoral occupation, expedite settlement throughout Australia, and render inevitable a federation of the Southern Colonies.—*London Railway News.*

Erie Railway.

To the Stockholders of the Erie Railway Company:

Heretofore the reports of the managers of this company have embraced the operations for the previous fiscal year, ending September 30th, but a special law having been passed by the last Legislature of this State ordering a new election to be held on the second Tuesday of July, instead of the second Tuesday of October as provided by former laws, the directors in surrendering their trust can only give a resume of the history of the operations of the road for a period of nine months, extending from September 30th, 1871, to July 1st, 1872, and even for this, the last two months are partially estimated, the accounts having been settled and closed to the 1st of May only; and it may be proper to remark that whatever credit or discredit may appear from the statements, must attach not to the present managers but to their predecessors in office.

The earnings of the company from all sources, from October 1st, 1871, to May 1st, 1872, (seven months) were as follows:

From freight	$8,142,849 00
" passengers	1,664,005 44
" storage	1,020 58
" telegraph	17,526 51
" rents	84,004 41
" mails	102 515 69
" miscellaneous sources	67,585 26
Earnings Erie Railway Co	$10,079,506 84
Earnings from leased branches	295,092 66
Total earnings	$10,374,599 50
Operat'g expenses Erie Railway	$7,093,971 12
Interest on mortgage debt	1,269,447 25
Rents of railroads, &c.	594,360 55
Taxes	166,808 84
Hire of cars, &c.	360,862 60
Expenses Erie Railway Co.	$9,485 450 36
Operating leased lines.	316,530 57
	9,801,980 93
Surplus	$572,618 57

Comparing the results of these seven months with the corresponding seven months of the previous year we find an increase in earnings of $1,335,197 74 or 14¼ per cent., and a decrease in expenses of operating the road of $160,593 35 or 2¼ per cent. The increase in earnings is largely attributable to the coal transportation, which for a little over five months of the corresponding period of the previous year was interrupted by strikes; on the other hand, during nearly the whole period of seven months embraced in this statement, there was very little done in cattle and oil, on which there was a large decrease in the receipts over the preceding months. Although the decrease in these special freights would be less than the increase on coal during the seven months, it is still enough to show a very gratifying increase on the general business of the road.

The amount expended for construction for the seven months was $2,189,276 40.

The account of receipts and disbursements for the same time may be stated briefly as standing thus:

Earnings from all sources		$10,374,599 50
Operating expenses	$7,410,501 69	
Interest, rents, &c.	2,391,479 24	
Construction	2,189,276 40	
		11,991,257 33
Disbursements over receipts		$1,616,657 83

The earnings from freight and passengers for the seven months compared with corresponding period of previous year were:

	1871.	1872.
Passengers	$1,585,766 51	$1,664,005 44
Freight	6,819,573 65	8,142,849 00

The number of tons of freight in each of the above periods were:

	1871.	1872.
Through, East	530,341	583,135
" West	117,132	151,136
Way, East	1,248,538	1,833,397
" West	394,397	561,722
Total in tons	2,290,408	3,129,391

The number of miles run by freight trains, with earnings and expenses per mile run, are as follows:

	1871.	1872.
Miles run	3,835,403	4,768 973
Tons moved	2 290,408	3,129,391
Earnings	$6,819,573 65	$8,142,849 00
Earnings per mile run	$1.78	$1.71
Earn'gs per ton moved	$2.98	$2.60
Expenses	$5,404,650 53	$5,285,008 48
Average cost per ton moved	$2.36	$1.69
Average cost per mile run	$1.41	$1.11

The capital stock and debt of the company on the 1st of July were as follows:

STOCK.

Common stock	$78,000,000	
Preferred stock	8,536,910	
		$86 536,910

FUNDED DEBT.

1st mort. payable in 1867	$3.000,000	
2d mort. " 1879	4,000 000	
3d mort. " 1883	6,000,000	
4th mort. " 1880	4,441,000	
5th mort. " 1888	926,500	
Buffalo Br. " 1891	182,600	
Sterling Bonds £1,000,000 1875	say 4,844,400	
Consolidated mort. 1920, issued	6,446,000	
Scrip dividend	199,640	
		30,040,140
Total stock and funded debt		$116,577,050

FLOATING DEBT.

Including loans on demand, bills payable, outstanding vouchers and payrolls, and accrued interest on funded debt $6,463,668 20

The loans on demand and time, are covered by collateral securities owned by the company.

Bonds of other railways or undertakings guaranteed by the Erie Railway Company, all bearing seven per cent. interest:

Paterson and Newark R. R., interest on, by endorsement on bonds of which this company owns $250,000.	$500,000
Newburgh and New York R.R., int. on. by endorsement on bonds of which this company owns $166,000.	250,000
Buffalo, Bradford and Pittsburg R. R., interest on ..... by endorsement on bonds of which this company owns $185,000.	564,000
Suspension Bridge and Erie Junction R. R., interest on bonds	1,000,000
Interest on stock ..... by endorsement on shares,	500,000
Pavonia Horse Railroad, interest on... which this company has ceased to pay, and may, perhaps, be released therefrom.	100,000
New York and Boston Express, int. on. all held by this company; the express company being extinct, or about being closed up.	170,000
Boston, Hartford and Erie R.R., int. on. The question as to the company's liability on the guaranty of these bonds is now before the courts. On $1,900,000 of these bonds this company is under special agreement, in addition to the original endorsement on bonds to pay the interest.	5,000,000
Narragansett Steamship Co., interest on by endorsement on bonds. The company has not been called upon to make any payments on account of this guaranty, nor is it likely that they will be.	1,000,000
Newark and Hudson R. R., (not yet completed) interest on ..... by endorsement on bonds. No interest has yet been paid by the company, but they may be called upon to do so.	250,000
Union and Titusville R. R. Co., int. on.. The company has not as yet been called upon to make any payments on account of this guaranty.	500,000

RENTALS.

Paterson and Hudson River, Paterson and Ramapo, and Union Railroads, extending from Jersey City to Suffern, 32 miles, $78,400.

Weehawen Branch—rental based partly upon a per centage per ton per mile, which amounts to, say $30,000 per annum.

Paterson and Newark Railroad	$35,000
Newburgh and New York Railroad	17,500
Montgomery and Erie Railroad	25,000
Goshen and Deckertown Railroad	21,500
Hawley Branch and Jefferson Extension	56,000
Carbondale Branch	140,000
Chemung Railroad (gold)	30,000
Buffalo, New York and Erie Railroad	233,100
Erie and Genesee Valley Railroad (gold)	8,400
Avon, Geneseo and Mount Morris	15 000
Buffalo, Bradford and Pittsburg Railroad	26 530
Suspension Bridge & Erie Junction R.R.	105,000
Rochester and Genesee Valley Railroad	32,100
Cincinnati, Hamilton and Dayton Railroad	180,000
Weehawken property	83,200
Long Dock property, interest and taxes	240,000
General offices, taxes and insurance	75,000

Nearly all the above leased roads are valuable adjuncts to the company's road, and some of them are indispensably necessary to its successful working. The 32 miles of leased roads in New Jersey form the eastern end, and the Buffalo, New York and Erie Railroad the western end of the main line from New York to Buffalo. By the Hawley and Carbondale Branches the large and profitable anthracite coal tonnage is obtained, and by the Suspension Bridge Road Niagara Falls is reached and a connection made with the Canada roads.

All of the above are broad gauge or six feet track.

The railroad of the Barclay Coal Company, with its furniture and equipment, is leased for twenty years by the Towanda Coal Company, which is operated by the Erie, this company paying for the same an annual rental of $30,000, and a royalty of twenty-five cents per ton for the coal. This arrangement is an advantageous one for the company, securing as it does a supply of coal at cheap rates for the use of the locomotives.

The broad gauge track of the Cincinnati, Hamilton and Dayton Railroad Company was leased perpetually by this company at a yearly rental of $180,000, but this arrangement, like many others of a similar character made by the late management, entails an unnecessary and improper loss to this company, and it can probably be terminated, the same not being valid as against this company.

The lines owned, leased and operated by this company are as follows:

	Miles.
Main Line, extending from Jersey City to Dunkirk	459
Included in this distance are the leased roads—Paterson and Hudson River, Paterson and Ramapo and Union Railroads—32 miles in length.	
The Weehawken Branch and Fort Lee Railroad, to the Cattle Yard on the Hudson River—Leased	5
The Northern Railroad of New Jersey: from Jersey City to Piermont; operated by this company at 65 per cent. of the gross earnings	26
The Hackensack and New York Railroad: to Hackensack	7¼
And the Hackensack Extension	13¾
Both operated at 65 per cent. of gross earnings.	
The Paterson and Newark Railroad: extending between these places; Leased	14½
The Piermont Branch: owned by this company	18
The Newburgh and New York Railroad: from Turners to Vail's Gate; Leased	12¾
The Newburgh Branch: Chester to Newburgh; owned by this company	18¾
The Montgomery and Erie: from Montgomery to Goshen; Leased	10½
The Goshen and Deckertown: Goshen to Pine Island, Leased	12
The Hawley Branch: Lackawaxen to Hawley, Leased	16
The Jefferson Railroad: Hawley to Honesdale. Leased	9
The Carbondale Branch: Carbondale to Susquehanna, Leased	36½
The Chemung Railroad: Elmira to Watkins, Leased	17½
The Buffalo, New York and Erie Railroad: Corning to Buffalo, Leased	141½
The Rochester and Genesee Valley Railroad: Rochester to Avon, Leased	18½
The Erie and Genesee Valley Railroad: Dansville to Mount Morris, Leased	14¾
The Avon, Geneseo and Mount Morris: Avon to Mount Morris, Leased	15½
The Buffalo Branch: Hornellsville to Attica, owned by this company	60
The Buffalo, Bradford and Pittsburg Railroad: Carrollton to Alton, Leased	25½
The Suspension Bridge & Erie Junction R.R.: Buffalo Junction to Niagara, Leased	23½

These roads, although operated in most cases without profit, are justified by the fact that they bring profitable business to the main line.

RECAPITULATION.

	Miles.
Length of road, main line	459
Length of branches, owned	96¾
Length of roads, leased	368¼
Length of roads operated at 65 per cent. of gross receipts	46½
	971¼
Second track on same and side tracks	476
All broad gauge or 6 feet track	1,447½
On 64¼ miles, Waverly to Watkins, and from Buffalo to Suspension Bridge, a third rail, forming narrow gauge, is laid, equivalent to single track	32½
Train service is furnished at from 75 to 90 cents per mile run on following roads:	
Warwick Valley, broad gauge	10
Wallkill Valley, "	18
Monticello and Port Jervis Branch, broad gauge	24
Barclay Railroad, narrow gauge	16
	— 68
Total	1,547½

The number of locomotives owned by this company is 489, of which number 95 are passenger, 342 freight and 52 are switching engines. Of the freight engines 20 are condemned and are being re-constructed. 17 locomotives have been added to the equipment since September 30th, 1871.

The number of cars is as follows:

First class passenger cars	208
Second class and emigrant cars	44
Baggage and express cars	72
Milk cars	26
Box freight cars	3,170
Box stock cars	565
Slat stock cars	88
Slat oil cars	321
Oil tank cars	442
Flat cars	2,116
Coal cars (8-wheel)	1,569
Coal cars (4-wheel)	1,570
Cabooses	204
Derrick and tool cars	27
Total number of cars owned by the Co	10,422
Cars leased of the Barcley R.R. (4-wheel coal)	388
Cars hired of the E. & A. S. C. Co. (1st class pass.)	33
Cars hired of the Union Car Co. (box freight)	500
" " Jefferson Car Co. (4-wheel coal)	1,500
Total	12,793

Since September 30th 1871, the following cars have been added to the equipment, viz:—12 first-class passenger cars, 350 box freight, 545 flat, 487 coal and 16 cabooses.

The contracts between this company and the Sleeping Coach Company provides that the latter shall furnish Sleeping and Drawing Room Coaches complete, with the furniture and fixtures properly adapted to their use, and necessary attendants, and shall receive for their use four cents for each mile run, and the additional amount paid by passenger occupying the same, over and above the rates of fare charged on the regular passenger coaches of the railway company.

The Union Car Company furnish 500 box freight cars suitable for transportation of grain in bulk at one cent per car per mile run, the railway company to keep the same in repair and guarantee a minimum monthly service of 2,500 miles per car.

The Jefferson Car Company furnishes the railway company with 1,500 four-wheel "dump" or coal cars at half a cent a car per mile for carrying coal, the railway company to keep the same in repair and guarantee a minimun monthly service of 1,400 miles per car.

Tabular statements, giving in detail the items of earnings and expenses for seven months, also details of construction, liabilities and assets of the company, and also a statement of earnings and expenses for nine months ending July 1st, are hereto appended. This last table, although estimated in part, may be regarded as substantially correct, and exhibits a gratifying result in the largely increased earnings and diminished expenses of the road.

Although something has been done in the way of reform, and measures are in progress which, if carried out, will do much more towards placing the affairs of the company on a firmer basis, yet the existence of many contracts which involve loss to the company is a subject of regret; some of these in all probability can be abrogated, and others modified so as not to be so onerous in their requirements.

But it is in the matter of additional facilities for increasing business, securing remunerative rates and economical operations, that the company must more particularly look to secure satisfactory returns on their investment.

The double tracking of portions of the road, the introduction of the third rail to secure narrow gauge connections, and steel rails in place of iron for renewals, stand prominently amongst the needed requirements. The report of the vice-president, recently submitted to the board, gives details and estimates of the expenses of this work, a copy of which report is hereto annexed.

Respectfully submitted,

JOHN A. DIX, *President.*

GENERAL OFFICE ERIE Co.,
New York, *July* 9, 1872.

Narrow Gauge Railways.

The Chief Engineer of the Western Maryland Railroad has made a long report on the gauge question to his Company, in which he deals largely with facts and figures. After treating of the different phases of the question at length, he summarizes his conclusions as follows:

They tell us that by constructing a 3 ft. road 100 miles long, destined to do a large coal tonnage—instead of the 4 ft. 8½ in. gauge,—the saving would be sufficient in 10½ years, if compounded at 7 per cent., to repay all but $6,200 per mile of the entire cost of an expensively constructed railway; or, taking the most moderate view of it, that in this period of time, after making even unreasonable allowances for contingencies, one-half of the total cost of the road and its furniture will be wiped out.

That from an increase of paying weight, and by reason of the decrease of unproductive rolling stock weight, the 3 ft. road can earn against 26 4-10 grades $308 880 more each year for its gross revenue in coal transportation alone; further, that on maximum grades of 40 ft. per mile it would have an annual surplus of net earnings amounting to $238,680; again, that sharp curvature, so destructive to the rolling stock of standard gauges, can be traversed without injurious effect on the 3 ft. roads.

That the cost of outfit is about 12 per cent. less, and about half the weight for the same business.

That the speed which is now maintained in our regular railway traffic can be fully adhered to on the 3 ft. lines, and that the passenger coaches on these roads have equal stability, and, in certain cases, more safety, than those of the standard.

That the cost of operating is about 20 per cent. in favor of narrower lines.

That the net revenues of the wide road may reach 7 per cent., while those of the 3 ft. as surely promise 20 per cent.,—which demonstrates that charges for the transportation can be reduced to the public on the 3 ft. road.

The 3 ft. branches can be built advantageously to connect with the standard roads, even where transhipment is unavoidable; that such transhipment, after the arrangements are once consummated, can be made at 6 to 10 cents per ton; and, further, that our present trunk lines should see it to be for their interest to lay down a third rail for the accommodation of the host of 3 ft. branches that would forthwith seek a union with them.

☞ At a meeting of the Middlesex Central Railroad Company in Boston, on the 20th inst., the following gentlemen were elected directors: C. W. Bellows, Andrew Robbins, Gardner Prouty, George Keyes, Thomas Stiles, and Henry Wood. At a subsequent meeting of the directors, C. W. Bellows of Pepperell was elected President, and George Keyes of Concord, Treasurer. The directors were authorized to contract with the Boston and Lowell Railroad for the construction of a portion of the road between Lexington and Concord; also to contract with N. C. Munson for building for a portion of the road in the same section.

☞ The city council of Dover, N. H., has voted unanimously to subscribe for bonds of the Portsmouth and Dover Railroad to the amount of $225 000. The Mayor is to make the subscription as soon as the City Solicitor certifies the lease to the Eastern Railroad to be correctly drawn.

Commerce of New York.

The foreign imports at New York for the month of June, 1871 and 1872, are officially stated as follows:

	1871.	1872.
Entered for consumpt'n.	$14,778,135	$9,769,216
Do. for warehousing	13,382,176	17,913,638
Free goods	2,086,100	2,926,874
Specie and bullion	1,352,006	43,724
Total entered at port	$31,598,417	$30,653,552
Withdrawn fr. wareh'use	8,711,237	7,584,971

The foreign imports at New York for the six months from January 1, were:

	1871.	1872.
Entered for consumpt'n.	$103,644,062	$108,754,644
Do. for warehousing	77,625,103	106,288,001
Free goods	15,822,807	16,960,413
Specie and bullion	4,742,052	777,578
Total entered at port	$201,834,024	$232,780,636
Withdrawn fr. wareh'se.	63,198,325	64,053,290

The foreign imports at New York for the fiscal year ending June 30, were:

	1871.	1872.
Entered for consumpt'n.	$194,498,898	$212,397,830
Do. for warehousing	131,133,036	171,011,048
Free goods	23,097,561	30,015,900
Specie and bullion	4,443,737	2,384,134
Total entered at port	$358,173,232	$415,808,912
Withdrawn fr. wareh'se	114,423,936	126,516,331

The following is a description of imports for the fiscal year ending June 30:

	1871.	1872.
Dry goods	$126,123,210	$139,903,902
Gen. merchandise	222,606,285	273,520,876
Specie and bullion	9,443,737	2,384,134
Total imports	$358,173,232	$415,808,912

The revenue from customs at New York for the fiscal year ending June 30, were:

	1871.	1872.
In June	$10,092,909 95	$6,943,232 70
Add 5 months	63,599,197 98	66,879,477 06
Six months	$73,692,107 93	$73,822,709 76
Fiscal year	141,421,292 68	147,900,891 51

The exports from New York to foreign ports in the month of June, were:

	1871.	1872.
Domestic produce	$17,432,767	$19,048,152
Foreign free goods	71,712	97,264
Do. dutiable	890,659	946,144
Specie and bullion	8,604,738	12,538,202
Total exports	$26,999,876	$32,629,762
Do. exclusive of specie.	18,395,138	20,091,560

The exports from New York to foreign ports for six months from January 1, were:

	1871.	1872.
Domestic produce	$110,265,583	$100,442,308
Foreign free goods	533,100	679,087
Do. dutiable	4,263,264	5,337,088
Specie and bullion	41,554,622	37,114,899
Total exports	$156,616,569	$143,573,382
Do. exclusive of specie.	115,061,947	106,458,483

The exports from New York to foreign ports for the fiscal year ending June 30, were:

	1871.	1872.
Domestic produce	$213,306,021	$215,729,972
Foreign free goods	611,328	1,279,250
Do. dutiable	8,799,617	9,053,551
Specie and bullion	82,905,497	59,425,823
Total exports	$305,622,363	$285,488,596
Do. exclusive of specie.	222,716,866	226,062,773

☞ Mr. James B. Hodgkin has been elected Treasurer of the Erie Railway Company.

Narrow Gauge Railways.

The Kansas City *Times* gives the appended tabular statements, showing the relative cost of broad and narrow-gauge railways:

FOR FOUR FEET EIGHT (OR TEN) INCH GAUGE—RAIL FIFTY-FIVE POUNDS TO THE YARD.

Right of way, grading, etc., average per mile	$8,500
Bridging and masonry	3,500
87 tons, rail, at $70 per ton	6,090
400 rail splices, $1 each	400
5500 lbs. spikes at 5c	275
2640 cross-ties at 30c	792
Laying track	500
Total cost for one mile	$20,057

FOR THREE FEET GAUGE—RAIL TWENTY-FIVE POUNDS TO THE YARD.

Right of way, grading, etc., average per mile	$4,500
Bridging and masonry	1,200
40 tons rails, at $65 per ton	3,000
330 rail splices at 50c	165
3,520 lbs. spikes at 6c	211
3,520 cross-ties at 20c	704
Laying track	300
Total cost for one mile	$10,080
Balance in favor of narrow gauge	$9,970

Thus, then, assuming, for example, the construction of a line of road one hundred miles in length, we have:

Cost of narrow-gauge 100 miles	$1,608,000
Cost of broad gauge 100 miles	2,005,000
Difference in favor narrow-gauge	$997,700
Ten per cent. interest on the $997,700 saved in construction of narrow-gauge	99 770

The narrow-gauge will do as much business as the broad, for either would do all the business of the country through which it runs.

From tables which are too voluminous to reproduce here, it is shown that the average cost of operating broad-gauge railroads, under the most favorable circumstances, is always upwards of sixty per cent. of the gross earnings, while the narrow-gauge as far as it has been tested, has shown an average cost of operating not exceeding forty-two per cent. of the gross earnings.

Estimating the yearly earnings of each road at six thousand dollars per mile, we have:

Annual cost of operating the broad gauge line 100 miles long	$360,000
Annual cost of narrow-gauge, same length	252,000
Difference in favor of narrow-gauge	$108,000

This gives us, at the end of the year's operation of the road, the following gratifying balance in favor of the narrow-gauge:

Balance in favor of narrow-gauge in construction	$997,700
Interest on same at ten per cent. per annum	99,770
Balance in favor of narrow-gauge in cost of operating	108,000
Total	$1,205,470

There are many points, however, to be considered in favor of the broad-gauge system, but they apply solely to great trunk lines, and particularly to the passenger-carrying part of the traffic. It may be impossible to obtain the comfort, roominess and elegance in narrow-gauge passenger coaches attainable in those of the broad-gauge. Stock cars of the broad-gauge are undoubtedly superior to those of the narrow gauge where cattle have to be carried long distances in them. As for box cars for carrying the generality of freight, there can be but little difference, except in capacity, between the cars of the respective gauges. But our argument in favor of narrow-gauges must be taken as referring to the construction and operation of feeders to trunk lines, such as the road between Memphis and Kansas City. We believe that the superior cheapness of construction and advantages of operation which pertain to the narrow-gauge system, will far more than compensate for the inconvenience and cost of breaking bulk of freights at the points of trans-shipment from the narrow-gauge feeders to the broad gauge trunk lines.

Erie Railway,

To the President and Directors of the Erie Railway Company:

GENTLEMEN: In compliance with a resolution of the Executive Committee, passed April 24th, 1872, I procured the services of a competent and practical engineer to make the necessary surveys and estimate of the cost of "providing 'third rails' over the whole line of the road, completion of double track, the reduction of excessive grades where practicable, the substitution of iron bridges for wood, the completion of the necessary depots, increased machine shops, erection of grain elevators, and such narrow-gauge rolling stock as will be necessary for the economical transaction of the business of this road," and submit the following as the result:

The cost and expense of laying a "third rail," on double track and sidings between Jersey City and Buffalo will be, if of steel rails		$5,551,800
Cost of above, if of iron rails		4,890,150
The cost and expense of laying "third rail," on double track and sidings between Hornellsville and Salamanca will be, if of steel rails		1,161,000
Cost of above, if of iron rails		1,025,700
Cost and expense of laying "third rail," on single track and sidings between Salamanca and Dunkirk will be, if of steel rails		332,150
Cost of above, if of iron rails		291,200
The cost of completing double track on Delaware Division, including grading and masonry, superstructure, laying and ballasting, and iron bridges, with steel rails will be		2,297,225
Cost of above, if of iron rails		2,201,015
The cost of completing double track on Susquehanna Division, as above, if of steel rails		654,025
If of iron rails		602,050
The cost of completing double track on Western Division, Hornellsville to Salamanca, steel rails		1,837,914
Iron rails		1,702,614
The cost of completing double track on Buffalo Division, Hornellsville to Buffalo, if of steel rails		1,998,540
Iron rails		1,824,300
	Steel rails	$13,832,654
	Iron rails	$12,540,029
Additional buildings required	$1,149,000	
Additional equipment, engines and cars	5,700,000	
		6,849,000
	Steel rails	$20,681,654
	Iron rails	$19,389,029

It will be seen from the foregoing report, that to complete the double track on the Delaware Division, without the third rail, will cost, if of steel $2,297,225, if of iron $2,201,015.

This I regard indispensable to any increase of the business of the road. The delays incident to throwing so large a business upon a single track renders anything like regular time impossible. The freight trains are obliged constantly to take the sidings for the fast trains to make their time. No time should be lost in completing the double track.

To complete the double track on the Susquehanna Division, without third rail, will cost, if of steel rails, $654,025, if of iron rails, $602,050, making the cost to complete the double track from New York to Hornellsville, if of steel rails, $2,951,

250, if of iron $2,803,065. As the cost of completing this double track to Hornellsville is so small, after the completion of the Delaware Division, I recommend this as very desirable. This done, and with two routes to Buffalo from Corning, and with the Salamanca and Buffalo business divided at Hornellsville, the road could be very well worked without double tracking the rest of the road.

Though I regard the double tracking from Hornellsville to Buffalo and from Hornellsville to Salamanca as important, I do not regard it as indispensable.

To lay third rail from Jersey City to Buffalo—on double track to Hornellsville—and track as now laid from Hornellsville, including completion of double track to Delaware and Susquehanna Divisions, will cost, if of steel, $7,965,865, if of iron, $7,232,866. Add to this, third rail on track as now from Hornellsville to Salamanca will make, if of steel, $8,653,315, if of iron, $7,852,665. Unless the Atlantic and Great Western narrow their gauge the third rail to Salamanca is not recommended.

The double track to Hornellsville, and the third rail to Buffalo, as soon as practicable, is of unquestionable importance. As it will take about one year to do this work no time should be lost in its prosecution.

The other items of cost in the report of Mr. Brown can be postponed or modified to meet the finances of the company.

The details of the estimate will be found in the annexed report of R. N. Brown, Esq., to which I beg leave to refer.

Respectfully submitted,

A. S. DIVEN, *Vice-Pres't.*

The Coming New Era in Railroads.

From all appearances ten years will not elapse before the Pacific Railroad will be multiform. East of the Rocky Mountains we can already count two through railroads completed and in use, the Union Pacific and the Kansas Pacific, and a third, the Northern Pacific, about half built, while a swarm of others are pushing westward vigorously, among them the Atchison and Pike's Peak, from Atchison to Colorado, the Leavenworth and Denver Narrow Gauge, the Texas, or Southern Pacific, the Atlantic and Pacific, and several more bound from the Missouri border to New Mexico. It is idle to go into details, as these projects increase in number constantly, and the prospect is quite fair for at least a score of main lines of railway westward to the Rocky Mountains.

If we look at a good railway map of the United States we shall find that the number of east and west lines this side of the Mississippi is so complicated as to be difficult to estimate. West of the great river they are increasing in the same way. Iowa has at least four, Missouri has three, and so it is all through that country. Before the proposed Canadian Pacific Railway can get half way through to British Columbia the United States will have a main line of railway from ocean to ocean, threading every defile of the Rocky Mountains.

It is already apparent that the competition for this through business is destined to become as formidable as that for the through trade and travel between the Northwest and the seaboard. If all these lines make their terminus at San Francisco that city will become one of the greatest commercial centres in the world. But it is already clear that some of the most powerful lines will not do so. The Northern Pacific certainly will not. The terminus of this line is Puget Sound, and the ocean transit from thence to Asia is less than from San Francisco.

From Puget Sound to the mouth of the Amoor river is about four thousand five hundred miles; to Hakodadi, Japan, direct, four thousand eight hundred miles, and to Shanghai, China, five thousand seven hundred and sixteen miles. From Hong Kong to San Francisco is six thousand two hundred miles. The distances to Japan are about the same by both routes. But to all the northern parts of Asia the Puget Sound route is much the shortest. It is known to be the determination of the Northern Pacific Railway Company to create a great commercial port on Puget Sound, and to strike out boldly in a competition for the Pacific trade.

In like manner it seems to be altogether unlikely that the Southern Pacific Railway will depend upon San Francisco much, as the trade of that city will be monopolized by several more direct routes. The obvious policy of the Southern Pacific Company is to establish a terminus at San Diego, and there, in a region never troubled with ice, build up a formidable mart of commerce. In fact, the success of the pioneer line of Pacific Railway has developed the truly American talent for such vast enterprises, and our countrymen will never rest until they shall have covered the whole Western wilderness with a complete net work of rails like that which now covers the region north of the Ohio river. How much capital will have to be invested in these prodigious undertakings is difficult even to conjecture; but what appears to be clear is that the field now opened before us in this matter of railway construction is equal in magnitude to that revealed to our astonished vision by the gold discoveries.

These enormous social movements create so much employment for both capital and labor as to produce corresponding speculative activity and the enhancement of prices and values. The railway movement has already absorbed so much money in America that many able thinkers have longed for a rest in order that more capital might be embarked in other forms of business. But there seems to be no possibility of arresting the progress of the movement now that it has entered upon a new field, eclipsing all its former achievements in magnitude and grandeur. The problem now before us is to construct a main through line of railway from ocean to ocean, from every leading point on the Atlantic seaboard, and touching all the important districts of the interior. Not only this but every leading city on the lakes and the Western rivers must be accommodated perfectly before the work of construction can halt.—*Philadelphia North American.*

☞ The Cumberland *News* says that the Cumberland and Pennsylvania Railroad, connecting with the Bedford and Bridgeport Railroad, will soon be completed. The distance from Cumberland to Bridgeport is twelve miles, and from Bridgeport to Bedford twenty miles, making thirty-two miles from Cumberland to Bedford. The twenty is now in use. The part to be built by the Cumberland and Pennsylvania Railroad (running to the State line, some six miles from Cumberland), is nearly finished, which leaves about six miles to be completed between the State line and Bridgeport. The road will run parallel with the Pittsburgh and Connellsville Railroad; the grade will be easy, and when a good force is put to work the labor can be speedily done.

☞ The Kent County, Md., Railroad is now completed from Chestertown to Fairlee, with the exception of the ballasting on a part of it, and regular trains will be run about the 1st of August. A large force is now employed in making the branch road from Chestertown to the wharf, and it will be completed and trains running upon it by the 25th of the present month.

☞ The work on the Williamstown, N. J., railroad is advancing quite rapidly towards completion. It connects with the Camden and Atlantic railroad at Atco station, and also with the West Jersey railroad at Glassboro. It will be in running order during the coming fall.

TWENTY PER CENT. INVESTMENT.

THE AMERICAN BRIDGE COMPANY,

OF CHICAGO, ILL.

L. B. BOOMER, of Chicago, President.

(Organized August 1, 1870.

Authorized Capital Stock, - - - $1,000,000.

The whole amount of the authorized Capital Stock of this Company not having been issued, the balance thereof will be issued to subscribers at par, payments for same to be made in four instalments of 25 per cent. each, viz:

25 per cent.	- -	July	15, 1872.
25 "	- -	August	1, 1872.
25 "	- -	September	1, 1872.
25 "	- -	October	1, 1872.

The Subscription Books now open at the office of the undersigned will be closed as soon as the new stock is fully subscribed.

The total amount of stock issued at this time is **$414,700**, and on this basis the Company shows a present surplus of **$136,280 97**, and is now doing a flourishing business. One thousand men are constantly employed in their extensive works, and they now have on hand **$1,250,000** of work for various Railroads in the United States, among which may be mentioned the

CHICAGO, R. I. & PACIFIC,
CHICAGO & N. WESTERN,
MICH. CENTRAL,
MISSOURI PACIFIC,
ATLANTIC & PACIFIC, &c.

and the Company is now offered work to the amount of over **$6,000,000**, including some of the largest bridges ever built in this country, to accept of which and further business necessitates a larger working capital, as immense amounts of material have to be kept constantly on hand, and the Company are frequently obliged to receive in part payment for their work Railroad and other Bonds, which are perfectly good securities, but not always immediately marketable.

The career of the American Bridge Company, though brief, has already fully demonstrated the profitableness of the enterprise. The Company has constructed, since its organization and up to the 31st of December, 1871, a total of 38,137 feet of bridges, 18 turning tables, and 16 iron roofs, and pneumatic and screw pile substructures, costing **$3,400,000**, and have facilities for the construction of pneumatic piles unsurpassed by any company in the country, and a capacity for the construction of at least 150 feet of Bridges for every working day in the year.

The Iron Railroad and Highway Bridge at Leavenworth, of three spans of 340 feet each, and the Union Pacific Bridge across the Missouri River, of eleven spans of 250 feet each, were constructed by this Company.

The net profit arising from this business, as shown by the books of the Company, up to the 31st March, 1872, was the sum of **$373,483 14**, or at the rate of **$224,089 28** *per annum*, being over **50** *per cent.* upon the capital stock then outstanding. With the proposed new structures, machinery, &c., the Company will have much greater capacity, and the proceeds of the increased issue of stock will enable them to buy material for cash, thereby making a saving of from **$50,000** to **$75,000** per year.

The Company can undoubtedly, on above basis, make dividends of from **20** to **25** *per cent. per annum* on the full amount of capital, **$1,000,000**, with a fair prospect of a considerable increase.

The undersigned are prepared to give to those inquiring the fullest details and entire satisfaction regarding the reliability of the Company's statements, and the unquestioned integrity and ability of its officers.

We confidently commend to capitalists the above as an investment worthy their attention.

MARVIN BROS.

BANKERS,

American Bridge Company.

Bridges are an indispensable element of intercommunication. Their complete history would as significantly as anything else, mark the progress of the world in its industrial or other development. They are not in all respects, as essential as common roads, but they are only of secondary importance. When the first bridge was constructed it would be impossible to know; yet while we do know for a certainty, that they were sparingly used in the early history of the world, it is by no means certain that they were not, in a rude form, at least, known to the earliest ages. The Ninevean, Babylonian and Egyptian empires are now thought to be the earliest in time, certainly they are the earliest that we have any permanent records of. As early certainly as this, roads and bridges, such as would answer the limited purposes for which they would be required, must have been established.

A thorough investigation of this subject would be curious as well as interesting, but we have no space for so agreeable an adventure now. It is manifest, however, that as soon as the world became at all densely populated in any part of it, migration and dispersion would become a necessity; and as in these migrations, voluntary or forced, and sometimes they were of the latter character, deep and rapid streams would require to be passed, some temporary structure was a necessity. As nations became permanent and population numerous, these temporary structures would be changed to permanent ones. This is the history of all new countries. The ancient world was not wanting in massive structures of this kind, but they were not common. It is in later ages that we must look for their considerable outgrowth. The world is much indebted to military enterprise for a considerable development of the system. Their importance and that of efficient military roads was appreciated in the early periods of the Greek and Roman Empires, and at that time considerable attention was bestowed upon them. The military enterprises of all ages since, until within the last two or three hundred years, have been the inspiration to the construction of roads and bridges.

The introduction of commerce, which in anything like its present phrases or characteristics is the work of the last two hundred years. The gradual extension of trade and commerce laid the foundation for conveniencies of this character, and since they have multiplied apace in all civilized countries. The introduction of the modern railway inaugurated a new era in the system. Railroads cannot ford streams, nor run around them. They must go across them. Bridges are, therefore, a special necessity for them. As, therefore, railroads have multiplied, bridges have multiplied likewise, and so far as large portions of the United States are concerned, the country has become a complete net-work of roads and bridges.

So vast has the business become, so necessary is it that the work should be done rapidly and well, it is not at all surprising that the construction of bridges has become a special branch of business. The ingenuity of inventors and others has been taxed to the utmost to invent new methods and improvements, and so complete and thorough have been these investigations and developments, that there is now probably little left to be discovered. The general principles are deemed well settled, and details are elaborated to a degree rendering further expectations in that direction apparently groundless. Until quite recently, the building of bridges has been accomplished generally by individual or municipal effort—but the time has fully come when not only has their construction been reduced to an exact science, they are and must continue to be constructed with certainty and rapidity. The business has become too large for individual efforts alone, and corporate enterprises must supply their rapid multiplication.

Not many companies of this character are yet in existence, yet there are some. Conspicuously among them is the AMERICAN BRIDGE COMPANY of Chicago. The business of this company has developed into magnificent proportions, and the establishment is unique and comprehensive, surpassing anything else of like character, we imagine, in the world. The company is formed under the General Manufacturing Laws of Illinois, with Mr. L. B. Boomer as president, and the usual number of other officers. The company springs out of the enterprise and business of Mr. Boomer, who, with Mr. A. B. Stone, commenced the special business of bridge building at Chicago in 1850. In 1857, Mr. Stone retired, Mr. Broomer continuing very successful till 1870, when the vast increase of business, and the necessity for greatly enlarged facilities led to the formation of the present company.

The capital of the company was fixed at $500,000, and remained such till the 25th of May of the present year, when in consequence of the pressure of the demand upon them they resolved to increase their capital stock to $1,000,000, which is now being done. The company is in very able hands, has proved a most extraordinary success in a business point of view, and it is reasonable to suppose that the required amount of capital will be readily obtained.

The company have published a very interesting pamphlet, giving a full and detailed history of the enterprise and its extraordinary success. It invites and will amply repay examination. Messrs MARVIN BROS., the well-known bankers, of Exchange Place, are the financial agents in this market, of the company, and will furnish the pamphlet and other needed information to all parties interested.

Our Chicago friends came to our market for an increase of their stock for special as well as general reasons. The fire has crippled their resources, and they need and will receive the help the wealthy east can afford them. We have not space to go into details about their business, and for the reason already suggested it is unnecessary. It is enough to say that the buildings and their grounds cover and occupy thirty acres in the suburbs of Chicago, admirably located in the southwestern part of the city, in connection with the great railway lines.

Their buildings, machinery and conveniences are as complete as they well could be, but more are demanded by the increase of business. Fortunately for them and the whole West, they were entirely beyond the reach of the late fire and are therefore unaffected by it.

The entire cash investments of the company up to this time reaches the large aggregate of $724,406 42 mostly in buildings, machinery and materials. Thus far the company have constructed 38,137 feet of bridges, eighteen turning tables and sixteen iron roofs and pneumatic and screw-pile structures costing $3,400,000. The profits of the company are large, and will not fail to secure attention.

We repeat this is an enterprise of vast importance. It is permanent in character; new bridges are constantly wanted, and old ones need to be repaired or renewed. The business is one that does not well admit of private competition. The field occupied by this company is the best on this continent. The gentlemen in charge are thoroughly experienced and capable. They are endorsed by the best railway talent in this country. The stock cannot therefore fail to be both safe and remunerative.

Messrs. MARVIN BROS., No. 49 Exchange Place, are the New York agents. Their names alone are an ample guarantee of good faith. Call and see them, get the pamphlet of the company and be convinced as we are.

Kansas City and Fort Smith R. R.

We learn that arrangements were made with Mr. Condict, as representative of certain moneyed parties at New York, whereby the building of the above road at an early day has been definitely secured. We hope this may be true. An election was held at the same time for officers, with the following result: President, J. N. Sarber; secretary, John Carnall; treasurer, C. B. Neal. We also learn that as soon as arrangements can be entered into with other roads, as to connections north, south and west, our western counties will be asked for aid, to be given only when the road is an accomplished fact.—*Fort Smith New Era.*

New York Housatonic and Northern R. R.

GEORGE W. MEAD, Esq., president of the New York, Housatonic and Northern Railroad Company from its organization, has found himself constrained by the demands of his private business and the desire for relaxation from so great an amount of labor, to press the acceptance of his resignation upon the board of this company. He is succeeded by LEWIS D. RUCKER, Esq., who is well known to the community as the late experienced and efficient superintendent of the Erie Railway.

☞ The Commissioner's Court, of St. Mary's Co., Md., have pledged that county to subscribe the whole State donation of $163,000 to the stock of the Washington City and Point Lookout Railroad, in preference to the old Southern Maryland Railroad. In a card to the public, Col. Suit states that his company is now determined to build the road direct from Washington city to Point Lookout, and cautions it against any adverse reports.

☞ The Branch to Chester river of the Kent County railroad is being pushed forward with energy, and will be completed some time next week. The track for about one-fourth of the distance is already laid, and but little grading on the unfinished portion remains to be done.

☞ The track of the Sugar River road is now laid beyond the east line of Claremont, and the last bridge is nearly completed.

☞ The Metropolitan Branch of the Baltimore and Ohio Railroad has been completed to Rockville, in Montgomery Co., Md.
